**The Colors of the Earth** Anke Benstem,Kai Dürfeld,Robert Fischer,Silke Haas.2023-07-28 Observed from space, Earth looks like a blue planet, particularly in the wondrous blue tones emanating from south of the equator. Indeed, about two-thirds of the earth's surface is covered in water, and our pride in this is exceeded only by what we feel when witnessing the overwhelming abundance and beauty of our natural scenery. The closer we approach each individual landscape, the greater the color ranges become as nature continues to surprise us. Black volcanic rock erupts into vivid red founts of fire. Sand dunes and mountain peaks shine bright orange under intense sunlight. In contrast, softer pastel tones dominate a blooming heath or lavender field. Our gaze then sweeps over a medley of greens--deep-green pine forests, poison-green reptiles, and light-green fresh undergrowth in valleys. The Colors of the Earth presents unique panoramas that showcase the beauty and opulent diversity of our natural world--that will amaze you and deepen your appreciation of our world.

*The Three Escapes of Hannah Arendt* Ken Krimstein.2018-09-25 Winner of the Bernard J. Brommel Award for Biography & Memoir Best Graphic Novels of the Year-Forbes Jewish Book Award Finalist Finalist for the Chautauqua Prize For Persepolis and Logicomix fans, a New Yorker cartoonist's page-turning graphic biography of the fascinating Hannah Arendt, the most prominent philosopher of the twentieth century. One of the greatest philosophers of the twentieth century and a hero of political thought, the largely unsung and often misunderstood Hannah Arendt is best known for her landmark 1951 book on openness in political life, *The Origins of Totalitarianism*, which, with its powerful and timely lessons for today, has become newly relevant. She led an extraordinary life. This was a woman who endured Nazi persecution firsthand, survived harrowing escapes from country to country in Europe, and befriended such luminaries as Walter Benjamin and Mary McCarthy, in a world inhabited by everyone from Marc Chagall and Marlene Dietrich to Albert Einstein and Sigmund Freud. A woman who finally had to give up her unique genius for philosophy, and her love of a very compromised man - the philosopher and Nazi-sympathizer Martin Heidegger - for what she called love of the world. Compassionate and enlightening, playful and page-turning, New Yorker cartoonist Ken Krimstein's *The Three Escapes of Hannah Arendt* is a strikingly illustrated portrait of a complex, controversial, deeply flawed, and irrefutably courageous woman whose intelligence and virulent truth telling led her to breathtaking insights into the human condition, and whose experience continues to shine a light on how to live as an individual and a public citizen in troubled times.

**Overdevelopment, Overpopulation, Overshoot** Tom Butler,Foundation for Deep Ecology.2015 Every major problem facing humanity is exacerbated by a needlessly ballooning human population. So why is the explosive growth of the human family--more than sevenfold since the Industrial Revolution and still expanding rapidly--generally ignored by policy makers and the media? And why has the environmental movement chosen to be mostly silent about the fundamental driver of species loss and the destruction of wildlife habitats around the globe? Isn't it time to start speaking out about the equation that matters most to the future of people and the planet? The publication centerpiece of the Global Population Speakout campaign, *Overdevelopment, Overpopulation, Overshoot (OVER)* moves beyond insider debates and tired arguments (human numbers and overconsumption are both responsible for the crisis of population overshoot). Anchored by a series of provocative photo essays, *OVER* presents the stark reality of a world transformed by human action, action that threatens our future and the buzzing, blossoming diversity of life with which we share the planet.--Publisher website.

He describes, in remarkable detail, the architectural styles of its individual buildings and provides historical, geographical, economic and cultural information. This includes historical figures and cultural anecdotes grounded in historical reality - Tréhin accounts for the effects of the Vichy regime, the Second World War and globalisation on his imagined city. This book offers fascinating evidence of and insight into the creative power of the autistic mind and will be of interest to people with autism and without.

Tom Calloway didn't want to go on a field trip to Costa Rica, but circumstances had him ending up sitting in the back of the plane—which was the only part that was intact after the crash in the remote South American wilderness. Tom and a small group of his classmates are fortunate to be alive, but their luck quickly runs out when some of them fall prey to the unfamiliar threats of the jungle: animals, reptiles, insects, and even the unforgiving heat. Every decision they make could mean life or death. As the days go by and the survivors' desperation grows, things get even more perilous. Not everyone can cope with the trauma of seeing their friends die, and a struggle for leadership soon pits them against each other. And when they come across evidence of other people in the middle of the rainforest, does that mean they're safe—or has their survival come to an even more vicious end?

*History of the World in 500 Railway Journeys* Sarah Baxter.2019-06-01 History is everywhere, and is never as complete as when it can be accessed on a part of history itself. The locomotive is one of the great steps in progress of civilisation that undoubtably connects us to land and history that was shaped by the machine itself. Although a basic form of railway, or rutway, did exist in Ancient Greek and Roman times - notably the ship trackway between Diolkos and the Isthmus of Corinth around 600 BC - it would take several thousand years before the first fare-paying passenger service was launched in the early nineteenth century. Some two hundred years on, it is possible to travel by train to some of the world's most remote and remarkable destinations, and track the many wonderful legacies of the Earth's extensive history - man-made and otherwise. From prehistoric rock formations to skyscraper cities, slow steam engines to high-speed bullet trains, let A History of the World in 500 Railway Journeys be your guide. Through its beautifully illustrated pages, and 500 awe-inspiring railway journeys, you can chart your own transcontinental itinerary through time. Chug through canyons, steam past ancient monuments, speed through cities, luxuriate in the railcars of presidents and queens, or make express connections between key historical moments or epic eras, A History of the World in 500 Railway Journeys has it all. A must-read for travellers, railfans and history buffs alike, offering inspiration and information in equal measure.

In this case, let's go with "Alice in Wonderland" since it's a well-known book, and there's probably a free eBook or two for this title. The original work is in the public domain, so most of the variations are just with formatting and the number of illustrations included in the work. There are many similar sites around, but Free-Ebooks.net is our favorite, with new books added every day.
