Absence and Difficult Knowledge in Contemporary Art Museums Margaret Tali.2017-12-22 This book analyzes practices of collecting in European art museums from 1989 to the present, arguing that museums actualize absence both consciously and unconsciously, while misrepresentation is an outcome of the absent perspectives and voices of minority community members which are rarely considered in relation to contemporary art. Difficult knowledge is proposed as a way of dealing with absence productively. Drawing on social art history, museology, postcolonial theory, and memory studies, Margaret Tali analyzes the collections of four modern and contemporary art museums across Europe: the Hamburger Bahnhof in Berlin, the Ludwig Museum of Contemporary Art in Budapest, the Kiasma Museum in Helsinki, and the Kumu Museum in Tallinn.

Accounting Information Systems Australasian Edition Marshall Romney,Paul Steinbart,Joseph Mula,Ray McNamara,Trevor Tonkin.2012-10-24 At last - the Australasian edition of Romney and Steinbart's respected AIS text! Accounting Information Systems first Australasian edition offers the most up-to-date, comprehensive and student-friendly coverage of Accounting Information Systems in Australia, New Zealand and Asia. Accounting Information Systems has been extensively revised and updated to incorporate local laws, standards and business practices. The text has a new and flexible structure developed especially for Australasian AIS courses, while also retaining the features that make the US edition easy to use. nt concepts such as systems cycles, controls, auditing, fraud and cybercrime, ethics and the REA data model are brought to life by a wide variety of Australasian case studies and examples. With a learning and teaching resource package second to none, this is the perfect resource for one-semester undergraduate and graduate courses in Accounting Information Systems.

Curating the Contemporary in the Art Museum Malene Vest Hansen,Kristian Handberg.2023-02-24 Curating the Contemporary in the Art Museum investigates the art museum as a space where the contemporary is staged - in exhibitions, collecting practices, communication, and policies. Curating the Contemporary in the Art Museum traces the art museum back to the postwar era. Including contributions by established and emerging art historians, academics and curators, the book proposes that the art museum is engaged in the contemporary in a double sense: it (re)presents contemporary art, while the contemporary condition itself also has a significant impact on art and the museum that houses it. Presenting a diverse range of international cases of exhibitions and curatorial practices, which hail primarily from Europe and Scandinavia, the essays examine the politics of staging "national", "international", and "global" framings of modernism, as well as the new public spaces shaped in digital practices and changing political frameworks. The book investigates both the seminal and the unknown exhibitions and institutions that created contemporary art as we know it today. Curating the Contemporary in the Art Museum provides a historical perspective on the museum of contemporary art. It constitutes a step towards differencing the canon of modernist and contemporary art and a more complex understanding of the politics of curating the contemporary in the art museum, why it will be of interest to academics and students engaged in the study of museums, curating, exhibitions, and art history.

Spring Persistence with Hibernate Paul Fisher,Brian D. Murphy.2011-02-01 Persistence is an important set of techniques and technologies for accessing and transacting data, and ensuring that data is mobile regardless of specific applications and contexts. In Java development, persistence is a key factor in enterprise, e-commerce, and other transaction-oriented applications. Today, the Spring framework is the leading out-of-the-box solution for enterprise Java developers; in it, you can find a number of Java Persistence solutions. This book gets you rolling with fundamental Spring Framework 3 concepts and integrating persistence functionality into enterprise Java applications using Hibernate, the Java™ Persistence API (JPA) 2, and the Grails Object Relational Mapping tool, GORM. Covers core Hibernate fundamentals, demonstrating how the framework can be best utilized within a Spring application context Covers how to use and integrate JPA 2, found in the new Java EE 6 platform Covers how to integrate and use the new Grails persistence engine, GORM

The Shape of Data in Digital Humanities Julia Flanders,Fotis Jannidis.2018-11-02 Data and its technologies now play a large and growing role in humanities research and teaching. This book addresses the needs of humanities scholars who seek deeper expertise in the area of data modeling and representation. The authors, all experts in digital humanities, offer a clear explanation of key technical principles, a grounded discussion of case studies, and an exploration of important theoretical concerns. The book opens with an orientation, giving the reader a history of data modeling in the humanities and a grounding in the technical concepts necessary to understand and engage with the second part of the book. The second part of the book is a wide-ranging exploration of topics central for a deeper understanding of data modeling in digital humanities. Chapters cover data modeling standards and the role they play in shaping digital humanities practice, traditional forms of modeling in the humanities and how they have been transformed by digital approaches, ontologies which seek to anchor meaning in digital humanities resources, and how data models inhabit the other analytical tools used in digital humanities research. It concludes with a glossary chapter that explains specific terms and concepts for data modeling in the digital humanities context. This book is a unique and invaluable resource for teaching and practising data modeling in a digital humanities context.

