Surgical Neuro-Oncology Samer Hoz,Oday Atallah,Li Ma,Zaid Aljuboori,Mayur Sharma,Mustafa Ismail,Maliya Delawan.2024-05-01 This book is the first review book that uses the multiple-choice question format in neurosurgical oncology which mirrors the format of the majority of shelf and board examinations. The mission of the book is to help readers understand the content and maintain the knowledge, rather than merely finding answers for complicated questions. It provides more than 800 MCQs in a convenient format that is suitable for self-study. Answers and definitions appear immediately below the questions to facilitate information retention. The chapters provide comprehensive coverage of the core concepts in neurosurgical oncology. They provide a step-by-step, thorough explanations of each disease from the definition, associated anatomy, pathology, clinical features, radiology to surgical decision-making, and surgical tricks, providing a comprehensive and concise overview. This book is an adjunct to the existing texts and does not intend to be the primary source of information; it rather aims to help readers identify their relevant strengths and weaknesses in the area. The book is an important asset for residents across neurosurgical disciplines as it includes much of the neuro-oncology knowledge that neurosurgical residents need to prepare for their certification tests. It is also useful for those seeking ways to solidify their knowledge or maintain their current certification.

Each chapter includes a focused practice test with multiple-choice questions and answers, which contain rationales and references. Two full practice exams appear at the end of the book. Ideal for first-time test-takers and recertification candidates alike, the bulleted, straightforward format will help anyone preparing for the boards or MOC recall their existing, specialized knowledge, and sharpen their skills in other areas of radiation oncology. KEY FEATURES: Includes two comprehensive practice tests that assess your knowledge of all disease sites and subtopics Reviews palliative care in several site-specific chapters Presents other related topics crucial to the exam, including biostatistics Includes free access to mobile and online app--track and sync your progress on up to three devices!

Cancer Consult Syed A. Abutalib,Maurie Markman.2014-06-16 The field of oncology benefits from several large-scale reference books and a host of monographs dedicated to specific cancers. However, truly excellent practice and review books are, surprisingly, quite scarce. Outside of a scant handful of books and online reference tools that offer clinical response practice and board review in a basic question and answer format, there are no resources that offer a robust, engaging, fully referenced tool for these vital activities in every oncologist's and oncology trainee's work. This print and electronic book seeks to fill that void, offering comprehensive question-and-answer style content that covers the entire specialty of oncology and provides practicing oncologists with a fascinating and immediately applicable compendium of vital information dealing with a well-balanced selection of common and uncommon cancers. At the heart of this book is the editor's and authors' desire to overcome the controversies and barriers to practice that usually emerge following the appearance of new data. In every section, the user is guided toward collaboration in ongoing clinical research - for example, via discussions of well-designed ongoing clinical trials in each specific area. Developed with both the teacher and learner in mind, this book also offers trainees and fellows an excellent opportunity to enhance their preparation for the ABIM oncology fellowship exam as well as for the oncology boards. It will also be an extremely useful tool for oncologists working toward the recertification exam. This comprehensive, beefy book includes hundreds of painstakingly developed multiple-choice and mini-case-based questions covering the principles of medical oncology, malignant hematology, surgical oncology, and radiation oncology. It also contains mini-cases and questions dealing with the biology, diagnosis, classification, staging, and multidisciplinary treatment of cancers at every anatomic site. The very latest topics are included, such as molecular techniques, targeted therapies, and translational cancer research. Concise but detailed answers are referenced to key journals and books, and evidence-based wherever possible. NCCN guidelines are also referenced as appropriate. With its powerful focus on take-home messages from and for actual clinical work, this book will help keep oncologists up to date, bridging the gaps between journal and reference literature, conferences, and their existing knowledge base.

