Canoes Mark Neuzil,Norman Sims.2018-04 Ancient records of canoes are found from the Pacific Northwest to the coast of Maine, in Minnesota and Mexico, in the Southeast, and across the Caribbean. And if a native of those distant times might encounter a canoe of our day, whether birch bark or dugout or a modern marvel made of carbon fiber, its silhouette would be instantly recognizable. This is the story of that singular American artifact, so little changed over time: of canoes, old and new, the people who made them, and the labors and adventures they shared. With features of technology, industry, art, and survival, the canoe carries us deep into the natural and cultural history of North America. --

Let Me Off at the Top! Ron Burgundy.2013-11-19 A shockingly candid and raw autobiography from legendary anchorman, jazz flutist, and host of The Ron Burgundy Podcast, Ron Burgundy. From his humble beginnings in a desolate Iowa coal mining town, his years at Our Lady Queen of Chewbacca High School to his odds-defying climb to the dizzying heights of becoming America's most trusted and beloved television News Anchor, Ron Burgundy pulls no punches in Let Me Off at the Top! In his very own words Burgundy reveals his most private thoughts, his triumphs and his disappointments. His life reads like an adventure story complete with knock-down fights, beautiful women and double-fisted excitement on every page. He has hunted jackalopes with Bobby Kennedy and Peter Lawford, had more than his share of his amorous exploits, and formed the greatest on-air team in the history of televised news. Along the way, he hobnobbed with people you wish you knew and some you honestly wish you didn't—celebrities, presidents, presidents' wives, celebrities' wives, dogs, and, of course Veronica Corningstone, the love of his life. Walter Cronkite, Barbra Streisand, Katie Couric, the list goes on. Who didn't Mr. Burgundy, or "Ron" as he is known to his friends, rub elbows with in the course of his colorful and often criminal life? This may well be the most thrilling book ever written, by a man of great physical, moral and spiritual strength and not surprisingly a great literary talent as well. This book deserves a real shot at a Pulitzer Prize. In fact if it doesn't win one then we will finally have proof that the Pulitzer is rigged. Ron Burgundy has taken the time to write a book. We owe it to him, as honest Americans, to read it.

Canoeing Ray Goodwin.2016-04-15 This is a thoroughly modern book on the traditional open canoe. It covers all aspects of the open canoe, from design to wilderness travel. What really sets it apart is its focus on canoeing techniques. Ray Goodwin is the UK's best known and (many would go so far as to say) foremost canoe coach. By introducing some of the latest canoeing performance skills, based on what he has discovered through decades of coaching and guiding, he sets out to inspire a new generation of paddlers. Through clear language and the use of photographs acquired over many years of paddling around the world, he shares some real insights of the reality of canoeing; sometimes gritty, but always enthralling. New in the 2nd edition is a section on 'vision pattern', a method for creating a mental map of a rapid. There is an expanded and re-written chapter on canoeing with children. There are more techniques for improvised sailing and more on advanced lining and tracking. It describes new solo rescue techniques and has many new inspirational canoe expedition examples. Ray has paddled extensively in Europe and his British canoe trips include the circumnavigation of Wales and the Irish Sea Crossing. In North America he has canoed the Rio Grande in the South and done trips as far north as the Arctic Circle, as well as doing two kayak descents of the Grand Canyon of the Colorado. In addition to being a British Canoe Union Level 5 Coach in Canoe, Inland Kayak, he holds a Mountain Instructor's Certificate and has led ice climbs on Kilimanjaro, Mount Kenya and in the Atlas Mountains. He runs his own coaching and guiding business, working at all levels from novice to the top BCU leadership and coaching qualifications courses.

LISTENING POINT Sigurd F. Olson.2012-07-04 "Listening Point tells of what I have seen and heard on a bare glaciated spit of rock in the Quetico-Superior country. Each time I have gone there I have found something new that has opened up whole realms of thought and interest. From it I have glimpsed the immensity of space and at times the grandeur of creation. "I believe that I have experienced there one of the oldest satisfactions of man; when as he gazed upon the earth and sky, he sensed the first vague glimmerings of meaning in the universe. I know that while we were born with curiosity and wonder, and our early years are full of the adventure they bring, such inherent joys are often lost. I also know that, being deep within us, their latent glow can be fanned to flame again by awareness and an open mind. "Listening Point is dedicated to rekindling that flame by capturing this almost forgotten sense of wonder, and learning from rocks and trees and all the life that surrounds them truths that can encompass all. "I named this place Listening Point because only when one comes to listen, only when one comes sharpens one's awareness, can one see and hear in the sense in which I use these words. Everyone has a listening point somewhere, some quiet place where he can contemplate the awesome universe. This book is simply the story of what such a place has meant to me. The experiences that have been mine can be known by anyone who will make the effort." Thus the author of The Singing Wilderness sets the tone of his new book—a book that not only successfully recaptures the to-be-treasured sense of wonder of which he speaks, but also brings to life, in all its essential grandeur, the unparalleled heritage of lakes and rivers and forests we are so fortunate to be able to call our own. Listening Point is a book that will rekindle spirits wearied by the turmoils of twentieth-century living—that will teach us a new way to look at the world around us and to feel the better for it. With 28 magnificent black-and-white drawings by Francis Lee Jacques.

