Phenology and Climate Change Xiaoyang Zhang.2012-03-21

Phenology, a study of animal and plant life cycle, is one of the most obvious and direct phenomena on our planet. The timing of phenological events provides vital information for climate change investigation, natural resource management, carbon sequence analysis, and crop and forest growth monitoring. This book summarizes recent progresses in the understanding of seasonal variation in animals and plants and its correlations to climate variables. With the contributions of phenological scientists worldwide, this book is subdivided into sixteen chapters and sorted in four parts: animal life cycle, plant seasonality, phenology in fruit plants, and remote sensing phenology. The chapters of this book offer a broad overview of phenology observations and climate impacts. Hopefully this book will stimulate further developments in relation to phenology monitoring, modeling and predicting.

Smart Education and e-Learning 2016 Vladimir L. Uskov,Robert J. Howlett,Lakhmi C. Jain.2016-06-13 This book contains the contributions presented at the 3rd international KES conference on Smart Education and Smart e-Learning, which took place in Puerto de la Cruz, Tenerife, Spain, June 15-17, 2016. It contains a total of 56 peer-reviewed book chapters that are grouped into several parts: Part 1 - Smart University: Conceptual Modeling, Part 2 - Smart Education: Research and Case Studies, Part 3 - Smart e-Learning, Part 4 - Smart Education: Software and Hardware Systems, and Part 5 - Smart Technology as a Resource to Improve Education and Professional Training. We believe that the book will serve as a useful source of research data and

valuable information for faculty, scholars, Ph.D. students, administrators, and practitioners - those who are interested in innovative areas of smart education and smart e-learning.

Desert Meteorology Thomas T. Warner.2009-01-18 Aridity prevails over more than one third of the land area of the Earth and over a significant fraction of the oceans as well. Yet to date there has been no comprehensive reference volume or textbook dealing with the weather processes that define the character of desert areas. Desert Meteorology fills this gap by treating all aspects of desert weather.

Education, Human Rights and Peace in Sustainable

Development Maigul Nugmanova,Heimo Mikkola,Alexander Rozanov,Valentina Komleva.2020-11-19 The aim of sustainable development is to balance our economic, environmental and social needs, allowing prosperity for current and future generations. Countries must be allowed to meet their basic needs of employment, food, energy, water and sanitation. There is a clear relationship between the three topics of the book: right to education has been recognized as a human right - education has a role in peace-building. Additionally, education, human rights and peace have a significant role in sustainable development. The United Nations have defined a broad range of internationally accepted rights, including civil, cultural, economic, political and social rights. However, this book demonstrates that there are still

people and nations not respecting the Universal Declaration of Human Rights. Chapters from Brazil, Cameroon, Ethiopia, Kazakhstan, Israel, Peru, Russia and South-Africa cover topics like civil war, human abuses, the vulnerability of indigenous people, abortion, epilepsy, food security, lack of health equities in maternal and child health, and democracy or lack of it. We sincerely hope that this book will contribute to the joint pursuit of humanity to make the world better after we all get over the coronavirus pandemic.

Finance & Development, March 2012 International Monetary Fund. External Relations Dept.. 2012-03-14 Young people, hardest hit by the global economic downturn, are speaking out and demanding change. F&D looks at the need to urgently address the challenges facing youth and create opportunities for them. Harvard professor David Bloom lays out the scope of the problem and emphasizes the importance of listening to young people in *Youth in the Balance*. *Making the Grade* looks at how to teach today's young people what they need to get jobs. IMF Deputy Managing Director, Nemat Shafik shares her take on the social and economic consequences of youth unemployment in our *Straight Talk* column. *Scarred Generation* looks at the effects the global economic crisis had on young workers in advanced economies, and we hear directly from young people across the globe in *Voices of Youth*. *Renminbi's rise, financial system regulation, and boosting GDP by empowering women*. Also in the magazine, we examine the rise of the Chinese currency, look at the role of the credit rating agencies, discuss how to boost the empowerment of women, and present our primer on macroprudential regulation, seen as increasingly important to

financial stability. People in economics - C. Fred Bergsten, American Globalist. Back to basics - The multi-dimensional role of banks in our financial systems.

