The novel revolves around a secret ministry whose task is not just to spy on its citizens, but to collect and interpret their dreams. An entire nation's unconscious is thus tapped and meticulously laid bare in the form of images and symbols of the dreaming mind.

European Citizenship and Social Exclusion Maurice Roche,Rik Van Berkel.2018-12-17 Frist published in 1997, this book aims to answer if European 'post-national' citizenship provide a practical opening and a conceptual challenge to cope with the diverse and close-circuiting crises of national European social models? What then might a new sphere of European social inclusion look like? This book also provided the first attempt to go well beyond 'national gridlock'. Old solutions will no longer do. Is new land in sight? With monetary integration almost implemented this is a highly relevant exploration of a central complementary 'common currency' in Europe's future.

Learning Democracy in School and Society: Education, Lifelong Learning, and the Politics of Citizenship Gert J.J. Biesta.2011-10-21 This

book explores the relationships between education, lifelong learning and democratic citizenship. It emphasises the importance of the democratic quality of the processes and practices that make up the everyday lives of children, young people and adults for their ongoing formation as democratic citizens. The book combines theoretical and historical work with critical analysis of policies and wider developments in the field of citizenship education and civic learning. The book urges educators, educationalists, policy makers and politicians to move beyond an exclusive focus on the teaching of citizenship towards an outlook that acknowledges the ongoing processes and practices of civic learning in school and society. This is not only important in order to understand the complexities of such learning. It can also help to formulate more realistic expectations about what schools and other educational institutions can contribute to the promotion of democratic citizenship. The book is particularly suited for students, researchers and policy makers who have an interest in citizenship education, civic learning and the relationships between education, lifelong learning and democratic citizenship. Gert Biesta (www.gertbiesta.com) is Professor of Education at the School of Education, University of Stirling, UK.

The Siege Ismail Kadare.2010-02-12 From Ismail Kadare, winner of the inaugural Man Booker International Prize - a novelist in the class of Coetzee, Pamuk, Márquez, and Rushdie - the stunning new translation of one of his major works. In the early fifteenth century, as winter falls away, the people of Albania know that their fate is sealed. They have refused to negotiate with the Ottoman Empire, and war is now inevitable. Soon enough, dust kicked up by Turkish horses is spotted from a citadel. Brightly coloured banners, hastily constructed minarets, and tens of thousands of men fill the plain below. From this moment on, the world is waiting to hear that the fortress has fallen. The Siege tells the enthralling story of the weeks and months that follow - of the exhilaration and despair of the battlefield, the constantly shifting strategies of war, and those whose lives are held in the balance, from the Pasha himself to the artillerymen, astrologer, blind poet, and harem of women who accompany him. Believe me, the general said. I've taken part in many sieges but this, he waved towards the castle walls, is where the most fearful carnage of our times will take place. And you surely know as well as I do that great massacres always give birth to great books. You really do have an opportunity to write a thundering chronicle redolent with pitch and blood, and it will be utterly different from the graceful whines composed at the fireside by squealers who never went to war. Brilliantly vivid, as insightful as it is compelling, The Siege is an unforgettable account of the clash of two great civilisations, and a portrait of war that will resonate across the centuries.

School-community-university Partnerships for a Sustainable Democracy Matt Hartley,Ted Huddleston.2010 This guide examines how schools and universities can work together with their local communities to promote democracy in society based on the principles of Education for Democratic Citizenship (EDC), a concept developed by the Council of Europe. Partnerships based on this idea foster civic skills and values in citizens and build the civic capacity of communities through the pursuit of collective solutions to local problems. The guide explores the mechanics of such partnerships in practice, describing how they are built and sustained, and what makes them work. Drawing on examples from Europe and the United States of America, the guide is intended for policy makers and practitioners in schools and universities, civil society and community groups, and representatives of public authorities and government bodies on both sides of the Atlantic.

Epilepsy in children Sics Editore.2014-10-01 Early diagnosis of childhood epilepsy is important and often improves prognosis. Epilepsy starting in infancy or at preschool age may delay the normal development of the child.All children in whom epilepsy is suspected should always be referred urgently to specialist care for further investigations. Diagnosis of epilepsy is based on seizure history, supplemented by EEG recordings and imaging studies. Pharmacological treatment is chosen according to the type of epilepsy or syndrome. Medication that is inappropriate may lead to the aggravation of seizures or other neurological manifestations. The monitoring of the child's neurocognitive development and the provision of appropriate support are important in the treatment of childhood epilepsies. A part of childhood epilepsies are benign and self-limited. The possibility of epilepsy surgery should be considered when the disease proves to be resistant to treatment.