Recalled Oncology Board Review Questions Michael Braham.2012-05-18 Series Two is now available. Dear Medical Personnel, Welcome! We have put together 100's of the most recently Recalled Board Review Questions, with Answers. Our pass rate is 96%. On our website CancerGroup.com you can read more about this book and testimonials from Physicians who passed the boards just by reading our book, PLUS other important information. Some of the Department Heads, hospitals and residents using our books are Mayo Clinic, Harvard University, Columbia, NYU, UCLA, Johns Hopkins, MD Anderson Cancer Center Orlando, Tift Regional Cancer Center, Instituto Oncologia Moderna, Puerto Rico plus many others. We at ancerGroup.com appreciate the voluminous amount of new information that we should be digesting in our day-to-day practice. Perhaps you have felt the same frustration, attempting to assimilate an unwieldy and often contradictory mountain of information about cancer. Reading newer textbooks is time-consuming, and frankly difficult to remember. Reviews are often shallow, highly technical, and also hard to recall later! As Physicians, we are naturally expected to be proficient in our knowledge of both basic science and clinical aspects of cancer medicine. The importance of maintaining an updated knowledge base was recently demonstrated by the new institution of time-limited Board Certification every 10 years. We need to have instant access to a vast storehouse of knowledge, for both exams and our daily practice and teaching of cancer medicine. How can we obtain this information in the most efficient manner, given the time constraints of seeing patients, spending time with family, important leisure and the vicissitudes of life? We have taken much study time to develop something that was sorely lacking when we were residents, that is an easy-to-use, easy to master (and keep current with) the foundations of cancer academics. We have developed a series of reviews which covers the following aspects of the commonest cancers, in a standardized format: * Definition * Epidemiology * Risk Factors * Basic Science, Oncogenes * Natural History * Workup * Current Staging * Landmark Studies * Conventional Studies: Treatments/Results * Latest Studies: Treatment/Results Many physicians have told us that they wished that the above information had been available, in a coherent fashion, when they were groping to understand the basics of cancer medicine! Through extensive review of textbooks and published articles, we are now making this information readily available to you in a concise, succinct and affordable paperback review series. We have collected and collated this data, looking for the common themes in newer textbooks, review courses, lectures, and seminars. We at CancerGroup.com, an organization dedicated to promoting awareness of cancer treatments, are continuing to develop new reviews. These will help provide a comprehensive, cohesive way to master pertinent information. We look forward to providing you with the best possible information. International Manual of Oncology Practice Ramon Andrade De Mello,Giannis Mountzios,Álvaro A. Tavares.2020-10-30 Cancer is a very aggressive disease and currently it has been considered a challenge to oncologists and cancer patients worldwide. Nowadays, several therapeutic strategies had improved toward last decades. Surgery is many times still the best curative treatment, mainly in early stage disease. However, Radiotherapy

and chemotherapy acquired a main role in this scenario. Target therapies were introduced for medical oncology practice and are demonstrating a hallmark of a new era in cancer treatment. More recently, immunotherapy has been considered the novel cornerstone in cancer treatment. The 2nd edition of the International Manual of Oncology Practice (iMOP) emerged after the great success of the iMOP 1st edition as a reference for medical oncologists and medical residents in the field. In this edition, several chapters were revised and its addresses from the molecular issues of cancer sciences to the clinical practice in medical oncology. In addition, multiple choice questions and clinical cases were included in the main chapters in order to improve the reader learning. The book focuses systemic treatments in many areas of medical oncology, such as breast cancer, gastrointestinal, thoracic, urological oncology, head and neck tumors, bone tumors, sarcomas and palliative care. The topics herein discussed will provide the readers a step forward in the medical oncology practice understanding and give facilities for help in cancer patient treatments.

RadTool Nuclear Medicine MCQs Medhat Sam Gabriel, Bitat Savir-Baruch. 2021-09-20 This book, in MCQ format, is a comprehensive tool that will help Nuclear Medicine and Radiology residents and attending physicians to understand concepts in nuclear medicine. Questions cover clinical applications of nuclear medicine techniques to the cardiovascular, pulmonary, endocrine, skeletal, gastrointestinal, genitourinary, and central nervous systems. In addition, topics in physics, radiopharmacy, and radiation safety are addressed. The MCQ format closely resembles that used in board examinations in nuclear medicine. Each question has four possible answers, only one of which is correct. About 60% of the questions are linked to clinical cases, with each case having four questions on average, along with one or two images. The remainder of the questions are free-standing, with or without an image. Answers are concise but are supported by references to the literature when necessary. Pearls in boxes are used to highlight the most important pieces of information. While the

questions are scrambled, as in board exams, an index categorizes each question into one of the systems or topics.

