**Geriatrische Notfallversorgung** Georg Pinter, Rudolf Likar, Walter Schippinger, Herbert Janig, Olivia Kada, Karl Cernic. 2013-09-13 Aufgrund der demographischen und ökonomischen Entwicklung erlangt die Behandlung geriatrischer Patienten steigende Bedeutung. Am Beispiel der Zentralen Notfallaufnahme am Klinikum Klagenfurt wird ein Modell für eine spezifische geriatrische Notfallversorgung präsentiert, die hochbetagten multimorbiden Patienten gerecht wird. Das Buch spannt den Bogen von der hausärztlichen Akut- über die intrahospitale Notfallversorgung bis zur Pflegeheimmedizin. Im medizinischen Bereich werden Schnittstellen zwischen eindimensionaler und geriatrischer Sicht beleuchtet. Weitere erfolgreiche Projekte aus D, A und CH, in denen durch organisatorische Veränderungen eine massive Auswirkung auf Patientenströme aus Pflegeheimen gezeigt wurde, vervollständigen das Werk. Es richtet sich an Führungskräfte mit gesundheitsökonomischer Ausrichtung im Gesundheitswesen, an Pflegedienstleitungen, Mediziner (Geriatrer, Notfallmediziner und Hausärzte) und Studierende der Gesundheitsökonomie/-management, Pflegewissenschaft und Public Health.

**Klinisches Simulationslernen in der Pflege** Astrid Herold-Majumdar. 2023-06-12 Die praktische Pflegearbeit mit Patient\_innen erfordert gut ausgebildete klinische Fertigkeiten und Skills, die vor der Umsetzung am Patientenbett in simulierten Lernsituationen erlernt werden -sollten. Das klinische Simulationslernen ist ein integraler Bestandteil der hochschulischen und beruflichen Ausbildung. Mit der Reform des Pflegeberufgesetzes und den generalistischen Ausbildungsgängen sind Lehrkonzepte für die praktische Ausbildung bedeutsamer geworden. Die Autorinnen des Praxisbuchs für klinisches Simulationslernen: •beschreiben die pflegfachlichen, evidence-basierten Hintergründe und die didaktisch-pädagogischen Grundlagen des Simulationslernens in der fachpraktischen Pflegeausbildung stellen die Entwicklung evidence-basierter Szenarien und deren methodischen Elementen mit Kurzanleitungen vor gliedern jedes Szenarium bezüglich des theoretischen Hintergrunds, den Anforderungen und Zielsetzungen, des Designs, der vermittelten Simulationserfahrungen, des Briefings/ Debriefings, der Lehr-/Lernziele und der verwendeten Literatur liefern evidence-basierte Szenarien für die Pflegeberatung von älteren Menschen mit Diabetes mellitus, zur Kontrakturenprophylaxe älterer Menschen, für die enterale Sondenernährung von Früh- und Neugeborenen sowie den aseptischen Verbandwechsel zentralvenöser Katheter und verbale Deeskalationsstrategien in der Notaufnahme stellen für die Kurzanleitungen alle notwendigen Materialien, Requisiten, Handlungsbewertungslisten, Drehbücher, Ereigniskarten und Hinweise zusammen. Vom Dummy zum Profi: Pflegerische Handlungskompetenzen mit der Methode des Simulationslernens systematisch erwerben. Pflegerische Fertigkeiten und Skills gekonnt und sicher an und mit Patient\_innen ausführen in Skills-Labs und Pflegepraxis.

**Clinical Exercise Physiology** Jonathan K. Ehrman, Paul Gordon, Paul Visich, Steven J. Keteyian. 2022-04-21 Clinical Exercise Physiology, Fifth Edition With HKPropel Access, is the most comprehensive guide to the clinical aspects of exercise physiology. Covering 24 chronic diseases and conditions, it is the go-to book for students preparing for clinical exercise certifications, including the ACSM-CEP

**Prevalence of Incontinence Among Older Americans** Yelena Gorina, Centers for Medicare & Medicaid Services (U.S.). 2014 This report presents national estimates of incontinence prevalence in the United States using data source specific definitions of incontinence among persons aged 65 years and over by sociodemographic characteristics during 2007-2010. The prevalence of incontinence is evaluated for non-institutionalized persons, those living in residential care facilities, and home health and hospice care recipients.

