*Examinations in Singapore* Yap Kwang Tan,Hong Kheng Chow,Christine Chuen Meng Goh.2008 The first book to explore the development of Singapore's much-talked-about education and examination system, this volume juxtaposes examinations with its immediate context of education and wider context of politics, economy and society. The study covers three broad historical periods: Examinations in Singapore from 1891 to 1945; The Post-War Years from 1946 to the 1970s; and Charting Our Destiny from the 1980s to 2007. In the British period up to 1941, the local examinations were conducted by the vernacular schools, and external examinations by the University of Cambridge Local Examinations Syndicate. There was a lack of systematic effort to establish a uniform system of education and examinations. During the Japanese Occupation, examinations were conducted by the Japanese authorities and, unexpectedly, the Cambridge examinations continued in the Sime Road Camp. In the post-war period and particularly after Singapore was granted self-government, the establishment of a national education system was followed by the emergence of national examinations: the Primary School Leaving Examinations and the Singapore-Cambridge GCE N/O/A Levels for every school-going child in Singapore. Thereafter, the nature of national examinations evolved with the changing needs of education and the nation. At the turn of the century, with the Ministry of Education's decision to take greater control of examinations, the Singapore Examinations and Assessment Board was established, to oversee new developments in examinations. Unlike most literature on education where examinations are often mentioned as an outcome of educational goals and objectives, this book focuses on examinations per se. Examinations have gained a momentum of their own, and it is interesting to note the development of examinations against the backdrop of the broader history of Singapore and of education in Singapore.

*Testing Second Language Speaking* Glenn Fulcher.2014-10-13 The testing and assessment of second language learners is an essential part of the language learning process. Glenn Fulcher's *Testing Second Language Speaking* is a state-of-the-art volume that considers the assessment of speaking from historical, theoretical and practical perspectives. The book offers the first systematic, comprehensive and up-to-date treatment of the testing of second language speaking. Written in a clear and accessible manner, it covers: Explanations of the process of test design Costing test design projects How to put the test into practice Evaluation of speaking tests Task types for testing speaking Testing learners with disabilities It also contains a wealth of examples, including task types that are commonly used in speaking tests, approaches to researching speaking tests and specific methodologies that teachers, students and test developers may use in their own projects. Successfully integrating practice and theory, this book demystifies the process of testing speaking and provides a thorough treatment of the key ethical and technical issues in speaking evaluation.

*Language Testing Reconsidered* Janna D. Fox,Mari Wesche ,Doreen Bayliss .2007-06-01 *Language Testing Reconsidered* provides a critical update on major issues that have engaged the field of language testing since its inception. Anyone who is working in, studying or teaching language testing should have a copy of this book. The information, discussions, and reflections offered within the volume address major developments within the field over the past decades, enlivened by current takes on these issues. The real value of this collection, however, lies in its consideration of the past as a means of defining the future agenda of language testing.

*A History of the Peninsula War II* Charles Oman.2017-06-15 Napoleon, on quitting Spain in January, left behind him as a legacy to his brother a comprehensive plan for the conquest of the whole Peninsula. But that plan was, from the first, impracticable: and when it had miscarried, the fighting in every region of the theatre of war became local and isolated. Neither the harassed and distracted French King at Madrid, nor the impotent Spanish

Junta at Seville, knew how to combine and co-ordinate the operations of their various armies into a single logical scheme. Ere long, six or seven campaigns were taking place simultaneously in different corners of the Peninsula, each of which was practically independent of the others. Every French and Spanish general fought for his own hand, with little care for what his colleagues were doing: their only unanimity was that all alike kept urging on their central governments the plea that their own particular section of the war was more critical and important than any other.

**The Routledge Handbook of World Englishes** Andy Kirkpatrick.2010-06-17 The Routledge Handbook of World Englishes constitutes a comprehensive introduction to the study of World Englishes drawing on the expertise of leading authors within the field. The Handbook is structured in nine sections covering historical perspectives, core issues and topics and new debates which together provide a thorough overview of the field taking into account the new directions in which the discipline is heading. Among the key themes covered are the development of English as a lingua franca among speakers for whom English is a common but not first language, the parallel development of English as a medium of instruction in educational institutions throughout the world and the role of English as the international language of scholarship and scholarly publishing, as well as the development of 'computer-mediated' Englishes, including 'cyberprose'. The Handbook also includes a substantial introduction and conclusion from the editor. The Routledge Handbook of World Englishes is the ideal resource for postgraduate students of applied linguistics as well as those in related degrees such as applied English language and TESOL/TEFL.

**Teaching and Learning Foreign Languages** Nicola McLelland.2017-07-14 Teaching and Learning Foreign Languages provides a comprehensive history of language teaching and learning in the UK from its earliest beginnings to the year 2000. McLelland offers the first history of the social context of foreign language education in Britain, as well as an overview of changing approaches, methods and techniques in language teaching and learning. The important impact of classroom-external factors on developments in language teaching and learning is also taken into account, particularly regarding the policies and public examination requirements of the 20th century. Beginning with a chronological overview of language teaching and learning in Britain, McLelland explores which languages were learned when, why and by whom, before examining the social history of language teaching and learning in greater detail, addressing topics including the status that language learning and teaching have held in society. McLelland also provides a history of how languages have been taught, contrasting historical developments with current orthodoxies of language teaching. Experiences outside school are discussed with reference to examples from adult education, teach-yourself courses and military language learning. Providing an accessible, authoritative history of language education in Britain, Teaching and Learning Foreign Languages will appeal to academics and postgraduate students engaged in the history of education and language learning across the world. The book will also be of interest to teacher educators, trainee and practising teachers, policymakers and curriculum developers.

