Authenticity in Nature Nigel Dudley.2012-03-12 This book examines the concept of naturalness in ecosystems, discusses its values and considers choices about the level of naturalness in conservation efforts. The author argues that all ecosystems have been modified and the idea of places 'untouched by humans' is a myth. But there are large differences in the degree of modification and levels of naturalness which can be identified. Changes are not always irreversible; some apparent wilderness areas are sites of former civilizations. There is no longer any simple distinction possible between 'natural' and 'cultural' systems. In the future, society will, to some extent, choose the degree of naturalness in land and seascapes. The growth of protected areas is an early sign of this, as are changes in forest management, dam removal and control of invasive species. To make informed choices about these areas, the author shows that we must understand the characteristics and values of naturally regulating ecosystems - their practical benefits, social values and management needs. *Authenticity in Nature* uses a rigorous definition of authenticity to help in the understanding and measurement of naturalness. It discusses the choices facing us and some of the information we need to make decisions relating to land and water management. Practical issues of management and numerous terrestrial and aquatic examples from around the world are discussed. It is an optimistic and highly original book, aiming to make genuine advances in our understanding and management of natural systems.

Skarns in British Columbia Gerald E. Ray, I. C. L. Webster, British Columbia. Ministry of Employment and Investment, British Columbia. Geological Survey Branch.1997 Skarns in British Columbia have historically been important sources of iron, tungsten, copper, and gold. This publication begins with an introduction on skarn terminology and the problems of skarn identification. It then reviews a genetic model of skarn formation and presents descriptive profiles of eight types of skarn deposits; describes the database of at least 735 skarn occurrences in the province, and the number and distribution of skarns in British Columbia according to their associations, class, age, and distribution; and notes the ages of British Columbia skarns and the total production of various metals extracted from British Columbia skarns. Subsequent sections provide information on assays and metal ratios of mineralized skarns, skarn mineralogy, skarn mineral chemistry, chemistry of skarn-related intrusions, and the mapping and evaluation of skarns. The appendix contains a listing of 735 skarn occurrences in British Columbia, giving deposit name, MINFILE number, latitude/longitude, elements and minerals present, and associated rocks and their ages.

Limited by Design Michael Crow, Barry Bozeman.1998-09-25 *Limited by Design* is the first comprehensive study of the varying roles played by the more than 16,000 research and development laboratories in the U.S. national innovation system. Michael Crow and Barry Bozeman offer policy makers and scientists a blueprint for making more informed decisions about how to best utilize and develop the capabilities of these facilities. Some labs, such as Bell Labs, Westinghouse, and Eastman Kodak, have been global players since the turn of the century. Others, such as Los Alamos National Laboratory, have been mainstays of the military/energy industrial complex since they evolved in the 1940s. These and other institutions have come to serve as the infrastructure upon which a range of industries have relied and have had a tremendous impact on U.S. social and economic history. Michael Crow and Barry Bozeman illustrate the histories, missions, structure, and behavior of individual laboratories, and explore the policy contexts in which they are embedded. In studying this large and varied collection of labs, Crow, Bozeman, and their colleagues develop a new framework for understanding the structure and behavior of laboratories that also provides a basis for rationalizing federal science and technology policy to create more effective laboratories. The book draws upon interviews and surveys collected from thousands of scientists, administrators, and policy makers, and features boxed lab windows throughout that provide detailed information on the variety of laboratories active in the U.S. national innovation system. *Limited by Design* addresses a range of questions in order to enable policy makers, university administrators, and scientists to plan effectively for the future of research and development.

