Spring Forward Michael Downing.2009-02-17 Michael Downing is obsessed with Daylight Saving, the loopy idea that became the most persistent political controversy in American history. Almost one hundred years after Congressmen and lawmakers in every state first debated, ridiculed, and then passionately embraced the possibility of saving an hour of daylight, no one can say for sure why we are required by law to change our clocks twice a year. Who first proposed the scheme? The most authoritative sources agree it was a Pittsburgh industrialist, Woodrow Wilson, a man on a horse in London, a Manhattan socialite, Benjamin Franklin, one of the Caesars, or the anonymous makers of ancient Chinese and Japanese water clocks. *Spring Forward* is a portrait of public policy in the 20th century, a perennially boiling cauldron of unsubstantiated science, profiteering masked as piety, and mysteriously shifting time-zone boundaries. It is a true-to-life social comedy with Congress in the leading role, surrounded by a supporting cast of opportunistic ministers, movie moguls, stockbrokers, labor leaders, sports fanatics, and railroad execs.

Twelve Years a Slave Solomon Northup.2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Industrial Development for the 21st Century David O'Connor, Monica Kjollerstrom. 2008-06-01 With very few exceptions, industrial development has been central to the process of structural transformation which characterises economic development. Industrial Development for the 21st century examines the new challenges and opportunities arising from globalization, technological change and new international trade rules. The first part focuses on key sectors with potential for developing countries, focussing on two key themes. First, traditional points of entry for late industrializers - like textiles and clothing - have become even more intensely competitive than ever before, requiring more innovative adaptive strategies for success. Second, countries now recognize that manufacturing does not exhaust the opportunities for producing high value-added goods and services for international markets. Knowledge intensity is increasing across all spheres of economic activity, including agriculture and services, which can offer promising development paths for some developing countries. The final section addresses social and environmental aspects of industrial development. Labour-intensive, but not necessarily other patterns of industrial development can be highly effective in poverty reduction though further industrial progress may be less labour-intensive. A range of policies can promote industrial energy and materials efficiency, often with positive impacts on firms' financial performance as well as the environment. Promoting materials recycling and reuse is an effective, if indirect means of conserving resources. Finally, the growth of multinational interest in corporate social responsibility is traced, with consideration given to both the barriers and opportunities this can pose for developing country enterprises linked to global supply chains.

New Age Globalization A. Ahmad. 2013-07-03 Using the frameworks of systems theory, modernization, and the world system, New Age Globalization presents a composite multilevel, multidirectional picture of globalization informed by eight different but interdependent subsystems.

Private Enforcement of Antitrust Law in the United States Albert A. Foer, Randy Stutz. 2012-01-01 Private Enforcement of Antitrust Law in the United States is a comprehensive Handbook, providing a detailed, step-by-step examination of the private enforcement process, as illuminated by many of the country's leading practitioners, experts, and scholars. Written primarily from the viewpoint of the complainant, the Handbook goes well beyond a detailed cataloguing of the substantive and procedural considerations associated with individual and class action antitrust lawsuits by private individuals and businesses. It is a collection of thoughtful essays that delves deeply into practical and strategic considerations attending the decision-making of private practitioners. This eminently readable and authoritative Handbook will prove to be an invaluable resource for anyone associated with the antitrust enterprise, including both inexperienced and seasoned practitioners, law professors and students, testifying and consulting

economists, and government officials involved in overlapping public/private actions and remedies.

The Gas Station in America John A. Jakle,Keith A. Sculle.1994 The first architect-designed gas station - a Pittsburgh Gulf station in 1913 - was also the first to offer free road maps; the familiar Shell name and logo date from 1907, when a British mother-of-pearl importer expanded its line to include the newly discovered oil of the Dutch East Indies; the first enclosed gas stations were built only after the first enclosed cars made motoring a year-round activity - and operating a service station was no longer a seasonal job; the system of octane rating was introduced by Sun Oil as a marketing gimmick (74 for premium in 1931). As the number of true gas stations continues its steady decline - from 239,000 in 1969 to fewer than 100,000 today - the words and images of this book bear witness to an economic and cultural phenomenon that was perhaps more uniquely American than any other of this century.--Jacket.
