**Queer Universes** Wendy G. Pearson,Veronica Hollinger,Joan Gordon.2008 Disputes over the meaning and practice of sexuality have become increasingly central to cultural self-definition. It is hardly surprising then that science fiction, the province of new physical and psychological frontiers, has taken up the task of imagining a diverse range of queer and not-so-queer futures. *Queer Universes* is a landmark investigation into these contemporary and historical representations of gender and sexualities—including Wendy Pearson's award-winning essay on reading science fiction queerly, as well as essays discussing "sextrapolation" in New Wave science fiction, "stray penetration" in William Gibson's cyberpunk works, the queering of nature in ecofeminist sci-fi, and the radical challenges posed to conventional science fiction in the work of important writers such as Samuel R. Delaney, Ursula K. Le Guin, and Joanna Russ. In addition, this distinguished volume offers interviews with acclaimed science fiction writers, along with an array of essays from scholars and science fiction giants alike.

**Parabolas of Science Fiction** Brian Attebery,Veronica Hollinger.2013-07-15 As a geometric term, parabola suggests a narrative trajectory or story arc. In science fiction, parabolas take us from the known to the unknown. More concrete than themes, more complex than motifs, parabolas are combinations of meaningful setting, character, and action that lend themselves to endless redefinition and jazzlike improvisation. The fourteen original essays in this collection explore how the field of science fiction has developed as a complex of repetitions, influences, arguments, and broad conversations. This particular feature of the genre has been the source of much critical commentary, most notably through growing interest in the "sf megatext," a continually expanding archive of shared images, situations, plots, characters, settings, and themes found in science fiction across media. Contributors include Jane Donawerth, Terry Dowling, L. Timmel Duchamp, Rachel Haywood Ferreira, Pawel Frelik, David M. Higgins, Amy J. Ransom, John Rieder, Nicholas Ruddick, Graham Sleight, Gary K. Wolfe, and Lisa Yaszek.

[The Best of the Best](#) Gardner Dozois.2005-02-01 For years, *The Year's Best Science Fiction* has been the most widely read short science fiction anthology of its kind. *Reading by Starlight* Damien Broderick.2005-06-29 Reading by Starlight explores the characteristics in the writing, marketing and reception of science fiction which distinguish it as a genre. Damien Broderick explores the postmodern self-referentiality of the sci-fi narrative, its intricate coded language and discursive 'encyclopaedia'. He shows how, for perfect understanding, sci-fi readers must learn the codes of these imaginary worlds and vocabularies, all the time picking up references to texts by other writers. Reading by Starlight includes close readings of paradigmatic cyberpunk texts and writings by SF novelists and theorists including Isaac Asimov, Arthur C. Clarke, Brian Aldiss, Patrick Parrinder, Kim Stanley Robinson, John Varley, Roger Zelazny, William Gibson, Fredric Jameson and Samuel R. Delaney.

**The Routledge Introduction to Canadian Fantastic Literature** Allan Weiss.2020-12-29 This study introduces the history, themes, and critical responses to Canadian fantastic literature. Taking a chronological approach, this volume covers the main periods of Canadian science fiction and fantasy from the early nineteenth century to the first decades of the twenty-first century. The book examines both the texts and the contexts of Canadian writing in the fantastic, analyzing themes and techniques in novels and short stories, and looking at both national and international contexts of the literature's history. This introduction will offer a coherent narrative of Canadian fantastic literature through analysis of the major texts and authors in the field and through relating the authors' work to the world around them.

**Evaporating Genres** Gary K. Wolfe.2011-01-03 In this wide-ranging series of essays, an award-winning science fiction critic explores how the related genres of science fiction, fantasy, and horror evolve, merge, and finally "evaporate" into new and more dynamic forms. Beginning with a discussion of how literary readers "unlearned" how to read the fantastic during the heyday of realistic fiction, Gary K. Wolfe goes on to show how the fantastic reasserted itself in popular genre literature, and how these genres themselves grew increasingly unstable in terms of both narrative form and the worlds they portray. More detailed discussions of how specific contemporary writers have promoted this evolution are followed by a final essay examining how the competing discourses have led toward an emerging synthesis of critical approaches and vocabularies. The essays cover a vast range of authors and texts, and include substantial discussions of very current fiction published within the last few years.