**PFLEGEN Fokus Alter Mensch** Roland Böhmer-Breuer, Erik Herrmann. 2021-06-15 Pflegen Fokus Alter Mensch richtet sich an alle Auszubildenden, die ihren Vertiefungseinsatz in der Altenpflege planen beziehungsweise in der generalistischen Ausbildung als Ziel den Arbeitsschwerpunkt in der Altenpflege sehen, also vor allem an diejenigen, die ihre Ausbildung in einer Altenpflegeeinrichtung beginnen. Das Buch kann ergänzend zu den generalistischen PFLEGEN-Bänden vom ersten Tag der Ausbildung an genutzt, aber auch mit jedem anderen Lehrbuch kombiniert werden. Die generalistische Pflegeausbildung hat die Pflege aller Altersstufen zum Ziel und muss sich dabei an den Besonderheiten und Eigenarten orientieren, die die Bedürfnisse von Menschen verschiedenen Alters prägen. Die Pflege alter Menschen jedoch braucht spezielles Wissen und eigene Kenntnisse von pflegerischen Interventionen, die besonders vertieft und ergänzt werden sollten. Dies ist für die Auszubildenden besonders relevant, die ihre Ausbildung in einer Altenpflegeeinrichtung beginnen und beenden und dort jeden Tag alte Menschen pflegen. Der Band Pflegen Fokus Alter Mensch vertieft pflegerisches Wissen für Pflegenden in Altenpflegeeinrichtungen und stellt dabei die (Handlungs-)Kompetenzentwicklung im Sinne der Pflegeberufesetze in den Mittelpunkt. Das Buch überzeugt durch: Infokästen und Grafiken machen deutlich, was von Bedeutung ist. Definitionen und Notfälle sind extra gekennzeichnet. Schritt-für-Schritt-Fotografien und Abbildungen unterstützen bei der praktischen Umsetzung. Komplexe Informationen sind lernfreundlich in Tabellen aufbereitet. Pflegesituationen am Kapitelanfang veranschaulichen Lerninhalte und stellen den Bezug zur Praxis her. Am Ende des Kapitels werden die Pflegesituationen noch einmal aufgenommen und es werden Transferaufgaben dazu gestellt - ganz im Sinne von Reflexion und Transfer

**The Concept and Measurement of Quality of Life in the Frail Elderly** James E. Birren, James E. Lubben, Janice Cichowlas Rowe, Donna E.

Deutchman. 2014-06-28 This work presents the first serious attempt to impose rigor on the definition and measurement of quality of life among the elderly. The book uses a conference to develop background but goes well beyond the meeting in terms of depth of reviews of the literature and of integration among the chapters. This book is intended for use by researchers in the many disciplines which focus on the mental and physical well-being of the elderly, including those in medicine, nursing, psychiatry, psychology, rehabilitation, sociology and social work, among others. In addition, this book provides important background information for professionals and policy makers interested in ensuring quality of life in the later years.

**Mental Health and Work Sick on the Job? Myths and Realities about Mental Health and Work** OECD. 2012-01-17 This report aims to identify the knowledge gaps and begin to narrow them by reviewing evidence on the main challenges and barriers to better integrating people with mental illness in the world of work.

**The Spiritual Dimension of Ageing** Elizabeth MacKinlay. 2001 Drawing on in-depth interviews with older people, Elizabeth MacKinlay, develops an understanding of spirituality that enables the reader to explore the spiritual dimension of ageing and to learn how it contributes to well being and health in later life. This book will be a useful text for students, trainers and academics, policy makers and practitioners in health and social care, as well as religious professionals, in hospital, residential and other caring settings.--BOOK JACKET. **Health, Disease, and Illness** Arthur L. Caplan, James J. McCartney, OSA, Dominic A. Sisti. 2004-06-17 In the 1850s, Drapetomania was the medical term for a disease found among black slaves in the United States. The main symptom was a strange desire to run away from their masters. In earlier centuries gout was understood as a metabolic disease of the affluent, so much so that it became a badge of uppercrust honor—and a medical excuse to avoid hard work. Today, is there such a thing as mental illness, or is mental illness just a myth? Is Alzheimer's really a disease? What is menopause—a biological or a social construction? Historically one can see that health, disease, and illness are concepts that have been ever fluid. Modern science, sociology, philosophy, even society—among other factors—constantly have these issues under microscopes, learning more, defining and redefining ever more exactly. Yet often that scrutiny, instead of leading toward hard answers, only leads to more questions. Health, Disease, and Illness brings together a sterling list of classic and contemporary thinkers to examine the history, state, and future of ever-changing concepts in medicine. Divided into four parts—Historical Discussions; Characterizing Health, Disease, and Illness; Clinical Applications of Health and Disease; and Normalcy, Genetic Disease, and Enhancement: The Future of the Concepts of Health and Disease—the reader can see the evolutionary arc of medical concepts from the Greek physician Galen of Pergamum (ca. 150 ce) who proposed that the best doctor is also a philosopher, to contemporary

discussions of the genome and morality. The editors have recognized a crucial need for a deeper integration of medicine and philosophy with each other, particularly in an age of dynamically changing medical science—and what it means, medically, philosophically, to be human.

