The Decipherment of Linear B John Chadwick.2014-05-15 The languages of the ancient world and the mysterious scripts, long undeciphered, in which they were encoded have represented one of the most intriguing problems of classical archaeology in modern times. This celebrated account of the decipherment of Linear B in the 1950s by Michael Ventris was written by his close collaborator in the momentous discovery. In revealing the secrets of Linear B it offers a valuable survey of late Minoan and

Mycenaean archaeology, uncovering fascinating details of the religion and economic history of an ancient civilisation.

Developing and Maintaining Emergency Operations Plans

United States. Federal Emergency Management Agency.2010 Comprehensive Preparedness Guide (CPG) 101 provides guidelines on developing emergency operations plans (EOP). It promotes a common understanding of the fundamentals of risk-informed planning and decision making to help planners examine a hazard or threat and produce integrated, coordinated, and synchronized plans. The goal of CPG 101 is to make the planning process routine across all phases of emergency management and

for all homeland security mission areas. This Guide helps planners at all levels of government in their efforts to develop and maintain viable all-hazards, all-threats EOPs. Accomplished properly, planning provides a methodical way to engage the whole community in thinking through the life cycle of a potential crisis, determining required capabilities, and establishing a framework for roles and responsibilities. It shapes how a community envisions and shares a desired outcome, selects effective ways to achieve it, and communicates expected results. Each jurisdiction's plans must reflect what that community will do to address its specific risks with the unique resources it has or can obtain.

The Challenge of Crime Henry Ruth, Kevin R. Reitz. 2006-03-31
The development of crime policy in the United States for many generations has been hampered by a drastic shortage of knowledge and data, an excess of partisanship and instinctual responses, and a one-way tendency to expand the criminal justice system. Even if a three-decade pattern of prison growth came to a full stop in the early 2000s, the current decade will be by far the most punitive in U.S. history, hitting some minority communities particularly hard. The book examines the history, scope, and effects of the revolution in America's response to crime since 1970. Henry Ruth and Kevin Reitz offer a comprehensive, long-term, pragmatic approach to increase public understanding of and find improvements in the nation's response to crime. Concentrating on meaningful areas for change in policing, sentencing, guns, drugs, and juvenile crime, they discuss such topics as new priorities for the use of incarceration; aggressive policing; the war on drugs; the need to switch the gun control debate to a focus on crime gun regulation; a new focus on offenders' transition from confinement to freedom; and the role of private enterprise. A book that rejects traditional liberal and conservative outlooks, *The Challenge of Crime* takes a major step in offering new approaches for the nation's responses to crime.

National Strategy for the COVID-19 Response and Pandemic Preparedness Joseph R. Biden, Jr..2021-05-04
The ultimate guide for anyone wondering how President Joe Biden will respond to the COVID-19 pandemic—all his plans, goals, and executive orders in response to the coronavirus crisis. Shortly after being inaugurated as the 46th President of the United States, Joe Biden and his administration released this 200 page guide detailing his plans to respond to the coronavirus pandemic. The National Strategy for the COVID-19 Response and Pandemic Preparedness breaks down seven crucial goals of President Joe Biden's administration with regards to the coronavirus pandemic: 1. Restore trust with the American people. 2. Mount a safe, effective, and comprehensive vaccination campaign. 3. Mitigate spread through expanding masking, testing, data, treatments, health care workforce, and clear public health standards. 4. Immediately expand emergency relief and exercise the Defense Production Act. 5. Safely reopen schools, businesses, and travel while protecting workers. 6. Protect those most at risk and advance equity, including across racial, ethnic and rural/urban lines. 7. Restore U.S. leadership globally and build better preparedness for future threats. Each of these goals are explained and detailed in the book, with evidence about the current circumstances and how we got here, as well as plans and concrete steps to achieve each goal. Also included is the full text of the many Executive Orders that will be issued by President Biden to achieve each of these goals. The National Strategy for the COVID-19 Response and Pandemic Preparedness is required reading for anyone interested in or concerned about the

COVID-19 pandemic and its effects on American society.

Investing in Cultural Diversity and Intercultural Dialogue

Unesco.2009-01-01 This report analyses all aspects of cultural

diversity, which has emerged as a key concern of the

international community in recent decades, and maps out new

approaches to monitoring and shaping the changes that are

taking place. It highlights, in particular, the interrelated

challenges of cultural diversity and intercultural dialogue and the

way in which strong homogenizing forces are matched by

persistent diversifying trends. The report proposes a series of ten

policy-oriented recommendations, to the attention of States,

intergovernmental and non-governmental organizations,

international and regional bodies, national institutions and the

private sector on how to invest in cultural diversity. Emphasizing

the importance of cultural diversity in different areas (languages,

education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

The Future of the Public's Health in the 21st Century

Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee on Assuring the Health of the Public in the 21st Century. 2003-02-01 The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. *The Future of the Public's Health in the 21st Century* reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

Medical Care for All, Regardless Donald Waters. 2021-09 The launch of The Alameda Plan in Oakland, California, in 1945 is a momentous chapter in the history of modern medicine and a

beautiful example of how collective action by the medical profession can make things better. Physician leaders in the Alameda County Medical Association (ACMA), which became the Alameda-Contra Costa Medical Association (ACCMA) when it merged with the Contra Costa Medical Society in 1950, were facing local and national public discontent over a war-induced physician shortage, disruptions in doctor-patient relations caused by the transition to more specialized multi-doctor care, notorious stories about a few bad doctors, and political rumblings for government regulation. With the organizational and visionary skills of their first full-time Executive Secretary, they turned that public narrative on its head. The Alameda Plan-in practice and in name-became emblematic of physician compassion and innovation in newsrooms, board rooms, union halls, medical conventions, State Capitols, and the halls of Congress.... This book aims to capture the context, essence, and results of the forward-thinking programs launched by the ACMA-ACCMA from 1945 through 1955.