Database Management System (University of Mumbai) Bhavesh Pandya, Safa Hamdare & A.K. Sen. Written Strictly as per Mumbai University syllabus, this book provides a complete guide to the theoretical as well as the practical implementation of DBMS concepts including E-R Model, Relational Algebra, SQL queries, Integrity, Security, Database design, Transaction management ,Query processing and Procedural SQL language. This book assumes no prior knowledge of the reader on the subject. KEY FEATURES • Large number of application oriented problem statements and review exercises along with their solutions are provided for hands on practice. • Includes 12 University Question paper for IT department (Dec '08 - May '14) with solutions to provide an overview of University Question pattern. • Lab manual along with desired output for queries is provided as per recommendations by Mumbai University. • All the SQL queries mentioned in the book are performed and applicable for Oracle DBMS tool.

The Routledge Companion to Digital Humanities and Art History Kathryn Brown.2020-04-15 The Routledge Companion to Digital Humanities and Art History offers a broad survey of cutting-edge intersections between digital technologies and the study of art history, museum practices, and cultural heritage. The volume focuses not only on new computational tools that have been developed for the study of artworks and their histories but also debates the disciplinary opportunities and challenges that have emerged in response to the use of digital resources and methodologies. Chapters cover a wide range of technical and conceptual themes that define the current state of the field and outline strategies for future development. This book offers a timely perspective on trans-disciplinary developments that are reshaping art historical research, conservation, and teaching. This book will be of interest to scholars in art history, historical theory, method and historiography, and research methods in education.

Museum Development in China Gail Dexter Lord, Guan Qiang, An Laishun, Javier Jimenez. 2019-07-22 Growth of Chinese museums in the 21st century reflects the government's Museum Development Plan for 2011-2020 to open one museum per 250,000 people, with the goal of attracting one billion visitors. This book builds our knowledge of the roles of China's museums through social and political changes, governance, and the private and public sectors.

The New Art Museum Library Amelia Nelson, Traci E. Timmons. 2021-04-13 The New Art Museum Library addresses the issues facing today's art museum libraries through a series of scholarly essays written by top librarians in the field. In 2007, the publication, *Art Museum Libraries and Librarianship*, edited by Joan Benedetti, was the first to solely focus on the field of art museum librarianship. In the decade since then, many changes have occurred in the field--both technological and ideological--prompting the need for a follow-up publication. In addition to representing current thinking and practice, this new publication also addresses the need to clearly articulate and define the art museum library's value within its institution. It documents the broad changes in the environment that art museum libraries now function within and to celebrate the many innovative initiatives that are flourishing in this new landscape. Librarians working in art museum face unique challenges as museums redefine what object-based, visitor-centric learning looks like in the 21st century. These unique challenges mean that art museum libraries are developing new strategies and initiatives so that they can continue to thrive in this environment. The unique nature of these initiatives mean that they will be useful to librarians working in a wide range of special libraries, as well as more broadly in academic and public libraries. The New Art Museum Library is uniquely positioned to present new strategies and initiatives including digital art history initiatives, the new norms in art museum library staffing, and the public programming priorities that are core to many art museum libraries today. This book is an endorsed project of ARLIS/NA.

Metadata Jian Qin, Marcia Lei Zeng. 2020-06-22 This benchmark text is back in a new edition thoroughly updated to incorporate developments and changes in metadata and related domains. Zeng and Qin provide a solid grounding in the variety and interrelationships among different metadata types, offering a comprehensive look at the metadata schemas that exist in the world of library and information science and beyond. Readers will gain knowledge and an understanding of key topics such as the fundamentals of metadata, including principles of metadata, structures of metadata vocabularies, and metadata descriptions; metadata building blocks, from modeling to defining properties, from designing application profiles to implementing value vocabularies, and from specification generating to schema encoding, illustrated with new examples; best practices for metadata as linked data, the new functionality brought by implementing the linked data principles, and the importance of knowledge organization systems; resource metadata services, quality measurement, and interoperability approaches; research data management concepts like the FAIR principles, metadata publishing on the web and the recommendations by the W3C in 2017, related Open Science metadata standards such as Data Catalog Vocabulary (DCAT) version 2, and metadata-enabled reproducibility and replicability of research data; standards used in libraries, archives, museums, and other information institutions, plus existing metadata standards' new versions, such as the EAD 3, LIDO 1.1, MODS 3.7, DC Terms 2020 release coordinating its ISO 15396-2:2019, and Schema.org's update in responding to the pandemic; and newer, trending forces that are impacting the metadata domain, including entity management, semantic enrichment for the existing metadata, mashup culture such as enhanced Wikimedia contents, knowledge graphs and related processes, semantic annotations and analysis for unstructured data, and supporting digital humanities (DH) through smart data. A supplementary website provides additional resources, including examples, exercises, main takeaways, and editable files for educators and trainers.