Being Fair, Faring Better Roberta Gatti,Sandor Karacsony,Kosuke Anan,Celine Ferré,Carmen de Paz Nieves,Valerie Morrica,Carmen de Paz,Abla Safir.2016-02-05 In Central and Eastern European countries, inequalities for Roma families living in marginalized communities start early and are striking. Some of these inequalities reflect hard-wired family circumstances such as being born in poverty. Others reflect lack of opportunities such as limited access to those basic goods and services that are necessary not only for realizing one's potential in life, but also for living with dignity. Gaps between Roma and non-Roma widen over the lifecycle in a way that reinforces and perpetuates disadvantage and translates into significantly unequal outcomes, despite the fact that Roma report having similar aspirations to those of their non-Roma neighbors. Promoting equal opportunities for disadvantaged Roma is not only an imperative for societies that want to call themselves fair, but it is also a smart economic choice, especially in those countries where populations are aging rapidly. Investing early, with a particular emphasis on supporting healthy and cognitive development for disadvantaged Roma children, is likely to go a long way in promoting fair chances. However, leveling the playing field in childhood is likely not enough: disadvantaged Roma continue being exposed to unequal opportunities at key nodes in their lives, such as when pursuing education or when looking for a job. Therefore, it is as important that a broader set of policies address some of the circumstances in which a large share of Roma children grow up, including access to employment and decent living conditions for their families. Implementing interventions that help overcome these interrelated barriers will require strong ownership at the national level, coordinated policies across different ministries and government levels, and an integrated delivery system that is grounded in approaches that are customized to local conditions and implemented in a participatory manner. Good practices in Europe and elsewhere show that inclusion of the most disadvantaged - including many Roma - is possible and the current

programming cycle for European Funds represents a unique opportunity to fund such interventions.

The Myth of Lasgush Dr Kapurani, Anastas Kapurani. 2004 'That which puzzled and fascinated me whenever I met Lasgush was this sensation of the impossible. It was impossible to get on with him as you did with others. The moment you were at him, or rather, the moment you knocked at his door, suddenly all became another thing. There was another logic, another code, other words, wrapped up in another meaning. .when you went to Lasgush's, it was more than going abroad. You believed you dropped somewhere beyond our time, beyond the everyday way of looking at things. One more step and it looked as if you would cross the borders of life and would find yourself in Dante's nothingness. .He was unpredictable, corrosive like acid, creepy, startling. His laugh was like as if beyond our life, mirthless, and his sadness had no grief. As for his anger, it was such as well, luxurious, cold, whereas his contempt was radiating from afar, as if adorned with silver.' (Kadare, In My Studio. pp 207, 208, 209. My translation) -All this Saussurean lava of meaning has its own matchless 'crater' from where it erupts and reaches us time and again, endlessly. Lasgush's Word has its own individual suspension, chiselled by the hand of a true master. It is breathlessly succinct and, in all probability, on a par with the best ever created. Lasgush says that his Word is: 'Mystery that burns in a thread of lightning.' (My Fiery Tongue)

The Ghost Rider Ismail Kadare. 2010-05-20 An old woman is awoken in the dead of night by knocks at her front door. The woman opens it to find her daughter, Doruntine, standing there alone in the darkness. She has been brought home from a distant land by a mysterious rider she claims is her brother Konstandin. Managing the Curriculum David Middlewood, Neil Burton. 2001-04-28 `Each chapter in the book is firmly rooted in research and is well referenced as one would expect of such a book. It will be of particular use to people with an academic interest in this aspect of school management but will also be thought-provoking for those who are involved in the development of the curriculum within their institution' - escalate This book explores many of the new aspects of the core business of schools and colleges, that is, the curriculum. Keeping the focus clearly on learning and teaching, the contributors explore the practical issues for managers at institutional level, within the context of their need to understand and analyze key educational values and principles. Part One presents overviews of theories and models of curriculum, while Part Two examines how these are applied through planning, monitoring and evaluating. Part Three explores in detail the various managerial roles within schools and colleges from leaders to those responsible for cross-curriculum work and special educational needs. The fourth part discusses the importance of effectively managing resources for the curriculum - the environment, support staff and finance. Contributors use empirical research evidence to analyze current curriculum trends whilst proposing various new models which are likely to emerge in the 21st century.

