Utopia's Garden E. C. Spary.2010-12-15 The royal Parisian botanical garden, the Jardin du Roi, was a jewel in the crown of the French Old Regime, praised by both rulers and scientific practitioners. Yet unlike many such institutions, the Jardin not only survived the French Revolution but by 1800 had become the world's leading public establishment of natural history: the Muséum d'Histoire Naturelle. E. C. Spary traces the scientific, administrative, and political strategies that enabled the foundation of the Muséum, arguing that agriculture and animal breeding rank alongside classification and collections in explaining why natural history was important for French rulers. But the Muséum's success was also a consequence of its employees' Revolutionary rhetoric: by displaying the natural order, they suggested, the institution could assist in fashioning a self-educating, self-policing Republican people. Natural history was presented as an indispensable source of national prosperity and individual virtue. Spary's fascinating account opens a new chapter in the history of France, science, and the Enlightenment.

Ozone in Water Treatment Bruno Langlais, David A. Reckhow, Deborah R. Brink.2019-07-16 With the advent of the Safe Drinking Water Act Amendments of 1986, many water utilities are reexamining their water treatment practices. Upcoming new regulations on disinfection and on disinfection by-products, in particular, are the primary driving forces for the big interest in ozone. It appears that ozone, with its strong disinfection capabilities, and apparently lower levels of disinfection by-products (compared to other disinfectants), may be the oxidant/disinfectant of choice. Many utilities currently using chlorine for oxidation may need to switch due to chlorine by-product concerns. Utilities using chloramines may need to use ozone to meet CT requirements. This book, prepared by 35 international experts, includes current technology on the design, operation, and control of the ozone process within a drinking water plant. It combines almost 100 years of European ozone design and operating experience with North American design/operations experience and the North American regulatory and utility operational environment. Topics covered include ozone chemistry, toxicology, design consideration, engineering aspects, design of retrofit systems, and the operation and economics of ozone technology. The book contains a how to section on ozone treatability studies, which explains what information can be learned using treatability studies, at what scale (bench, pilot, or demonstration plant), and how this information can be used to design full-scale systems. It also includes valuable tips regarding important operating practices, as well as guidance on retrofits and the unique issues involved with retrofitting the ozone process. With ozone being one of the hottest areas of interest in drinking water, this book will prove essential to all water utilities, design engineers, regulators, and plant managers and supervisors.

The author covers principles common to any kind of water treatment, for example, drinking water, municipal wastew

Joie de Vivre in French Literature and Culture Susan Harrow, Timothy A. Unwin.2009 The apparent self-sufficiency of joie de vivre means that, despite the widespread use of the phrase since the late nineteenth century, the concept has rarely been explored critically. Joie de vivre does not readily surrender itself to examination, for it is in a sense too busy being what it is. However, as the essays in this collection reveal, joie de vivre can be as complex and variable a state as the more negative emotions or experiences that art and literature habitually evoke. This volume provides an urgently needed study of an intriguing and under-explored area of French literature and culture from the Middle Ages to the contemporary era. While the range and content of contributions embraces linguistics, literature, art, sport and politics, the starting point is, like that of the term joie de vivre itself, in French language and culture. This volume will be of special interest to researchers across the full range of French studies, from literature and language to cultural studies. It will be of direct appeal to specialist readers, university libraries, graduate and undergraduate students, and general readers with a lively interest in French literature and culture of the medieval, early modern and broad modern periods. This book's fresh perspectives on the theme of joie de vivre and its relation to questions of privacy, contemplation, voyeurism, feasting and nationhood will also be of relevance to researchers in comparative and cognate disciplines.

Theodore Von Neuhoff, King of Corsica Julia Gasper.2013 A visionary and a madman was how one British statesman, Lord Carteret, described Theodore von Neuhoff. This exciting biography, *Theodore von Neuhoff, King of Corsica: The Man behind the Legend* by Julia Gasper, traces the unlikely career of the German baron who in 1736 had himself crowned the King of Corsica. Theodore von Neuhoff's career spanned the entire European continent and his role in the Corsican rebellion against Genoa was as bold and unconventional as everything else in his life. Mixing with royalty, rogues and rabble, he was successively a soldier, secret agent, Jacobite, speculator, alchemist, cabbalist, Rosicrucian, astrologer, fraudster, and spy. He had changed his name several times, abducted a nun and seen the inside of several prisons before turning his hand to revolution. Neuhoff had daring far-sighted ideas about religious tolerance and the abolition of slavery that turned the Corsican rebellion into a significant political event with repercussions way beyond the shores of one small island. Denounced as an arch-criminal, traitor and seditious heretic, he survived pursuit by the agents of the Genoese Republic for twenty years with a price on his head, dodging assassination attempts while meeting countless famous and fascinating people. Valuable to the British as a political tool against the French, he spent his old age in relative comfort in an English debtors' prison. *Theodore von Neuhoff, King of Corsica* argues that despite all his eccentricity Neuhoff was still a significant Enlightenment figure.
