Saving the City Richard Roberts.2013-11-28 In London, the world's foremost financial centre, the week before the outbreak of the First World War saw the breakdown of the markets, culminating with the closure for the first time ever of the London Stock Exchange on Friday 31 July. Outside the Bank of England a long anxious queue waited to change bank notes for gold sovereigns. Bankers believed that a run on the banks was underway, threatening the collapse of the banking system—all with the nation on the eve of war. This book tells the extraordinary, and largely unknown, story of this acute financial crisis that surged over London and around the globe. Drawing on diaries, letters, and memoirs of participants and a wide range of press coverage, as well as government and bank archives, it presents a lively and colourful account of a remarkable episode in financial and social history, outlining the drama of the collapse and the measures taken to contain it. This crucial and compelling 'missing piece' in the world's financial development was the first true global financial crisis, and proved a landmark in the management of financial crises.

My City Links: January 2024 Issue My City Links.2024-01-01 Another year has come to an end, leaving behind a kaleidoscope of memories. For Odisha, 2023 was an eventful year when it came to

governance, development, sports, and business. Our Cover Story for this edition brings you snapshots of the year's significant policy decisions, major achievements in sports, landmarks from the corporate & business world, and important happenings in the Odia entertainment industry. Located in close proximity to buildings that seat the 'who's-who' of Odisha's power establishment, the Bhubaneswar Club has over the years evolved as an enduring symbol of socializing and celebration. With a history of 74 years, the club not only boasts of a rich legacy but also stands tall as a symbol of contemporary urban life. In City Tales, we walk you through all that the club stands for. Bhubaneswar was recently witness to a memorable congregation of vintage motor vehicles that reflected the glory, beauty, and craftsmanship of an era gone by. The inaugural Odisha Concours D'Elegance saw the participation of 50 eye-catching vintage cars from all over the country. Read all about this one-of-a-kind event in City Lights. A New Year brings with it new beginnings as well as new resolutions that are meant to set the tone for the next 12 months. City Lights brings to you a special feature tracing the origins of New Year resolutions and speaking to people from different walks of life to figure out the practice means to them. December 1, 2023 will be remembered for a film that not only created a storm at the box office but also sparked off an intense debate that shows no signs of dying down soon. 'Animal', the multi-lingual blockbuster, has received flak for normalizing misogyny and its controversial portrayal of gender dynamics. In Screen Shots, we talk to some prominent names from the Odia entertainment industry on the ongoing debate that has brought with it its own share of polarization and toxicity. Another issue that has become a matter of debate in recent days is that of paid menstrual leave for women. The issue has taken centre stage once again after Union Minister for Women and Child Development Smriti Irani expressed her opposition to the concept on the grounds that it could lead to discrimination against women in the

workforce. In *City Beat*, we reach out to people for their views on the subject

Planning as Persuasive Storytelling James A. Throgmorton.1996-07 *Planning as Persuasive Storytelling* is a revealing look at the world of political conflict surrounding the Commonwealth Edison Company's ambitious nuclear power plant construction program in northern Illinois during the 1980s. Examining the clash between the utility, consumer groups, community-based groups, the Illinois Commerce Commission, and the City of Chicago, Throgmorton argues that planning can best be thought of as a form of persuasive storytelling. A planner's task is to write future-oriented texts that employ language and figures of speech designed to construct constituencies that the planner's vision is both desirable and feasible. Though seeking to persuade, the planner must also remain open to transformation through honest engagement with contending stories. Juxtaposing stories about efforts to construct Chicago's electric future, *Planning as Persuasive Storytelling* suggests a shift in how we think about planning. In order to account for the fragmented and conflicted nature of contemporary American life and politics, that shift would be away from science and the experts and toward persuasive storytelling by diverse authors--P. Housing the North American City Michael Doucet,John C. Weaver.1991-08-06 Doucet and

