Sinophone Southeast Asia .2021-09-06 This volume explores the diverse linguistic landscape of Southeast Asia's Chinese communities. Based on archival research and previously unpublished linguistic fieldwork, it unearths a wide variety of language histories, linguistic practices, and trajectories of words. The localized and often marginalized voices we bring to the spotlight are quickly disappearing in the wake of standardization and homogenization, yet they tell a story that is uniquely Southeast Asian in its rich hybridity. Humor in Advertising Marc G. Weinberger, Charles S. Gulas, Charles R. Taylor. 2021-06-21 Humor has long been one of the most common approaches used in advertising. Whether in a big televised event like the Super Bowl or in new forms of digital advertising, everyone is exposed to funny ads, some of which both entertain the audience and help sell a product. Yet, the use of humor in advertising is complex; clearly not all humorous ads are successful. This comprehensive volume both summarizes the cumulative state of knowledge on humor in advertising and provides new cutting-edge research on key topics such as humor's use in conjunction with emotional and sexual appeals, its use in digital advertising, and issues related to gender and cross-cultural applicability. Special emphasis is placed on defining humorous advertising and types of humor used, as well as outlining what conditions work for advertisers. The chapters examine humor in advertising and add insights on several cutting-edge issues in this stream of research. An overview article summarizing the overall body of literature accumulated over 50 years of research on humorous advertising defines types of humorous appeals. The degree to which humor is effective and the boundary conditions associated with when and how it works best in advertising is discussed. New research articles further contribute to cumulative knowledge by exploring the interaction of humor with other issues and techniques such as whether it travels internationally, gender issues, its use in conjunction with emotional and sexual appeals, and its

presence in the digital contexts. The book concludes with an in-depth look at the evolution of humorous appeals over the oldest traditional advertising medium—outdoor advertising. The chapters in this book were originally published in International Journal of Advertising. The Economics of the Publishing and Information Industries Albert N. Greco.2014-12-05 Books, scholarly journals, business information, and professional information play a pivotal role in the political, social, economic, scientific, and intellectual life of nations. The Economics of the Publishing and Information Industries utilizes substantive historical, business, consumer, economic, sociological, technological, and quantitative and qualitative methodologies to understand the people, trends, strengths, opportunities, and threats the publishing industry and the financial service sector have faced in recent years. Various developments, both economic and demographic, contributed to the circumstances influencing the financial service sector's investment in the publishing and information industries. This volume identifies and analyzes those developments, clearly laying out the forces that drove the marriage between the spheres of publishing and finance. This book offers insight and analysis that will appeal to those across a wide variety of fields and occupations, including those in financial service firms, instructors and students in business, communications, finance, or economics programs, business and financial reporters, regulators, private investors, and academic and major public research libraries.

The Multiple Intelligences of Reading and Writing: Making the Words Come Alive Thomas Armstrong.2003-04-15 We normally think of reading and writing as skills that are a part of linguistic intelligence. In *The Multiple Intelligences of Reading and Writing: Making the Words Come Alive*, Thomas Armstrong shows how involving the other seven intelligences--logical-mathematical, spatial, bodily-kinesthetic, musical, interpersonal, intrapersonal, and naturalistic--will help students acquire reading and writing skills, especially those students who are not particularly strong in linguistic intelligence. *The Multiple Intelligences of Reading and Writing* appeals to all educators who work with reading and writing skills, from the preschool teacher leading the class in phonemic awareness activities to the post-graduate professor helping students examine kinesthetic imagery in Shakespeare's plays. The book combines Howard Gardner's MI theory and recent brain research on reading and writing with historical, anthropological, biographical, and psychological perspectives on literacy. Armstrong pulls the research together to show you how to engage students by infusing the study of words with imagery, logic, oral language, physical activity, emotion, music, social involvement, and nature experiences. Armstrong provides hundreds of ideas, strategies, tips, and resources for teaching everything from grammar and spelling to word decoding and reading comprehension. His strategic approach synthesizes the best reading and writing methods for application in preK-12 classrooms, literacy

programs, speech and language pathology groups, one-to-one tutoring sessions, and all other settings where words are the focus of learning. Armstrong shows you how to empower your students with literacy skills for life. Note: This product listing is for the Adobe Acrobat (PDF) version of the book.
