The Assessment of L2 Written English across the MENA Region Lee McCallum, Christine Coombe.2020-12-19 This edited book brings together contributions from different educational contexts across the Middle East and North Africa (MENA) in order to explore how L2 English writing is assessed. Across seven MENA countries, the book covers aspects of practice including: task design and curriculum alignment, test (re)development, rubric design, the subjective decision making that underpins assessing students' writing and feedback provision, learner performance and how research methods help shed light on initiatives to improve student writing. In such coverage, chapter authors provide concrete evidence of how assessment practice is governed by their unique context, yet also influenced by international standards, trends and resources. This book will be of interest to second language teachers, assessors and programme developers as well as test designers and evaluators.

Active Teaching and Learning Strategies Rock Moore, Michelle A. Moore.2004 Active Teaching and Active Learning Strategies: Creating a Blueprint for Success is the cumulative result of a year of reflecting, asking, and listening to questions, and comments, that many have concerning the education of our youth. The book's genesis however, started many years ago as the state of California, along with many other states, embraced a standards based accountability system. This accountability has now been coupled with the recent addition of The No Child Left Behind Legislation. In a real sense, we are entering both the best and worst of times. I say this because of the effects of high-stakes testing and the requirement that all students reach high levels of proficiency which admittedly, are very lofty goals. For this to be realized, changes will be required in teaching and assessment, as well as a more concentrated focus on student learning. The instructional design introduced in this book advocates four components: academic, social/collaborative, contextual, and cognitive/developmental. These components work in tandem with Active Teaching and Learning Strategies. Combined, they form a student responsive instructional methodology, which optimizes student success, and academic achievement. We wanted to create a book that demonstrated to those of us in the field of education the value of looking at academic standards with data about our students, and reflecting on how this information should influence our choices concerning instructional practices and our perceptions about the students that we are entrusted with. The focus of this endeavor is to see all students achieve and succeed, and to keep passion and compassion at the heart of all that we do. It is the premise of this book that the difference between effective and outstanding teachers are that outstanding teachers care, know how to utilize data, practice active teaching strategies, and promote the active learning of students. Together these characteristics became the design, and course of action, that Created a Blueprint for Success.

Peer Interaction and Second Language Learning Masatoshi Sato, Susan Ballinger. 2016-03-10 This volume represents the first collection of empirical studies focusing on peer interaction for L2 learning. These studies aim to unveil the impact of mediating variables such as task type, mode of interaction, and social relationships on learners' interactional behaviors and language development in this unique and pedagogically powerful learning context. To examine these issues, contributors employed quantitative, qualitative, and mixed-methods designs as well as cognitive, social, and sociocognitive theoretical frameworks. The majority of the studies are classroom based and were conducted in a rich array of settings covering five continents and encompassing a wide range of learner L1s and target languages. These settings include second and foreign language classrooms from primary to university level, content-based programs, online contexts, and after-school programs. To span the divide between research and practice, each study includes a section suggesting pedagogical implications.

Argumentative Writing in a Second Language Alan R. Hirvela, Diane Belcher. 2021-12-13 Argumentative Writing in a Second Language is a collection on teaching argumentative writing, offering multiple vantage points drawn from the contributors' own teaching and research experiences. The value of learning how to compose argumentative texts cannot be overstated, and yet, very little attention has been allocated to the equally important topic of how argumentation is or can be taught in the L2 context. Thus, this volume shifts attention to teachers and argumentative writing instruction, especially within increasingly common multimodal and digital literacy settings. While doing so, it provides a comprehensive, wide-ranging view of the L2 argumentative writing landscape within an instructional lens. Part I of the volume is topic-oriented and focuses on explorations of important issues and perspectives, while Part II features several chapters reporting classroom-based studies of a variety of instructional approaches that expand our understanding of how argumentative writing can be taught. The book will be of value to pre-service and in-service teachers in varying instructional contexts, as well as teacher educators and L2 writing scholars/researchers.

Argument Writing as a Supplemental Literacy Intervention for At-Risk Youth Margaret Sheehy, Donna M. Scanlon. 2021-11-28 This volume details the development and initial evaluation of a supplemental literacy course intended to support at-risk high school students in the US. Developed using design based research (DBR), the course combines argument writing and knowledge building literacy routines to support academic literacy development. Acknowledging the demand for US students to meet academic literacy standards that emphasize explanatory and argumentative writing, the text foregrounds knowledge building as key to effective writing development. Chapters trace the development and implementation of course literacy routines designed using DBR and use whole-class and individual case studies to demonstrate how informational reading, discussion, and argument writing become an activity system to support literacy development. Ultimately, the text has important implications for literacy course design, and the use of knowledge building analysis and DBR in research. The text will benefit researchers, academics, and educators in higher education with an interest in academic literacy education, writing and composition, and secondary education more broadly. Those specifically interested in methodologies relating to classroom teaching and learning as well as argumentation and argument writing will also benefit from this book.

