Politik und Religion: Eigenlogik oder Verzahnung? Robert von Friedeburg, Luise Schorn-Schütte.2019-08-11 War die Entflechtung von Religion und Politik das Innovative der Frühen Neuzeit? Oder lag im Gegenteil in der neuerlichen Verzahnung das Charakteristikum jener Zeit? Wenn die Verzahnung von Religion und Politik das neue Element war, dann stellt sich die Frage, wie die Reformation im europäischen Blick zu bewerten ist. War sie traditionales Element oder etwas Neues? Mit dieser Fragestellung formuliert der Band eine neue Forschungsrichtung, die die gegenwärtige Reformationsgeschichtsschreibung herausfordert. Die Bewertungsmaßstäbe des 19. und 20. Jahrhunderts, die Tradition ausschließlich als Opposition der Neuerung verstanden, müssen revidiert werden. Denn: In der Frühen Neuzeit galt die innovative Kraft der Tradition als selbstverständlich.

The Sixteenth-Century French Religious Book Andrew Pettegree, Paul Nelles.2017-03-02 This study comprises the proceedings of a conference held in St Andrews in 1999 which gathered some of the most distinguished historians of the French book. It presents the 16th-century book in a new context and provides the first comprehensive view of this absorbing field. Four major themes are reflected here: the relationship between the manuscript tradition and the printed book; an exploration of the variety of genres that emerged in the 16th century and how they were used; a look at publishing and book-selling strategies and networks, and the ways in which the authorities tried to control these; and a discussion of the way in which confessional literature diverged and converged. The range of specialist knowledge embedded in this study will ensure its appeal to specialists in French history, scholars of the book and of 16th-century French literature, and historians of religion.

Der Protestantismus als politisches Princip Friedrich Julius Stahl.1853

The French Civil Wars, 1562-1598 R. J. Knecht.2014-07-22 The French Wars of Religion tore the country apart for almost fifty years. They were also part of the wider religious conflict between Catholics and Protestants which raged across Europe during the 16th century. This new study, by a major authority on French history, explores the impact of these wars and sets them in their full European context.

Protestantische Revolution? Trutz Rendtorff.1993

Christ's Churches Purely Reformed Philip Benedict.2008-10-01 This sweeping and eminently readable book is the first synthetic history of Calvinism in almost fifty years. It tells the story of the Reformed tradition from its birth in the cities of Switzerland to the unraveling of orthodoxy amid the new intellectual currents of the seventeenth century. As befits a pan-European movement, Benedict's canvas stretches from the British Isles to Eastern Europe. The course and causes of Calvinism's remarkable expansion, the inner workings of the diverse national churches, and the theological debates that shaped Reformed doctrine all receive ample attention. The English Reformation is situated within the history of continental Protestantism in a way that reveals the international significance of English developments. A fresh examination of Calvinist worship, piety, and discipline permits an up-to-date assessment of the classic theories linking Calvinism to capitalism and democracy. Benedict not only paints a vivid picture of the greatest early spokesmen of the cause, Huldrych Zwingli and John Calvin, but also restores many lesser-known figures to their rightful place. Ambitious in conception, attentive to detail, this book offers a model of how to think about the history and significance of religious change across the long Reformation era.

Christentum und Revolution Stefan J. Dietrich.1996

Humankind Andreas Höfele,Stephan Laqué.2011 Anthropology is a notoriously polysemous term. Within a continental European academic context, it is usually employed in the sense of philosophical anthropology, and mainly concerned with exploring concepts of a universal human nature. By contrast, Anglo-American scholarship almost exclusively associates anthropology with the investigation of cultural and ethnic differences (cultural anthropology). How these two main traditions (and their 'derivations' such as literary anthropology, historical anthropology, ethnology, ethnography, intercultural studies) relate to each other is a matter of debate. Both, however, have their roots in the path-breaking changes that occurred within sixteenth and early seventeenth-century culture and scientific discourse. It was in fact during this period that the term anthropology first acquired the meanings on which its current usage is based. The Renaissance did not 'invent' the human. But the period that gave rise to 'humanism' witnessed an unprecedented diversification of the concept that was at its very core. The question of what defines the human became increasingly contested as new developments like the emergence of the natural sciences, religious pluralisation, as well as colonial expansion, were undermining old certainties. The proliferation of doctrines of the human in the early modern age bears out the assumption that anthropology is a discipline of crisis, seeking to establish sets of common values and discursive norms in situations when authority finds itself under pressure. -- Publisher's website.