Sustainable Food Chains and Ecosystems Konstantinos Mattas, Henk Kievit, Gert van Dijk, George Baourakis, Constantin Zopounidis. 2020-03-30 Unarguably, preserving the ecosystem, securing sustainability and understanding the dynamics of agro-food chains have all become vital policy objectives with several interlinked dimensions. The main objectives of this book are to draw the attention of researchers, policymakers and businesspeople to the relation between agro-food chains and the ecosystem, and to demonstrate the importance of building resilient agro-food chains that take into account climate change and environmental challenges. Agro-food chains as they function today can serve as powerful tools for promoting sustainable forms of agriculture, consumption and production that are embedded in a viable ecosystem. The book addresses a range of environmental, methodological and societal issues from a transaction perspective, while also providing extensive background information on the topic, and outlining future applications and research directions.

Affairs, National Academy of Sciences, National Research Council. 2012-03-16 During July 10-13, 2011, 68 participants from 32 countries gathered in Istanbul, Turkey for a workshop organized by the United States National Research Council on Anticipating Biosecurity Challenges of the Global Expansion of High-containment Biological Laboratories. The United States Department of State's Biosecurity Engagement Program sponsored the workshop, which was held in partnership with the Turkish Academy of Sciences. The international workshop examined biosafety and biosecurity issues related to the design, construction, maintenance, and operation of high-containment biological laboratories- equivalent to United States Centers for Disease Control and Prevention biological safety level 3 or 4 labs. Although these laboratories are needed to characterize highly dangerous human and animal pathogens, assist in disease surveillance, and produce vaccines, they are complex systems with inherent risks. Biosecurity Challenges of the Global Expansion of High-Containment Biological Laboratories summarizes the workshop discussion, which included the following topics: Technological options to meet diagnostic, research, and other goals; Laboratory construction and commissioning; Operational maintenance to provide sustainable capabilities, safety, and security; and Measures for encouraging a culture of responsible conduct. Workshop attendees described the history and current challenges they face in their individual laboratories. Speakers recounted steps they were taking to improve safety and security, from running training programs to implementing a variety of personnel reliability measures. Many also spoke about physical security, access controls, and monitoring pathogen inventories. Workshop participants also identified tensions in the field and suggested possible areas for action.

The Challenges of Education in Central Asia Stephen P. Heyneman, Alan J. DeYoung. 2004 A look at the challenges facing education in Central Asia. In many ways, the story of education since the beginning of the transition in Central Asia is integrated with similar processes in other parts of the former Soviet Union. It may not explain everything, but understanding the challenges throughout the 15 former republics is helpful in understanding the progress and setback in the Central Asian Republics. Most importantly, the Central Asia republics have demonstrated their independence in the adherence of Western recommendations; they have articulated their demand for respect on their own terms, and not just as the recipient of strategies developed elsewhere. One would hope that this sense of independence and of autonomy of spirit would continue, but that it would not interfere; with the universal principles that pertain to all modern societies: those of equality of opportunity, and the necessity for achieving consensus over what to teach about history that is fair to all citizens.

Principles of Environmental Sciences Jan J. Boersema, Lucas Reijnders. 2008-12-12 International experts provide a comprehensive picture of the principles, concepts and methods that are applicable to problems originating from the interaction between the living/non-living environment and mankind. Both the

analysis of such problems and the way solutions to environmental problems may work in specific societal contexts are addressed. Disciplinary approaches are discussed but there is a focus on multi- and interdisciplinary methods. A large number of practical examples and case studies are presented. There is special emphasis on modelling and integrated assessment. This book is different because it stresses the societal, cultural and historical dimensions of environmental problems. The main objective is to improve the ability to analyse and conceptualise environmental problems in context and to make readers aware of the value and scope of different methods. Ideal as a course text for students, this book will also be of interest to researchers and consultants in the environmental sciences.

