**The Invulnerable Child** Elwyn James Anthony, Bertram J. Cohler. 1987-06-08 This groundbreaking volume thoroughly explores the intriguing and sometimes baffling phenomenon of positive adaptation to stress by children who live under conditions of extreme vulnerability. Examining the determinants of risk, the development of competence in the midst of hardship, and the nature of stress-resilience, THE INVULNERABLE CHILD will be of profound interests to psychiatrists, developmental and clinical psychologists, social workers, nurses, educators and social scientists, and all those involved in the psychosocial well being of children.

**Pictorial Appearing** Kresimir Purgar. 2019-07-31 The proliferation of digital technology has changed our visual perception and the way we interpret terms such as 'representation', 'immersion', and 'virtuality'. Kresimir Purgar examines some of the topics fundamental to an understanding of the contemporary culture of images. The principal thesis of this volume is that we are witnessing the transitional period of images as not-representation-anymore and not-yet-immersion. Instead of just asking what images mean, we should ask ourselves what images are, how they appear, and what they do to us. The author proposes the comprehensive concept of pictorial appearing that takes into account phenomenological, semiotic, and art-historical perspectives on both old and new images.

**Core Topics in Vascular Anaesthesia** Carl Moores, Alastair F. Nimmo. 2012-06-07 Vascular surgery and anaesthesia have changed considerably in recent years and become recognised subspecialties, although non-specialist anaesthetists continue to provide much of the care for emergency vascular surgical patients. Core Topics in Vascular Anaesthesia brings together the clinical expertise of global leaders in the field in a comprehensive review of contemporary practice. Detailed discussion is included on every aspect of clinical management: • Preoperative risk assessment, including cardiopulmonary exercise testing and risk modification using pharmacological and cardiac interventions • Anaesthesia for major vascular operations including carotid endarterectomy, complex endovascular aortic surgery and repair of ruptured aortic aneurysms • Intraoperative management of high risk patients including advanced monitoring techniques, fluid management, blood conservation and transfusion, major haemorrhage and treatment of coagulopathy Practical and well illustrated, Core Topics in Vascular Anaesthesia is essential reading for anaesthetists, intensive care physicians and vascular surgeons.

**Translational Medicine in CNS Drug Development** George G. Nomikos, Douglas E. Feltner. 2019-06-18 Translational Medicine in CNS Drug Development, Volume 29, is the first book of its kind to offer a comprehensive overview of the latest developments in translational medicine and biomarker techniques. With extensive coverage on all aspects of biomarkers and personalized medicine, and numerous chapters devoted to the best strategies for developing drugs that target specific disorders, this book presents an essential reference for researchers in neuroscience and pharmacology who need the most up-to-date techniques for the successful development of drugs to treat central nervous system disorders. Despite increases in the number of individuals suffering from CNS-related disorders, the development and approval of drugs for their treatment have been hampered by inefficiencies in advancing compounds from preclinical discovery to the clinic. However, in the past decades, game-changing strides have been made in our understanding of the pathophysiology of CNS disorders and the relationship of drug exposure in plasma and CNS to pharmacodynamic measures in both animals and humans. Includes comprehensive coverage of biomarker tools and the role of personalized medicine in CNS drug development Discusses strategies for drug development for a full range of CNS indications, with particular attention to neuropsychiatric and neurocognitive disorders Includes chapters written by international experts from industry and academia

**Key Concepts in Medical Sociology** Jonathan Gabe, Mike Bury, Mary Ann Elston. 2004-03-18 `This book is a must have for students and lecturers alike. Students because it gives them model essays on frequently set topics, lecturers because it gives them thumbnail overviews and up to date bibliographies on topics they might not cover in their courses. It is written without repetition - which is quite a feat - and provides authoritative statements on the state of the art in medical sociology' - Kevin White Reader in Sociology, Australian National University `The entries, written by a couple of dozen colleagues, are concise, intelligent, and full of both specific examples and theoretical trends in the field. Key Concepts will be a valuable companion to medical sociology texts and anthologies, and an important permanent reference work as well' - Phil Brown Professor of Sociology and Environmental Studies, Brown University `It is intended to provide more depth than a dictionary or than is usually found in textbooks, and the authors achieve this objective admirably... it provides an excellent and readable introduction to the subject the subject for students whose course involves medical sociology, health researchers, or health professionals who want to understand more about the social context of their work' - British Journal of Occupational Therapy Written with the needs of today's student in mind, the SAGE Key Concepts series provides accessible, authoritative and reliable coverage of the essential issues in a range of disciplines. Written in each case, by experienced and respected experts in the subject area, the books are indispensable study aids and guides to comprehension. Cross-referenced throughout, the format encourages understanding without sacrificing the level of detail and critical evaluation essential to convey the complexity of the issues. Key Concepts in Medical Sociology: · provides a systematic and accessible introduction to medical sociology · begins each 1500 word entry with a definition of the concept, then examines its origins, development, strengths and weaknesses · offers further reading guidance for independent learning · draws on international literature and examples · is essential reading for undergraduates in medical sociology as well as students taking courses with a medical sociology component.

