**Sapiens** Yuval Noah Harari. 2015-02-10 New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

Back to the Future Maria Assunção Flores,Ana Amélia Carvalho,Fernando Ilídio Ferreira,Maria Teresa Vilaça.2013-06-13 Schools and teachers are facing various challenges in a rapidly changing world. In such circumstances, discussing and sharing concerns of mutual interest regarding policy, practice and research is crucial to creating more sophisticated understandings of the various challenges as a first step in the improvement of education. While the future should not be imprisoned in the past, the past does provide valuable lessons that will undergo new iterations in constructing the future. The future will be multi-faceted and complex and the different chapters included in this book are intended to provide important contributions from which to build the future of education. The different chapters provide readers with international perspectives, frameworks and empirical evidence of legacies, continuities and changes in educational policy, practice and research in teaching, teacher education and learning. We hope that they inspire the readers to build the future and to change their own professional realities. —Cheryl J. Craig, Ph.D., Professor, University of Houston, Houston, TX, USA, Secretary, ISATT This book metaphorically captures the looking backward to the past—pressing forward to the future that typically takes place on celebratory occasions. It causes us to pause and remember even as we race toward a time unknown to us. In a sense, the authors featured in this book serve as tour guides pointing out legacies, continuities and changes in teaching and teacher education. I strongly urge readers not only to peruse the chapters that follow, but to distill them to their essences and to glean what is of value to be learned from them. In conclusion, the ISATT Executive especially thanks the co-editors of this volume who have compiled a superb collection of chapters on a timely and relevant topic.
