Yukon Alone John Balzar.2000 The Yukon Quest International Sled Dog Race is one of the most challenging sporting events in the world. Every February, a handful of hardy souls spends over two weeks racing sleds pulled by fourteen dogs over 1,023 miles of frozen rivers, icy mountain passes, and spruce forests as big as entire states, facing temperatures that drop to forty degrees below zero on nights that are seventeen hours long. Why would anyone want to enter this race? John Balzar-who moved to Alaska and lived on the trail-treats us to a vivid account of the grueling race itself, offering an insightful look at the men and women who have moved to this rugged and beautiful place. Readers will also be fascinated by Balzar's account of what goes into the training and care of the majestic dogs who pull the sleds and whose courage, strength, and devotion make them the true heroes of this story.

Titian and the Renaissance in Venice Bastian Eclercy,Hans Aurenhammer.2019-04-30 This dazzling survey of 16th-century Venetian painting captures the striking colors and revolutionary characteristics of one of art history's greatest chapters. It is hard to imagine more profoundly influential artists than the Venetian painters of the 16th century. Whether creating sweeping devotional altarpieces or intimate portraits, the Venetian painters changed the way artists employed color and composition. These defining qualities are on brilliant display in this book that covers fascinating aspects of the work of Titian, Veronese, Tintoretto, Lorenzo Lotto, Jacopo Bassano, and many others. More than one hundred paintings, drawings, and prints are reproduced in stunning detail. Side-by-side comparisons draw readers into the conversations between Venetian artists as they tackled similar subjects and vied for commissions. The book opens with fascinating essays about the history of 16th-century Venice, the Venetian School of painting, and the techniques of the Venetian masters. As beautiful as it is informative, this book features all of the excitement and splendor of one of the most prolific and important chapters in the history of European art.

Mountain Emergency Medicine Hermann Brugger,Ken Zafren,Luigi Festi,Peter Paal,Giacomo Strapazzon.2021-03-15T00:00:00+01:00 Mountain emergency medicine has seen exponential development due to the ever increasing number of people who hike or trek as well as practice extreme sports. Emergency physicians and nurses need to be equipped with the necessary training to be able to manage “on the field” accidents and sicknesses as well as their own physical security. Theoretical knowledge is generally of high level but practical expertise is dangerously lacking in many operators. Furthermore, treatment modalities on the field have not been completely codified and are not supported by internationally-accepted guidelines. This book is the first to offer a complete and thorough approach to this field of Emergency Medicine based on the latest research findings.

Ethiopia Philip Briggs.2018-12-10 This new, fully updated 8th edition of Bradt's Ethiopia remains the most comprehensive, detailed and thorough guide available, particularly known for its strength of background information, coverage of off-the-beaten track areas, and in-depth details of hotels and other tourist facilities. It also contains far more maps than other guides. Bradt's Ethiopia is also the longest-serving English-language guidebook dedicated to the country, with a history of 25 years of research and expertise. This new edition has been updated by the original author, Philip Briggs, the world's foremost writer of Africa travel guides. Recent years have seen a notable rise in domestic and foreign private investment in the development of new hotels and national parks; this new edition includes all the most up-to-date details reflecting the recent changes, from development of tourist facilities to improved road infrastructure. Bradt's Ethiopia is ideal for visitors of all ages no matter the interest, whether travelling independently or as part of an organised group, from adventurous and active travellers interested in cultural, historical, and wildlife sightseeing to international conference visitors, spa tourists and community-based visitors looking for activities such as trekking and horseriding in the Rift Valley and Simien Mountains. Wildlife and birding visitors who come for Ethiopia's wealth of endemics are also catered for and this new edition includes a dedicated colour section on wildlife and birds. Of all the African nations, Ethiopia is most prone to misconceptions. The 1985 famine and the cracked barren earth of the Danakil Depression are not images quickly forgotten. But this fully updated guide refocuses the lens to reveal an ancient country that continues to surpass all expectations: from the ancient Judaic cultures of the fertile highlands to the Animist people of the South Omo Valley, from the Afroalpine moorland of the Bale Mountains National Park to the thundering Blue Nile Falls. This book also leads you further off the beaten track, so travellers can see more of this expansive and beautiful land, believed to be the cradle of humankind.

