Cutscores Michael J. Zieky, Marianne Perie, Samuel A. Livingston. 2008 This is a how-to-it manual aimed at people who have to plan and run a cutscore study for educational or occupational tests. The focus is on practical advice rather than on theory or reviews of research.

Treated Diamonds James E. Shigley. 2008 Most of the material presented here was originally published in *Gems & Gemology* as articles and lab notes (short reports from the GIA Laboratory, formerly called the Gem Trade Laboratory) or as *Gem News/Gem News International* items between the years 1938 and 2007. Also included are summaries of presentations at GIA's 2006 International Gemological Symposium and Gemological Research Conference, which originally appeared in the Fall 2006 Proceedings volume produced by *Gems & Gemology* staff. The present work is organized in two main parts on color treatments and clarity treatments, with color photos and microimages on almost every page. Chapters in the section on color treatments cover coated diamonds, irradiated diamonds, and annealed diamonds. Chapters in the section on clarity treatments cover laser-drilled and glass-filled diamonds. Material is presented in chronological order to help readers follow the evolving areas of interest and understanding of these treatments. Some of the older material includes editorial comments to explain now-unfamiliar concepts or discuss significant development since the original publication. The book includes a poster-sized color chart enclosed in a side pocket, with color photos demonstrating diagnostic features of filled diamonds and testing techniques. Shigley is a distinguished research fellow at the GIA Lab in Carlsbad, California.

Trends of Economic Development in East Asia Wolfgang Klenner. 2012-12-06 The economic success achieved in the last decade in East Asia has brought about a fundamental reorientation in the Western view of the region. In order to contribute to a better understanding of present events and future developments in the area, leading East Asia economists and men of experience in Asian business from Asia, America, and East and West Europe have written papers on their research or business fields for this volume. The individual articles deal with problems common to the East Asian region and the Pacific area as well as with specific economic problems of Japan, China and South Korea. The volume is divided into four parts: East Asia and the Pacific Basin includes articles on supra-national issues, for example on the international economic relations of Japan, China, Taiwan and Korea. Japan includes articles on Japanese industrial and business structure, technological policy, exports and other issues. China includes articles on structural change, economic reforms, fiscal policy, agriculture and other issues. Korea includes articles on economic and industrial policy, restructuring, protectionism and other issues. The occasion of the publication of this volume is the 70th birthday of Willy Kraus, who for many years has been actively concerned with the questions of development in the East Asian region.

Anglo-European Intelligence Cooperation Hager Ben Jaffel.2019-09-26 This book investigates everyday practices of intelligence cooperation in anti-terrorism matters, with a specific focus on the relationship between Europe and Britain. The volume examines the effective involvement of British anti-terrorism efforts in European cooperation arrangements, which until now have been overshadowed by the UK-US 'special relationship' and by political debates that overstate the divide between Britain and continental Europe. In arguing that British intelligence has always had a European dimension, it provides a distinct perspective to the study of intelligence cooperation and the role of British intelligence therein. Mobilizing a 'field theory' approach, the book provides an original contribution to the understanding of intelligence cooperation by investigating everyday bureaucratic practices of 'ground-level' security professionals and police forces, embedded in a European 'field' structured around the exchange of anti-terror intelligence. It also accounts for the drivers behind cooperation by using 'field analysis,' which explains the trajectory and positioning of actors according to their 'capitals' rather than necessities dictated by threats or state decisions. This book will be of much interest to students of Security Studies, International Political Sociology, Intelligence Studies, and International Relations in general.

The Gall Midges of the Neotropical Region Raymond J. Gagné.1994 Gagne's introductory chapters include biographical sketches of those individuals who have contributed most to our knowledge of Neotropical gall midges. He also discusses classification and distribution, external anatomy and biology, and techniques for collecting, rearing, and preparing specimens for study. The heart of the book comprises two chapters. The first presents the midges themselves: identification keys to the genera, a synopsis of each genus and higher taxon, and a list of all known species from South America. The second includes keys and descriptions of galls and other damage caused by the midges, with known hosts.

