At The Front Jannie Geldenhuys.2012-03-19 General Jannie Geldenhuys is widely regarded as one of the leading military commanders South Africa has produced. As Chief of the South African Defence Force from 1985 to 1990, he brought his experience to bear on the Border War in Namibia, and was part of the negotiating team that brought an end to the conflict in 1989. In this completely revised and updated edition, Geldenhuys reflects on a military career spanning more than four decades. *At the Front* covers the years before and during the protracted Border War, and consists of Geldenhuys' personal experiences and insights. He sheds light on the final years of the conflict and the negotiated settlement, and also writes of his early years, as he evolved from a rugby-mad young officer to a deep-thinking, reflective man with ever-sharpening insights into war, peace, politics and, most of all, himself.

Department of the Army Pamphlet DA PAM 600-3 Officer Professional Development and Career Management March 2021 United States Government US Army.2021-03-23 This United State Army general human resources talent management personnel regulation, Department of the Army Pamphlet DA PAM 600-3 Officer Professional Development and Career Management March 2021, outlines officer development and career management programs for each of the Army's career branches and functional areas. It does not prescribe the path of assignment or educational assignments that will guarantee success but rather describes the full spectrum of developmental opportunities an officer can expect throughout a career. It emphasizes the need of the future force leader to broaden and acquire a greater depth vice breadth of experience in challenging leadership positions. In addition, this pamphlet provides a summary of the special branches (The Judge Advocate General's Corps, Chaplain Corps, and U.S. Army Medical Department). This pamphlet applies to the Regular Army, the Army National Guard/Army National Guard of the United States, and the U.S. Army Reserve, unless otherwise stated. During mobilization, procedures in this publication can be modified to support policy changes as necessary.

Lord Methuen and the British Army Stephen M. Miller.2012-11-12 This study analyzes the readiness of the British military establishment for war in 1899 and its performance in the South African War (1899-1902). It focuses on the career of Field Marshal Paul Sanford, 3rd Baron Methuen, whose traditional military training, used so effectively in Queen Victoria's small wars, was put to the test by the modern challenges of the South African War. A subsidiary aim of this work is to correct and refine the historical consensus that Methuen's campaigning in the South African War was plagued by practical errors and poor judgement. The South African War was a crucial transitional episode in the history of the British army. Unlike Great Britain's other expeditions, it required the concentrated resources of the entire empire. It was a modern war in the sense that it employed the technology, the weaponry, the communications, and the transportation of the second industrial revolution.

South Africa's Post-Apartheid Military Lindy Heineken.2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security, political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for 'defence in a democracy'? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues, such as: · the effect of integrating former revolutionary soldiers into a professional armed force · the effect of affirmative action on meritocracy, recruitment and retention · military veterans, looking at the difficulties they face in reintegrating back into society and finding gainful employment · gender equality and mainstreaming · the rise of military unions and why a confrontational, instead of a more corporatist approach to labour relations has emerged · HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become 'lost in transition and transformation', spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence, security and civil-military relations of countries around the world.

A Guide to the Study and Use of Military History John E. Jessup,Robert W. Coakley,James Lawton Collins.2000-04-01 On 6 June 1944, as the allied forces began the invasion of Normandy, General George S. Patton, Jr., wrote to his son, then a cadet at the United States Military Academy, that to be a successful soldier, you must know history. The number of similar pronouncements from noted military figures, including Napoleon, is almost endless and the basic refrain is the same - to understand the present and to prepare for the future the study of history is vital. This applies most particularly to those who lead men in battle. As Marshall Foch wrote, no study is possible on the battlefield, one does simply what one can in order to apply what one knows. Despite vast changes in technology since World War II, the combat leader may still learn much from the study of past battles and campaigns. Weather, terrain, and intelligence of friendly and enemy dispositions, for instance, are as important today as in the days of Alexander, Frederick the Great, and Napoleon; human reactions in combat remain relatively constant. Quite beyond vicarious experience of the battlefield, the study of military history affords and understanding of the interplay of forces that have shaped the present and provides the means of viewing current problems against the long perspective of how men have handled similar problems in the past. The immediate utility of knowledge of history is likely to vary with the situation in which the individual soldier finds himself. Certainly force planners could profit from a study of the varying approaches of General Pershing and General Marshall in the two world wars toward the size and composition of the Army, officers in charge of training from a reminder that the American soldier's traditional outlook was not conducive to fighting a counterinsurgency war in Vietnam, and military leaders and policy makers alike from an appreciation of the long American tradition against drafting men for combat service in anything short of an all-out national war effort. Knowledge of military history cannot produce solutions to all problems, nor can it guarantee success in a military career. But it can provide a foundation for both problem solving and career achievement.This Guide to the Study and Use of Military History is designed to foster an appreciation of the value of military history and explain its uses and the resources available for its study. It is not a work to be read lightly tossed aside, but one the career soldier should read again or use as a reference at those times during his career when necessity or leisure turns him to the contemplation of the military past.The Guild consists of four parts. Part One is general in nature and deals with the nature of

