The Fatal Strain Alan Sipress.2009-11-12 In 2009, Swine Flu reminded us that pandemics still happen, and award- winning journalist Alan Sipress reminds us that far worse could be brewing. When a highly lethal strain of avian flu broke out in Asia in 2003 and raced westward, Sipress, as a reporter for The Washington Post, tracked the virus across nine countries, watching its secrets elude the world's brightest scientists and most intrepid disease hunters. A vivid portrayal of the struggle between man and microbe, *The Fatal Strain* is a fast-moving account that weaves cultural, political, and scientific strands into a tale of inevitable pandemic.

The Pariahs of Yesterday Leslie Page Moch.2012-03-30 This work looks at the surge of Bretons who left their homes in Western France in the latter half of the 19th century to live and work in Paris. Portrayed as backward, ignorant peasants they found no welcome until after WWII. Moch positions her work within immigration theory, connecting migration studies to theories about state projects of assimilation and about cultures of inclusion and exclusion.

Uncertain Territories Inge E. Boer.2006-01-01 Tracing and theorizing the concept of the boundaries through literary works, visual objects and cultural phenomena, this book argues against the reification of boundaries as fixed and empty non-spaces that simply divide the world. Expanding on her previous work on gender and Orientalism, Inge Boer takes us into uncertain territories of fashion and art, tourism and travel, skilfully engaging the ambivalence of boundaries, as both protecting and confining, as bringing distinction while existing by virtue of their ability to be transgressed. In her close readings of that boundaries as desert, as frame, as home (or lack of it), Boer shows that boundaries are spaces within, through, and in the name of which negotiations take place. They are not lines but spaces ; neither fixed nor empty but flexible and inhabited. With the publication of this book, Boer's intellectual legacy stretches beyond her untimely passing. The writings that she left behind can be said to have inaugurated the future of her work, presented in the latter part by several of Boer's intellectual companions. In their original essays, the contributors elaborate on Boer's theme of boundaries as spaces where opposition yields to negotiation. Committed to the artefact as cultural stimulant, as the embodiment of thought, their analyses span a multitude of artefacts and media, ranging from literature to photography, to art installation and presentation, to film and song. Fanning out from Boer 's central focus - Orientalism - to other places of contestation, boundaries are shown to mediate the relationship between self and other ; they are, ultimately, spaces of encounter.

Ruling by Other Means Grzegorz Ekiert, Elizabeth J. Perry, Xiaojun Yan.2020-07-30 What do states gain by sending citizens into the streets? *Ruling by Other Means* investigates this question through the lens of State-Mobilized Movements (SMMs), an umbrella concept that includes a range of (often covertly organized) collective actions intended to advance state interests. The SMMs research agenda departs significantly from that of classic social movement and contentious politics theory, focused on threats to the state from seemingly autonomous societal actors. Existing theories assume that the goal of popular protest is to voice societal grievances, represent oppressed groups, and challenge state authorities and other powerholders. The chapters in this volume show, however, that states themselves organize citizens (sometimes surreptitiously and even transnationally) to act collectively to advance state goals. Drawn from different historical periods and diverse geographical regions, these case studies expand and improve our understanding of social movements, civil society and state-society relations under authoritarian regimes.

A Patriot's History of the United States Larry Schweikart, Michael Patrick Allen.2004-12-29 For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. *A Patriot's History of the United States* corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.

Futurism Lawrence S. Rainey, Christine Poggi, Laura Wittman.2009 In 1909, F.T. Marinetti published his incendiary Futurist Manifesto, proclaiming, "We stand on the last promontory of the centuries!!" and "There, on the earth, the earliest dawn!" Intent on delivering Italy from "its fetid cancer of professors, archaeologists, tour guides, and antiquarians," the Futurists imagined that art, architecture, literature, and music would function like a machine, transforming the world rather than merely reflecting it. But within a decade, Futurism's utopian ambitions were being wedded to Fascist politics, an alliance that would tragically mar its reputation in the century to follow. Published to coincide with the 100th anniversary of the founding of Futurism, this is the most complete anthology of Futurist manifestos, poems, plays, and images ever to be published in English, spanning from 1909 to 1944. Now, amidst another era of unprecedented technological change and cultural crisis, is a pivotal moment to reevaluate Futurism and its haunting legacy for Western civilization.

