Not the Marrying Kind Christina Cole.2014-04-26 Kat Phillips is not the marrying kind. She can't cook, keep house, or sew a stitch. When her father takes sick and decides to sell the Rocking P ranch, Kat must either follow his wishes and marry the lackluster minister in town or find a husband for herself. Joshua Barron comes to the Colorado Territory to make a new start. Nothing means more to him than freedom. He arrives at the cabin where he'll be staying with his reclusive, crazy-as-a-coot cousin, and realizes Cody desperately needs a wife. His thoughts go at once to the long-legged redhead he met in the foothills. When Kat realizes the handsome stranger is looking for a wife, she's determined to prove she's got all the skills required to please a man...even if she has to lie to do it. She has no idea that Joshua is involved in a few lies of his own.

Climate Change from a Criminological Perspective Rob White.2012-06-12 Few would dispute the power of climate change to lead to profoundly destructive weather events. At the same time, the possibility of climate change as a consequence—or even a cause—of criminal events is far less recognized. As the earth grows warmer, issues regarding land use, water rights, bio-security, and food production and distribution will continue to have far-reaching impact, and produce more opportunity for offenses by individuals and groups as well as political and corporate entities. In *Climate Change from a Criminological Perspective*, a panel of pioneering green criminologists investigates an increasingly complex chain of ecological causes and effects. Illegal acts are analyzed as they contribute to environmental decline (e.g., wildlife poaching) or result from ecological

distress (e.g., survival-related theft). Regulatory and other interventions are critiqued, concepts of environmental harm refined, and new research methodologies called for. And while individual events described are mainly local, the contributors keep the global picture, and substantial questions about human rights and social relationships, firmly in mind. Topics featured include: Global warming as corporate crime. Climate change and the courts: U.S. and global views. Climate change, natural disasters, and gender inequality. The roles and responsibilities of environmental enforcement networks. A sociocultural perspective on climate change denial. PLUS: instructive in-depth chapters on criminological aspects of Hurricane Katrina and the Japanese nuclear disaster. A volume of considerable timeliness and vision, *Climate Change from a Criminological Perspective* will be read and discussed, and will inspire action, by researchers in criminology, criminal justice, environmental studies, and related disciplines, as well as policymakers.

Internal Combustion Engines Institution of Mechanical Engineers.2014-10-10 This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce

both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

Social Torture Chris Dolan.2009 As Director of the Refugee Law Project at the University of Makerere, Kampala, Uganda, Dolan offers a behind-the-scenes, cross-disciplinary study of one of Africa's longest running and most intractable conflicts. This book shows how, alongside the activities of the Lord's Resistance Army, government decisions and actions on the ground, consolidated by humanitarian interventions and silences, played a central role in creating a massive yet only very belatedly recognized humanitarian crisis. Not only individuals, but society as a whole, came to exhibit symptoms typical of torture, and the perpetrator-victim dichotomy became blurred. It is such phenomena, and the complex of social, political, economic and cultural dynamics which underpin them, which the author describes as social torture. Building on political economy, social anthropology, discourse analysis, international relations and psychoanalytic approaches to violence, this book offers an important analytical instrument for all those seeking entry points through which to address entrenched conflicts, whether from a conflict resolution, post-conflict recovery or transitional justice perspective.

Diode, Transistor & Fet Circuits Manual R. M. Marston.2013-10-22 Diode, Transistor and FET Circuits Manual is a handbook of circuits based on discrete semiconductor components such as diodes, transistors, and FETS. The book also includes diagrams and practical circuits. The book describes basic and special diode characteristics, heat wave-rectifier circuits, transformers, filter capacitors, and rectifier ratings. The text also presents practical applications of associated devices, for example, zeners, varicaps, photodiodes, or LEDs, as well as it describes bipolar transistor characteristics. The transistor can be used in three basic amplifier configurations, such as common-collector, common-emitter, or common-base. Oscillators and multivibrators use transistors as linear amplifying elements or as digital switching elements, respectively. In other practical applications, bipolar transistors are used in audio pre-amp, tone control, and power amplifier applications. For

example, the book illustrates the ideal form and location of the volume control where it is fully d.c. isolated from the pre-amplifier's output. The book cites other applications of transistor circuits in a noise limiter, in astable multivibrators, in L-C oscillators, and in lie detectors. This book is suitable for radio, television, and electronics technicians, design and application engineers, and students in electronics or radio communications.