Breast Cancer Management for Surgeons Christos Markopoulos, Andreas Karakatsanis.2023-12-05 This book is a revision companion for the UEMS breast exam. The contents extract and distil the key messages and facts of the exam-linked textbook, published in 2017, giving self-test opportunities at the last chapter. Each chapter starts by listing the key facts at the start. The chapters have been edited by the exam board in collaboration with most of the authors of the original chapters of key relevance. The book is specifically designed to complement the UEMS breast surgery exam which is held once a year. In addition there are 2 feeder courses for the exam, the EBSQ exam Preparatory Course by the Division of Breast Surgery and the Advanced Course on Breast Cancer by the ESSO, each of which run yearly and several other post graduate courses

that could be supported by the book. The book is also of interest to candidates sitting the FRCS exam with a special interest in breast surgery. The last Chapter describes the format of the exams, the scoring system and presents examples of both, the written (MCQ) and the oral examination. The MCQ part contains a questions section with 25 MCQs, including the correct answers at the end. A Clinical Case scenario is also presented with indicative questions similar to those discussed during the oral exam and a list of Academic papers included for discussion in recent oral exams, along with indicative questions is also included.

Oncology MCQs for NEET-SS (medical Oncology and Surgical Oncology) Dr Bhratri Bhushan.2020-01-14 Volume 1 available at: <https://www.amazon.in/dp/B08371FV41> (e-book)<https://www.amazon.in/dp/1651694524> (paperback)MCQs on cancer staging for NEET-SS is available at: <https://www.amazon.in/dp/B0846RY856>

When I was preparing for DM entrance, I experienced a dearth of books on the subject of oncology and the books that were available were either not updated or were lacking in depth, that was when I conceived the idea of writing such a book myself. I have written this book purely from the perspective of an oncologist and by relying on the highest quality material, most importantly the Bible of oncology: DeVita, Hellman, and Rosenberg's Cancer Principles & Practice of Oncology 11th edition. The NCCN guidelines and high impact journals were also referenced as and when needed. The result is this book, which will serve the purpose of equipping the exam going (NEET-SS and board review, along with any other entrance exam where questions about oncology are asked) doctors with the right tool to test and build their knowledge. As the knowledge in the field of oncology is unfolding at an unprecedented scale and new strategies are being devised at a prolific pace, it is not possible to provide all of the updated information, all at once. I will be updating this book periodically for this purpose and I would implore readers to keep themselves updated by going through the quarterly updates of DeVita's oncology that are included with the purchase of the 11th edition and also the NCCN guidelines. In case of any queries and suggestions regarding this book, kindly send to: bhratri@gmail.com Dr. Bhratri Bhushan MBBS, MD (Internal medicine), DM (Medical oncology) is a consultant medical oncologist and hematologist. He has published a number of books on the subject of oncology and his papers have been published in renowned journals of medical literature.