GNSS – Global Navigation Satellite Systems Bernhard Hofmann-Wellenhof, Herbert Lichtenegger, Elmar Wasle. 2007-11-20 This book extends the scientific bestseller GPS - Theory and Practice to cover Global Navigation Satellite Systems (GNSS) and includes the Russian GLONASS, the European system Galileo, and additional systems. The book refers to GNSS in the generic sense to describe the various existing reference systems for coordinates and time, the satellite orbits, the satellite signals, observables, mathematical models for positioning, data processing, and data transformation. This book is a university-level introductory textbook and is intended to serve as a reference for students as well as for professionals and scientists in the fields of geodesy, surveying engineering, navigation, and related disciplines.

Soft Power With Chinese Characteristics Ying Zhu, Kingsley Edney, Stanley Rosen. 2019-12-05 This book examines the Chinese Communist Party's attempts to improve China's image around the world, thereby increasing its soft power. This soft, attractive form of power is crucial if China is to avoid provoking an international backlash against its growing military and economic might. The volume focuses on the period since Xi Jinping came to power in 2012, and is global in scope, examining the impact of Chinese

policies from Hong Kong and Taiwan to Africa and South America. The book explains debates over soft power within China and delves into case studies of important policy areas for China's global image campaign, such as film, news media and the Confucius Institutes. The most comprehensive work of its kind, the volume presents a picture of a Chinese leadership that has access to vast material resources and growing global influence but often struggles to convert these resources into genuine international affection. With a foreword by Joseph Nye, *Soft Power With Chinese Characteristics* will be invaluable to students and scholars of Chinese politics and Chinese media, as well as international relations and world politics more generally.

Precision Crop Protection - the Challenge and Use of Heterogeneity

Erich-Christian Oerke, Roland Gerhards, Gunter Menz, Richard A. Sikora. 2010-08-03 Precision farming is an agricultural management system using global navigation satellite systems, geographic information systems, remote sensing, and data management systems for optimizing the use of nutrients, water, seed, pesticides and energy in heterogeneous field situations. This book provides extensive information on the state-of-the-art of research on precision crop protection and recent developments in site-specific application technologies for the management of weeds, arthropod pests, pathogens and nematodes. It gives the reader an up-to-date and in-depth review of both basic and applied research developments. The chapters discuss I) biology and epidemiology of pests, II) new sensor technologies, III) applications of multi-scale sensor systems, IV) sensor detection of pests in growing crops, V) spatial and non-spatial data management, VI) impact of pest heterogeneity and VII) precise mechanical and chemical pest control.

25 Years of Transformations of Higher Education Systems in Post-Soviet Countries Jeroen Huisman, Anna Smolentseva, Isak Froumin. 2018-04-24

This book is open access under a CC BY 4.0 license. This open access book is a result of the first ever study of the transformations of the higher education institutional landscape in fifteen former USSR countries after the dissolution of the Soviet Union in 1991. It explores how the single Soviet model that developed across the vast and diverse territory of the Soviet Union over several decades has evolved into fifteen unique national systems, systems that have responded to national and global developments while still bearing some traces of the past. The book is distinctive as it presents a comprehensive analysis of the reforms and transformations in the region in the last 25 years; and it focuses on institutional landscape through the evolution of the institutional types established and developed in Pre-Soviet, Soviet and Post-Soviet time. It also embraces all fifteen countries of the former USSR, and provides a comparative analysis of transformations of institutional landscape across Post-Soviet systems. It will be highly relevant for students and researchers in the fields of higher education and sociology, particularly those with an interest in historical and comparative studies.