history is a discipline, military history as a branch of that discipline, the uses of military history, and suggested methods of reading and study. Part Two is a guide to the areas of study and the materials available for study in each. It consists of seven bibliographical essays - one on the great military historians and philosophers with whom all students of military history should have some acquaintance, two on world military history, three specifically on American military history, and a final essay on the merging of American and world military history since the end of World War II. Each of the period essays weaves its bibliographical information into the framework of a discussion of the main military developments of the era covered, introducing, where pertinent, varying historical interpretations of events and issues. Each contains at the end an alphabetical listing of all works mentioned. Part Three deals with U.S. Army historical programs and activities and how the Army uses or has used military history. This part informs the reader of the resources available within the Army for study and research in military history and some of the practical uses of history in staff work. Part Four similarly deals, albeit more briefly, with military history outside the Army - in other elements of the Department of Defense, in foreign military establishments, and in the academic world. Finally two appendices provide annotated listings of reference works and historical periodicals of greatest interest and utility to the student of military history. The longest part of the Guide, Part Two, contains the bibliographical essays, generally modeled on the bibliographical pamphlets published by the American Historical Association Center for Teachers. Like them, each individual essay, written by a specialist in the field, adopts a somewhat different approach. All of them, however, must list many works within a relatively short space to give the reader some understanding of the vast variety of historical literature available. Bibliographic essays seldom make light bedtime reading, and those in the Guide are no exception. But the editors do believe these essays can be read initially with interest and profit for a general appreciation of the whole field of military history, and then used later as a more detailed reference when the student develops an interest in a particular period or subject. Except in the essay on the great military historians, and philosophers, only works written in English or translated into English have been included. And there is relatively heavy emphasis on American military history as opposed to the broader field of world military history. The reason is simply the belief that books in the national language and on the national experience will be of greatest interest and utility to the American officer.

The Encyclopedia of the Cold War [5 volumes] [5 volumes] Spencer C. Tucker.2007-09-12 A comprehensive five-volume reference on the defining conflict of the second half of the 20th century, covering all aspects of the Cold War as it influenced events around the world. The conflict that dominated world events for nearly five decades is now captured in a multivolume work of unprecedented magnitude—from a publisher widely acclaimed for its authoritative military and historical references. Under the direction of internationally known military historian Spencer Tucker, ABC-CLIO's *The Encyclopedia of the Cold War: A Political, Social, and Military History* offers the most current and comprehensive treatment ever published of the ideological conflict that not so long ago enveloped the globe. From the Second World War to the collapse of the Soviet Union, *The Encyclopedia of the Cold War* provides authoritative information on all military conflicts, battlefield and surveillance technologies, diplomatic initiatives, important individuals and organizations, national histories, economic developments, societal and cultural events, and more. The nearly 1,300 entries, plus topical essays and an extraordinarily rich documents volume, draw heavily on recently opened Russian, Eastern European, and Chinese archives. The work is a definitive cornerstone reference on one of the most important historical topics of our time.

Storm over South Africa Michael G. Bergen.2016-08-17 *Storm over South Africa* follows the lives and tribulations of a diverse group of characters through the Second Anglo-Boer War from 1899 to 1902 in South Africa. They belonged to different levels of the opposing societies, and the story follows their actual life-and-death experiences in this conflict. The characters include the seventeen-year-old son of a Boer president, a young shipbuilding dock worker and his military nurse girlfriend from the industrial northeast of England, and a young Canadian soldier who volunteered for Canada's first campaign outside its borders. Involved too are such illustrious British participants as Winston Churchill, Field Marshal Frederick Roberts, and the generals Kitchener, Ian Hamilton, and Robert Baden-Powell, among others. Boer leaders involved include the generals Christiaan de Wet, Louis Botha, Koos de la Rey, and Jan Smuts. The reader is guided through the various twists and turns of the first major British conflict of the twentieth century from its beginning through to its end. The naivety and excitement of combatants in the lead-up to and beginning of the Second Anglo-Boer War was contagious. It pulled many naive young men into the maelstrom of combat. The failures, frustrations, disappointments, disillusionments, and suffering soon emerged. It is a tale of imperial arrogance, determination, stubbornness, innocence, love, and loss experienced in a rugged and alluring land far from the heart of the British Empire.

General and Flag Officer Careers Harry Thie.2001 Congress has recently expressed concern that the current tenure system for developing general and flag officers does not effectively prepare them for handling increasing levels of responsibility and for performing with maximum efficiency at each level of assignment. This report assesses the continued appropriateness of mandatory retirement of general and flag officers after 35 years. It focuses on the value of extending tenure, specifically examining promotions, number of assignment, and career length. The study discusses two types of consequences resulting from such an extension. Systemic results of longer service lead to fewer promotions and fewer rising to the highest grades, but increased stability and experience. Career-path consequences indicate more depth or breadth of experience could result for officers. The appropriateness of continued mandatory retirement after 35 years depends, finally, on objectives. If the objective is rapid career-path movement to positions of responsibility, the 35-year limit accomplishes this. If the goal is more experienced officers and greater stability, removing the limit seems best. Decision makers will need to decide which objective is most important.