Rebels and Robbers Assis Malaquias. 2007 Rebels and Robbers is about the political economy of violence in post-colonial Angola. This book provides the first comprehensive attempt at analyzing how the military and non-military dynamics of more than four decades of conflict created the structural violence that stubbornly defines Angolan society even in the absence of war. The book clearly demonstrates that the end of the civil war has not ushered in positive peace. The focus on structural violence enables the author to explore the continuities since colonial times, especially in the ways race, class, ethnicity, and power have been used by governing elites as mechanisms to oppress the powerless. Thus, although corruption as structural violence manifesting itself so ubiquitously in Angola today may have been taken to new levels after independence, its origin is unmistakably colonial. Similarly, the zero-sum character of political interactions that defined colonial Angola is yet to be fully exorcized. But there are also important discontinuities. The unabashed propensity to capture public resources for personal aggrandizement is purely post-colonial. So is the tendency toward personal, unaccountable rule. Given its rich endowments, the end of the civil war provides Angola with an opportunity to finally realize its developmental potential. This will depend on whether the wealth resulting from the exploration of natural resources is directed toward creating the conditions for the citizens realization of their aspirations for the good life thus ensuring sustainable peace. This book will be valuable to academics, practitioners, and the general public interested in gaining a deeper understanding of the political economy of violence in Africa and, more specifically, the interplay between violence, wealth and power in Angola.

Genocide Adam Jones. 2006-09-27 An invaluable introduction to the subject of genocide, explaining its history from pre-modern times to the present day, with a wide variety of case studies. Recent events in the former Yugoslavia, Rwanda, East Timor and Iraq have demonstrated with appalling clarity that the threat of genocide is still a major issue within world politics. The book examines the differing interpretations of genocide from psychology, sociology, anthropology and political science and analyzes the influence of race, ethnicity, nationalism and gender on genocides. In the final section, the author examines how we punish those responsible for waging genocide and how the international community can prevent further bloodshed.

Late Victorian Holocausts Mike Davis. 2002-06-17 Examining a series of El Niño-induced droughts and the famines that they spawned around the globe in the last third of the 19th century, Mike Davis discloses the intimate, baleful relationship between imperial arrogance and natural incident that combined to produce some of the worst tragedies in human history. Late Victorian Holocausts focuses on three zones of drought and subsequent famine: India, Northern China; and Northeastern Brazil. All were affected by the same global climatic factors that caused massive crop failures, and all experienced brutal famines that decimated local populations. But the effects of drought were magnified in each case because of singularly destructive policies promulgated by different ruling elites. Davis argues that the seeds of underdevelopment in what later became known as the Third World were sown in this era of High Imperialism, as the price for capitalist modernization was paid in the currency of millions of peasants' lives.

Black Marxism Cedric J. Robinson. 2021-02-04 'A towering achievement. There is simply nothing like it in the history of Black radical thought' Cornel West 'Cedric Robinson's brilliant analyses revealed new ways of thinking and acting' Angela Davis 'This work is about our people's struggle, the historical Black struggle' Any struggle must be fought on a people's own terms, argues Cedric Robinson's landmark account of Black radicalism. Marxism is a western construction, and therefore inadequate to describe the significance of Black communities as agents of change against 'racial capitalism'. Tracing the emergence of European radicalism, the history of Black African resistance and the influence of these on such key thinkers as W. E. B. Du Bois, C. L. R. James and Richard Wright, Black Marxism reclaims the story of a movement.