**Atrial Fibrillation Therapy** Gheorghe-Andrei Dan, Antoni Bayés de Luna, John Camm. 2013-11-25 The paradigm for atrial fibrillation (AF) management has changed significantly in recent years. A new era has begun for the prevention of one of the most tremendous complication of AF, stroke.

Prevention of ischemic stroke in AF patients with oral anticoagulants represents a huge challenge because of the narrow therapeutic range of these drugs, interindividual and intraindividual variability, and the unsatisfactory time in therapeutically range (TTR) with this type of medication. New guidelines have emerged as a result of new mechanisms for initiation and perpetuation for pharmacotherapy to cure AF and trials with new classes of antithrombotic drugs are ongoing. The treatment of AF is still in its infancy, but recent research is revealing how it can be applied with optimal efficacy. This book assists trainees, recertifying physicians, practicing physicians and other professional staff in internal medicine, cardiology, emergency medicine, and clinical pharmacology to apply new diagnostic tools for selecting the best treatment options for AF patients.

**Variation in Health Care Spending** Institute of Medicine, Board on Health Care Services, Committee on Geographic Variation in Health Care Spending and Promotion of High-Value Care. 2013-10-01 Health care in the United States is more expensive than in other developed countries, costing \$2.7 trillion in 2011, or 17.9 percent of the national gross domestic product. Increasing costs strain budgets at all levels of government and threaten the solvency of Medicare, the nation's largest health insurer. At the same time, despite advances in biomedical science, medicine, and public health, health care quality remains inconsistent. In fact, underuse, misuse, and overuse of various services often put patients in danger. Many efforts to improve this situation are focused on Medicare, which mainly pays practitioners on a fee-for-service basis and hospitals on a diagnoses-related group basis, which is a fee for a group of services related to a particular diagnosis. Research has long shown that Medicare spending varies greatly in different regions of the country even when expenditures are adjusted for variation in the costs of doing business, meaning that certain regions have much higher volume and/or intensity of services than others. Further, regions that deliver more services do not appear to achieve better health outcomes than those that deliver less. Variation in Health Care Spending investigates geographic variation in health care spending and quality for Medicare beneficiaries as well as other populations, and analyzes Medicare payment policies that could encourage high-value care. This report concludes that regional differences in Medicare and commercial health care spending and use are real and persist over time. Furthermore, there is much variation within geographic areas, no matter how broadly or narrowly these areas are defined. The report recommends against adoption of a geographically based value index for Medicare payments, because the majority of health care decisions are made at the provider or health care organization level, not by geographic units. Rather, to promote high value services from all providers, Medicare and Medicaid Services should continue to test payment reforms that offer incentives to providers to share clinical data, coordinate patient care, and assume some financial risk for the care of their patients. Medicare covers more than 47 million Americans, including 39 million people age 65 and older and 8 million people with disabilities. Medicare payment reform has the potential to improve health, promote efficiency in the U.S. health care system, and reorient competition in the health care market around the value of services rather than the volume of services provided. The recommendations of Variation in Health Care Spending are designed to help Medicare and Medicaid Services encourage providers to efficiently manage the full range of care for their patients, thereby increasing the value of health care in the United States.

**Narrative Identity and Dementia** Marie A Mills. 2018-08-10 First published in 1998, this book is a study on the influence of emotions on autobiographical memory in dementia. Based on eight in-depth case-studies of older people with dementia, collected over a two year period, the general findings of this innovative study reveal the strength and durability of the personal narrative even as cognitive processes decline. Using a psychotherapeutic approach, the author is able to demonstrate that the retention of a personal past give a sense of narrative identity and well-being to sufferers of dementia and has an important part to play in dementia care training. Researchers, teachers and students will find this book a useful resource, together with those who work in the field of ageing and dementia care.

**Musikalische Bildung im Alter** Theo Hartogh, Hans Hermann Wickel. 2023 Die prosperierende Disziplin Musikpädagogik verzeichnet eine zunehmende Dynamik hinsichtlich theoretischer und interdisziplinärer Diskurse sowie neuer und innovativer Projekte. Dieses Buch gibt einen Einblick in diese Entwicklungen, die sich in grundlegenden Reflexionen, institutionellen und konzeptionellen Neuerungen und in konkreten Praxisprojekten manifestieren. Im Mittelpunkt steht dabei immer die Musik als Kulturgut, zu der älteren Menschen ein Zugang ermöglicht werden soll. Dabei geht es jedoch nicht um einen festen, für die Zielgruppe geeignet erscheinenden Kanon, sondern um die vielfältigen Beziehungen zwischen alten Menschen und Musik und um die Begegnung und Auseinandersetzung mit Neuem.