The Tower of Hanoi – Myths and Maths Andreas M. Hinz,Sandi Klavžar,Uroš Milutinović,Ciril Petr.2013-01-31 This is the first comprehensive monograph on the mathematical theory of the solitaire game “The Tower of Hanoi” which was invented in the 19th century by the French number theorist Édouard Lucas. The book comprises a survey of the historical development from the game’s predecessors up to recent research in mathematics and applications in computer science and psychology. Apart from long-standing myths it contains a thorough, largely self-contained presentation of the essential mathematical facts with complete proofs, including also unpublished material. The main objects of research today are the so-called Hanoi graphs and the related Sierpiński graphs. Acknowledging the great popularity of the topic in computer science, algorithms

and their correctness proofs form an essential part of the book. In view of the most important practical applications of the Tower of Hanoi and its variants, namely in physics, network theory, and cognitive (neuro)psychology, other related structures and puzzles like, e.g., the "Tower of London", are addressed. Numerous captivating integer sequences arise along the way, but also many open questions impose themselves. Central among these is the famed Frame-Stewart conjecture. Despite many attempts to decide it and large-scale numerical experiments supporting its truth, it remains unsettled after more than 70 years and thus demonstrates the timeliness of the topic. Enriched with elaborate illustrations, connections to other puzzles and challenges for the reader in the form of (solved) exercises as well as problems for further exploration, this book is enjoyable reading for students, educators, game enthusiasts and researchers alike.

The Girl with the Leica Helena Janeczek. 2019-10-10 1st August 1937. A parade of red flags marches through Paris. It is the funeral procession for Gerda Taro, the first female photographer to be killed on a battlefield. Robert Capa, who leads the procession, is devastated. They have been happy together: he taught her how to use the Leica before they left together to fight in the Spanish Civil War. Other figures from Gerda's past are in the crowd: Ruth Cerf, her friend from Leipzig, who shared the hardships of their first years in Paris after fleeing from Germany; Willy Chardack, who resigned himself to the role of loyal companion after Gerda snubbed him for Georg Kuritzkes, a fighter in the International Brigades. For all of them, Gerda will remain a stronger and more vivid presence than her image of anti-fascist heroine. It is her who binds together a narrative spanning distant times and places, bringing back to life the snapshots of these young people and the challenges they faced in the 1930s, from economic depression to the rise of nazism, to the hostility towards refugees in France. But for those who loved her, those young years would remain a time when, as long as Gerda was alive, everything seemed possible.

The Science of Happiness Stefan Klein. 2015-04-09 The international bestseller. An enthralling exploration of the science of happiness. We all know what it feels like to be happy, but what mechanisms inside our brains trigger such a positive emotion? What does it really mean to be happy, and why can't we feel that way all of the time? Psychologists and neuroscientists have been studying negative emotions for decades, but until recently few have focused on the subject of happiness. Now, in *The Science of Happiness*, leading science journalist Stefan Klein ranges widely across the latest frontiers of neuroscience and psychology to explain how happiness is generated in our brains, what biological purpose it serves, and the conditions required to foster the 'pursuit of happiness'. A remarkable synthesis of a growing body of research that has not been brought together before, *The Science of Happiness* is, ultimately, a book that helps us understand our own quest for happiness -- and is certain to help make you happier.

Chilloo Aunty M. 2021-04-21 The book is light-hearted and I think anyone with a pet can relate to it. Even if the reader doesn't have a pet it makes for an interesting read. The story has only a few characters, the mom and dad, and later a baby brother and sister. As Chilloo recounts his memories of his life, even small incidents become big stories. Chilloo loves his family and they're his whole world. His life literally revolves around them. Even though he is dependent on them, they are also equally dependent on him, for his love and companionship. Chilloo will make you fall in love with him too.

Travels with My Donkey Tim Moore.2014-05-06 'A donkey?' blurted my family as one. For a moment it didn't seem they'd ever be able to list all the reasons that made this so entertainingly ludicrous. . . .Yes, I'd never ridden a donkey on a beach or petted one at a city farm, never even pinned a cardboard tail to one's throat after the cake and ice cream....A donkey would be my hairy-coated hair shirt, making my pilgrimage to Santiago de Compostela a truer test of the will, a trial. With these words, having no knowledge of Spanish and even less about the care and feeding of donkeys, Tim Moore, Britain's indefatigable traveling Everyman, sets out on a pilgrimage to the cathedral at Santiago de Compostela with a donkey named Shinto as his companion. Armed only with the Codex Calixtinus, a twelfth-century handbook to the route, and expert advice on donkey management from Robert Louis Stevenson, Moore and his four-legged companion travel the ancient five-hundred-mile route from St. Jean Pied-de-Port, on the French side of the Pyrenees, to the cathedral at Santiago de Compostela, which houses the remains of Spain's patron saint, St. James. Over sun-scorched highways, precipitous bridges, dirt paths shaded by leafy trees, and vineyards occasionally lashed by downpours, Moore and Shinto pass through some of the oldest towns and cities in northern Spain in colorful company, both past and present. Pilgrims real and imagined have traveled this route throughout the ages, a diverse cast of wayfarers spanning Charlemagne, St. Francis of Assisi, Chaucer's Wife of Bath, and New Age diva, Shirley MacLaine. Moore's present-day companions are no less florid or poignant. Clearly more interested in Shinto than in Moore, their fellow walkers are an assortment of devout Christian pilgrims, New Age spirituality seekers, travelers grieving over a lost love affair, Baby Boomers contemplating the advent of middle age, and John Q. Public just out for a cheap, boozy sun-drenched outdoor holiday. As Moore pushes, pulls, wheedles, cajoles, and threatens Shinto across Spain toward the crypt of St. James in a quest to find the spiritual pilgrim within, the duo overnights in the bedrooms, dormitories, and---for Shinto---adjacent grassy fields of northern Spain's hostels, inns, convents, seminaries, and farmhouses. Shinto, a donkey with a finely honed talent for relieving himself at the most inopportune moments, has better luck in the search for his next meal than Moore does in finding his inner St. Francis. Undaunted, however, Man and Beast finally arrive at the cathedral and a successful end to their journey. For readers who delighted in his earlier books, *Travels with My Donkey* is the next hilarious chapter in the travels of Tim Moore, a book that keeps the bones of St. James rattling till this day.