Introduction to Art Image Access Murtha Baca. 2002-07-25 With the proliferation of information on the World Wide Web and in other networked environments, one of the main things that users search for are images of works of art and architecture. End-users generally try to search for images by subject, a process that often proves unsatisfactory and frustrating. Cataloging images of works of art has always been challenging, but now that end-users need only have access to the Internet, the challenge is more daunting than ever. This illustrated book on using metadata standards and controlled vocabularies to catalog and provide accurate end-user access to images of works of art also focuses on decisions that must be made about the arrangement of visual records, descriptive principles and methodologies, and requirements for access. *Introduction to Art Image Access* addresses the issues that underlie a visual collection to make it accessible in an electronic environment. A glossary, selected bibliography, and list of acronyms and URLs are included.

Metadata Standards and Web Services in Libraries, Archives, and Museums Erik Mitchell. 2015-10-21 Metadata in library information environments is evolving rapidly. This book provides readers with a set of tools for designing, developing, and implementing metadata-rich information systems while also examining the challenges and opportunities in this field. As the world of library and information science has developed in the age of digital information, metadata and metadata-rich information systems have become increasingly important—and more complex and confusing. This book will enable students, instructors, and practitioners in the information science field to understand how these new systems and standards will impact their careers and professions. Author Erik Mitchell explores definitions of information and presents an up-to-date consideration of user needs in information systems to provide necessary background before moving on to in-depth discussions of metadata, information organization practice, and information system design. Each chapter incorporates hands-on activities to complement the reading material, allowing readers to build technical skills alongside the important conceptual learning in this content area. Readers will gain conceptual understanding and skills that will allow them to analyze and transform structured data, develop metadata-rich information systems, and design systems with user needs and digital literacies in mind. This book is intended for library and information science students taking information organization, metadata, or other core digital cataloging classes, but will also be highly useful for professionals seeking to learn the details of metadata systems and theory using a hands-on approach.

The Economics of Art Museums Martin Feldstein. 2009-05-15 The National Bureau of Economic Research organized a project to explore the economic issues facing the major art museums of the United States. For this purpose NBER defined economics broadly to include not only the financial situation of the museums but also the management and growth of museum collections, the museums' relationship with the public, and the role of the government in supporting art museums. This volume brings together nontechnical essays on these issues by economists associated with the NBER and personal statements by leaders of America's major national art museums and related foundations. It can be read not only by economists but also by museum officials and trustees. Museum directors generally come to their responsibilities with a background in art history and

curatorial work but without experience in thinking about the management and public policy aspects of museum administration. Trustees who serve on museum boards generally have a background in business or law but have not previously tried to apply their experience to the unusual economic problems of museums. The background papers, the panelists' remarks, and the summary of the discussion will help them to approach their responsibilities with a better understanding of the problems and possibilities of the museum.

Deaccessioning and Its Discontents Martin Gammon.2018-07-24 The first history of the deaccession of objects from museum collections that defends deaccession as an essential component of museum practice. Museums often stir controversy when they deaccession works—formally remove objects from permanent collections—with some critics accusing them of betraying civic virtue and the public trust. In fact, Martin Gammon argues in *Deaccessioning and Its Discontents*, deaccession has been an essential component of the museum experiment for centuries. Gammon offers the first critical history of deaccessioning by museums from the seventeenth to the twenty-first century, and exposes the hyperbolic extremes of “deaccession denial”—the assumption that deaccession is always wrong—and “deaccession apology”—when museums justify deaccession by finding some fault in the object—as symptoms of the same misunderstanding of the role of deaccessions in proper museum practice. He chronicles a series of deaccession events in Britain and the United States that range from the disastrous to the beneficial, and proposes a typology of principles to guide future deaccessions. Gammon describes the liquidation of the British Royal Collections after Charles I's execution—when masterworks were used as barter to pay the king's unpaid bills—as establishing a precedent for future deaccessions. He recounts, among other episodes, U.S. Civil War veterans who tried to reclaim their severed limbs from museum displays; the 1972 “Hoving affair,” when the Metropolitan Museum of Art sold a number of works to pay for a Velázquez portrait; and Brandeis University's decision (later reversed) to close its Rose Art Museum and sell its entire collection of contemporary art. An appendix provides the first extensive listing of notable deaccessions since the seventeenth century. Gammon ultimately argues that vibrant museums must evolve, embracing change, loss, and reinvention.