Absolute Therapeutic Medical Physics Review Malcolm Heard, Raghavendiran Boopathy, Charles R. Thomas, Jr..2022-11-23 This book is a comprehensive study guide for the therapeutic medical physicist pursuing initial board certification and those participating in continuing education. Medical physics is an evolving field as a result of rapidly developing technology and the focus on evidence-based care in radiation oncology. Recently, the certification body has mandated an online question and answer system to allow practicing physicist to receive continuing education credits. The questions are designed to test the walking around knowledge of the clinical physicist. Many physicists specialize in specific treatment modalities, thus limiting their exposure to other areas of clinical physics. This handbook allows these physicists to stay up-to-date and satisfy the requirements of the certification body. The text is divided into 2 main sections: Questions & Detailed Answers. Question chapters are divided by the ABR content guide and are composed of 15-35 questions. Questions are primarily multiple choice in nature with 4-5 possible answers, but there are also matching questions. Questions review the scope of medical physics, spanning from medical physics theories to day-to-day applications in clinic. The questions and detailed answers will be set in such a way to address most relevant and commonly tested topics of dosimetry, treatment machine, treatment planning, protection, radiobiology, radiation safety and professionalism and ethics. The questions will most closely fit to what is done in clinical practice. Detailed answers not only explain the correct answer, but also discuss the erroneous remaining answers with the appropriate citation of the most recent protocols, guidelines, publications and task group recommendations. This is an ideal study guide for therapeutic medical physicists in training and in practice, who need to pass a written board examination or prepare themselves for their continuing education requirements.

Oncology Board Review, Second Edition Francis P. Worden, MD, Rami N. Khoriaty, MD, Erin Cobain, MD, Alexander T. Pearson, MD, PhD.2017-05-08 Print version of the book includes free access to the app (web, iOS, and Android), which offers interactive Q&A review plus the entire text of the print book! Please note the app is included with print purchase only. Oncology Board Review: Blueprint Study Guide and Q&A is a concise, outline-based study guide covering the topics that appear on the Medical Oncology Certification Exam. This second edition has been thoroughly revised to include new treatment regimens, clinical guidelines, and other updates impacting the field and reflected on the test. The book includes all topics listed in the American Board of Internal Medicine (ABIM) blueprint as essential material for the Medical Oncology Certification Exam. The coverage spans all hematologic malignancies and solid tumors, beginning with the epidemiology, and followed by the etiology and risk factors of the disease, staging, signs and symptoms, diagnostic criteria, indications for treatment, prognostic factors, treatment recommendations, and special considerations. Later chapters review other major subspecialty areas found on the exam including cancer genetics and tumor biology, supportive and palliative care, bone marrow transplantation, and biostatistics. Each chapter includes key points summarized in digestible bullets for easy recall and self-assessment. And, now containing over 230 board style questions with answers and detailed rationales, Oncology Board Review, Second Edition is the go-to, quick review for any trainee preparing for initial certification and for oncologists preparing for recertification. New to this Edition: Includes over 230 board style questions and answers with rationales New chapter on Bone Marrow Transplantation Thoroughly updated and revised chapters with all new treatment recommendations and FDA approvals for solid tumors and hematologic malignancies included.

100 Questions & Answers about Lung Cancer Joan H. Schiller, Amy Cipau.2012-12-15 Guides patients and their families through diagnosis, treatment, and survivorship of lung cancer.

Radiation Oncology Murat Beyzadeoglu, Gokhan Ozyigit, Ugur Selek.2016-08-23 'Radiation Oncology: MCQs for Exams' (ROME) will cover the essential aspects of radiation physics, radiobiology, and clinical radiation oncology designed to meet the needs of a large scale of examinees. Topics of this new book will be in the order of our previous Basic Radiation Oncology (Springer, 2010) with additional two new chapters (Pediatric tumors and Rare tumors-Benign Diseases) making a total of 15 chapters and instead of old style question and answer format, current MCQ examination pattern helpful for both oral exams and written exams is used in this comprehensive bedside recall book complementing the Basic Radiation Oncology 1st Edition.