Divine Names on the Spot II F Porzia, C Bonnet. 2023-09-14 English summary: Names, images, and narratives are intimately related and frequently polysemous. As pieces of information on the gods, they convey fragments of knowledge and attempts to interpret the multifaceted complexity of the divine world. In what Robert Parker describes as an archipelago, images and narratives are like compasses used to approach the mapping of the gods. The different contributions collected in this volume, dealing with the Greek and the Semitic worlds (the two main areas of the Mapping Ancient Polytheisms project), explore connections but also discrepancies between these different semantics, in order to highlight specificities and commonalities in the onomastic and iconographic languages. French description: Les noms, les images et les recits sont intimement liés et volontiers polysemiques. En tant qu'éléments d'information sur les dieux, ils véhiculent des fragments de connaissance et constituent autant de tentatives d'interprétation de la complexité multiforme du monde divin. Dans ce que Robert Parker décrit comme un archipel, les images et les recits sont comme des boussoles qui facilitent la cartographie des dieux. Les différentes contributions rassemblées dans ce volume, traitant des mondes grec et sémitique (les deux principaux domaines abordés dans le projet Mapping Ancient Polytheisms), explorent les connexions mais aussi les divergences existant entre ces différentes sémantiques, afin de mettre en évidence les spécificités et les points communs entre langage onomastique et langage iconographique.

Terra 2008 Leslie Rainer, Angelyn Bass Rivera, David Gandreau. 2011-06-14 Earthen architecture constitutes one of the most diverse forms of cultural heritage and one of the most challenging to preserve. It dates from all periods and is found on all continents but is particularly prevalent in Africa, where it has been a building tradition for centuries. Sites range from ancestral cities in Mali to the palaces of Abomey in Benin, from monuments and mosques in Iran and Buddhist temples on the Silk Road to Spanish missions in California. This volume's sixty-four papers address such themes as earthen architecture in Mali, the conservation of living sites, local knowledge systems and intangible aspects, seismic and other natural forces, the conservation and management of archaeological sites, research advances, and training.

In Defense of Looting Vicky Osterweil. 2020-08-25 A fresh argument for rioting and looting as our most powerful tools for dismantling white supremacy. Looting -- a crowd of people publicly, openly, and directly seizing goods -- is one of the more extreme actions that can take place in the midst of social unrest. Even self-identified radicals distance themselves from looters, fearing that violent tactics reflect badly on the broader movement. But Vicky Osterweil argues that stealing goods and destroying property are direct, pragmatic strategies of wealth redistribution and improving life for the working class -- not to mention the brazen messages these methods send to the police and the state. All our beliefs about the innate righteousness of property and ownership, Osterweil explains, are built on the history of anti-Black, anti-Indigenous oppression. From slave

revolts to labor strikes to the modern-day movements for climate change, Black lives, and police abolition, Osterweil makes a convincing case for rioting and looting as weapons that bludgeon the status quo while uplifting the poor and marginalized. In *Defense of Looting* is a history of violent protest sparking social change, a compelling reframing of revolutionary activism, and a practical vision for a dramatically restructured society.

Power Kills R. J. Rummel.2017-07-12 This volume, newly published in paperback, is part of a comprehensive effort by R. J. Rummel to understand and place in historical perspective the entire subject of genocide and mass murder, or what he calls democide. It is the fifth in a series of volumes in which he offers a detailed analysis of the 120,000,000 people killed as a result of government action or direct intervention. In *Power Kills*, Rummel offers a realistic and practical solution to war, democide, and other collective violence. As he states it, The solution...is to foster democratic freedom and to democratize coercive power and force. That is, mass killing and mass murder carried out by government is a result of indiscriminate, irresponsible Power at the center. Rummel observes that well-established democracies do not make war on and rarely commit lesser violence against each other. The more democratic two nations are, the less likely is war or smaller-scale violence between them. The more democratic a nation is, the less severe its overall foreign violence, the less likely it will have domestic collective violence, and the less its democide. Rummel argues that the evidence supports overwhelmingly the most important fact of our time: democracy is a method of nonviolence.

