**Extreme IR** Ziv J Haskal.2023-07-12 This book presents 101 unique and extraordinary cases in interventional radiology (IR) and endovascular therapy. Extreme IR is an internationally recognized event that Dr. Ziv Haskal created and held in early 2000's at mountaintop venues, then at successive Society of Interventional Radiology annual conference meetings, and later, published monthly within the Journal of Vascular and Interventional Radiology (JVIR) for which he was editor-in-chief for 10 years. The ever-popular Extreme IR sessions at conferences have drawn more than 5,000 attendees. Cases are presented in a rapid-fire format designed to maximize relevancy, excitement, and unique knowledge. This book aims to replicate that experience for a wider audience. The book is divided into twelve sections, including venous, portal hypertension, and biliary, arterial, oncology, etc. cases. Most cases span two pages and include large, illustrative images with bullet-pointed text to present essential information in a concise and focused fashion. The global list of authors exemplifies the extraordinary breadth of the cases for interventional radiologists, endovascular specialists. **Handbook of Angioplasty and Stenting Procedures** Robert A. Morgan, Eric Walser.2010-01-19 Despite the fact that Interventional Radiology is steadily moving toward a clinical specialty with the need for broad medical training, daily craftsmanship will always remain fundamental to what an interventional radiologist does. Without basic catheter and wire skills IR would not be what it is today. When I watch experienced colleagues work I am always surprised to see that, concerning the technique and the materials, we all make the same choices. There is apparently a common IR skill, which is universal and can be learned with experience. I always see this with new IR fellows, that it

takes time to step away from improvising and letting the procedure take the lead to logic and standardized control over a procedure. Choosing the right materials for the right job and building a level of confidence with these materials is a very important part of any IR fellowship. Why can a supervisor get a stable catheter position with a new wire in no time, whereas the fellow almost gives up? The difference is knowing your materials for this specific indication and combining routine and standardized operational procedures. Hands-on workshops are always very popular at every IR meeting because one can really learn about basic skills. Lectures with the title "How I do it," can always count on a full audience.