The St. Bartholomew's Day Massacre Barbara B. Diefendorf.2008-09-02 A riveting account of the Saint Bartholomew's Day Massacre, its origins, and its aftermath, this volume by Barbara B. Diefendorf introduces students to the most notorious episode in France's sixteenth century civil and religious wars and an event of lasting historical importance. The murder of thousands of French Protestants by Catholics in August 1572 influenced not only the subsequent course of France's civil wars and state building, but also patterns of international alliance and long-standing cultural values across Europe. The book begins with an introduction that explores the political and religious context for the massacre and traces the course of the massacre and its aftermath. The featured documents offer a rich array of sources on the conflict — including royal edicts, popular songs, polemics, eyewitness accounts, memoirs, paintings, and engravings — to enable students to explore the massacre, the nature of church-state relations, the moral responsibility of secular and religious authorities, and the origins and consequences of religious persecution and intolerance in this period. Useful pedagogic aids include headnotes and gloss notes to the documents, a list of major figures, a chronology of key events, questions for consideration, a selected bibliography, and an index.

Human Rights in the Shadow of Colonial Violence Fabian Klose.2013-05-31 Based on previously inaccessible material from international archives, *Human Rights in the Shadow of Colonial Violence* examines the relationship between emerging human rights concepts after 1945 and repressive British and French actions against anticolonial movements in Africa.

Sisters Crossing Boundaries Katharina Stornig.2013-10-02 The last third of the 19th century witnessed a considerable increase in the active participation of women in the various Christian missions. Katharina Stornig focusses on the Catholic case, and particularly explores the activities and experiences of German missionary nuns, the so-called Servants of the Holy Spirit, in colonial Togo and New Guinea in the late 19th and first half of the 20th centuries. Introducing the nuns' ambiguous roles as travelers, evangelists, believers, domestic workers, farmers, teachers, and nurses, Stornig highlights the ways in which these women shaped and were shaped by the missionary encounter and how they affected colonial societies more generally. Privileging the sources produced by nuns (i.e. letters, chronicles and reports) and emphasizing their activities, *Sisters Crossing Boundaries* profoundly challenges the frequent depiction of women and particularly nuns as the largely passive observers of the missionizing and colonizing activities of men. Stornig does not stop at adding women to the existing historical narrative of mission in Togo and New Guinea, but presents the hopes and strategies that German nuns related to the imagination and practice of empire. She also discusses the effects of boundary-crossing, both real and imagined, in the context of religion, gender and race.

A History of France, 1460-1560 David Potter.1995-04-12 A survey of French history from the reign of Louis XI to the outbreak of the Wars of Religion that isolates some of the controversial theories of the period: state building, nobility and clientage and the Reformation and discusses them with full attention to the regional diversity of France. It also introduces the reader to recent research on the court and government set in the context of the basic social and economic movements of the period. It is argued that the basic identity of France as a nation was reinforced under the aegis of monarchical legitimacy backed by the nobility and the church, setting the pattern for the rest of the Ancien Regime.

Flametti, Or, the Dandyism of the Poor Hugo Ball.2014 In 1916, Hugo Ball (1886-1927) cofounded the Cabaret Voltaire in Zurich and penned the Dada Manifesto, launching what would become the Zurich Dada movement. That same year he completed his semi-autobiographical novel, *Flametti, or The Dandyism of the Poor*, which would be published two years later. Drawing from his pre-Dada period of struggle and poverty in the vaudeville circuit, Ball immerses us in the rise and fall of Max Flametti and his vaudeville company. Fishing in the local river to feed his company, dabbling in drugs, strolling through the vegetable market on the Gemüsebrücke in Zurich, ducking into a side street to avoid running into the police, Flametti marches through the pages of Ball's novel passionately pursuing a career that culminates in the presentation of the theatrical extravaganza *The Indians at the Krokodil in Zürich* (a locale that still exists today as a Spanish restaurant). Overcoming odds and alternately averting, succumbing to and embracing financial ruin, Flametti ultimately emerges as a tragic figure--a Willy Loman of vaudeville. Flametti portrays a frenetic Zurich that had been the backdrop to the Dada movement, and is comparable to other such literary cities and eras as Christopher Isherwood's Berlin.