The Geology of Chile Teresa Moreno (Ph. D.), Wes Gibbons.2007 This book is the first comprehensive account in English of the geology of Chile, providing a key reference work that brings together many years of research, and written mostly by Chilean authors from various universities and other centres of research excellence. The 13 chapters begin with a general overview, followed by detailed accounts of Andean tectonostratigraphy and magmatism, the amazingly active volcanism, the world class ore deposits that have proven to be so critical to the welfare of the country, and Chilean water resources. The subject then turns to geophysics with an examination of neotectonics and earthquakes, the hazardous frequency of which is a daily fact of life for the Chilean population. There are chapters on the offshore geology and oceanography of the SE Pacific Ocean, subjects that continue to attract much research not least from those seeking to understand world climatic variations, and on late Quaternary land environments, concluding with an account examining human colonization of southernmost America. The geological evolution of Chile is the c. 550 million year history of a continental margin over 4000 km long. During his voyage on H.M.S. Beagle, an extended visit to Chile (1834-35) had a profound impact on Charles Darwin, especially on his understanding of volcanoes, earthquakes and tsunamis.

Carbonatites, Nepheline Syenites, Kimberlites and Related Rocks in British Columbia British Columbia. Geological Survey Branch, Jennifer Pell, British Columbia. Ministry of Energy, Mines and Petroleum Resources, Canada/British Columbia Mineral Development Agreement.1994 This study documents alkaline rock occurrences in British Columbia; describes their petrography, geochemistry, economic geology, and field relationships; and determines the timing and tectonic controls of emplacement, providing a basis for future, detailed studies. Work was begun in 1984 and included field mapping during the summers of 1984, 1985, and 1986. All the carbonatite-syenite localities (with the exception of the Wicheeda Lake and Mount Bisson showings) and a large number of the diatreme breccias were mapped and sampled.

Twelve Years a Slave Solomon Northup.2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

A World Dictionary of Livestock Breeds, Types and Varieties Ian Lauder Mason.1996 This dictionary covers cattle, sheep, pigs, goats, horses, donkeys and buffalo. It includes all names which have been applied to interbreeding groups of these species whether they are called breeds, sub-breeds, types, varieties, strains or lines. The region or country of origin of each group is given and this is followed by a very brief description of the breed in terms of products, color, and major morphological features. There is a note on the history of the breed and the dates of formation of breed societies and herdbooks. Synonyms for its name are listed as well as the present conservation status. This new edition includes approximately 9,000 entries, of which 5,000 are main entries and 4,000 are cross references. This represents an increase on the third edition of 18% for main entries and 13% for cross references. The highest proportion of new breed entries are in the horse and pig chapters. Furthermore some 2,300 entries (30%) have been amended. These include 400 major changes, such as new name, extinction, or the extension of a bare name to a complete entry. They also include 1,900 entries with minor changes, for example new breed society, new synonyms, additions to distribution or description, changes in spelling or of conservation status. China features strongly in all additions and amendments. In addition to these changes references to USSR, Yugoslavia and Czechoslovakia have been corrected in accordance with the current country names. Overall the book continues to represent the standard reference work for all concerned with domestic livestock, particularly those involved in animal breeding and genetics.

Mestizo Logics Jean-Loup Amselle.1998 This innovative work seeks to reverse the perspective and reasoning of anthropology and to develop an alternative mode of conceiving culture that would not automatically privilege the colonizing West. That necessarily involves a critique of the "ethnological reason" that extracts elements from their context, aestheticizes them, and then uses their supposed differences to classify types of political, economic, or religious ensembles. Such "reason" yields classical oppositions like the State versus segmentary societies, market versus subsistence economies, and Islam or Christianity versus paganism. As an alternative, the author opposes to exclusionary categories a "mestizo logic" that sees social phenomena as situated on a continuum and accentuates indistinction and the originary syncretism in all cultures and other ways of categorizing human life. The book's rich source material is drawn from the author's fifteen years of fieldwork and research in West Africa. The opening chapters first treat the notion of ethnological reason?its history and ideological practices?then oppose to it the reality of cultural tension, the fact that conflicts and negotiations bring about transformations in the identity of collectivities. The following two chapters illustrate a real system of transformation, and question some basic concepts of political anthropology. The discussion continues in a more illustrative manner over the next two chapters, which present case studies of two West African societies that challenge typologies of political anthropology and ethnographic classification. The last three chapters?on white paganism, cultural identities and cultural models, and understanding and acting?situate the debate within a wider historical framework of political and cultural confrontations. Who defines "ethnicities," "identities," "differences"? Where can one find them as pure essences witnessing to their own originary beings?