Cancer Staging Dr Bhratri Bhushan.2020-01-25 I have written this book in three volumes. Notes on how to read a kindle edition book on your phone/tablet: 1. Download the kindle app on your phone/tablet 2. Sign in with your Amazon account once you have installed the app (if you don't have an account then make one). Now your app is ready to use 3. Now comes the most important step. Remember that you can't buy a kindle edition book directly from this app you have just installed. So, now you should open your web browser (google/safari/firefox) and go to www.amazon.in 4. Again sign in with your amazon account there 5. Once you have signed in your account on the web browser, search Amazon for Bhratri Bhushan or oncology MCQ books or copy and paste the links provided below; you will see the three volumes there 6. Purchase the book you want to 7. Now this book will automatically appear in your app 8. Open your app and read the book (I have written this description because I had a difficult time figuring it out myself. I hope you will find it helpful. The most crucial step in the third one, so read it again. And I would like to repeat that you don't need a kindle device to read a kindle edition.) When I was preparing for DM entrance, I experienced a dearth of books on the subject of oncology and the books that were available were either not updated or were lacking in depth, that was when I conceived the idea of writing such a book myself. For this purpose, I have written a book in two volumes Oncology MCQs for NEET-SS, board review and other entrance exams. The purpose of this book on cancer staging is to equip the exam going (NEET-SS and board review, along with any other entrance exam where questions about oncology are asked) doctors with the right tool to test and build their knowledge about the latest cancer staging standards, provided in the eighth edition of the AJCC cancer staging textbook. I must admit that this book by no means can serve as a reference book of cancer staging, as it is not comprehensive enough. As the knowledge in the field of oncology is unfolding at an unprecedented scale and new strategies are being devised at a prolific pace, it is not possible to provide all of the updated information, all at once. I will be updating this book periodically for this purpose and I would implore readers to keep themselves updated by going through the standard textbooks and online tools. In case of any queries and suggestions regarding this book, kindly send to: bhratri@gmail.com Dr. Bhratri Bhushan MBBS, MD (Internal medicine), DM (Medical oncology) is a consultant medical oncologist and hematologist. He has published a number of books on the subject of oncology and his papers have been published in renowned journals of medical literature.

HEMATOLOGY MCQs for NEET-SS and Board Review (Complete Edition) Bhratri Bhushan.2020-05-28 I have written this book in four volumes. The other three volumes of Oncology MCQs for NEET-SS are available at: Volume 1: <https://www.amazon.in/dp/B08371FV41> Volume 2: <https://www.amazon.in/dp/B083VXXZY8> Volume 3: <https://www.amazon.in/dp/B0846RY856> When I was preparing for DM entrance, I experienced a dearth of books on the subject of hematology entrance and the books that were available were either not updated or were lacking in depth, that was when I conceived the idea of writing such a book myself. I have written this book purely from the perspective of a hemat-oncologist and by relying on the highest quality material. The standard textbooks, NCCN guidelines and high impact journals were referenced for every question. The result is this book, which will serve the purpose of equipping the exam going (NEET-SS and board review, along with any other entrance exam where questions about hematology are asked) doctors with the right tool to test and build their knowledge. As the knowledge in the field of hematology is unfolding at an unprecedented scale and new strategies are being devised at a prolific pace, it is not possible to provide all of the updated information, all at once. Career Development in Academic Radiation Oncology Ravi A. Chandra, Neha Vapiwala, Charles R. Thomas Jr..2021-05-25 This book offers comprehensive career development advice for professionals in radiation oncology. While numerous texts have been published to advise medical students on entry into the specialty, and to guide residents and junior faculty with exam preparation, there remains a need for a comprehensive resource that covers topics pertinent to a successful career within radiation oncology. This text has been edited and written by leading experts in the field, and offers multiple unique vantage points. This work is divided into five sections covering career planning, applying to faculty positions, early career development, mid and senior career considerations, and contextual issues. Throughout the text, authors balance "nuts and bolts" (e.g., preparing your CV and evaluating a contract) with big picture considerations. Each chapter is written concisely, yet comprehensively, from the vantage point of a mentor advising a mentee; questions to review with local mentors and additional reading suggestions are also provided. Issues of workforce disparities, conscious and unconscious bias, work-life equilibrium, and interpersonal conflict, and how these may impact one's career path, are also closely addressed. While the work is primarily targeted to those pursuing career paths within academic medicine, there is also distinct value and tailored content for trainees and radiation oncologists practicing in hospital-based, hybrid or community settings. In a period of rapid change in the healthcare sector and cancer care more specifically, this book will serve as the premier reference for those pursuing an independent career in radiation oncology.