Valuing Detroit's Art Museum Jeffrey Abt.2017-03-27 This book explores the perilous situation that faced the Detroit Institute of Arts during the city's bankruptcy, when creditors considered it a nonessential asset that might be sold to settle Detroit's debts. It presents the history of the museum in the context of the social, economic, and political development of Detroit, giving a history of the city as well as of the institution, and providing a model of contextual institutional history. Abt describes how the Detroit Institute of Arts became the fifth largest art museum in America, from its founding as a private non-profit corporation in 1885 to its transformation into a municipal department in 1919, through the subsequent decades of extraordinary collections and facilities growth coupled with the repeated setbacks of government funding cuts during economic downturns. Detroit's 2013 bankruptcy underscored the nearly 130 years of fiscal missteps and false assumptions that rendered the museum particularly vulnerable to the monetary power of a global art investment community eager to capitalize on the city's failures and its creditors' demands. This is a remarkable and important contribution to many fields, including non-profit management and economics, cultural policy, museum and urban history, and the histories of both the Detroit Institute of Arts and the city of Detroit itself. Despite the museum's unique history, its story offers valuable lessons for anyone concerned about the future of art museums in the United States and abroad.

Socializing Art Museums Alejandra Alonso Tak,Ángel Pazos-López.2020-08-24 Art museums today face the challenge of opening themselves up as institutions to a changing society. This publication offers new perspectives on museological trends that are developing in various countries and cultures. Through increasingly flexible, inclusive and unexpected museum typologies, institutions aim to give their visitors greater access to art. The essays define the role of the museum as a medium of social change, as a protagonist in an education process and as a technologically innovative platform. Art historians, but also practitioners from the museum world - including curators, architects and psychologists - examine what is expected of art museums using case studies and against the background of the humanities and social sciences.

A Museum on the Verge Jeffrey Abt.2001 The Detroit Institute of Arts is one of America's largest and oldest municipal art museums. However, even as the museum grew into a distinguished collection, there were threats of closure. The DIA has walked a financial tightrope since it opened just over a century ago, and was nearly closed by government funding cuts in the 1970s and 1990s. Now Jeffrey Abt tells how the DIA has had to struggle to maintain its fine art collection with barely enough income to remain open. *A Museum on the Verge* goes behind the scenes at the DIA to disclose the political, economic, and social forces that shaped the museum from its founding to the present day. Drawing on new archival research, Abt reveals that the growing discrepancy between the museum's size and its operating budget was the result of a century of ad hoc solutions to institutional problems that left the DIA vulnerable to annual income losses -- especially reductions of government funding. He also explains its complex relations with private and government entities and delineates the integral role of the museum's support group, the Founders Society. Abt's account is supplemented by a wealth of material, including legal documents and numerical data taken at five-year intervals from the 1880s through 2000 that is presented in both tables and graphs. The data, which comprehensively survey vital statistics such as attendance, collections growth, and finances, provide a rich resource for comparative research on other museums. As a case study of a prominent public institution, *A Museum on the Verge* offers an invaluable research model for scholars and museum professionals alike.

The Art of Curating Sally Anne Duncan,Andrew McClellan.2018-08-07 From 1921 until 1948, Paul J. Sachs (1878–1965) offered a yearlong program in art museum training, “Museum Work and Museum Problems,” through Harvard University's Fine Arts Department. Known simply as the Museum Course, the program was responsible for shaping a professional field—museum curatorship and management—that, in turn, defined the organizational structure and values of an institution through which the American public came to know art. Conceived at a time of great museum expansion and public interest in the United States, the Museum Course debated curatorial priorities and put theory into practice through the placement of graduates in museums big and small across the land. In this book, authors Sally Anne Duncan and Andrew McClellan examine the role that Sachs and his program played in shaping the character of art museums in the United States in the formative decades of the twentieth century. *The Art of Curating* is essential reading for museum studies

scholars, curators, and historians.