Time- and Strata-Bound Ore Deposits D.D. Klemm,H.-J. Schneider.2012-12-06 The problem of time-and strata-bound formation of ore deposits has during the past decade become one of the most debated topics in current international discussion. Due to the amazing results of modern mineral exploration and world-wide geophysical research, the mutual relationship between the complex geological history of a crustal segment and the development of distinct metallogenic provinces (ore belts) has received much interest. Reviewing the earth's history in this light one can now recognize metallogenic epochs even of global range which document the existence of world-wide time-bound ore enrichments. The knowledge of these metallogenic processes has been growing step by step for several decades. It began with simple observations and sceptic interpretations, which at first threw heretical spot lights on to the edifices of the prevailing theories on granitic differentiation as the favoured source of ore deposits. It was obvious that the new ideas at first referred to ore enrichments in sedimentary sequences, nowadays summarized under the term strata-bound, and mainly interpreted as stratiform or sedimentary ore deposits. Moreover, the modern term strata-bound also includes ore mineralizations which are bound to distinct units of layered (intrusive or extrusive) igneous complexes as a general descriptive term without genetical restriction! Albert Maucher is one of the representatives of the initial era who discussed these genetical questions critically in the decade before the 2nd World War.

This little spruce asks the same two questions of every creature he meets: What is Christmas? What is a Christmas tree? The little tree hears no response until one day he shelters a white dove from a storm. Through this friendship, the little tree learns the meaning of love, sacrifice and Christmas. Since its first publication in 1990, the book has become a Christmas favourite. The new edition features a sparkly foil cover, redesigned artwork and an extended page count. An African Slaving Port and the Atlantic World Mariana Candido.2013-03-29 This book traces the history and development of the port of Benguela, the third largest port of slave embarkation on the coast of Africa, from the early seventeenth to the mid-nineteenth century. Benguela, located on the central coast of present-day Angola, was founded by the Portuguese in the early seventeenth century. In discussing the impact of the transatlantic slave trade on African societies, Mariana P. Candido explores the formation of new elites, the collapse of old states and the emergence of new states. Placing Benguela in an Atlantic perspective, this study shows how events in the Caribbean and Brazil affected social and political changes on the African coast. This book emphasizes the importance of the South Atlantic as a space for the circulation of people, ideas and crops.

The Atlantic Slave Trade Joseph E. Inikori, Stanley L. Engerman.1992-04-30 Debates over the economic, social, and political meaning of slavery and the slave trade have persisted for over two hundred years. The Atlantic Slave Trade brings clarity and critical insight to the subject. In fourteen essays, leading scholars consider the nature and impact of the transatlantic slave trade and assess its meaning for the people transported and for those who owned them. Among the questions these essays address are: the social cost to Africa of this forced migration; the role of slavery in the economic development of Europe and the United States; the short-term and long-term effects of the slave trade on black mortality, health, and life in the New World; and the racial and cultural consequences of the abolition of slavery. Some of these essays originally appeared in recent issues of *Social Science History*; the editors have added new material, along with an introduction placing each essay in the context of current debates. Based on extensive archival research and detailed historical examination, this collection constitutes an important contribution to the study of an issue of enduring significance. It is sure to become a standard reference on the Atlantic slave trade for years to come. Contributors. Ralph A. Austen, Ronald Bailey, William Darity, Jr., Seymour Drescher, Stanley L. Cloth in West African History Colleen E. Kriger.2006-06-08 In this holistic approach to the study of textiles and their makers, Colleen Kriger charts the role cotton has played in commercial, community, and labor settings. She pays close attention the details of how people made, exchanged, and wore cotton cloth from before industrialization in Europe to the twentieth century. Closely tracing this history in Nigeria, Cloth in West African History offers a fresh perspective on the history of the region and on the local, regional, and global processes that shaped it.