Improving Human Learning in the Classroom George R. Taylor, Loretta MacKenney. 2008-10-03 Improving Human Learning in the Classroom provides a functional and realistic approach to facilitate learning through a demonstration of commonalities between the various theories of learning. Designed to assist educators in eliciting students' prior knowledge, providing feedback, transfer of knowledge, and promoting self-assessment, Taylor and MacKenney provide proven strategies for infusing various learning theories into a curriculum, guiding educators to find their own strategies for promoting learning in the classroom. Both quantitative and qualitative research methods investigate learning theories and reforms in education. Quantitative data sources build the theoretical framework for educating the student, as well as developing strategies for closing the achievement

gap. Taylor and MacKenney fuse personal experiences with solid strategies for human learning.

Evaluation of Schools Providing Compulsory Education in Europe EURIDICE..2004 Improving the quality of education is a constant concern of national policy-makers. Evaluation of the education offered pupils is one of the means by which this aim may be achieved. Such evaluation may assume several forms depending on the components subject to investigation, whether they be the processes activated by teachers, the tasks assumed by schools, local authority school management and administration, the functioning of the education system as a whole, or the performance of pupils who may be examined by individual teachers or schools, a local education authority or a national body. All such aspects might be the focus of a comparative study. However, the present study concentrates solely on approaches to the evaluation of schools providing compulsory education. The decision to proceed in this way reflects the terms of the Recommendation of the European Parliament and of the Council (12 February 2001) on European Cooperation in Quality Evaluation in School Education. It is clear from the Recommendation that improvements in quality evaluation in education ultimately hinge on developments at school level. The Recommendation emphasises the interrelation between external and internal evaluation, and calls on the Member States to 'encourage school self-evaluation as a method of creating learning and improving schools, within a balanced framework of school self-evaluation and any external evaluations' (page 60/53 of the Recommendation). The present introduction is in two parts. The first establishes the general framework for this comparative investigation by indicating the focus of the study (schools as entities), along with its analytical unit (the approach to evaluation), its methodology, scope, overall structure and content. The second part contains diagrams that provide a general outline of evaluation systems. These diagrams will enable readers who so wish to understand how the evaluation of schools is situated in relation to a country's entire system of educational evaluation. The diagrams may vary considerably from one country to the next both from the perspective of the evaluators and in terms of the components evaluated (whether pupils, teachers, schools, local educational providers or the education system overall). The second part of the introduction will also provide some insight into the position of each of the different countries vis-à-vis the study as a whole.

Teaching and the Case Method Louis B. Barnes, Carl Roland Christensen, Abby J. Hansen. 1994 This third edition of Teaching and the Case Method is a further response to increased national and international interest in teaching, teachers, and learning, as well as the pressing need to enhance instructional effectiveness in the widest possible variety of settings. Like its predecessors, this edition celebrates the joys of teaching and learning at their best and emphasizes the reciprocal exchange of wisdom that teachers and students can experience. It is based on the belief that teaching is not purely a matter of inborn talent. On the contrary, the knowledge, skills, and attitudes that make for excellence in teaching can be analyzed, abstracted, and learned. One key premise of Teaching and the Case Method is that all teaching and learning involve a core of universally applicable principles that can be discerned and absorbed through the study and discussion of cases.

In Search of Pedagogy Volume I Jerome S. Bruner. 2006-09-27 Jerome Bruner is one of the best-known and most influential psychologists of the twentieth century. In this two volume set, Bruner has selected and assembled his most important writings about education. Volume I spans the twenty years from 1957 to 1978 and Volume II covers 1979 to 2006. Volume I starts with a specially written introduction by Bruner, in

which he gives an overview of the 1957-1978 years and contextualises his selection of papers. The articles and chapters then reveal the thinking, the concepts and the empirical research of that time that have made Bruner one of the most respected and cited educational authorities of our time.
