**Ptolemy's Almagest** Ptolemy.1998-11-08 Ptolemy's Almagest is one of the most influential scientific works in history. A masterpiece of technical exposition, it was the basic textbook of astronomy for more than a thousand years, and still is the main source for our knowledge of ancient astronomy. This translation, based on the standard Greek text of Heiberg, makes the work accessible to English readers in an intelligible and reliable form. It contains numerous corrections derived from medieval Arabic translations and extensive footnotes that take account of the great progress in understanding the work made in this century, due to the discovery of Babylonian records and other researches. It is designed to stand by itself as an interpretation of the original, but it will also be useful as an aid to reading the Greek text.

**Cities and People** Mark Girouard.1985 London, Paris, Venice, New York, Rome, Constantinople - the cities of the world have captured man's imagination for generations. In this lively, sumptuously illustrated book, the author of the best-selling 'Life In The English Country House' takes us on a tour of cities and their people through the centuries. Focusing on carefully selected cities at crucial periods in their history, Mark Girouard looks at their architecture and design in the light of the needs of the men and women who lived in them.

**Dresden** Frederick Taylor.2009-04-21 Published to coincide with the bombing, this dramatic and controversial account completely re-examines the Allied attack on Dresden For decades it has been assumed that the Allied bombing of Dresden was militarily unjustifiable, an act of rage and retribution for Germany's ceaseless bombing of London and other parts of England. Now, Frederick Taylor's groundbreaking research offers a completely new examination of the facts, and reveals that Dresden was a highly-militarized city actively involved in the production of military armaments and communications concealed beneath the cultural elegance for which the city was famous.

Incorporating first-hand accounts, contemporaneous press material and memoirs, and never-before-seen government records, Taylor documents unequivocally the very real military threat Dresden posed, and thus altering forever our view of that attack.

**Reconstruction of Urban Forests** Joe R. McBride,Judith Stilgenbauer,Igor Lacan,Sheauchi Cheng,Scot Medbury,Deborah L. McBride.2022-01-17 This book will address the destruction of urban forest in nine cities by bombing during World War II and the Bosnian War and their reconstruction in the post-war years. After reviewing the general objectives and results of aerial bombing, the book explores the effects of bombing and the reconstruction of urban forest in London, Coventry, Hamburg, Dresden, St. Petersburg, Stalingrad, Tokyo, Hiroshima, and Sarajevo. Sarajevo stands out among these cities because the destruction of its urban forest was the result of citizens cutting down trees for firewood during the siege of the city. Most of the cities studied developed plans for reconstruction either during or after the war. These plans often addressed the planning and re-establishment of the urban forest that had been destroyed. Urban planners often planned for infrastructure improvements such as new boulevards and parks where trees would be planted. After the war many of these plans were abandoned or significantly modified. Cost, resistance by property owners, control of reconstruction by authorities outside of the cities, and the lack of planting stock were factors contributing to the failure of many of the plans. Exceptions occurred in Hiroshima and Coventry where the destroyed cities became symbols of national reconstruction and every effort was made to redesign the destroyed portions of these cities as memorials to those who lost their lives and to demonstrate the rebirth of the cities. In several of the cities studied individual citizens undertook on their own the replanting of street and park trees. Their ingenuity, hard work, and dedication to trees in their cities was remarkable. A common factor limiting efforts to replant street and park trees was the lack of nursery stock. During and immediately after the wars nearly all

nurseries that had supplied trees for city planting had been converted to vegetable gardens to produce food for the urban populations. The slow return to the production of trees for urban planting was a common factor in the time required in many cities to restore their street and park trees. There are lessons to be learned by urban planner, urban forester, and landscape architects from this book that will be useful in the future destruction of urban forest either by natural or man-made causes.

*Silk and Steel* Cordia Byers.1985 She longed to plunge a dagger into his handsome back. She had mastered the arts of war, not love. Disguised as a man, she fought as fiercely as any Scots warrior. Then an English soldier with blazing blue eyes stormed her castle walls and exposed Jamelyn's shocking secret. The last defender of Raven's Keep was not a man but a shapely auburn-haired beauty! Even after the treacherous king made her marry Justin, her conqueror, she vowed never to surrender. Yet a smoldering passion lay between them, ready to burst into a roaring inferno. The novel of a passionate woman who could fight anything-- except love.--Back cover.

**Seeing Hitler's Germany** K. Semmens.2005-03-23 Seeing Hitler's Germany is the first fully researched, wide-ranging study of commercial tourism under the swastika. The book demonstrates how effectively the Nazi regime coordinated all German tourism organizations. At the same time, it emphasizes the apparent 'normality' of many everyday tourist experiences after 1933. These certainly helped some Germans and many foreign visitors to overlook the regime's brutality. However, tourism also celebrated the most racist, chauvinist aspects of the 'new Germany', which in turn became a normal part of being a tourist under Hitler. While violence and terror have continued to dominate many recent studies of the Third Reich, this book takes a different view. By investigating a range of 'normal' experiences - such as taking a tour, visiting a popular sightseeing attraction, reading a guidebook or sending a postcard - Seeing Hitler's Germany deepens our understanding of the popular legitimization of Nazi rule.

**The Conquest of Nature: Water, Landscape, and the Making of Modern Germany** David Blackbourn. 2007-08-17 Brilliantly conceived...[A] tour de force in historical writing.—Ian Kershaw Majestic and lyrically written, *The Conquest of Nature* traces the rise of Germany through the development of water and landscape. David Blackbourn begins his morality tale in the mid-1700s, with the epic story of Frederick the Great, who attempted—by importing the great scientific minds of the West and by harnessing the power of his army—to transform the uninhabitable marshlands of his scattered kingdom into a modern state. Chronicling the great engineering projects that reshaped the mighty Rhine, the emergence of an ambitious German navy, and the development of hydroelectric power to fuel Germany's convulsive industrial growth before World War I, Blackbourn goes on to show how Nazi racial policies rested on German ideas of mastery of the natural world. Filled with striking reproductions of paintings, maps, and photographs, this grand work of modern history links culture, politics, and the environment in an exploration of the perils faced by nations that attempt to conquer nature.

**Earth Science and Applications from Space** National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Committee on Earth Science and Applications from Space: A Community Assessment and Strategy for the Future. 2007-10-01 Natural and human-induced changes in Earth's interior, land surface, biosphere, atmosphere, and oceans affect all aspects of life. Understanding these changes requires a range of observations acquired from land-, sea-, air-, and space-based platforms. To assist NASA, NOAA, and USGS in developing these tools, the NRC was asked to carry out a decadal strategy survey of Earth science and applications from space that would develop the key scientific questions on which to focus Earth and environmental observations in the period 2005-2015 and beyond, and present a prioritized list of space programs, missions, and supporting activities to address these questions. This report presents a vision for the Earth science program; an analysis of the existing Earth Observing System and recommendations to help restore its capabilities; an assessment of and recommendations for new observations and missions for the next decade; an examination of and recommendations for effective application of those observations; and an analysis of how best to sustain that observation and applications system.