**The Narcissistic / Borderline Couple** Joan Lachkar. 2004-06 In this second edition of her groundbreaking book, Dr. Joan Lachkar addresses the ever-changing faces and phases of narcissism within the context of marital therapy and discusses the new developments in the treatment of marital conflict. Drawing from many different theoretical frameworks, mainly self-psychology (Kohut) and object relations (Klein), the works of D.W. Winnicott, and Kernberg are expanded to further explain why couples stay in painful, conflictual, never-ending relationships (traumatic bonding). The new chapters, case illustrations, and updated treatment sequences are invaluable to both beginning and experienced clinicians. The Narcissistic / Borderline Couple is an essential text for every marital therapist, offering an improved understanding of marital pathology within the framework of our changing world.

**Coping with Disease** Annette V. Lee. 2005 If there is a single challenge a person faces in every stage of life from birth to death, it is the necessity of coping with life's exigencies. These often include health problems, social stress, and perceived difficulties. The ability to deal with these issues defines an individual to a large extent and can accelerate or brake one's development in the multitude of mental and physical pathways intrinsic to life. Coping behaviours include talking out a problem, crying, laughing, relaxation, ignoring the problem, praying, looking for the positive aspects of a situation, assuming everything is terrible, taking medication, hoping a problem will go away, attacking the problem with willpower, cognitive therapy etc. This new book examines new research which will shed light on coping behaviours in a vast array of disease situations.

**The Psyche in Antiquity** Edward F. Edinger. 1999

**Inflammation and Stroke** Giora Z. Feuerstein. 2012-12-06 Stroke is a leading cause of death in developed countries. However, current therapeutic strategies for stroke have been largely unsuccessful. One possible explanation is that research and pharmacological management have focused on very early events in brain ischemia. New research has shown that brain ischemia and trauma elicit strong inflammatory reactions driven by both external and brain cells. The recognition of inflammation as a fundamental response to brain ischemia provides novel opportunities for new anti-inflammatory therapies. For the first time, an international body of researchers presents the latest findings about the cellular and humoral aspects of immune and inflammatory reactions in the brain. The work may have an impact on the treatment of neuroinjuries and ancillary brain diseases, and increase the understanding of the roles infections and immune reactions play in the brain milieu.

**Treating Opioid Addiction** John F. Kelly, Sarah E. Wakeman. 2019-07-15 This book addresses opioids and opioid use disorders from epidemiological, clinical, and public health perspectives. It covers detailed information on the nature of opioids, their effects on the human body and brain, prevention, and treatment of opioid addiction. Unlike other texts, the first section of this volume builds a strong historical, neurobiological, and phenomenological foundation for a deep understanding of the topic and the patient. The second section addresses the most challenging issues clinicians face, including pharmacological and psychosocial treatments, harm reduction approaches, alternative approaches to pain management for the non-specialist, and prescribing guidelines. *Treating Opioid Addiction* is a valuable resource for psychiatrists, psychologists, addiction medicine physicians, primary care physicians, drug addiction counselors, students, trainees, scholars, and public health officials interested in the effects and impact of opioids in the clinical and epidemiological context.

*Pathology and the Postmodern* Dwight Fee. 2000-02-11 'This is a wonderful volume, powerfully written, timely, insightful, and filled with major pieces; the passion, intellectual rigor and sense of history found here promises to shape this field in the decades to come. This volume sets the agenda for the future' - Norman K Denzin, University of Illinois Pathology and the Postmodern explores the relationship between mental distress and social constructionism using new work from eminent scholars in the fields of sociology, psychology and philosophy. The authors address: how specific cultural, economic and historical forces converge in contemporary psychiatry and psychology; how new syndromes, subjectivities and identities are being constructed and