**Educational Design Research** Jan Van den Akker, Koeno Gravemeijer, Susan McKenney, Nienke Nieveen. 2006-11-22 The field of design research has been gaining momentum over the last five years, particularly in educational studies. As papers and articles have grown in number, definition of the domain is now beginning to standardise. This book fulfils a growing need by providing a synthesised assessment of the use of development research in education. It looks at four main elements: background information including origins, definitions of development research, description of applications and benefits and risks associated with studies of this kind how the approach can serve the design of learning environments and educational technology quality assurance - how to safeguard academic rigor while conducting design and development studies a synthesis and overview of the topic along with relevant reflections.

**Vom Glück und Schmerz, sich um andere zu kümmern** Gertrud Teusen. 2020-05-10 Plötzlich gerät die eigene Welt aus dem Gleichgewicht: Der Partner oder ein Familienmitglied wird krank, muss gepflegt werden. Eine belastende Situation für alle Beteiligten. Und dennoch werden pflegende Angehörige oft vergessen, obwohl sie sehr viel leisten, sich aufopfern und oft am Ende eine wichtige Person vergessen: sich selbst. Gertrud Teusen erklärt, warum man auch an sich selbst denken muss. Einfühlsam nimmt sie den Angehörigen die Sorge, egoistisch zu sein, und gibt konkrete Anleitungen dafür, wie es gelingen kann, gleichzeitig Pfleger zu sein, aber sich auch weiterhin gut um sich selbst zu kümmern.

**Innovationen und Innovationsmanagement im Gesundheitswesen** Mario A. Pfannstiel, Kristin Kassel, Christoph Rasche. 2020-07-06 Im aktuellen Gesundheitsmarkt entstehen vielfältige innovative Produkte und Dienstleistungen, die dazu beitragen, die Qualität und Sicherheit der medizinischen Versorgung weiter zu steigern. Voraussetzung für die Entstehung von Innovationen sind Akteure, die Potenziale und Lösungswege aufspüren und den Mut haben kreative Ideen in die Tat umzusetzen sowie ein innovationsfreundliches Klima in Unternehmen. Dazu gehören Handlungsspielräume zum Ausprobieren, Erproben und Experimentieren für Mitarbeiter und auf der Führungsebene eine Akzeptanz für ein gewisses Maß an Fehlschlägen, die bei der Suche nach Lösungen entstehen. Nur so können Innovationen den Ausgangspunkt für den wirtschaftlichen Erfolg von Unternehmen bilden und zur treibenden Kraft in der Gesundheitswirtschaft werden. Dieses Buch stellt Best-Practice-Beispiele vor und zeigt dabei auf, welche Ansätze, Vorgehensweisen und Methoden sich für das Erreichen von unternehmerischen Innovationszielen besonders gut eignen. Zugleich bietet es einen ganzheitlichen Ansatz von Innovationsmanagement für Entscheidungsträger, Praktiker und Wissenschaftler.

**Ambient Assisted Living** Nuno M. Garcia, Joel Jose P.C. Rodrigues. 2015-06-09 Addresses an Emerging Shift in Developing Countries The authors and contributors of Ambient Assisted Living have recognized that the demographic profile is changing in many developing countries and have factored in an inversion of the demographic pyramid. The technology of ambient assisted living (AAL), supports the elderly and disabled in their daily routines to allow for safe and independent living for as long as possible. Dedicated to ambient intelligence—electronic environments that are sensitive and responsive to the presence of people—Ambient Assisted Living highlights the technologies that center on the needs of these special interest groups, such as the elderly or people with disabilities. Beneficial to students, practitioners, and users of ambient assisted living (AAL), this text compiles scattered information on the subject, outlines the most important and significant work in related literature, and covers the latest hardware and software for ergonomic design pertaining to AAL. From inception to implementation, the text assesses what has been produced and researched so far and looks for trends and clues for the future. It reviews literature on AAL published since 2007 and describes the main features and

areas of products or systems that interlink and improve new or existing technologies and systems. This text: Provides extensive coverage of the applications, software, and information management for AAL Contains an overview of the concepts related to AAL Includes a comprehensive review of the state of the art on pervasive and mobile health (m-health) applications Describes a set of projects and work with scientific relevance in AAL Introduces a framework focused on the monitoring and assistance of elderly persons living alone Discusses a prospective study on technological systems for people with cognitive disabilities Ambient Assisted Living highlights technologies that adapt to the user rather than the user adapting to the technology. This text proposes technologies that can enable assisted persons to live independently for longer and reduce the need for long-term care.

**Anemia in the Elderly** Lodovico Balducci, William B. Ershler, John M. Bennett. 2007-10-04 Anemia in the elderly has been properly defined as the silent epidemic, representing 3 million people in the United States aged 65 years and older. Incidence and prevalence of this condition increase with age. It differs in its etiology, pathogenesis and treatment from anemia in children and younger adults. Anemia is associated with reduced survival, increased risk of functional dependence and hospitalization, increased risk of congestive heart failure and stage renal disease and cognitive disorders. Approximately 70% of anemia in older individuals is reversible.