Earnings Quality Elisa Menicucci. 2019-12-21 This book provides an overview of earnings quality (EQ) in the context of financial reporting and offers suggestions for defining and measuring it. Although EQ has received increasing attention from investors, creditors, regulators, and researchers in different areas, there are various definitions of it and different approaches for its measurement. The book describes the relationship between EQ and earnings management (EM) since they can be considered related challenges, especially in the context of international financial reporting standards (IAS/IFRSs). EM occurs when managers make discretionary accounting choices that are regarded as either an efficient communication of private information to improve the informativeness of a firm's current

and future performance, or a distorting disclosure to mislead the firm's true performance. The intentional manipulation of earnings by managers, within the limits allowed by the accounting standards, may alter the usefulness of financial reporting and lead to lower quality of earnings. The use of fair value in financial reporting has created a current debate about the impact it might have on EQ. At times, the high subjectivity in estimating fair value can allow opportunities for the exercise of management judgments and intentional bias, which can reduce the quality of financial reporting. Management discretion can result in high EM and hence in a reduction of EQ. Particularly during difficult financial periods, managers engage in EM to mask the negative effects of the turmoil, and in such circumstances accruals and earnings smoothing are attempts to reduce abnormal variations of earnings in such circumstances. This book is a valuable resource for those interested in wider perspectives on EQ and it adds to the research studies on this topic in the context of financial reporting.

Words of Edification Abai Kunanbaev.2022-01-12 If one is to speak about them as a whole, the legacy of Abai's, so-translated Ghaqliya Words of Edification, differ from literary prose and most likely deserve to be recognised as a unique genre in their own right. These are works that have no narrative and if we are talking about their style and content then this is an aesthetic form that Abai discovered himself, a unique and special form of the artistic word. Sometimes, they resemble philosophical reflections or critical exhortations but more often they are edifying teachings, deep thoughts devoted to moral, ethical problems. Mukhtar Auezov

Landscape Dynamics of Drylands across Greater Central Asia: People, Societies and Ecosystems Garik Gutman,Jiquan Chen,Geoffrey M. Henebry,Martin Kappas.2020-04-14 This volume is a compilation of studies on interactions of changes in land cover, land use and climate with people, societies and

ecosystems in drylands of Greater Central Asia. It explores the effects of collapse of socialist governance and management systems on land use in various parts of Central Asia, including former Soviet Union republics, Mongolia and northern drylands of China. Often, regional land-atmosphere feedbacks may have large global importance. Remote sensing is a primary tool in studying vast dryland territories where in situ observations are sporadic. State-of-the-art methods of satellite remote sensing combined with GIS and models are used to tackle science questions and provide an outlook of current changes at land surface and potential scenarios for the future. In 10 chapters, contributing authors cover topics such as water resources, effects of institutional changes on urban centers and agriculture, landscape dynamics, and the primary drivers of environmental changes in dryland environment. Satellite observations that have accumulated during the last five decades provide a rich time series of the dynamic land surface, enabling systematic analysis of changes in land cover and land use from space. The book is a truly international effort by a team of scientists from the U.S., Europe and Central Asia. It is directed at the broad science community including graduate students, academics and other professionals at all levels within natural and social sciences. In particular, it will appeal to geographers, environmental and social scientists, economists, agricultural scientists, and remote sensing specialists.

Oversight of High-Containment Biological Laboratories Frank Gottron. 2009-12 The fed. gov't. responded to the 9/11 terrorist attacks and the subsequent anthrax attacks with increased focus on and funding for biodefense. High-containment labs. (HCL) play a critical role in the biodefense effort, offering the hope of better responses to an attack and a better understanding of the threat posed by bioterrorism. However, they also could increase the risk of a biological attack by serving as a potential source of materials or training. Policymakers have become increasingly interested in

the oversight of these facilities following reports of accidents, regulatory noncompliance, and community resistance. A key task for policymakers is to define their goals for enhancing oversight of HCL. Illustrations

Planetary Gear Trains Kiril Arnaudov, Dimitar Petkov Karaivanov. 2019-03-27 This book provides comprehensive information for various planetary gear trains, with practical applications and comprehensive references to technical articles. In the text's chapters, readers can find all the information needed for various types of gear trains, with illustrations and examples. The authors help gear designers to creatively understand the design of gears, as well as master the mechanical calculations needed. Planetary Gear Trains is the most comprehensive and up-to-date work available in this key technical area. The book reflects not only teaching, but also the practical experience of the authors. It was developed under the motto From practice to practice.