Diamanten im Staub Charmaine Pauls.2021-10-21 Männer wie wir sehen Dinge. Wir tun Dinge, die uns gefühllos machen. Das ist der Preis für Macht und Geld, dafür, dass wir la belle vie leben und die französische Mafia leiten. Dann tauchte sie auf wie eine hübsche Wildblume, die durch die Ritzen eines schmutzigen Pflasters wächst - zerbrechlich und doch unverwundlich, ein Hauch von Schönheit inmitten des Schmutzes. Sie sollte nur ein weiterer Job sein, eine namenlose Person, die ich aus ihrem Leben reißen und meinem Bruder übergeben sollte, nichts weiter als ein Pfand in unserem Diamantengeschäft. Für Männer wie uns gibt es einen psychologischen Stempel. Uns fehlt es an Empathie und Schuldgefühlen. Wir tun Dinge, um zu bekommen, was wir wollen, Dinge, die Blumen verwelken lassen.

ACT - Adjunct Compensatory Training for Rock Climbers Volker Schöffl,Patrick Matros,Dicki (Ludwig) Korb.2020-03-13 ACT - Adjunct compensatory Training for rock climbers: climbers' compensation training with a medical foundation Adjunct compensatory Training focuses on training the neglected muscle slings and innervation patterns within their specific range of motion, building up posture and core strength as well as balancing the athletic build of the body. The ACT concept was inspired by our long-time cooperation with high-level athletes. We combine our sports-medical and trainings-methodical knowledge to effectively prevent injuries and overstrain. Volker Schöffl, as the MD in the group, analyses the body from a sports-medical and biomechanical point of view. With his vast knowledge of climbing injuries (Volker Schöffl, Thomas Hochholzer, Sam Lightner Jr. One Move Too Many) and as a highly active avid climber, he understands why certain conditions could and do lead to injuries in the long-term. Dicki and Patrick are world-renowned climbing trainers and coaches. Coming from a top-level climbing background themselves, they focus on climbing-specific training (Gimme Kraft, Kraftfactory) and biomechanical analysis of climbing. Weaknesses in certain climbers which can be reduced through specific and adjunct training are frequently revealed by the biomechanical aspects. Combining our two fields of expertise, we have collaborated to create Adjunct compensatory Training, which aims to rebuild neglected range of motion in muscle slings and to improve neuromuscular innervation patterns. Thus, it will help you to better withstand specific climbing training and reduce injury and the risk of overexertion. The ACT concept was born in 2015 and has been consistently developed further within our group since then. In our daily work with both elite athletes and normal climbers, we perpetually evaluated, restructured and remodelled our exercises, structuring and fine-tuning a program which we find most effective.

Thomas Tuchel Schachter Meuren, Daniel Tobias.2021-08 When Thomas Tuchel arrived at Chelsea in January 2021, few could imagine that a mere four months later he would be leading the club to victory in the UEFA Champions League final. Having inherited a misfiring team, he quickly remoulded them in his image, combining a spectacular attacking style of play with brilliant tactical thinking. But who is Thomas Tuchel? Fans of his former clubs Paris Saint-Germain and Borussia Dortmund would tell you he is one of the best football managers in the world. Innovator, tactician, superlative motivator and, sometimes, controversialist, Tuchel knows how to develop young players but also how to manage a dressing room full of superstars such as Neymar and Mbappé; and now Mount, Havertz and Werner. This is the definitive story of Thomas Tuchel and his footballing genius: from his beginnings as a football manager in Mainz to his successful but conflict-laden stint at Dortmund. From his glittering tenure at PSG, which was also marred by his fractious relationship with the club's hierarchy, to his arrival mid-season at Chelsea. This book introduces us to one of the most interesting figures in football today.