**Handlexikon Geistige Behinderung** Georg Theunissen, Wolfram Kulig, Kerstin Schirbort. 2013-07-04 Work with people who have mental disabilities has been undergoing greater change in recent years than practically any other field in remedial and special needs teaching. As the ability of people with mental disability to learn and develop was recognized, a competence and strengths approach was adopted in the theories and concepts underlying support work for them, and this was supplemented by taking into account the views of those affected and a commitment to strengthen their legal rights. This pocket dictionary provides solid scientific guidance in the face of the rapid developments and upheavals in assistance for the mentally disabled that have taken place in recent years. It includes all of the major key concepts that are important from both the practical and theoretical viewpoints. At the same time, the pocket dictionary tries to indicate the interdisciplinary nature of this specialist field of work by including terms that come not only from the field of remedial and special needs teaching, but also from psychiatry/medicine, psychology, sociology, social policy and social work.

**Alzheimer's Disease Drug Development** Jeffrey Cummings, Jefferson Kinney, Howard Fillit. 2022-03-31 Provides a definitive overview of the complex ecosystem facilitating Alzheimer's Disease drug research and development. Demonstrates a drug's journey from in the lab, clinical trial testing, regulatory review, and marketing by pharmaceutical companies. Details the use of artificial intelligence, clinical trial management, and financing models.

**Emerging ICT Policies and Regulations** V. Sridhar. 2020-10-08 This book constructs both educational and research arguments on various dimensions of Information and Communication Technology (ICT) policy and regulation. There has been a paradigm shift in the ICT industry due to convergence of various technologies, the ubiquity of the Internet, the emergence of app economy and the pervasiveness of social media. These pose policy and regulatory challenges in the areas of industry structure, market power of firms, pricing of products and services, interconnection of networks, radio spectrum management, intellectual property rights, data privacy and security. The common thread throughout the different sections of the book is the massive adoption of digitization by individuals, enterprises, governments and societies and the critical role of associated regulation and policy for its success. The book addresses 13 important questions in the areas of: i) Telecom Regulation including bundling of products and services, interconnection, and radio spectrum; (ii) Internet Regulation including governance of the Internet, Net Neutrality, quality of service, and cyber security; (iii) App Economy Regulation including Over The Top communication and broadcast services, ICT platform intermediation, sharing economy, data protection and privacy; and (iv) Emerging Technology Regulation including Artificial Intelligence and Intellectual Property Rights. The book explains technology and related regulatory concepts in an easy-to-read format and includes brief case studies describing the regulatory approaches from different countries. Specific focus is given to the regulatory landscape in India surrounding these questions and the lessons for similar emerging countries. Written in the form of contemporary questions and answers, this unique book appeals to researchers in ICT policy and regulation, regulators and policymakers, as well as students interested in the subject area. The book comprehensively covers the current and emerging policy and regulatory issues relating to ICT, especially as applicable to India. Further, it provides a theoretical framework for analysing each regulatory issue along with practical implications. A good reference for researchers, regulators and policy makers. - Dr R.S. Sharma, Chairman, Telecom Regulatory Authority of India. "This book by Professor Sridhar provides an excellent overview of the challenges that the world faces in coping with the dynamic new emerging digital technologies that affect the way we work, play and communicate with each other. As the internet and mobile telephony becomes more ubiquitous and accessible to everyone regardless of socio-economic class, ICT can be used for good or for mischief. The book lays out the issues of regulating global ICT and policies that governments should adopt to enable its productive and positive use." - Dr G Anand Anandalingam, Ralph J. Tyser Professor of Management Science, Robert H. Smith School of Business, University of Maryland, U.S.A. "Using problem-centric approach successfully opens the complexity of ICT regulation to a wider audience. Through cleverly chosen topical case examples the book links the problems of Indian and international ICT markets." - Dr Hämmäinen Heikki, Professor, Department of Communications and Networking, Aalto University, Finland. "Prof Sridhar is a Thought Leader in the Telecom space and I have enjoyed my interaction with him over the years. This book is an excellent compendium looking at the main regulations and policies with reference to the ICT sector. It serves as a ready reckoner for new entrants and professionals alike, providing global and local perspectives on topics that impact the growing Digital Economy." - P Balaji, Chief Regulatory and Corporate Affairs Officer, Vodafone Idea Limited, India "Emerging ICT Policies and Regulations: Roadmap to Digital Economies is a must read for understanding essential questions regarding ICT Policy and Regulation as digitization develops locally and globally. With useful information on the case of India (and other countries), the book provides a clear, comprehensive, and cogent capture of relevant concepts and practices as well as emerging challenges. Powerful illustrations make concrete the nuance of regulatory approaches and provide added value for the reader." - Dr. Nanette S. Levinson, Professor, Internet Governance Lab, School of International Service, American University, USA, "Reference books are usually an important source of information but they are often not very readable. I am glad to say that Prof. Sridhar has managed to produce a very-well written account of ICT regulation and policies with a focus on India, and the result is a comprehensive and interesting volume with a number of very useful chapters; many of them easily digested on their own. The book is highly recommended for members of the internet and telecommunications industries, regulators and researchers." - Dr Jairo Gutierrez, Professor and Deputy Head, Engineering Computer and Mathematical Sciences, Auckland University of Technology, New Zealand. "Professor Sridhar's book provides the required regulatory theory and framework on 13 most important issues of the digital economy and provides guidance for setting policies and rules. A comprehensive reference for students and practitioners in the area of ICT regulation." - Dr S Sadagopan, Director and Professor, International Institute of Information Technology Bangalore, India Emerging ICT Policies and Regulations puts together invaluable and timely research in mapping and analysing the various issues faced by digital economy in India. Prof Sridhar has captured the most pressing issues in it, pertaining to Competition Law and Policy, Intellectual Property Rights, net neutrality, data privacy, regulating OTT services etc., not just comprehensively, but in a reader friendly way. A must read for anyone wanting to get insights on the numerous challenges involved in optimally regulating ICT driven services. - Pradeep S Mehta, Secretary General, Consumer Unity & Trust Society International, India "The Book is a very exhaustive and excellent collection of contemporary issues & challenges on Policy & Regulation that the Digital Economy is likely to grapple with in the coming years. The research on each of these issues which precedes the suggested outcome ( by the author ) is very comprehensive and includes detailed analysis of the pros and cons, global best practices in the area of Policy Regulation in other Regimes , how the Indian context differs from the others and therefore , how it could possibly be addressed. - TV Ramachandran, President, Broadband India Forum, India "Whether it is spectrum auction or license fee; net neutrality or interconnection; cybersecurity or privacy; Sridhar peels off layers and presents underlying tensions within the fast-paced technological revolution and rather slow evolution of policy & regulation." - Deepak Maheshwari, Former Secretary - ISP Association of India, Co-Founder - National Internet eXchange of