*Aggression in Personality Disorders and Perversions* Otto F. Kernberg. 1992-01-01 In this important new book, Dr. Otto F. Kernberg, one of the world's foremost psychoanalysts, explores the role of aggression in severe personality disorders and in normal and perverse sexuality, integrating new developments in psychoanalytic theory with findings from clinical work with severely regressed patients. The book also integrates Dr. Kernberg's recent studies of the descriptive, structural, and psychodynamic features of problems stemming from pathological aggression with the vicissitudes of their psychoanalytic treatment. Finally, Dr. Kernberg demonstrates the importance of differential diagnosis for effective psychoanalytically inspired treatment of these disorders, providing a rich variety of clinical illustrations. The book begins by relating the dual-drive theory of libido and aggression to contemporary developments in affect theory. Dr. Kernberg then applies this general theory of affects to aggression, which in its pathological form centers on the affect of hatred. He analyzes sado-masochistic, hysterical-hysteroid, and narcissistic-antisocial spectrums of personality disorders, emphasizing how aggression is structured in each group. Dr. Kernberg next describes and updates the theoretical frame underlying his approach to the treatment of these disorders, outlines their clinical manifestations, and illustrates their diagnosis and treatment, ranging from standard psychoanalysis with infantile personalities, to psychoanalytic psychotherapy with borderline personalities, to the psychotherapeutic approach to the treatment of psychosis and hospital milieu treatment in the management of highly regressed patients. In the final section, Dr. Kernberg links the findings from psychoanalytic approaches to personality disorders with those from the psychoanalytic study of sexual perversions.

*Integrative Psychiatry* Daniel A. Monti, Bernard D. Beitman. 2010 Contemporary psychiatry is a field that is especially conducive to the principles of integrative medicine. With the exception of a few disorders, such as schizophrenia, most psychiatric disorders respond to interventions other than drugs. Patients who have not tolerated or not responded optimally to traditional treatments are also good candidates for integrative treatments. Additionally, herbals such as St. John's wort for the treatment of depression and ginkgo for the treatment of memory impairment in dementia have been found effective in traditional clinical trials. Patients' use of alternative and complementary therapies in psychiatry has created a need for physicians to become informed about these treatments, to advise patients on their efficacy, and to be able to make judgments on integrating these therapies into existing regimens, including discussions of such issues as potential drug-herb interactions. In this volume in the Weil Integrative Medicine Library, the authors describe a rational and evidence-based approach to the integrative therapy of mental disorders integrating the principles of alternative and complementary therapies into the principles and practice of conventional psychiatry and psychology. The authors will examine what works and what doesn't, and offer practical guidelines for physicians to incorporate integrative medicine into their practice and to advise patients on reasonable and effective therapies. The text discusses areas of controversy and identifies areas of uncertainty where future research is needed. Chapters also cite the best available evidence for both the safety and the efficacy of all therapies discussed. The information is presented in accessible and easy-to-read formats, including clinical pearls and key points, with a second text color for highlighting key information.

*Neurobiology of Violence* Jan Volavka. 2008-08-13 Every clinician today needs a basic understanding of what causes violent behavior. The second edition of *Neurobiology of Violence* synthesizes current research on the origins of violence and reveals its implications for managing aggressive patients and minimizing risk. Author Jan Volavka, currently Chief of Clinical Research at the Nathan S. Kline Institute, spent time in a Nazi prison as a child and has devoted much of his career to studying violence in humans. In *Neurobiology of Violence, Second Edition*, he brought together research and clinical data from many diverse disciplines in a single-authored volume with a unified voice that is clearly written and interesting to read. *Neurobiology of Violence, Second Edition*, will give you a firm grounding in a complex subject that will help you diagnose, manage, and predict violent behavior. In the first part of the book you'll examine the basic science of the origins of violence in humans, such as Factors in animal aggression that have parallels in human aggression, including the relationship between serotonin and aggression The genetic and environmental factors that interplay from conception to adulthood to result in violence. In the latter part, you'll develop new insights and strategies for working with violent patients in discussions of the latest clinical science, including Major mental disorders and violent behaviors, including behaviors expressed in the community and those in psychiatric hospitals Alcohol and various drugs and the tendencies of each type of abuse to predispose people to violence Current psychopharmacological approaches to managing violent behavior in patients. With more than 1000 updated references, the second edition of *Neurobiology of Violence* is a seminal resource for clinicians. It is an important tool for psychiatrists, neurologists, psychologists, and all other clinicians who struggle to understand and treat violent patients.