The French Reformation Mark Greengrass.1991-01-08 The French Reformation seemed well-placed to succeed: there was a vigorous pre-reform movement, an apparent welcome for the work of French-speaking reformers in many quarters despite severe persecution, and the beginnings of a powerful and well-organized church structure. Yet, French protestantism remained the faith only of a minority. This book seeks to understand this

apparent contradiction and to explain why protestantism failed to take hold in France.

Security John T. Hamilton.2013-06-21 From national security and social security to homeland and cyber-security, security has become one of the most overused words in culture and politics today. Yet it also remains one of the most undefined. What exactly are we talking about when we talk about security? In this original and timely book, John Hamilton examines the discursive versatility and semantic vagueness of security both in current and historical usage. Adopting a philological approach, he explores the fundamental ambiguity of this word, which denotes the removal of concern or care and therefore implies a condition that is either carefree or careless. Spanning texts from ancient Greek poetry to Roman Stoicism, from Augustine and Luther to Machiavelli and Hobbes, from Kant and Nietzsche to Heidegger and Carl Schmitt, Hamilton analyzes formulations of security that involve both safety and negligence, confidence and complacency, certitude and ignorance. Does security instill more fear than it assuages? Is a security purchased with freedom or human rights morally viable? How do security projects inform our expectations, desires, and anxieties? And how does the will to security relate to human finitude? Although the book makes clear that security has always been a major preoccupation of humanity, it also suggests that contemporary panics about security and the related desire to achieve perfect safety carry their own very significant risks.

Theodore Beza and the Quest for Peace in France Scott M. Manetsch.2000 This volume presents a fascinating account of the political strategies, religious attitudes, and resistance activities of Theodore Beza and other French Protestant leaders between the Saint Bartholomew's Day massacres (1572) and the Edict of Nantes (1598).

Noble Power During the French Wars of Religion Stuart Carroll.1998-10-15 Noble affinities were the essence of power in sixteenth-century France. This is the first book to analyse the development of a noble following during the whole course of the Wars of Religion and the first substantial study of the Guise - the most powerful family of the period - to appear for over a century. The Guise, champions of the catholic cause, were the largest landowners in the province and used Normandy as a base for their support of catholicism in the British Isles. The family exploited religious dissension to build a formidable ultra-catholic party in Normandy which ultimately challenged the monarchy. This study breaks new ground by

illuminating the relationship between high politics and popular confessional solidarities, especially the rise of radical catholicism. It exploits new archival sources to consider all groups in political society, reinterpreting court politics and discussing groups usually excluded from the traditional political narrative, such as the peasantry.

Ireland: 1641 Micheál Ó Siochrú,Jane Ohlmeyer.2016-05-16 The 1641 rebellion is one of the seminal events in early modern Irish and British history. Its divisive legacy, based primarily on the sharply contested allegation that the rebellion began with a general massacre of Protestant settlers, is still evident in Ireland today. Indeed, the 1641 'massacres', like the battles at the Boyne (1690) and Somme (1916), played a key role in creating and sustaining a collective Protestant/ British identity in Ulster, in much the same way that the subsequent Cromwellian conquest in the 1650s helped forge a new Irish Catholic national identity. Following a successful hardback edition, Ó Siochrú and Ohlmeyer's popular title is now available in paperback. The original and wide-ranging themes chosen by leading international scholars for this volume will ensure that this edited collection becomes required reading for all those interested in the history of early modern Europe. It will also appeal to those engaged in early colonial studies in the Atlantic world and beyond, as the volume adopts a genuinely comparative approach throughout, examining developments in a broad global context.

Vikings Gareth Williams,Peter Pentz,Matthias Wemhoff.2014 In the ninth and tenth centuries, the Vikings created an unrivalled cultural network that spanned four continents. Adventurers, farmers, traders, conquerors and sailors, the Vikings were both peaceful and fierce, fighting or bargaining their way through as far as Constantinople in the East, North America and Greenland in the North, the British Isles in the West as well as into the Mediterranean. Throughout their existence, the Vikings encountered a remarkable diversity of peoples and inhabited an expansive and changing world. This beautifully illustrated book explores the core period of the Viking Age from a global perspective, examining how the Vikings drew influences from Christian Europe and the Islamic World and how they created a lasting historical impact on our world today. Highlighting an extraordinary range of objects and featuring new discoveries by archaeologists and metal-detector users, the cultural connections between Europe, Byzantium and the Middle East are explored in absorbing detail. Vikings: life and legend is published to complement a major exhibition developed jointly by the British Museum, the National Museum of Denmark, Copenhagen and the Museum for Prehistory and Early History, Berlin.