India, Former Chair - IEEE Internet Initiative, India. "An encyclopedic mapping of regulatory challenges and solutions for the sector by the always insightful Prof. Sridhar. Through a single book, he provides an accessible guide to a plurality of regulations impacting the various layers of the OSI model." - Sunil Abraham, Executive Director, Centre for Internet & Society, India

**Neuropsychotherapy** Klaus Grawe.2017-09-25 Neuropsychotherapy is intended to inspire further development and continual empirical updating of consistency theory. It is essential for psychotherapists, psychotherapy researchers, clinical psychologists, psychiatrists, neuroscientists, and mental-health professionals. Profoundly important and innovative, this volume provides necessary know-how for professionals as it connects the findings of modern neuroscience to the insights of psychotherapy. Throughout the book, a new picture unfolds of the empirical grounds of effective psychotherapeutic work. Author Klaus Grawe articulates a comprehensive model of psychological functioning-consistency theory-and bridges the gap between the neurosciences and the understanding of psychological disorders and their treatment. Neuropsychotherapy illustrates that psychotherapy can be even more effective when it is grounded in a neuroscientific approach. Cutting across disciplines that are characteristically disparate, the book identifies the neural foundations of various disorders, suggests specific psychotherapeutic conclusions, and makes neuroscientific knowledge more accessible to psychotherapists. The book's discussion of consistency theory reveals the model is firmly connected to other psychological theoretical approaches, from control theory to cognitive-behavioral models to basic need theories.

**World Report on Ageing and Health** World Health Organization.2015-10-22 The WHO World report on ageing and health is not for the book shelf it is a living breathing testament to all older people who have fought for their voice to be heard at all levels of government across disciplines and sectors. - Mr Bjarne Hastrup President International Federation on Ageing and CEO DaneAge This report outlines a framework for action to foster Healthy Ageing built around the new concept of functional ability. This will require a transformation of health systems away from disease based curative models and towards the provision of older-person-centred and integrated care. It will require the development sometimes from nothing of comprehensive systems of long term care. It will require a coordinated response from many other sectors and multiple levels of government. And it will need to draw on better ways of measuring and monitoring the health and functioning of older populations. These actions are likely to be a sound investment in society's future. A future that gives older people the freedom to live lives that previous generations might never have imagined. The World report on ageing and health responds to these challenges by recommending equally profound changes in the way health policies for ageing populations are formulated and services are provided. As the foundation for its recommendations the report looks at what the latest evidence has to say about the ageing process noting that many common perceptions and assumptions about older people are based on outdated stereotypes. The report's recommendations are anchored in the evidence comprehensive and forward-looking yet eminently practical. Throughout examples of experiences from different countries are used to illustrate how specific problems can be addressed through innovation solutions. Topics explored range from strategies to deliver comprehensive and person-centred services to older populations to policies that enable older people to live in comfort and safety to ways to correct the problems and injustices inherent in current systems for long-term care.

