Chasing Innovation Lilly Irani.2019-03-12 A vivid look at how India has developed the idea of entrepreneurial citizens as leaders mobilizing society and how people try to live that promise Can entrepreneurs develop a nation, serve the poor, and pursue creative freedom, all while generating economic value? In *Chasing Innovation*, Lilly Irani shows the contradictions that arise as designers, engineers, and businesspeople frame development and governance as opportunities to innovate. Irani documents the rise of entrepreneurial citizenship in India over the past seventy years, demonstrating how a global ethos of development through design has come to shape state policy, economic investment, and the middle class in one of the world's fastest-growing nations. Drawing on her own professional experience as a Silicon Valley designer and nearly a decade of fieldwork following a Delhi design studio, Irani vividly chronicles the practices and mindsets that hold up professional design as the answer to the challenges of a country of more than one billion people, most of whom are poor. While discussions of entrepreneurial citizenship promise that Indian children can grow up to lead a nation aspiring to uplift the poor, in reality, social, economic, and political structures constrain whose enterprise, which hopes, and which needs can be seen as worthy of investment. In the process, Irani warns, powerful investors, philanthropies, and companies exploit citizens' social relations, empathy, and political hope in the quest to generate economic value. Irani argues that the move to recast social change as innovation, with innovators as heroes, frames others—craftspeople, workers, and activists—as of lower value, or even dangers to entrepreneurial forms of development. With meticulous historical context and compelling stories, *Chasing Innovation* lays bare how long-standing power hierarchies such as class, caste, language, and colonialism continue to shape opportunity in a world where good ideas supposedly rule all.

Everyday Sectarianism in Urban Lebanon Joanne Randa Nucho.2016-11-22 What causes violent conflicts around the Middle East? All too often, the answer is sectarianism—popularly viewed as a timeless and intractable force that leads religious groups to conflict. In *Everyday Sectarianism in Urban Lebanon*, Joanne Nucho shows how wrong this perspective can be. Through in-depth research with local governments, NGOs, and political parties in Beirut, she demonstrates how sectarianism is actually recalibrated on a daily basis through the provision of essential services and infrastructures, such as electricity, medical care, credit, and the planning of bridges and roads. Taking readers to a working-class, predominantly Armenian suburb in northeast Beirut called Bourj Hammoud, Nucho conducts extensive interviews and observations in medical clinics, social service centers, shops, banking coops, and municipal offices. She explores how group and individual access to services depends on making claims to membership in the dominant sectarian community, and she examines how sectarianism is not just tied to ethnoreligious identity, but also class, gender, and geography. Life in Bourj Hammoud makes visible a broader pattern in which the relationships that develop while procuring basic needs become a way for people to see themselves as part of the greater public. Illustrating how sectarianism in Lebanon is not simply about religious identity, as is commonly thought, *Everyday Sectarianism in Urban Lebanon* offers a new look at how everyday social exchanges define and redefine communities and conflicts.

PoC or GTFO Manul Laphroaig.2017-10-31 This highly anticipated print collection gathers articles published in the much-loved *International Journal of Proof-of-Concept or Get The Fuck Out*. PoC||GTFO follows in the tradition of *Phrack* and *Uninformed* by publishing on the subjects of offensive security research, reverse engineering, and file format internals. Until now, the journal has only been available online or printed and distributed for free at hacker conferences worldwide. Consistent with the journal's quirky, biblical style, this book comes with all the trimmings: a leatherette cover, ribbon bookmark, bible paper, and gilt-edged pages. The book features more than 80 technical essays from numerous famous hackers, authors of classics like *Reliable Code Execution on a Tamagotchi*, *ELFs are Dorky*, *Elves are Cool*, *Burning a Phone*, *Forget Not the Humble Timing Attack*, and *A Sermon on Hacker Privilege*. Twenty-four full-color pages by Ange Albertini illustrate many of the clever tricks described in the text.

Digital Keywords Benjamin Peters.2016-06-07 How the digital revolution has shaped our language In the age of search, keywords increasingly organize research, teaching, and even thought itself. Inspired by Raymond Williams's 1976 classic *Keywords*, the timely collection *Digital Keywords* gathers pointed, provocative short essays on more than two dozen keywords by leading and rising digital media scholars from the areas of anthropology, digital humanities, history, political science, philosophy, religious studies, rhetoric, science and technology studies, and sociology. *Digital Keywords* examines and critiques the rich lexicon animating the emerging field of digital studies. This collection broadens our understanding of how we talk about the modern world, particularly of the vocabulary at work in information technologies. Contributors scrutinize each keyword independently: for example, the recent pairing of digital and analog is separated, while classic terms such as community, culture, event, memory, and democracy are treated in light of their historical and intellectual importance. Metaphors of the cloud in cloud computing and the mirror in data mirroring combine with recent and radical uses of terms such as information, sharing, gaming, algorithm, and internet to reveal previously hidden insights into contemporary life. Bookended by a critical introduction and a list of over two hundred other digital keywords, these essays provide concise, compelling arguments about our current mediated condition. *Digital Keywords* delves into what language does in today's information revolution and why it matters.