*Liminal Lives* Susan Merrill Squier.2004-11-16 Embryo adoptions, stem cells capable of transforming into any cell in the human body, intra- and inter-species organ transplantation—these and other biomedical advances have unsettled ideas of what it means to be human, of when life begins and ends. In the first study to consider the cultural impact of the medical transformation of the entire human life span, Susan Merrill Squier argues that fiction—particularly science fiction—serves as a space where worries about ethically and socially charged scientific procedures are worked through. Indeed, she demonstrates that in many instances fiction has anticipated and paved the way for far-reaching biomedical changes. Squier uses the anthropological concept of liminality—the state of being on the threshold of change, no longer one thing yet not quite another—to explore how, from the early twentieth century forward, fiction and science together have altered not only the concept of the human being but the contours of human life. Drawing on archival materials of twentieth-century biology; little-known works of fiction and science fiction; and twentieth- and twenty-first century U.S. and U.K. government reports by the National Institutes of Health, the Parliamentary Advisory Group on the Ethics of Xenotransplantation, and the President's Council on Bioethics, she examines a number of biomedical changes as each was portrayed by scientists, social scientists, and authors of fiction and poetry. Among the scientific developments she considers are the cultured cell, the hybrid embryo, the engineered intrauterine fetus, the child treated with human growth hormone, the process of organ transplantation, and the elderly person rejuvenated by hormone replacement therapy or other artificial means. Squier shows that in the midst of new phenomena such as these, literature helps us imagine new ways of living. It allows us to reflect on the possibilities and perils of our liminal lives.

**The Year's Best Science Fiction: Seventeenth Annual Collection** Gardner Dozois.2000-08-12 In science fiction's early days, stories often looked past 1984 to the year 2000 as the far unknowable future. In a high-tech future, the line between reality and simulation has grown thin . . . and it's often hard to tell who's on what side. *Everywhere* by Geoff Ryman. Le Guin's *The Shobies' Story* returns to the Hainish worlds with a reality-defining story, while Joe Haldeman's *The Hemmingway Hoax* embarks from our world on a time-defying trip through other possibilities. Kate Wilhelm, Michael Moorcock, Robert Silverberg, and John Brunner demonstrate too with their stories why they remain among the most popular science fiction writers of all time. With the closing of a decade and cyberpunk virtually becoming reality, many of the leading writers of the eighties have begun to bring new insight and vision to their fiction: Bruce Sterling examines a classic clash of cultures in *We See Things Differently*, and James Patrick Kelly's *Mr. Boy* presents a hard-edged story about the guts of growing up. Lewis Shiner's *White City* and Connie Willis's *Cibola* both seek peace--of sorts--amid spectacle, and works by Nancy Kress, Lucius Shepard and Robert Frazier, Pat Murphy, and John Kessel also dazzle and amaze. **Posthuman Pathogenesis** Başak Aşın,Şafak Horzum.2022-07-07 This multi-vocal assemblage of literary and cultural responses to contagions provides insights into the companionship of posthumanities, environmental humanities, and medical humanities to shed light on how we deal with complex issues like communicable diseases in contemporary times. Examining imaginary and real contagions, ranging from Jeep and SHEVA to plague, HIV/AIDS, and COVID-19, *Posthuman Pathogenesis* discusses the inextricable links between nature and culture, matter and meaning-making practices, and the human and the nonhuman. Dissecting pathogenic nonhuman bodies in their interactions with their human counterparts and the environment, the authors of this volume raise their diverse voices with two primary aims: to analyse how contagions trigger a drive to survival, and chaotic, liberating, and captivating impulses, and to focus on the viral interpolations in socio-political and environmental systems as a meeting point of science, technology, and fiction, blending social reality and myth. Following the premises of the post-qualitative turn and presenting a differentiated experience of contagion, this 'rhizomatic' compilation thus offers a non-hierarchised array of essays, composed of a multiplicity of genders, geographies, and generations.