Days of the Generals Hilton Hamann.2012-03-30 What really happened during South Africa's military involvement in Angola? Did the military leaders always see eye to eye with the politicians - and with each other? Was South Africa responsible for the death of Mozambican President Samora Machel? What was the extent of South Africa's nuclear programme? How did South Africa's military machine deal with the end of apartheid? Based on interviews with the former generals of the South African Defence Force, *Days of the Generals* addresses these and many other fascinating questions. The book looks in detail at South Africa's intervention in Angola, Namibia and Mozambique. It examines the armed struggle of the ANC and the state's war against the liberation movements. It investigates chemical and biological warfare, the 'third force' and other top-secret issues. For the first time, the generals - Magnus Malan, Constand Viljoen, Jannie Geldenhuys, Georg Meiring, Hein du Toit and Chris Thirion - have opened up and given their account of events in southern Africa from the 1970s to the present. Theirs is an explosive story, giving behind-the-scenes information about covert operations, secret meetings, strategic alliances and full-scale war. This is essential reading for anyone interested in

southern African politics and military history. The author, Hilton Hamann, entered the South African Defence Force as a conscript in 1975, and was stationed in Angola. He subsequently became the Sunday Times's military correspondent and wrote for a number of well-known international magazines and newspapers, such as Soldier of Fortune. In this role he travelled extensively with the SADF, often accompanying them into battle. He currently runs a news syndication company.

Battle For Angola Al J. Venter.2017-04-03 Following the publication of Al Venter's successful Portugal's Guerrilla Wars in Africa - shortlisted by the New York Military Affairs Symposium's 'Arthur Goodzeit Book Award for 2013' - his Battle for Angola delves still further into the troubled history of this former Portuguese African colony. This is a completely fresh work running to almost 600 pages including 32 pages of color photos, with the main thrust on events before and after the civil war that followed Lisbon's over-hasty departure back to the metrópole. There are also several sections that detail the role of South African mercenaries in defeating the rebel leader Dr Jonas Savimbi (considered by some as the most accomplished guerrilla leader to emerge in Africa in the past century). There are many chapters that deal with Pretoria's reaction to the deteriorating political and military situation in Angola, the role of the Soviets and mercenaries in the political transition, as well as the civil war that followed. With the assistance of several notable military authorities he elaborates in considerable detail on South Africa's 23-year Border War, from the first guerrilla incursions to the last. In this regard he received solid help from the former the head of 4 Reconnaissance Regiment, Colonel Douw Steyn, who details several cross-border Recce strikes, including the sinking by frogmen of two Soviet ships and a Cuban freighter in an Angolan deepwater port. Throughout, the author was helped by a variety of notable authorities, including the French historian Dr René Pélissier and the American academic and former naval aviator Dr John (Jack) Cann. With their assistance, he covers several ancillary uprisings and invasions, including the Herero revolt of the early 20th century; the equally troubled Ovambo insurrection, as well as the invasion of Angola by the Imperial German Army in the First World War. Former deputy head of the South African Army Major General Roland de Vries played a seminal role. It was he - dubbed 'South Africa's Rommel' by his fellow commanders - who successfully nurtured the concept of 'mobile warfare' where, in a succession of armored onslaughts 'thin-skinned' Ratel Infantry Fighting Vehicles tackled Soviet main battle tanks and thrashed them. There is a major section on South African Airborne - the 'Parabats' -by Brigadier-General McGill Alexander, one of the architects of that kind of warfare under Third World conditions. Finally, the role of Cuban Revolutionary Army receives the attention it deserves: officially there were almost 50,000 Cuban troops deployed in the Angolan war, though subsequent disclosures in Havana suggest that the final total was much higher.

Minority and Gender Differences in Officer Career Progression Susan D. Hosek.2001 Since the military draft ended in 1975, newly commissioned officers have included increasing numbers of minorities and women. These officers must be retained and promoted for the senior officer ranks to become as diverse as the junior officer ranks are today. This report examines whether minority and women officers obtain these promotions and choose to continue in their careers at the same rate as other officers. The authors conducted two research efforts: analyzing personnel records and interviewing mid-career officers, personnel managers, and promotion board members individually and in focus groups. Results for minorities other than blacks were limited due to small sample sizes. White women were found to be less likely to reach higher officer ranks than were men, mostly because they chose to leave the military between promotions. Black male and black female officers generally failed promotions in higher proportions than did white males, but were more likely to stay in the military between promotions. The interviews and focus groups revealed different perceptions about careers: Black officers seemed to have greater difficulty forming all-important peer and mentor relationships and overcoming initial expectations of lower performance. Women's careers have been affected by limited occupational opportunities, inconsistent acceptance of their role as military officers, harassment, and family conflicts.