White Water Safety and Rescue Franco Ferrero.2006 White water safety and rescue for canoeists, kayakers and rafters. A completely revised new edition now in full colour throughout. You can find presentation resources of the photos and illustrations below. The writing of this book started when I tried to put some notes together as course notes for the safety and rescue courses I was running at Plas y Brenin. It soon became clear what a huge topic it is and in sheer frustration I explained to a friend that I would have to write a book to cover it properly. His answer was, Why don't you? This is the result. I hope you find it enjoyable and informative. What's new in the 2nd Edition? Full colour and new photos throughout. The text has been completely revised and numerous small but significant improvements have been made. The principles of safety and

rescue have been unified and the mnemonic CLAP adopted. This is to make it easier to remember them and fall in line with current practice in the teaching of white water safety. The rescue section has been reorganized to fit in more closely with the TRTTG 'low to high risk' model. The rafting sections have been completely rewritten by Geraint Rowlands. The chapter 'Planning a Descent' has been extended to cover factors to be considered when travelling abroad. One-handed signals as used by Paul O'Sullivan in his chapter in the BCU Canoe and Kayak Handbook have been adopted.

Alone Against the North Adam Shoalts. 2016-05-10 Winner of the Legislative Assembly of Ontario's 2016 Young Authors Award Winner of the 2017 Louise de Kiriline Award for Nonfiction Adam Shoalts was no stranger to the wilderness. He had hacked his way through jungles, stared down bears and climbed mountains. But, one spot on the map called out to him irresistibly. Cutting through the forbidding landscape of the Hudson Bay Lowlands is a river no hunter, no explorer, has left any record of paddling. It was this river that Shoalts was obsessively determined to explore. What Shoalts discovered as he paddled downriver appeared in no satellite imagery or map: a series of waterfalls that could easily have killed him. Just as astonishing was the media reaction when he got back to civilization. He was crowned Canada's Indiana Jones and was feted by the Royal Canadian Geographical Society and congratulated by the governor general. Shoalts had proved that the world is bigger than we think. Gripping and often poetic, *Alone Against the North* is a classic adventure story of single-minded obsession, physical hardship, and the restless sense of wonder that every explorer has in common. Shoalts's story makes it clear that the world can become known only by setting out into the unfamiliar, where every step is different from the one before and something you may never have imagined lies around the next curve in the river.

Campfire Cookery Sarah Huck, Jaimee Young. 2011-09-19 "The variety of dishes that Huck and Young present as possibilities for preparing and cooking outdoors is rather astounding and pleasantly surprising" (Epicurious). Camping fare typically includes burgers and hot dogs, and while these are certainly easy, get ready to rethink the cuisine that can be savored over the open flame. With recipes like Spiced Currant Cream Scones, Maple-Glazed Wild Salmon, and Tomato Tarte Tatin, Huck and Young celebrate delicious food and the great outdoors. They also include step-by-step instructions for activities such as stargazing, foraging for woodland berries, and minding one's fruits of the sea (or, how to clean a fish). *Campfire Cookery* proves that the campfire cannot only be a blissful escape but a true culinary destination. "It is the rare cookbook that has even the camping-averse actually contemplating a weekend of mosquitoes and sweaty sleeping bags . . . But really, we simply love the recipes." —LA Weekly

Survival Psychology J. Leach. 1994-09-05 '...it should be made standard reading for those dealing with disaster/survival situations, it is also very informative in helping the general reader understand the psychology of survivors...The text makes compulsive reading and the book is hard to put down. It is worth examining, no matter where your professional interest lies.' - Duncan MacPaul, Nursing Times. Why do so many people die without need? How can an exceptional few survive extraordinarily harsh conditions sometimes after months or years of deprivation? Recent years have seen remarkable improvements in survival training and technology, yet most people still perish quickly in the face of adversity. In this book John Leach seeks to answer these questions by considering the psychology of human survival; how groups and individuals behave before, during and after life threatening events. Both short and long-term survival are addressed as well as the psychological consequences of hunger, thirst, cold, heat, crowding, isolation, fatigue and sleep deprivation. The essence of this work is distilled into a set of principles for psychological first-aid for use in the field.