Global Study on Homicide 2013 United Nations.2014-06-15
The Global Study on Homicide 2013 is based on comprehensive data from more than 200 countries/territories, and examines and analyses patterns and trends in homicide at the global, regional, national and sub-national levels. Such analysis is fundamental to understanding the various factors and dynamics that drive homicide, so that measures can be developed to reduce violent crime. The Study provides a typology of homicide, including homicide related to crime, coexistence-related homicide, and socio-political homicide. The nature of crime in several countries emerging from conflict, the role of various mechanisms in killing, and the response of the criminal justice system to homicide are also analyzed. A further chapter examines homicide at the sub-national level, and includes analysis at the city-level for selected global cities.

To Err Is Human Institute of Medicine,Committee on Quality of Health Care in America.2000-03-01 Experts estimate that as many as 98,000 people die in any given year from medical errors that occur in hospitals. That's more than die from motor vehicle accidents, breast cancer, or AIDS—three causes that receive far more public attention. Indeed, more people die annually from medication errors than from workplace injuries. Add the financial cost to the human tragedy, and medical error easily rises to the top ranks of urgent, widespread public problems. To Err Is Human breaks the silence that has surrounded medical errors and their consequence—but not by pointing fingers at caring health care professionals who make honest mistakes. After all, to err is human. Instead, this book sets forth a national agenda—with state and local implications—for reducing medical errors and improving patient safety through the design of a safer health system. This volume reveals the often startling statistics of medical error and the disparity between the incidence of error and public perception of it, given many patients' expectations that the medical profession always performs perfectly. A careful examination is made of how the surrounding forces of legislation, regulation, and market activity influence the quality of care

provided by health care organizations and then looks at their handling of medical mistakes. Using a detailed case study, the book reviews the current understanding of why these mistakes happen. A key theme is that legitimate liability concerns discourage reporting of errors—which begs the question, How can we learn from our mistakes? Balancing regulatory versus market-based initiatives and public versus private efforts, the Institute of Medicine presents wide-ranging recommendations for improving patient safety, in the areas of leadership, improved data collection and analysis, and development of effective systems at the level of direct patient care. To Err Is Human asserts that the problem is not bad people in health care—it is that good people are working in bad systems that need to be made safer. Comprehensive and straightforward, this book offers a clear prescription for raising the level of patient safety in American health care. It also explains how patients themselves can influence the quality of care that they receive once they check into the hospital. This book will be vitally important to federal, state, and local health policy makers and regulators, health professional licensing officials, hospital administrators, medical educators and students, health caregivers, health journalists, patient advocates—as well as patients themselves. First in a series of publications from the Quality of Health Care in America, a project initiated by the Institute of Medicine

The Challenge of Crime in a Free Society United States. President's Commission on Law Enforcement and Administration of Justice. 1967 This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of

meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

Environmental Consequences of the Chernobyl Accident and Their Remediation International Atomic Energy

Agency. 2006 The explosion on 26 April 1986 at the Chernobyl nuclear power plant and the consequent reactor fire resulted in an unprecedented release of radioactive material from a nuclear reactor and adverse consequences for the public and the environment. Although the accident occurred nearly two decades

ago, controversy still surrounds the real impact of the disaster. Therefore the IAEA, in cooperation with other UN bodies, the World Bank, as well as the competent authorities of Belarus, the Russian Federation and Ukraine, established the Chernobyl Forum in 2003. The mission of the Forum was to generate 'authoritative consensual statements' on the environmental consequences and health effects attributable to radiation exposure arising from the accident as well as to provide advice on environmental remediation and special health care programmes, and to suggest areas in which further research is required. This report presents the findings and recommendations of the Chernobyl Forum concerning the environmental effects of the Chernobyl accident.

World Drug Report 2008 United Nations Office on Drugs and Crime. 2008-06-26 The Report continues to provide in depth trend analysis of the four main drug markets in its first section. In addition, to mark the one hundred year anniversary of the Shanghai Opium Commission, and one hundred years of international drug control, the Report contains an in-depth look at the development of the international drug control system. The Report also contains a small statistical annex which provides a detailed look at production, prices and consumption. As in previous years, the present Report is based on data obtained primarily from the annual reports questionnaire (ARQ) sent by Governments to UNODC in 2007, supplemented by other sources when necessary and where available. Two of the main limitations herein are: (i) that ARQ reporting is not systematic enough, both in terms of number of countries responding and of content, and (ii) that most countries lack the adequate monitoring systems required to produce reliable, comprehensive and internationally comparable data. National monitoring systems are, however, improving and UNODC has contributed to this process.