The Conspirators' Hierarchy John Coleman.1997 This work argues for the existence of a committee of 300, an elite body which controls every aspect of politics, religion, commerce and industry, answerable to no one except itself. It maintains that the confusion of social and moral values in the free world has been deliberately created.

The Subversion of Politics George Katsiaficas.1997 George Katsiaficas's account covers the period 1968-1996 and pays special attention to the role of autonomous feminist movements, the effects of squatters and feminists on the disarmament movement and on efforts to shut down nuclear power, and the antifascist social movements developed in response to the neo-Nazi upsurge. In addition to providing a rare depiction of these often overlooked movements, Katsiaficas develops a specific notion of autonomy from the statements and aspirations of these movements. Drawing from the practical actions of social movements, his analysis is extended into a universal standpoint of the species, a perspective he develops by uncovering the partiality of Antonio Negri's workerism, Seyla Benhabib's feminism, and notions of uniqueness of the German nation.

Viruses, Plagues, and History Michael B. A. Oldstone.2020 Here, my previous edition of *Viruses, Plagues, & History* is updated to reflect both progress and disappointment since that publication. This edition describes newcomers to the range of human infections, specifically, plagues that play important roles in this 21st century. The first is Middle East Respiratory Syndrome (MERS), an infection related to Sudden Acute Respiratory Syndrome (SARS). SARS was the first new-found plague of this century. Zika virus, which is similar to yellow fever virus in being transmitted by mosquitos, is another of the recent scourges. Zika appearing for the first time in the Americas is associated with birth defects and a paralytic condition in adults. Lastly, illness due to hepatitis viruses were observed prominently during the second World War initially associated with blood transfusions and vaccine inoculations. Since then, hepatitis virus infections have afflicted millions of individuals, in some leading to an acute fulminating liver disease or more often to a life-long persistent infection. A subset of those infected has developed liver cancer. However, in a triumph of medical treatments for infectious diseases, pharmaceuticals have been developed whose use virtually eliminates such maladies. For example, Hepatitis C virus infection has been eliminated from almost all (>97%) of its victims. This incredible result was the by-product of basic research in virology as well as cell and molecular biology during which intelligent drugs were designed to block events in the hepatitis virus life-cycle--

Lethal Politics R. J. Rummel.2017-07-05 While there are estimates of the number of people killed by Soviet authorities during particular episodes or campaigns, until now, no one has tried to calculate the complete human toll of Soviet genocides and mass murders since the revolution of 1917. Here, R. J. Rummel lists and analyzes hundreds of published estimates, presenting them in the historical context in which they occurred. His shocking conclusion is that, conservatively calculated, 61,911,000 people were systematically killed by the Communist regime from 1917 to 1987.Rummel divides the published estimates on which he bases his conclusions into eight historical periods, such as the Civil War, collectivization, and World War II. The estimates are further divided into agents of death, such as terrorism, deportations, and famine. Using statistical principles developed from more than 25 years of quantitative research on nations, he analyzes the estimates. In the collectivization period, for example, about 11,440,000 people were murdered. During World War II, while the Soviet Union had lost almost 20,000,000 in the war, the Party was killing even more of its citizens and foreigners-probably an additional 13,053,000. For each period, he defines, counts, and totals the sources of death. He shows that Soviet forced labor camps were the major engine of death, probably killing 39,464,000 prisoners overall.To give meaning and depth to these figures, Rummel compares them to the death toll from'major wars, world disasters, global genocide, deaths from cancer and other diseases, and the like. In these and other ways, Rummel goes well beyond the bare bones of statistical analysis and tries to provide understanding of this incredible toll of human lives. Why were these people killed? What was the political and social context? How can we understand it? These and other questions are addressed in a compelling historical narrative.This definitive book will be of interest to Soviet experts, those inte