Achtung-Panzer! Heinz Guderian.1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Biomedical Odysseys Priscilla Song. 2017-05-16 Thousands of people from more than eighty countries have traveled to China since 2001 to undergo fetal cell transplantation. Galvanized by the potential of stem and fetal cells to regenerate damaged neurons and restore lost bodily functions, people grappling with paralysis and neurodegenerative disorders have ignored the warnings of doctors and scientists back home in order to stake their futures on a Chinese experiment. *Biomedical Odysseys* looks at why and how these individuals have entrusted their lives to Chinese neurosurgeons operating on the forefront of experimental medicine, in a world where technologies and risks move faster than laws can keep pace. Priscilla Song shows how cutting-edge medicine is not just about the latest advances in biomedical science but also encompasses transformations in online patient activism, surgical intervention, and borderline experiments in health care bureaucracy. Bringing together a decade of ethnographic research in hospital wards, laboratories, and online patient discussion forums, Song opens up important theoretical and methodological horizons in the anthropology of science, technology, and medicine. She illuminates how poignant journeys in search of fetal cell cures become tangled in complex webs of digital mediation, the entrepreneurial logics of postsocialist medicine, and fraught debates about the ethics of clinical experimentation. Using innovative methods to track the border-crossing quests of Chinese clinicians and their patients from around the world, *Biomedical Odysseys* is the first book to map the transnational life of fetal cell therapies.

Organised Retailing and Agri-Business N. Chandrasekhara Rao,R. Radhakrishna,Ram Kumar Mishra,Venkata Reddy Kata.2015-10-07 This book examines the performance of organized retail chains supplying the agri-input and output services in terms of achieving their objective of utilising collective bargaining power in the marketing of their agricultural produce, integrating empirical experience from India and other selected developing countries. The scenario of marketing for agricultural products has been undergoing rapid changes with the rise of organised retailing (the Indian term for ‘supermarkets’), a process that is likely to accelerate in years to come, with India being on the threshold of a supermarket revolution. In fact, India is referred to as the ‘final frontier’ in the development of supermarkets. The growth of supermarkets in India is faster than that in China, which is also witnessing an exponential growth as part of the “third wave” of supermarket diffusion. The book investigates the links between organised retailing and farmers and farming in India. Apart from raising issues of equity, inclusion and problems in policy framework, it also discusses policy interventions that are essential in order to make the development of organised retailing more inclusive and beneficial to the farming community and agricultural sector. The book further serves as a guide for policy makers, helping them to select the right kind of interventions to balance growth with equity as market forces penetrate deeper into the agricultural marketing space.

Haptic and Audio Interaction Design Antti Pirhonen,Stephen Brewster.2008-09-16 Bringing Them Under the Same Roof The Haptic and Audio Interaction Design workshop series is now in its third year. These workshops have already demonstrated a clear need for a venue in which - searchers and practitioners in these areas gather together under the same roof. Three years have also shown clear developments in the approaches taken - with the benefits of combining haptics and audio shown practically and conceptually in this year's - pers. In other words, it seems that when there is interaction between audio and haptic researchers, they really learn from each other and multimodal approaches emerge. There are many good reasons for using haptics and audio together. There are the practical needs in application development. Mobile devices are an obvious example - while the device is small in size and is used on the move, interaction cannot rely solely on visual display. On the other hand, the development of applications for visually impaired people makes it necessary to learn how to design non-visual user-interfaces for different situations.

Sounding the Limits of Life Stefan Helmreich. 2015-10-27 What is life? What is water? What is sound? In *Sounding the Limits of Life*, anthropologist Stefan Helmreich investigates how contemporary scientists—biologists, oceanographers, and audio engineers—are redefining these crucial concepts. Life, water, and sound are phenomena at once empirical and abstract, material and formal, scientific and social. In the age of synthetic biology, rising sea levels, and new technologies of listening, these phenomena stretch toward their conceptual snapping points, breaching the boundaries between the natural, cultural, and virtual. Through examinations of the computational life sciences, marine biology, astrobiology, acoustics, and more, Helmreich follows scientists to the limits of these categories. Along the way, he offers critical accounts of such other-than-human entities as digital life forms, microbes, coral reefs, whales, seawater, extraterrestrials, tsunamis, seashells, and bionic cochlea. He develops a new notion of sounding—as investigating, fathoming, listening—to describe the form of inquiry appropriate for tracking meanings and practices of the biological, aquatic, and sonic in a time of global change and climate crisis. *Sounding the Limits of Life* shows that life, water, and sound no longer mean what they once did, and that what count as their essential natures are under dynamic revision.