The Plant Microbiome in Sustainable Agriculture Alok Kumar Srivastava, Prem Lal Kashyap, Madhumita Srivastava. 2021-02-16 The most up-to-date reference on phytomicrobiomes available today The Plant Microbiome in Sustainable Agriculture combines the most relevant and timely information available today in the fields of nutrient and food security. With a particular emphasis on current research progress and perspectives of future development in the area, The Plant Microbiome in Sustainable Agriculture is an invaluable reference for students and researchers in the field, as well as those with an interest in microbiome research and development. The book covers both terrestrial and crop associated microbiomes, unveiling the biological, biotechnological and technical aspects of research. Topics discussed include: Developing model plant microbiome systems for various agriculturally important crops Defining core microbiomes and metagenomes in these model systems Defining synthetic microbiomes for a sustainable

increase in food production and quality The Plant Microbiome in Sustainable Agriculture is written to allow a relative neophyte to learn and understand the basic concepts involved in phytomicrobiomes and discuss them intelligently with colleagues.

Cereal Biotechnology Peter C. Morris,James H.

Bryce.2000-08-31 The application of biotechnology to food processing has been one of the most important and controversial recent developments in the food industry. With this in mind, Cereal Biotechnology analyzes the practice, potential benefits, and risks of using genetic techniques in cereal processing. This major new text provides both plant molecular biologists and those in the cereal processing industries with a comprehensive overview of the subject.

From Globalization to World Society Boris Holzer,Fatima

Kastner,Tobias Werron.2014-08-01 Since the 1970s, various sociological approaches have tried to understand and conceptualize the global, yet few of them have systematically addressed the full spectrum of social relationships. Prominent exponents of the global approach - such as world systems analysis - instead have focused on particular domains such as politics or the economy. Under the label of world society, however, some authors have suggested alternatives to the predominant equivocation of society and the nation-state. The contributions to this volume share that objective and take their point of departure from the two most ambitious projects of a theory of world society:

world polity research and systems theory, mapping out the common ground and assessing their potential to inform empirical analyses of globalization.

Sustainable Land Use in Deserts Siegmund-W. Breckle, Maik Veste, Walter Wucherer. 2012-12-06 Changing desert areas for land use implies a lot of ecological problems. These and related ones are dealt with in this book covering various interdisciplinary and international aspects. Large areas in arid and semi-arid regions are already polluted in various ways. One of the biggest problems is the anthropogenic salinization by inadequate means of agriculture and irrigation. Additionally, most arid areas in the world are dramatically overgrazed. Methods and practices of a sustainable land use in deserts are urgently needed in many arid regions. This book gives a broad survey on some of the affected regions of the world as well as some case studies from elsewhere (Aral Sea, Negev desert, Namib desert etc.). Thus, basic and applied sciences are brought together. Water management in deserts, grazing systems or reclamation of desertified areas are among the topics of this book, as well as social and economic aspects.

Globalization and Development Don Kalb, Wil Pansters, Hans Siebers. 2007-05-08 This book is a collective effort by researchers affiliated with the CERES Research School in Development Studies in the Netherlands. These experts discuss themes and concepts crucial to the overlapping fields of globalization and development research. Individual chapters examine the notions and issues of globalization, livelihood, identity, governance, transnationalism, and knowledge.

Manual on the Production and Use of Live Food for Aquaculture Patrick Lavens, Patrick Sorgeloos. 1996 The cultivation of fish and shellfish larvae under controlled hatchery conditions requires not only the development of specific culture techniques, but in most cases also the production and use of live food organisms as feed for the developing larvae. The present manual describes the

major production techniques currently employed for the cultivation of the major types of live food commonly used in larviculture, as well as their application potential in terms of their nutritional and physical properties and feeding methods. The manual is divided into different sections according to the major groups of live food organisms used in aquaculture, namely micro-algae, rotifers, Artemia, natural zooplankton, and copepods, nematodes and trochophores.