Immunology for Pharmacy - E-Book Dennis Flaherty. 2014-06-25 With a new pharmacy-specific approach to immunology, *Immunology for Pharmacy* prepares pharmacists for practice by providing a complete understanding of the basis of immunology and the consequences of either suppressing or enhancing immune function. It covers key subjects such as prophylaxis and vaccination, antibodies as therapeutic and diagnostic agents, biological modifiers, and the rationale for use and mechanisms of therapeutic agents. Written by experienced author and educator Dennis Flaherty, this book presents topics with a logical, step-by-step approach, explaining concepts and their practical application. A companion Evolve website reinforces your understanding with flashcards and animations. Pharmacy-specific coverage narrows the broad field of immunology to those areas most pertinent and clinically relevant to pharmacy students. 165 full-color illustrations help to illuminate difficult concepts. Factors That Influence the Immune Response chapter covers biological agents including bacteria, viruses, and fungi, and their related toxins and how they relate to the immune system. Three chapters on vaccinations prepare you for this important part of the pharmacist's role

by discussing cancer treatment with whole tumor vaccines, cell vaccines, and viral vector vaccines, describing other vaccines such as recombinant vaccines and plant vaccines, and examining how diseases such as diphtheria, whooping cough, and tetanus respond to vaccinations. A summary of drugs used in treating each condition helps you understand typical treatments and their immunological mechanisms, so you can choose proper treatments. Integrated information makes it easier to understand how various parts of the immune system work together, leading to a better understanding of immunology as a whole. A unique focus on practical application and critical thinking shows the interrelationship of concepts and makes it easier to apply theory to practice. Information on AIDS covers the identification and treatment of both strains of HIV as well as AIDS, preparing you for diseases you will see in practice. Unique student-friendly features simplify your study with learning objectives and key terms at the beginning of each chapter, bulleted summaries and self-assessment questions at the end of each chapter, and a glossary at the back of the book. Over 60 tables summarize and provide quick reference to important material. A companion Evolve website includes animations and pharmacy terminology flashcards.

Autoimmune Bullous Diseases Müzeyyen Gönül,Seray Çakmak.2018-05-09 Autoimmune bullous diseases are a group of rare skin diseases characterized by intraepidermal and subepidermal bullae formations due to autoantibodies directed against the structural proteins of the epidermis or the dermal-epidermal junction. Early and correct diagnosis and adequate treatment of autoimmune bullous diseases are important as they cause morbidity and mortality in the affected patients. This book, which gives detailed information about autoimmune bullous diseases, has two sections and nine chapters with sixteen contributing authors. The first section describes the structure and tasks

of desmosomes and basement membrane zone, which consist of the major antigens of skin integrity targeted by autoantibodies. The second section is about the epidemiology, etiopathogenesis, mucocutaneous, histopathologic and laboratory findings, and therapy of autoimmune bullous diseases.

State, Power and Legitimacy Kunal Chakrabarti,Kanad Sinha.2018-11-26 State, Power and Legitimacy: The Gupta Kingdom presents a comprehensive account of the Gupta state, with particular emphasis on its strategies of legitimizing its power. The political strategies that characterized this crucial juncture of early Indian history, termed 'threshold times' by Romila Thapar, employed certain features of ancient Indian polity even as new political mechanisms were emerging. This volume argues that this unique combination of political strategizing was a part of the process of legitimizing royal authority, in which religion, literature and art were essential tools. The volume also includes a large selection of pre-published essays which provide the reader with a

comprehensive idea of how the Gupta state has been studied by earlier historians together with recent articles which help us to look at the Gupta state and the manner in which it exercised and legitimized its power. A substantive introduction suggests the need to move beyond the nationalist perspective that views the rule of the Guptas as the 'Golden Age' or the Marxist model of 'Indian feudalism'.