Art Museums of Latin America Michele Greet, Gina McDaniel Tarver. 2018-03-08 Since the late nineteenth century, art museums have played crucial social, political, and economic roles throughout Latin America because of the ways that they structure representation. By means of their architecture, collections, exhibitions, and curatorial practices, Latin American art museums have crafted representations of communities, including nation states, and promoted particular group ideologies. This collection of essays, arranged in thematic sections, will examine the varying and complex functions of art museums in Latin America: as nation-building institutions and instruments of state cultural politics; as foci for the promotion of Latin American modernities and modernisms; as sites of mediation between local and international, private and public interests; as organizations that negotiate cultural construction within the Latin American diaspora and shape constructs of Latin America and its nations; and as venues for the contestation of elitist and Eurocentric notions of culture and the realization of cultural diversity rooted in multiethnic environments.

Digital Humanities, Libraries, and Partnerships Robin Kear, Kate Joranson. 2018-03-05 Digital Humanities, Libraries, and Partnerships brings forward ideas and reflections that stay fresh beyond the changing technological landscape. The book encapsulates a cultural shift for libraries and librarians and presents a collection of authors who reflect on the collaborations they have formed around digital humanities work. Authors examine a range of issues, including labor equity, digital infrastructure, digital pedagogy, and community partnerships. Readers will find kinship in the complexities of the partnerships described in this book, and become more equipped to conceptualize their own paths and partnerships. Provides insight into the collaborative relationships among academic librarians and faculty in the humanities Documents the current environment, while prompting new questions, research paths and teaching methods Examines the challenges and opportunities for the digital humanities in higher education Presents examples of collaborations from a variety of international perspectives and educational institutions

The Audience for American Art Museums J. Mark Davidson Schuster. 1991 This study uses data from the 1985 Survey of Public Participation in the Arts (SPPA) to explore the composition of the audience for art museums and art galleries in the United States. Organized into four parts, part 1 reports that when asked if they had visited an art museum or art gallery in the 12 months preceding their 1985 SPPA interview, 22 percent of the adult population said that they had. The report goes on to present art museum participation rates across a variety of demographic variables--income, education, age, gender, race, geographic distribution, and occupation. This section also compares the 1985 SPPA participation rates with those of the Americans and the Arts Studies, and with participation rates from Great Britain, France, Sweden, and Quebec. A statistical model designed to predict the probability of attendance based on demographic factors also is developed in part 1, but this model's low predictive ability leads to the conclusion that other variables need to be examined. Part 2 of the report focuses on three SPPA socialization questions that are most likely to be linked to attendance at art museums: whether or not, and at what ages, the respondent had ever taken lessons in the visual arts; whether or not, and at what ages, the respondent had taken art appreciation classes; and whether or not, and the frequency with which, parents had taken the respondent to museums. An analysis of these questions reveals that all three of these factors show a strong relationship with increased attendance. Part 3 of the report examines unsatisfied demand and barriers to attendance. Part 4 presents a profile of the museum audience and examines how the demographic characteristics of the SPPA respondents are distributed among the museum audience and how this audience profile compares to the profile of the general population. An appendix that presents the mathematical results from the three logit analyses (a variation of regression analysis) that were conducted with the SPPA museum attendance data also is included. (DB)

Culture Strike Laura Raicovich. 2021-12-14 A leading activist museum director explains why museums are at the center of a political storm In an age of protest, cultural institutions have come under fire. Protestors have mobilized against sources of museum funding, as happened at the Metropolitan Museum, and against board appointments, forcing tear gas manufacturer Warren Kanders to resign at the Whitney. That is to say nothing of demonstrations against exhibitions and artworks. Protests have roiled institutions across the world, from the Abu Dhabi Guggenheim to the Akron Art Museum. A popular expectation has grown that galleries and museums should work for social change. As Director of the Queens Museum, Laura Raicovich helped turn that New York municipal institution into a public commons for art and activism, organizing high-powered exhibitions that doubled as political protests. Then in January 2018, she resigned, after a dispute with the Queens Museum board and city officials. This public controversy followed the museum's responses to Donald Trump's election, including her objections to the Israeli government using the museum for an event featuring Vice President Mike Pence. In this lucid and accessible book, Raicovich examines some of the key museum flashpoints and provides historical context for the current controversies. She shows how art museums arose as colonial institutions bearing an ideology of neutrality that masks their role in upholding conservative, capitalist values. And she suggests ways museums can be reinvented to serve better, public ends.