*Narrative and Identity* Jens Brockmeier, Donal A. Carbaugh. 2001-01-01 Annotation This text evolved out of a December 1995 conference at the International Research Center for Cultural Studies (IFK) in Vienna, attended by scholars from psychology, psychiatry, philosophy, social sciences, literary theory, classics, communication, and film theory, and exploring the importance of narrative as an expression of our experience, as a form of communication, and as a form for understanding the world and ourselves. Nine scholars from Canada, the US, and Europe contribute 12 essays on the relationship between narrative and human identity, how we construct what we call our lives and create ourselves in the process. Coverage includes theoretical perspectives on the problem of narrative and self construction, specific life stories in their cultural contexts, and empirical and theoretical issues of autobiographical memory and narrative identity. **How to Talk to a Narcissist** Joan Lachkar. 2008-04-03 Much has been written about narcissism, addressing not only its theoretical aspects, its psychodynamics and the defense mechanisms within the spectrum of various kinds of narcissists. Yet, little if anything has been written about how to actually communicate with one, or what Lachkar refers to as the "Language of Empathology." This book focuses on specific communication styles in addressing patients with severe narcissistic personality pathology which can be extremely beneficial to mental health professionals, who are often inundated with technical terms rather than offered a practical guide on how to actually talk to a narcissist. *How to Talk to a Narcissist* is designed to be a guide useful to both beginning and seasoned practitioners. The book is recommended to all clinicians treating individuals, couples, groups,

within the scope of various narcissistic personality disorders. The book has many applications, including use as a textbook for universities, clinics, graduate courses, and analytic training institutes. People in business, partnerships, commercial sales, and human resources will also find the approach to communicating with a narcissist most valuable.

Regulated Agent-Based Social Systems Gabriela Lindemann, Daniel Moldt. 2004-02-10 This book presents selected extended and reviewed versions of the papers accepted for the First International Workshop on Regulated Agent Systems: Theory and Applications, RASTA 2002, held in Bologna, Italy, in July 2002, as part of AAMAS 2002. In addition, several new papers on the workshop theme are included as well; these were submitted and reviewed in response to a further call for contributions. The construction of artificial agent societies deals with questions and problems that are already known from human societies. The 16 papers in this book establish an interdisciplinary community of social scientists and computer scientists devoting their research interests to exploiting social theories for the construction and regulation of multi-agent systems.

**Biomechanics in Sport: Performance Enhancement and Injury Prevention** Vladimir Zatsiorsky. 2008-04-15 Biomechanics in Sport is a unique reference text prepared by the leading world experts in sport biomechanics. **Person Centered Psychiatry** Juan E. Mezzich, Michel Botbol, George N. Christodoulou, C. Robert Cloninger, Ihsan M. Salloum. 2017-01-26 This book presents an authoritative overview of the emerging field of person-centered psychiatry. This perspective, articulating science and humanism, arose within the World Psychiatric Association and aims to shift the focus of psychiatry from organ and disease to the whole person within their individual context. It is part of a broader person-centered perspective in medicine that is being advanced by the International College of Person-Centered Medicine through the annual Geneva Conferences held since 2008 in collaboration with the World Medical Association, the World Health Organization, the International Council of Nurses, the International Federation of Social Workers, and the International Alliance of Patients' Organizations, among 30 other international health institutions. In this book, experts in the field cover all aspects of person-centered psychiatry, the conceptual keystones of which include ethical commitment; a holistic approach; a relationship focus; cultural sensitivity; individualized care; establishment of common ground among clinicians, patients, and families for joint diagnostic understanding and shared clinical decision-making; people-centered organization of services; and person-centered health education and research.

Cognitive Approaches in Neuropsychological Rehabilitation Xavier Seron, Gérard Deloche. 2018-09-03 Originally published in 1989, presenting a new perspective on cognitive therapy in neuropsychology, these papers examine a cognitively-oriented, single-case methodology in neuropsychological rehabilitation. The recommended strategy is in-depth analysis of the precise nature of the impaired as well as the preserved processing components in the individual patient. The objective is to design a therapeutic course based on individual patient needs that is justified by the theoretical interpretation of the location of the deficit in his or her cognitive architecture.

*Living with Dementia* Veljko Dubljević, Frances Bottenberg. 2021-01-22 This book addresses current issues in the neuroscience and ethics of dementia care, including philosophical as well as ethical legal, and social issues (ELSI), issues in clinical, institutional, and private care-giving, and international perspectives on dementia and care innovations. As such, it is a must-read for anyone interested in a well-researched, thought-provoking overview of current issues in dementia diagnosis, care, and social and legal policy. All contributions reflect the latest neuroscientific research on dementia, either broadly construed or in terms of the etiologies and symptoms of particular forms of dementia. Given its interdisciplinary and international scope, its depth of research, and its qualitative emphasis, the book represents a valuable addition to the available literature on neuroethics, gerontology, and neuroscientific memory research.
