American Geography Matt Black.2021-12-07 Award-winning photographer Matt Black traveled over 100,000 miles to chronicle the reality of today's unseen and forgotten America. When Magnum photographer Matt Black began exploring his hometown in California's rural Central Valley—dubbed “the other California,” where one-third of the population lives in poverty—he knew what his next project had to be. Black was inspired to create a vivid portrait of an unknown America, to photograph some of the poorest communities across the US. Traveling across forty-six states and Puerto Rico, Black visited designated “poverty areas,” places with a poverty rate above 20 percent, and found that poverty areas are so numerous that they're never more than a two-hour's drive apart, woven through the fabric of the country but cut off from “the land of opportunity.” *American Geography* is a visual record of this five-year, 100,000-mile road trip, which chronicles the vulnerable conditions faced by America's poor. This compelling compilation of black-and-white photographs is accompanied by Black's own travelogue—a collection of observations, overheard conversations in cafe's and public transportation, diner menus, bus timetables, historical facts, and snippets from daily news reports. A future classic of photography, this monograph is supported by an international touring exhibition and is a must-have for anyone with an interest in witnessing the reality of an America that's been excluded from the American Dream.

Belonging Steve McCurry.2021-06-15 A stunning collection of photographs of the LGBTQ community in Thailand, from one of the world's most renowned photographers Steve McCurry is the artist behind some of the most iconic images in contemporary photography. His 1984 portrait of Sharbat Gula (“the Afghan

girl”) on the cover of National Geographic remains widely recognized to this day. Now McCurry turns his attention to Thailand as part of a series of photobooks on LGBTQ communities around the world. Thailand has long had the reputation as one of the most gay-friendly destinations in Asia, particularly Bangkok with its nightlife and its relative openness and safety. While this may be true for tourists and expats, the idea of Thailand as a haven for LGBTQ people and for same-sex couples, heavily promoted by the tourist industry, does not necessarily extend to Thais themselves. While Thailand is home to the largest LGBTQ communities in Asia, the reality for them is less accepting. Discrimination and exclusion targeting LGBTQ people continues despite a nominally progressive stance on inclusion, and same-sex marriage remains illegal. Against this backdrop, McCurry’s lushly colored photographs take us into the vibrant LGBTQ community in Bangkok, and this beautifully packaged, affordably priced book gives us a series of close to one hundred moving and intimate portraits of people who are no longer welcome in the community in which they grew up, but who have forged a new life and a new meaning of family in the queer community. Belonging was designed by Emerson, Wajdowicz Studios (EWS).

Brutal London Simon Phipps.2017-01-30 A photographic exploration of the post-war modernist architecture of London. This collection of unique and evocative photography of Brutalist architecture by Simon Phipps casts the city in a new light. Arranged by inner London Borough, BRUTAL LONDON takes in famous examples such as the Trellick Tower, the Brunswick Centre and the Alexandra Road Estate, as well as lesser known housing and municipal spaces. It serves as an introduction to buildings the reader may see every day, an invitation to look differently, a challenge to look up afresh, or to seek out celebrated Brutalism across the capital. The book's portable size and maps for each borough make it useful and practical; while the design, by leading agency A Practice for Everyday Life, echoes the aesthetic of Brutalist architecture with rough textured edges and fonts inspired by the site maps of modernist estates. The hardback was finalist for the British Book Design and Production Awards 2017, Photographic Books, Art / Architecture Monographs. Please note this is a fixed-format ebook with some coloured pages and may not be well-suited for older e-readers.

Good Morning, America Volume Four Mark Power.2024-04-09 Power moved slowly through Kansas, Missouri, Iowa, Nebraska and Wyoming before heading back to Colorado. In a later trip he travelled to Alaska and then another lengthy trip to Connecticut, Massachusetts, New Jersey and upstate New York. This new book includes some of these new images alongside those taken on previous trips. Power has described the process to be like 'assembling a large and complicated jigsaw puzzle with little idea of what the final picture will be.' Each book in the series has represented a shift in mood or tone. This latest book has seen the human presence subtly move from the peripheries or the incidental in the landscape to being a more integral part of some images. The tone of the book is more optimistic than previously, and the human presence diminishes a sense of isolation so often present in the vast landscape. In the background on his recent trips the political landscape had shifted with the election of Joe Biden as 46th President. Power was aware that although domestic US politics seemed less dramatic and eventful under the new president, that the country remained divided with the next election around the corner.

Camera Orientalis Ali Behdad. 2016-08-22 In the decades after its invention in 1839, photography was inextricably linked to the Middle East. Introduced as a crucial tool for Egyptologists and Orientalists who needed to document their archaeological findings, the photograph was easier and faster to produce in intense Middle Eastern light—making the region one of the original sites for the practice of photography. A pioneering study of this intertwined history, *Camera Orientalis* traces the Middle East's influences on photography's evolution, as well as photography's effect on Europe's view of "the Orient."

Considering a range of Western and Middle Eastern archival material from the late nineteenth and early twentieth centuries, Ali Behdad offers a rich account of how photography transformed Europe's distinctly Orientalist vision into what seemed objective fact, a transformation that proved central to the project of European colonialism. At the same time, Orientalism was useful for photographers from both regions, as it gave them a set of

conventions by which to frame exotic Middle Eastern cultures for Western audiences. Behdad also shows how Middle Eastern audiences embraced photography as a way to foreground status and patriarchal values while also exoticizing other social classes. An important examination of previously overlooked European and Middle Eastern photographers and studios, *Camera Orientalis* demonstrates that, far from being a one-sided European development, Orientalist photography was the product of rich cultural contact between the East and the West.
