Female Fans of the NFL Anne Cunningham Osborne, Danielle Sarver Coombs. 2015-09-16 In the past, sport, particularly football, has been defined as a male domain. Women's interest stereotypically ranges from gentle tolerance to active resistance. But increasingly, women are proudly identifying themselves as supporters of their teams, and have become highly desirable audiences for sport organizations and merchandisers. Football provides a unique site at which to examine the complex interplay between three theoretical areas: identity formation and maintenance, commercialization of cultural practices, and gender hegemony. This book explores how women experience their fandom, and what barriers exist for the female fan.

Sport and Body Politics in Japan Wolfram Manzenreiter.2013-08-15 There is more to Japanese sport than sumo, karate and baseball. This study of social sport in Japan pursues a comprehensive approach towards sport as a distinctive cultural sphere at the intersection of body culture, political economy, and cultural globalization. Bridging the gap between Bourdieu and Foucault, it explains the significance of the body as a field of action and a topic of discourse in molding subject and society in modern Japan. More specifically, it provides answers to questions such as how and to what purposes are politics of the body articulated in Japan, particularly in the realm of sport? What is the agenda of state actors that develop politics aiming at the body, and to what degree are political and societal objectives impacted by commercial and non-political actors? How are political decisions on the allocation of resources made, and what are their consequences for sporting opportunities and practices of the body in general? Without neglecting the significance of sport spectatorship, this study takes a particular angle by looking at sport as a field of practice, pain and pleasure.

There are chapters on seizure for security and enforcement of judgments, and a final section on alternative dispute resolution. Political Consumerism Dietlind Stolle,Michele Micheletti.2013-08-26 Political Consumerism captures the creative ways in which citizens, consumers and political activists use the market as their arena for politics. This book theorizes, describes, analyzes, compares and evaluates the phenomenon of political consumerism and how it attempts to use market choice to solve complex globalized problems. It investigates theoretically and empirically how and why consumers practice citizenship and have become important political actors. Dietlind Stolle and Michele Micheletti describe consumers' engagement as an example of individualized responsibility taking, examining how political consumerism nudges and pressures corporations to change their production practices, and how consumers emerge as a force in global affairs. Unlike other studies, it also evaluates if and how consumer actions become effective mechanisms of global change. Stolle and Micheletti offer a candid discussion of the limitations of political consumerism as a form of participation and as a problem-solving mechanism.

Defining Sport Shawn E. Klein.2016-12-14 *Defining Sport: Conceptions and Borderlines* is not about the variations of usage of the term “sport.” It is about the concept, the range of activities in the world that we unite into one idea—sport. It is through the project of defining sport that we can come to understand these activities better, how they are similar or different, and how they relate to other human endeavors. This definitional inquiry, and the deeper appreciation and apprehension of sport that follows, is the core of this volume. Part I examines several of the standard and influential approaches to defining sport. Part II uses these approaches to examine various challenging borderline cases. These chapters examine the interplay of the borderline cases with the definition and provide a more thorough and clearer understanding of both the definition and the given cases. This work is not meant to be the definitive or exhaustive account of sport. It is meant to inspire further thought and debate on just what sport is; how it relates to other activities and human endeavors; and what we can learn about ourselves through the study of sport. This book will be of interest to scholars in philosophy of sport, history, communications, sociology, psychology, sports management, cultural studies, and physical education.

Global Sport Business Hans Westerbeek.2013-09-13 Global Sport Business: The Community Impact of Commercial Sport involves a range of pressing issues that come with the arrival of sport as a commodity in the world economy. It can be argued that, throughout the past two centuries, sport has always been recognized as both a frivolous pursuit of spending leisure time with friends and family, and as an activity that has substantial commercial value to be mined by entrepreneurs. However, only during the most recent wave of globalization, spurred by technological advancements that have led to achieving global reach in regard to potential customers, has sport entered a global marketplace that offers tremendous financial rewards for those who manage to control international sport organizations and events. In this book, global sport business is viewed from a number of different perspectives including a value chain approach to describing the sport industry; the ever increasing impact of the international media on sport business; how globalization influences the style of (sport) management; how social capital can be generated through sport business; and the emergence of social sport business. Overall, the different contributors to the book reflect on how sport's global (and as such commercial) attractiveness can, and often will impact locally, on communities of people and individuals. This book was published as a special issue of *Sport in Society*.