**Patient Navigation** Elizabeth A. Calhoun,Angelina Esparza.2017-05-24 Documenting the success and result of patient navigation programs, this book represents the culmination of years of research and practical experience by scientific leaders in the field. A practical guide to creating, implementing, and evaluating successful programs, Patient Navigation - Overcoming Barriers to Care offers a step-by-step guide towards creating and implementing a patient navigation program within a healthcare system. Providing a formal structure for evaluation and quality improvement this book is an essential resource for facilities seeking patient navigation services accreditation.

**Frailty in Aging** O. Theou,K. Rockwood.2015-07-22 Frailty represents an important challenge for aging populations. As a concept it is full of 'known unknowns' such as which mechanisms lead to frailty and how it is best managed. In order to examine these circumstances, the new science of understanding and managing frailty requires an appropriate framing of the problem. This publication investigates the biology and management of frailty and its social aspects. It considers these and related questions: How can we recognize frailty? How does an understanding of frailty increase our comprehension of the aging process? What are its implications for health care systems, including primary care, hospitals and rehabilitation? How will a growing number of frail older adults affect society more generally? The book focuses on frailty as a state of vulnerability, which is related to aging, but which can occur across the life course, and aims to improve the life of frail people and those around them. The book is highly recommended to researchers in aging, health science researchers, health care professionals and anyone interested in the understanding of the aging process.

**Gesundheitsökonomie und Gesundheitspolitik** Manfred Haubrock.2019-12-09 Führungskräfte und -personen in der Gesundheitswirtschaft benötigen für ihre Arbeit grundlegendes Wissen über gesundheitsökonomische Zusammenhänge und gesundheitspolitische Entscheidungsprozesse. Der erfahrene Hochschuldozent Manfred Haubrock fasst das Basis-wissen zur Gesundheitsökonomie und Gesundheitspolitik für Pflege-, Sozial- und Verwaltungsfachberufe verständlich und kompakt zusammen. Das Kurzlehrbuch •zeigt, wie deutsche Gesundheits- und Sozialversorgungssysteme für Arbeitslosen-, Kranken-, Pflege-, Renten- und Unfallversicherung entstanden sind, wie sie sich entwickelt haben und was sie kennzeichnet •identifiziert die Besonderheiten der Gesundheitsversorgung in Form von sozialer Marktwirtschaft, Wettbewerb und bedarfsgerechtem Versorgungsauftrag •beschreibt den Wandel vom Gesundheitssystem zur Gesundheitswirtschaft mit dessen Grundlagen, Ursachen und Folgen, den veränderten Rahmenbedingungen und dem primären und sekundären Gesundheitsmarkt •skizziert politische Aspekte der Gesundheitsversorgung hinsichtlich ihrer Funktionen, Herausforderungen und Ziele, den möglichen Reformen und Handlungsspielräumen sowie deren Einbettung in den europäischen Kontext •stellt Träger und Organisationen der Gesundheitsversorgung differenziert dar •beschreibt Aspekte ausgewählter Versorgungssysteme, wie Krankenhausversorgung, ambulante ärztliche Versorgung, Arzneimittelversorgung, Heil- und Hilfsmittelversorgung, rehabilitative Versorgung, ambulante und stationäre pflegerische Versorgung, geburtshilfliche Versorgung, Hospiz- und Palliativversorgung, Versorgung durch Rettungsdienste, alters- und behindertengerechte Versorgung •erörtert die Relevanz von gesundheitsökonomischen Evaluationen, nennt Kriterien qualifizierter Evaluationen und beschreibt, wie Kosten-Nutzen-Betrachtungen erfolgen •zeigt, wie Versorgungsleistungen dokumentiert und präsentiert werden mittels Sozialberichterstattung,

**Dementia in Nursing Homes** Sandra Schüssler,Christa Lohrmann.2017-05-19 Written by leading international experts, this book discusses the latest advances in the field of dementia in nursing homes. The topics and findings covered are based on their survey and on a scientific literature review. Dementia is spreading worldwide, placing a growing burden on healthcare systems and caregivers, as well as those affected. With increasing and complex care needs, nursing home admission is often necessary. Globally, over half of nursing home residents suffer from dementia. The book provides essential information on the most important issues in dementia in nursing homes today, including meaningful activities, patient-/person-centered care, psychosocial interventions, challenging behavior, inclusion and support of family members, pain, staff training and education, communication, polypharmacy, quality of life, end-of-life care and advanced care planning, depression, delirium, multidisciplinary approaches, physical restraints and care dependency. Each topic is covered by an international expert in dementia. As such, the book will appeal to professional nurses, nursing scientists, nursing students, other healthcare professionals, and to a broad readership, and will provide a valuable resource for those working in nursing homes, as well as researchers in the field.