Weaver begin this empirical, analytical, and narrative study with an analysis of the evolution of land development as an enterprise and continue with an examination of house design and construction practices, the development of the apartment building, and an account of class and age as they relate to housing tenure. They also relate developments in Hamilton to the current state of urban historiography, using their case study to resolve discrepancies and contradictions in the literature. Among the major themes the authors deal with is a controversial exploration of what they see as a central North American urge: the desire to own a home. Other themes include the social allocation of urban space, the quality and affordability of housing, the increased interest of large corporations in the land development and financial service industries, and a comparative analysis of housing in Canada and the United States. The authors have drawn on civic and business records dating from the early nineteenth century to the latest planning data. Combining this information with their comprehensive analysis, Doucet and Weaver show that current housing problems and potential solutions are better understood when seen as part of a historical process. They provide a critical assessment of the ways in which contemporary society produces shelter and question the use of technical innovations alone to resolve housing crises.

Smart City—Being Smart Dr Sonali Sarnobat.2017-02-21 The mainstream media is responsible to raise the level of consciousness of the general populace. But in reality there is a big void here. The

media is so engulfed in its TRP ratings that politics, Bollywood, and cricket take the center stage. Hardly any space is spared for opinions, scholarly inputs, and the likes. The book offers an in-depth analysis of the concept of Smart City. The intention of the author is twofold: one, to propagate the concept of Smart City; two, to explain what it takes to be a smart city from the conventional city.

A Forest Environment Tax Scheme in Japan Keiko Nakayama.2022-03-02 This book is a work that focuses on the forest environmental tax. Forest resources have played a major role in preventing global warming by absorbing carbon dioxide and supplying oxygen. However, global economic growth has adversely affected the global environment and has exacerbated global warming due to excessive consumption of forest resources. The functions or “services” of forests are diverse, but the interest of the citizenry in forest cultivation is scarce since forests are public goods. Concurrently, Japanese forestry, which has played an important role in forest conservation, is steadily declining, and it is no longer possible for private forest operators to maintain the forest environment. Therefore, in order to realize sustainable economic growth, it is necessary to formulate policies for the conservation of appropriate forest environments. Forest conservation is an especially important policy issue for Japan, where two-thirds of the country is forested. In Japan, a forest environmental tax is being introduced as a forest conservation policy. As of 2021, the forest environmental tax has already been introduced in about two-thirds of the prefectures and soon will be introduced as a national tax. In this book, the significance and issues of the forest environmental tax will be sorted out, and the status of the introduction of the forest environmental tax in Japan will be compared with that of other countries. In addition, there is additional material regarding the

water source conservation fund in Toyota City, Aichi Prefecture, a system similar to the forest environmental tax.

Cities, Disaster Risk and Adaptation Christine Wamsler.2014-01-23 Worldwide, disasters and climate change pose a serious risk to sustainable urban development, resulting in escalating human and economic costs. Consequently, city authorities and other urban actors face the challenge of integrating risk reduction and adaptation strategies into their work. However, related knowledge and expertise are still scarce and fragmented. Cities, Disaster Risk and Adaptation explores ways in

which resilient cities can be 'built' and sustainable urban transformations achieved. The book provides a comprehensive understanding of urban risk reduction and adaptation planning, exploring key theoretical concepts and analysing the complex interrelations between cities, disasters and climate change. Furthermore, it provides an overview of current risk reduction and adaptation approaches taken by both city authorities and city dwellers from diverse contexts in low, middle and high income nations. Finally, the book offers a planning framework for reducing and adapting to risk in urban areas by expanding on pre-existing positive actions and addressing current shortfalls in theory and practice. The importance of a distributed urban governance system, in which institutions' and citizens' adaptive capacities can support and complement each other, is highlighted. This book takes a holistic approach; it integrates perspectives and practice from risk reduction and climate change adaptation based on a specific urban viewpoint. The text is richly supplemented with boxed case studies written by renowned academics and practitioners in the field and 'test yourself' scenarios that integrate theory into practice. Each chapter contains learning objectives, end of chapter questions, suggested further reading and web resources, as well as a wealth of tables and figures. This book is essential reading for undergraduate and postgraduate students of geography, urban studies and planning, architecture, environmental studies, international development, sociology and sustainability studies.