Links Between Business Accounting and National Accounting United Nations,United Nations. Statistical Division.2000 This publication is one of a series of handbooks prepared by the United Nations Statistics Division (UNSD) to help countries, particularly developing countries, implement the 1993 system of national accounts (SNA). It attempts to cover the conceptual and practical aspects of linking business accounts to national accounts through countries' experiences. The handbook aims to provide a general guide to business accounts and the possibility of linking items in them to SNA concepts allowing for local rules and regulations. It cannot provide a set of concrete and detailed international guidelines due to the diversity of business account standards among countries and the extent to which business accounts are made available to statisticians. The main target audiences for this handbook are staff responsible for the compilation of national accounts although it is also a useful reference tool for those who prepare statistics for the preparation of national accounts.

Rhizosphere Biology: Interactions Between Microbes and Plants Vadakattu V. S. R. Gupta,Anil K. Sharma.2020-08-21 This book presents a detailed discussion on the direct interactions of plants and microorganisms in the rhizosphere environment. It includes fifteen chapters, each focusing on a specific component of plant-microbe interactions, such as the influence of plants on the root microbiome, and the downstream effects of rhizosphere microbial dynamics on carbon and nutrient fluxes in the surroundings. As such, the book helps readers gain a better understanding of diversity above the ground, and its effect on the microbiome and its functionality.

The Regiment of Princes Thomas Hoccleve.1999-11-01 Thomas Hoccleve was born in 1367 and entered government service as clerk in the office of the Privy Seal in 1387, an office that he held until his death in 1426. His earliest datable poem (the Epistle of Cupid, a free translation of Christine de

Pisan's Epistre au Dieu d'Amour) was completed about 1402. The Regiment of Princes, written about 1410-11, was composed at a time when England was still feeling the consequences of the deposition of Richard II. Essentially it is addressed to a prince on the subject of his governance, but it exhibits considerable generic instability and thus raises fundamental questions about how we should understand the tone of considerable portions of the poem. For all the problems it presents, The Regiment shows that Hoccleve has strengths as a poet. At times he could be a very talented prosodist. In autobiographical sections of the poem he creates a most interesting early-modern subjectivity. He has distinctive observations to make about his time, and, in his self-critical awareness, probes the limits of what it means to be a poet writing in the wake of Chaucer.

The Biology of Chameleons Krystal A. Tolley, Anthony Herrel. 2013-11-16 They change color depending on their mood. They possess uniquely adapted hands and feet distinct from other tetrapods. They feature independently movable eyes. This comprehensive volume delves into these fascinating details and thorough research about one of the most charismatic families of reptiles—Chameleonidae. Written for professional herpetologists, scholars, researchers, and students, this book takes readers on a voyage across time to discover everything that is known about chameleon biology: anatomy, physiology, adaptations, ecology, behavior, biogeography, phylogeny, classification, and conservation. A description of the natural history of chameleons is given, along with the fossil record and typical characteristics of each genus. The state of chameleons in the modern world is also depicted, complete with new information on the most serious threats to these remarkable reptiles.

The Blackwell Guide to Literary Theory Gregory Castle. 2009-02-04 This student-friendly text introduces students to the history and scope of literary theory, as well as showing them how to perform literary analysis. Designed to be used alongside primary theoretical texts as an introduction to theory or alongside literary texts as a model for performing literary analysis. Presents a series of exemplary readings of particular literary texts such as Jane Eyre, Heart of Darkness, Ulysses, To the Lighthouse and Midnight's Children. Provides a brief history of the rise of literary theory in the twentieth century, in order that students understand the historical contexts for different theories. Presents an alphabetically organized series of entries on key figures and publications, from Adorno to Žižek. Features descriptions of the major movements in literary theory, from critical theory through to postcolonial theory.