**Urban Public Health** Gina S. Lovasi,Ana V. Diez Roux,Jennifer Kolker.2020 Any discussion about urban health will begin with the fact that most of humanity now lives in urban areas. About a decade into the 21st century, the urban portion of the global population surpassed 50 percent. This shift to majority urban will come last to Africa, where the rate of urban growth is the highest in the world. How has this centuries-long transformation in

human settlement affected how we think about public health research and practice? The answer: not enough. Urban health has been a niche area, much as the climate crisis has been a niche area in environmental science. It is clear that this must change because urban is how people now live. **URBAN PUBLIC HEALTH: A Research Toolkit for Practice and Impact** is a valuable addition to the surprisingly slim number of books that investigate what urban health means and why its study is both distinct and important. Carefully crafted and thoughtful chapters grapple with the complexity of the urban setting as a physical and social space. The volume will appeal to a varied audience, including researchers, students and practitioners alike.

**Fountain of Age** Betty Friedan.2006-08 Betty Friedan launches a new revolution with this powerful, bestselling book breaking through the American mystique of aging as decline. Through hundreds of interviews, Friedan confronts our denial and demolishes society's compassionate contempt-to offer a vision of what can be embraced.

**Alter und Multimorbidität Herausforderungen an die Gesundheitsversorgung und die Arbeitswelt** Stephan Burger.2013-06-24 Bevölkerung, soziale Sicherung und Arbeitsmarkt stehen in einem engen wechselseitigen Zusammenhang. Während in den letzten zehn Jahren insbesondere Finanzierungsfragen der sozialen Sicherungssysteme als Folge des demographischen Wandels und ihre politischen Antworten hierauf (z. B. Anhebung des Renteneintrittsalters) die öffentlichen Debatten bestimmt haben, rücken seit geraumer Zeit Fragen der Prävention, des Versorgungsmanagements und des Betrieblichen Gesundheitsmanagements zur Sicherung der Beschäftigungsfähigkeit der Arbeitnehmer in den Mittelpunkt des Interesses. Für das Gesundheitswesen wie für den Arbeitsmarkt ist die mit dem höheren Lebensalter zunehmende Verbreitung der chronischen Volkskrankheiten bei gleichzeitiger Zunahme von Multimorbidität von besonderer Relevanz. Sie gehen einher mit steigenden Gesundheitsausgaben, einem höheren Risiko häufiger und langwieriger Ausfälle sowie langfristiger Leistungseinbußen bei den Betroffenen und verursachen damit erhebliche Kosten für das Gesundheitswesen und die Unternehmen. Das Werk konkretisiert diese Fragestellungen an der Schnittstelle von Gesundheitswirtschaft und Arbeitsmarkt mit renommierten Autoren aus Wissenschaft, Politik und Versorgungspraxis.

**Diversität managen** Ricarda B. Bouncken, Mario A. Pfannstiel, Andreas J. Reuschl, Anica Haupt.2015-03-18 Die zunehmende Internationalisierung und der demografische Wandel in der Bevölkerung verlangen die Entwicklung neuer Managementkonzepte zum Umgang mit Diversität in Krankenhäusern. Das Fachbuch stellt ein ganzheitliches, praxisorientiertes Konzept zum Management von Diversität vor. Aktuelle Erkenntnisse zum Umgang mit Diversität werden zusammengefasst, zudem wird eine Strategie aufgezeigt, um die damit verbundenen Vorteile zu nutzen, bzw. Risiken zu reduzieren. Die Darstellung eines ganzheitlichen Managementansatzes wird durch praktische Beispiele und Leitfragen ergänzt.

**Ethische Herausforderungen des Alters** Rudolf Likar, Olivia Kada, Georg Pinter, Herbert Janig, Walter Schippinger, Karl Cernic, Cornel Sieber.2019-08-14 Im Zentrum des Buchs steht der alternde Mensch mit seinen Angehörigen. Seine Interaktion mit dem Gesundheits- und Pflegesystem, den Ärzten und Pflegekräften verändert sich über den Prozess des Alterns hinweg. Zugleich ändern sich derzeit die gesellschaftlichen Rahmenbedingungen grundlegend. Dadurch entstehen immer wieder neue ethische Herausforderungen für die Patienten selbst, ihre Angehörigen, die Gesundheitsprofessionellen, die Institutionen und die Gesellschaft insgesamt. Das Buch beleuchtet die verschiedenen Sichtweisen eingehender und zeigt anhand von vielen Praxisbeispielen nicht nur die ethischen Dilemmata, sondern bietet auch etliche Lösungsmöglichkeiten an.