Drought characteristics and management in Central Asia and Turkey

Food and Agriculture Organization of the United Nations. 2018-06-28 The report assesses the occurrence and impacts of drought, the current policies underlying drought management as well as the mitigation measures and responses adopted in Central Asia and Turkey, with a focus on Agriculture Sector. It is part of a series of similar studies carried out in different regions and countries of the world, with the objective of shedding light on drought effects, sensitizing policy-makers for the much needed paradigm shift to pro-active drought management planning and providing guidance for the development of such policies. The studies are carried out by FAO, in collaboration with the Water for Food Institute, University of Nebraska-Lincoln, USA, as a direct contribution to FAO's Strategic Objective Increasing the resilience of livelihoods to threats and crises.

The Aral Sea Basin Stefanos Xenarios, Dietrich Schmidt-Vogt, Manzoor Qadir, Barbara Janusz-Pawletta, Iskandar Abdullaev. 2019-09-17 This book offers the first multidisciplinary overview of water resources issues and management in the Aral Sea Basin, covering both the Amu Darya and Syr Darya River Basins. The two main rivers of Amu Darya and Syr Darya and their tributaries comprise the Aral Sea Basin area and are the lifeline for about 70 million inhabitants in Central Asia. Written by regional and international experts, this book critically examines the current state, trends and future of water resources

management and development in this major part of the Central Asia region. It brings together insights on the history of water management in the region, surface and groundwater assessment, issues of transboundary water management and environmental degradation and restoration, and an overview of the importance of water for the key economic sectors and overall socio-economic development of Central Asian countries, as well as of hydro politics in the region. The book also focusses on the future of water sector development in the Basin, including a review of local and international actors, as well as an analysis of the current status and progress towards the Sustainable Development Goals by Basin countries. The book will be essential reading for those interested in sea basin management, environmental policy in Central Asia and water resource management more widely. It will also act as a reference source for decision-makers in state agencies, as well as a background source of information for NGOs.

Aralkum - a Man-Made Desert Siegmar-W. Breckle, Walter Wucherer, Liliya A. Dimeyeva, Nathalia P. Ogar. 2011-09-22 Having been the fourth largest lake on the globe roughly 50 years ago, today the Aral Sea no longer exists. Human activities caused its desiccation and the formation of a huge new desert, the Aralkum, which can be regarded as one of the greatest ecological catastrophes and - at the same time - the largest primary succession experiment of mankind. This volume brings together the results of international and interdisciplinary long-term studies on the new desert ecosystem and is divided into four main sections. The first section provides an overview of the physical characteristics of the area and covers geological, pedological, geomorphological and climatological aspects and their dynamics, especially dust-storm dynamics. The second focuses on the biotic aspects and highlights the spatial and temporal patterns of the flora and fauna. In the third section studies and projects aiming to combat desertification by phytomelioration and to develop

strategies for the conservation of biodiversity are presented. The book is rounded off with a section providing a synthesis and conclusions.

Global University Rankings and Their Impact Andrejs Rauhvargers.2013

University Rankings, Diversity, and the New Landscape of Higher Education .2019-02-18

University rankings are a relatively new phenomenon in higher education. Although quite an established practice in the U. S., it is only within the last decade that attempts to analyse university performance have spread to the rest of the world, and that we also have seen new global rankings appear—rankings attempting to measure university performance beyond national borders. No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world. This book is written as part of the effort to better understand rankings and their effects on higher education. A serious approach towards university rankings implies that rankings should be analysed properly, including the methods used and the indicators chosen, and investigate the objectives claimed. If university rankings are considered as consumer information then everyone should have an interest in basing such guidance on valid and reliable data and methodology. A serious analysis should also discuss the wider implications of rankings as an emerging phenomenon in higher education. Consequently, the contributions to this book investigate and analyse how different rankings work, how they reach their conclusions, and on what data and methodology they are built. Furthermore it provides a critical reflection about the impact of rankings on higher education, how and in what way rankings influence policy-making, the structure of the sector, or the internal life of the sector.