**Education, Equity and Transformation** Crain Soudien, Peter Kallaway. 2012-12-06 The papers for this special issue were selected from a pool of nearly 700 presentations which were made at the 10th Congress of the World Council of Comparative Education Societies (WCCES), which was held in Cape Town, South Africa, from 12 to 17 July 1998. The congress was hosted by the Southern African Comparative and History of Education Society (SACHES) and held on the campuses of the University of the Western Cape and the University of Cape Town. The papers were selected by the convenors of the conference's standing commissions, which provided a significant focus for the conference proceedings. These commissions were on the following themes: Teachers and teacher education Curriculum - Higher education - Lifelong learning - Language, literacy and basic education - Gender and education Policy - Theory and theory shifts Basic education in Africa Peace and Justice Dependency European Education Policy Research in Africa Culture, Indigenous Knowledge and Learning The papers presented, as the discussion below makes clear, ranged widely in subject matter and theoretical perspective and addressed issues of concern both to individual countries and to regions of the world. While some of the papers use comparison as an approach, it remains a matter of concern that the comparative perspective is so little in evidence. It is hoped that the comparative research approach will be more in evidence in the future.

Measured Constructs Cyril J. Weir, Ivana Vidaković, Evelina D. Galaczi. 2013-05-23 This volume establishes how English language constructs were measured in Cambridge English examinations over the period 1913 to 2012. An addition to the Studies in Language Testing series, this volume provides an overview of English language testing over the last century, with coverage of key theoretical and practical aspects of the assessment of reading, listening, writing and speaking skills. It includes examples of the Cambridge English exams, old and new, and is the first volume to describe in a systematic way the different theoretical influences which have shaped the development of the constructs underlying Cambridge English exams in the last 100 years.

**International Handbook of English Language Teaching** Jim Cummins, Chris Davison. 2007-12-31 This two volume handbook provides a comprehensive examination of policy, practice, research and theory related to English Language Teaching in international contexts. More than 70 chapters highlight the research foundation for best practices, frameworks for policy decisions, and areas of consensus and controversy in second language acquisition and pedagogy. The Handbook provides a unique resource for policy makers, educational administrators, and researchers concerned with meeting the increasing demand for effective English language teaching. It offers a strongly socio-cultural view of language learning and teaching. It is comprehensive and global in perspective with a range of fresh new voices in English language teaching research.

*Oxford Companion to the English Language* Tom McArthur, Jacqueline Lam-McArthur, Lise Fontaine. 2018-05-14 The Oxford Companion to the English Language provides an authoritative single-volume source of information about the English language. It is intended both for reference and for browsing. The first edition of this landmark Companion, published in 1998, adopted a strong international perspective, covering topics from Cockney to Creole, Aboriginal English to Caribbean English and a historical range from Chaucer to Chomsky, Latin to the World Wide Web. It succinctly described and discussed the English language at the end of the twentieth century, including its distribution and varieties, its cultural, political, and educational impact worldwide, its nature, origins, and prospects, and its pronunciation, grammar, vocabulary, word-formation, and usage. This new edition notably focuses on World Englishes, English language teaching, English as an international language, and the effect of technological advances on the English language. More than 130 new entries include African American English, British Sign Language, China English, digital literacy, multimodality, social networking, superdiversity, and text messaging, among many others. It also includes new biographical entries on key individuals who have had an impact on the English language in recent decades, including Beryl (Sue) Atkins, Adam Kilgariff, and John Sinclair. It is an invaluable reference for English Language students, and fascinating reading for any general reader with an interest in language.

Assessing the English Language Writing of Chinese Learners of English Liz Hamp-Lyons, Yan Jin. 2022-05-24 This book focuses on the assessment of English language writing in China mainland, the territories of Hong Kong and Macau, and Taiwan. The first part of the book describes how writing in English has been assessed in Chinese contexts in the past 25 years, and how it continues to be assessed at present. The second part of the book presents reports of work such as formative classroom-based assessment, feedback-based or feedback-led approaches, learning-oriented assessment, portfolios, as well as the important issue of teacher professional development in writing assessment. This two-part division relates to and reflects what has been happening in writing assessment internationally, in the UK from the 1940s, and in the US in the past 25 years. The use of English for international business communication, for international political negotiations and its rapidly increasing use as a medium of instruction in some subject areas has led to a rapid increase in the numbers of Chinese L1 speakers who are learning and being assessed in English. This is often done with an emphasis on reading and writing. The vast majority of assessments of English language writing are done through large-scale direct testing that uses simple prompts/tasks and short writing samples. This book explores best practices in assessing the writing in English of native speakers of Chinese. *Assessing the English Language Writing of Chinese Learners of English* edited by long-time experts Liz Hamp-Lyons and Yan Jin clearly demonstrates the authors' collective years of writing and teaching about writing assessment. The book's 13 chapters, written by recognized experts in assessment of Chinese speakers learning English, represent a wide array of important topics written in reader friendly language and offering evidence for pedagogical practices as well as high-stakes testing of writing. Teachers, researchers, administrators of writing programs in China, and test developers who seek counsel about this population need look no further than to add *Assessing the English Language Writing of Chinese Learners of English* to their reading list. *Media Education Across Europe* David French, Mike Richards. 2003-08-29 Education in and about the media is expanding across Europe and, like the industries it studies, is changing rapidly. The future of media education is a matter of live concern in all European countries, as educators and practitioners throughout the continent come together to learn from each other and to plan for the changes to come. *Media Education Across Europe* identifies the exciting developments now taking place within and across the boundaries of European nation-states. Essays from eight countries - the U.K., France, Germany, Italy, Spain, Belgium, Sweden and the Netherlands - explore the development of courses and approaches to the subject in each country. The contributors also consider the prospects for European collaboration in media education; the possibilities opening up for graduate employment and the future conflict - and co-operation - between media teachers and media employers.