American Military History Volume 1 Army Center of Military History.2016-06-05 *American Military History* provides the United States Army-in particular, its young officers, NCOs, and cadets-with a comprehensive but brief account of its past. The Center of Military History first published this work in 1956 as a textbook for senior ROTC courses. Since then it has gone through a number of updates and revisions, but the primary intent has remained the same. Support for military history education has always been a principal mission of the Center, and this new edition of an invaluable history furthers that purpose. The history of an active organization tends to expand rapidly as the organization grows larger and more complex. The period since the Vietnam War, at which point the most recent edition ended, has been a significant one for the Army, a busy period of expanding roles and missions and of fundamental organizational changes. In particular, the explosion of missions and deployments since 11 September 2001 has necessitated the creation of additional, open-ended chapters in the story of the U.S. Army in action. This first volume covers the Army's history from its birth in 1775 to the eve of World War I. By 1917, the United States was already a world power. The Army had sent large expeditionary forces beyond the American hemisphere, and at the beginning of the new century Secretary of War Elihu Root had proposed changes and reforms that within a generation would shape the Army of the future. But world war-global war-was still to come. The second volume of this new edition will take up that story and extend it into the twenty-first century and the early years of the war on terrorism and includes an analysis of the wars in Afghanistan and Iraq up to January 2009.

Domestications Hosam Mohamed Aboul-Ela. 2018-08-15 *Domestications* traces a genealogy of American global engagement with the Global South since World War II. Hosam Aboul-Ela reads American writers contrapuntally against intellectuals from the Global South in their common—yet ideologically divergent—concerns with hegemony, world domination, and uneven development. Using Edward Said’s *Culture and Imperialism* as a model, Aboul-Ela explores the nature of U.S. imperialism’s relationship to literary culture through an exploration of five key terms from the postcolonial bibliography: novel, idea, perspective, gender, and space. Within this framework the book examines juxtapositions including that of Paul Bowles’s *Morocco* with North African intellectuals’ critique of Orientalism, the global treatment of Vietnamese liberation movements with the American narrative of personal trauma in the novels of Tim O’Brien and Hollywood film, and the war on terror’s philosophical idealism with Korean and post-Arab nationalist materialist archival fiction. *Domestications* departs from other recent studies of world literature in its emphases not only on U.S. imperialism but also on intellectuals working in the Global South and writing in languages other than English and French. Although rooted in comparative literature, its readings address issues of key concern to scholars in American studies, postcolonial studies, literary theory, and Middle Eastern studies.

Owners of the Map Claudio Sopranzetti. 2018 On May 19, 2010, the Royal Thai Army deployed tanks, snipers, and war weapons to disperse the thousands of Red Shirts protesters who had taken over the commercial center of Bangkok to demand democratic elections and an end to inequality. Key to this mobilization were motorcycle taxi drivers, who slowed down, filtered, and severed mobility in the area, claiming a prominent role in national politics and ownership over the city and challenging state hegemony. Four years later, on May 20, 2014, the same army general who directed the dispersal staged a military coup, unopposed by protesters. How could state power have been so fragile and open to challenge in 2010 and yet so seemingly sturdy only four years later? How could protesters who had once fearlessly resisted military attacks now remain silent? *Owners of the Map* provides answers to these questions—central to contemporary political mobilizations around the globe—through an ethnographic study of motorcycle taxi drivers in Bangkok. Claudio Sopranzetti explores the unresolved tensions in the drivers’ everyday lives, their migration trajectories, consumer desires, and political demands amidst the restructuring of Thai capitalism after the 1997 economic crisis. Reconstructing the entanglements between their everyday mobility and political mobilization, Sopranzetti reveals mobility not just as a strength of contemporary capitalism but also as one of its fragile spots, always prone to disruption by the people who sustain its channels but remain excluded from their benefits. In so doing, *Owners of the Map* advances an analysis of power that focuses not on the sturdiness of hegemony or the ubiquity of everyday resistance but on its potential fragility as well as the work needed for its maintenance.
