Developmental Disabilities

How to Teach Daily Living Skills to Adults with Developmental Disabilities John Meyers.2008 As hard as it might be to imagine, there are people working in the social services field who aren't as well trained as they might be. This doesn't mean that they work for a bad agency or that we need to change the whole service delivery system. It means that those staff people need more training. Training in what? This book introduces readers to a wide range of principles used in teaching daily living skills to adults with developmental disabilities - including understanding the basics of behavior, assessing behaviors, writing plans, instructional processes, reinforcement, behavior management tips, data collection, ethical issues, and much more. It is written in a conversational tone rather than a textbook format, so it's like having a conversation with someone who has been there and done that. This is an idea generating book designed to get you thinking about the service you provide the clients in your program.

The Epidemiology of Common Health Conditions Among Adults with Developmental Disabilities in Primary Care

Suzanne McDermott, Robert R. Moran, Tan Platt. 2008 The purpose of this book is to provide evidence for physicians about the prevalence for a range of medical conditions by disability, from a primary care perspective. Each chapter focuses on a secondary condition for which adults with DD are at increased risk, decreased risk, and the same risk as the general population. The incidence and prevalence of each of the secondary conditions is presented, and contrasted to the general population. The special challenges for diagnosis and treatment of the secondary condition is highlighted. Finally the book describes a case study that includes physical, social and emotional challenges and ways to accommodate these issues in a primary care practice.

Friendships and Community Connections Between People with and Without Developmental Disabilities Angela R.

Novak Amado.1993 True community integration is much more than placing an individual with a disability in a community setting ... it also means belonging and being in close friendships with other community members without disabilities. Now, this perceptive book gleans principles from successful experiences to help others build relationships of their own through natural social connections. The authors of this heartening guide to relationships and community connections combine the wisdom gained from their varied backgrounds in advocacy, service provision, parenting, and research to explore how friendships can enhance the lives of every individual in the community. Each author considers a different facet of friendship, such as: work and leisure relationship; gender-related expectations; community associations and groups; the roles of love, affection, and intimacy.

Neurological, Psychiatric, and Developmental Disorders

Institute of Medicine,Board on Global Health,Committee on Nervous System Disorders in Developing Countries.2001-01-01 Brain disorders—neurological, psychiatric, and developmental—now affect at least 250 million people in the developing world, and this number is expected to rise as life expectancy increases. Yet public and private health systems in developing countries have paid relatively little attention to brain disorders. The negative attitudes, prejudice, and stigma that often surround many of these disorders have contributed to this neglect. Lacking proper diagnosis and treatment, millions of individual lives are lost to disability and death. Such conditions exact both personal and economic costs on families, communities,

and nations. The report describes the causes and risk factors associated with brain disorders. It focuses on six representative brain disorders that are prevalent in developing countries: developmental disabilities, epilepsy, schizophrenia, bipolar disorder, depression, and stroke. The report makes detailed recommendations of ways to reduce the toll exacted by these six disorders. In broader strokes, the report also proposes six major strategies toward reducing the overall burden of brain disorders in the developing world.