Problem Solving Using UCSD Pascal K. L. Bowles, S. D. Franklin, D. J. Volper. 2012-12-06 To the Second Edition This book is designed both for introductory courses in computer problem solving, at the freshman and sophomore college level, and for individual self study. The first edition of this book has been used for teaching introductory classes at University of California San Diego (UCSD), University of California Irvine (UCI), and many other schools. This second edition is based on our experience using the text over the past six years with a broad range of students. We have taught the course using variations on Keller's Personalized System of Instruction (PSI). The organization of this book is conducive to this approach but does not require it. PSI methods allow slightly more material to be absorbed by the students than is the case with the traditional lecture/recitation presentation. PSI allows grading according to the number of chapter units completed. In a 10 week quarter, virtually all students who pass the course at UCSD and UCI complete the material covered in the first eleven chapters and the exercises associated with them. A substantial portion complete the entire fifteen chapters. For a conventional presentation under the semester system, the 15 chapters should present an appropriate amount of material for the average student.

Action Research S. Michael Putman, Tracy Rock. 2016-12-29 Action Research: Using Strategic Inquiry to Improve Teaching and Learning helps educators use research to guide decision-making and determine the effectiveness of various instructional strategies. The book leads the reader through the action research process using a model of self-regulation, which focuses on task definition, goal setting and planning, enacting research, and adaption. Written specifically for educators who may not feel prepared to measure the impact of interventions on student learning outcomes, the book provides very practical and useful tools, containing specific examples that are relevant to teachers' everyday reality. The text also reinforces how action research can improve the teaching and learning process by reinforcing or changing perceptions about the use of informal data, including anecdotal notes or observations, in the research process.

Going Gradeless, Grades 6-12 Elise Burns, Elise B Naramore, David Frangiosa. 2021-02-23 Grade reform and standards-based grading (SBG) is a hotly debated issue in education. As one high school administrator puts it, Traditional letter grading is probably the biggest elephant in the room in regard to school reform. We start [grading] at a young age, and it becomes all about accumulating points, and it's not about the learning anymore. (Dan Kelley, principal of Smithfield High School, Rhode Island). When students can focus less on the score and more on the learning, great things happen. SBG is even more challenging in high school. In this book, the authors share their districts' successes moving to alternate assessment methods that promote learning rather than solely achievement. The proponents of grade reform highlight the arbitrary nature of grades, the undue stress experienced by some learners, and the potential interference in the process of learning. On the other hand, opponents reference the lack of accountability and a shift away from content knowledge that is perceived in many alternate assessment models. This book outlines how to remove the negative impacts of grades while still maintaining a high level of accountability. While the majority of other books in this space provide a rationale for why the shift is necessary, these authors provide the classroom teacher's perspective and concrete examples of how these approaches can be developed and applied. They provide sample assessments, student work samples, an accountability checklist, a sample of their rubrics, and a review of our collected data--

Writing Projects for Mathematics Courses Annalisa Crannell, Gavin LaRose, Thomas Ratliff, Elyn Rykken. 2004-12-31 Writing Projects for Mathematics Courses is a collection of writing projects suitable for a wide range of undergraduate mathematics courses, from a survey of mathematics to differential equations. The projects vary in their level of difficulty and in the mathematics that they require but are similar in the mode of presentation and use of applications. Students see these problems as real in a way that textbook problems are not, even though many of the characters involved (e.g. dime-store detectives and CEOs) are obviously fictional. The stories are sometimes fanciful and sometimes grounded in standard scientific applications, but the mere existence of the story draws the students in and makes the problem relevant.

Problem Solving 4 Today, Grade 3 Carson Dellosa Education. 2019-01-02 Problem Solving 4 Today: Daily Skill Practice for third grade contains reproducible activities designed to help students learn critical math word problem-solving skills with strategies such as restating the question, writing a number sentence, using a model, and more. The 4 Today series offers comprehensive, quick, and easy-to-use math workbooks. The reproducible activities review essential skills during a four-day period. On the fifth day, an assessment with related skills is provided. Each week begins with a Fluency Blast section to provide students with repeated, daily practice for essential skills. The format and style of the 4 Today books provide excellent practice for standardized tests. The series also includes a progress-tracking reproducible, a standards alignment chart, tips for fostering a school-to-home connection, and an answer key.

Math Vitamins Loretta Jean Everhart. 2011-08-19 For some students, the mere thought of solving a word problem can transform even the most confident among them into nervous wrecks. In her guidebook, Math Vitamins, retired educator Loretta Jean Everhart shares her methods of success that will help any student from Pre-K to fifth grade effectively solve even the most challenging word problems. Everhart taught elementary students for over thirty years and relies on her diverse experience working with students of all levels to offer useful techniques and step-by-step guidance that will lead parents and teachers through several ways to cope with math anxiety, improve math writing and vocabulary, and use cooperative learning to solve word problems. While providing simple strategies like having children work on jigsaw puzzles to learn guess and test methodologies, Everhart also shares an in-depth exploration of Polya's four-step model, which helps children first understand the problem and then develop a plan on how to answer it. For the parent of a home-schooled child or for teacher who is searching for new ideas, this innovative guidebook offers practical tips and suggestions that will help lead struggling students out of the often tricky world of word problems and onto a successful path of future problem solving.