Journal of Environmental Accounting and Management Zhifeng Yang, Sergio Ulgiati. 2018-07-01 This peer-reviewed journal publishes original research results in the field of environmental and ecological science with focus on applications to the sustainable management of natural, human-dominated, and man-made ecosystems. The aim of the journal is to provide a place for a rapid exchange of new ideas and concepts for scientists and engineers in the fields of environmental accounting, human and systems ecology, and environmental management. Manuscripts on environmental accounting and managements are solicited, including: mathematical modeling; computational and management techniques in environmental, ecological, energy and information science; environmental technology and engineering; human managed ecosystems such as agricultural, urban, coastal, riparian, and wetland ecosystems. No length limitations for contributions are set, but only concisely written manuscripts are considered for publication. Brief papers can be published on the basis of Technical Notes. Discussions of previous published papers are welcome. Topics of Interest Environmental and ecological economics, environmental accounting, environmental impact assessment, ecosystem service assessment, energy and resource use, social factors and management. Modeling in environmental conservation and restoration, eco-hydrology and water resources management, ecological process and pattern, climate change effects, environmental engineering and technology. Planning and management in human dimension-institutions and patterns for socio-economic systems, industrial ecology, ecological informatics, landscape design, and urban planning. Environmental policy, legislation, and innovations with environmental and strategic impact assessment, project appraisal and auditing, and environmental protection.

Microbial Interventions in Agriculture and Environment Dhananjaya Pratap Singh,Vijai Kumar Gupta,Ratna Prabha.2019-11-27 Microbial communities and their functions play a crucial role in the management of ecological, environmental and agricultural health on the Earth.

Microorganisms are the key identified players for plant growth promotion, plant immunization, disease suppression, induced resistance and tolerance against stresses as the indicative parameters of improved crop productivity and sustainable soil health. Beneficial belowground microbial interactions with the rhizosphere help plants mitigate drought and salinity stresses and alleviate water stresses under the unfavorable environmental conditions in the native soils. Microorganisms that are inhabitants of such environmental conditions have potential solutions for them. There are potential microbial communities that can degrade xenobiotic compounds, pesticides and toxic industrial chemicals and help remediate even heavy metals, and thus they find enormous applications in environmental remediation. Microbes have developed intrinsic metabolic capabilities with specific metabolic networks while inhabiting under specific conditions for many generations and, so play a crucial role. The book *Microbial Interventions in Agriculture and Environment* is an effort to compile and present a great volume of authentic, high-quality, socially-viable, practical and implementable research and technological work on microbial implications. The whole content of the volume covers protocols, methodologies, applications, interactions, role and impact of research and development aspects on microbial interventions and technological outcomes in prospects of agricultural and environmental domain including crop production, plan-soil health management, food & nutrition, nutrient recycling, land reclamation, clean water systems and agro-waste management, biodegradation & bioremediation, biomass to bioenergy, sanitation and rural livelihood security. The covered topics and sub-topics of the microbial domain have high implications for the targeted and wide readership of researchers, students, faculty and scientists working on these areas along with the agri-activists, policymakers, environmentalists, advisors etc. in the Government, industries and non-government level for reference and knowledge generation.

Microbiological Advancements for Higher Altitude Agro-Ecosystems & Sustainability Reeta Goel,Ravindra Soni,Deep Chandra

Suyal.2020-03-13 The book explores the challenges and opportunities associated with high-altitude agro-ecosystems and the factors that influence them. It discusses the various indigenous agricultural practices and approaches, as well as the microbiology of mountain & hill agro-ecosystems,

providing a comprehensive overview of the various factors that control the microbiome at high altitudes. The contributions examine microbiological advances, such as use of “omics” technologies for hill agriculture and environmental sustainability, and explore the use of nanotechnology for agricultural and environmental sustainability at higher altitudes. The book also describes various aspects of low-temperature microbiology in the context of high-altitude farming and environmental sustainability.

Biosolids Applied to Land National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Toxicants and Pathogens in Biosolids Applied to Land. 2002-11-01 The 1993 regulation (Part 503 Rule) governing the land application of biosolids was established to protect public health and the environment from reasonably anticipated adverse effects. Included in the regulation are chemical pollutant limits, operational standards designed to reduce pathogens and the attraction of disease vectors, and management practices. This report from the Board on Environmental Studies and Toxicology evaluates the technical methods and approaches used by EPA to establish those standards and practices, focusing specifically on human health protection. The report examines improvements in risk-assessment practices and advances in the scientific database since promulgation of the regulation, and makes recommendations for addressing public health concerns, uncertainties, and data gaps about the technical basis of the biosolids standards.