Rules Without Rights Tim Bartley.2018 Activists have exposed startling forms of labor exploitation and environmental degradation in global industries, leading many large retailers and brands to adopt standards for fairness and sustainability. This book is about the idea that transnational corporations can push these standards through their global supply chains, and in effect, pull factories, forests, and farms out of their local contexts and up to global best practices. For many scholars and practitioners, this kind of private regulation and global standard-setting can provide an alternative to regulation by territorially-bound, gridlocked, or incapacitated nation states, potentially improving environments and working conditions around the world and protecting the rights of exploited workers, impoverished farmers, and marginalized communities. But can private, voluntary standards actually create meaningful forms of regulation? Are forests and factories around the world actually being made into sustainable ecosystems and decent workplaces? Can global norms remake local orders? This book provides striking new answers by comparing the private regulation of land and labor in democratic and authoritarian settings. Case studies of sustainable forestry and fair labour standards in Indonesia and China show not only how transnational standards are implemented 'on the ground' but also how they are constrained and reconfigured by domestic governance. Combining rich multi-method analyses, a powerful comparative approach, and a new theory of private regulation, *Rules without Rights* reveals the contours and contradictions of transnational governance. *Transformations in Governance* is a major new academic book series from Oxford University Press. It is designed to accommodate the impressive growth of research in comparative politics, international relations, public policy, federalism, environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions, down to subnational governments, and side-ways to public-private networks. It brings together work that significantly advances our understanding of the organization, causes, and consequences of multilevel and complex governance. The series is selective, containing annually a small number of books of exceptionally high quality by leading and emerging scholars. The series targets mainly single-authored or co-authored work, but it is pluralistic in terms of disciplinary specialization, research design, method, and geographical scope. Case studies as well as comparative studies, historical as well as contemporary studies, and studies with a national, regional, or international focus are all central to its aims. Authors use qualitative, quantitative, formal modeling, or mixed methods. A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style. The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina, Chapel Hill, and Walter Mattli of the University of Oxford.

It examines the possibilities and limitations of market approaches to securing social compliance in global manufacturing industries. It does so by tracing the historic origins of social labelling both in trade union and consumer constituencies, considering industry and consumer perspectives on the benefits and drawbacks of social labelling, comparing efforts to develop and implement labelling initiatives in various countries, and locating social labelling within contemporary debates and controversies about the implications of globalization for workers worldwide. Post-Humanitarianism Mark Duffield.2018-12-28 The world has entered an unprecedented period of uncertainty and political instability. Faced with the challenge of knowing and acting within such a world, the spread of computers and connectivity, and the arrival of new digital sense-making tools, are widely celebrated as helpful. But is this really the case, or have we lost more than gained in the digital revolution? In *Post-*

Humanitarianism, renowned scholar of development, security and global governance Mark Duffield offers an alternative interpretation. He contends that connectivity embodies new forms of behavioural incorporation, cognitive subordination and automated management that are themselves inseparable from the emergence of precarity as a global phenomenon. Rather than protect against disasters, we are encouraged to accept them as necessary for strengthening resilience. At a time of permanent emergency, humanitarian disasters function as sites for trialling and anticipating the modes of social automation and remote management necessary to govern the precarity that increasingly embraces us all. Post-Humanitarianism critically explores how increasing connectivity is inseparable from growing societal polarization, anger and political push-back. It will be essential reading for students of international and social critique, together with anyone concerned about our deepening alienation from the world.

Labor, Global Supply Chains, and the Garment Industry in South Asia Sanchita Banerjee Saxena. 2019-06-27 This book argues that larger flaws in the global supply chain must first be addressed to change the way business is conducted to prevent factory owners from taking deadly risks to meet clients' demands in the garment industry in Bangladesh. Using the 2013 Rana Plaza disaster as a departure point, and to prevent such tragedies from occurring in the future, this book presents an interdisciplinary analysis to address the disaster which resulted in a radical change in the functioning of the garment industry. The chapters present innovative ways of thinking about solutions that go beyond third-party monitoring. They open up possibilities for a renewed engagement of international brands and buyers within the garment sector, a focus on direct worker empowerment using technology, the role of community-based movements, developing a model of change through enforceable contracts combined with workers movements, and a more productive and influential role for both factory owners and the government. This book makes key interventions and rethinks the approaches that have been taken until now and proposes suggestions for the way forward. It engages with international brands, the private sector, and civil society to strategize about the future of the industry and for those who depend on it for their livelihood. A much-needed review and evaluation of the many initiatives that have been set up in Bangladesh in the wake of Rana Plaza, this book is a valuable addition to academics in the fields of development studies, gender and women's studies, human rights, poverty and practice, political science, economics, sociology, anthropology, and South Asian studies.
