Starting Out John Cox.2006 Building and maintaining an opening repertoire can be a demanding task -- for a start there are an enormous number of different lines to choose from. There's a strong temptation amongst beginners and improving players to opt solely for tricky lines in order to snare unsuspecting opponents, but this approach has only short-term value. As players improve and their opponents become stronger, very often these crafty lines don't stand up to close scrutiny, and suddenly they back to square one with no suitable opening weapons. In *Starting Out with 1 e4!* and *Starting Out with 1 d4!* Neil McDonald and John Cox solve this perennial problem by providing the reader with a strong and trustworthy repertoire with the white pieces based on the popular opening moves 1 e4 and 1 d4. The recommended lines given here have stood the test of time and are regularly employed by Grandmasters. Reading these books will give players the confidence to play these variations against all strengths of player and provides them with reliable opening armoury for years to come. These books are written in Everyman Chess's distinctive Starting Out style, with plenty of notes, tips, and warnings throughout to help the aspiring player. >Grandmaster-style opening repertoires >Written by opening experts >Ideal for improving players English Grandmaster Neil McDonald is an experienced and successful player on the international chess circuit. My First Chess Opening Repertoire for White Vincent Moret.2016-05-11 Every chess player needs to decide which openings he is going to play. But where do you start? The risk of drowning in the turbulent sea of opening theory is only too real for beginning amateurs. Often your goals and ambitions will be misguided. Trying to win in 20 moves, copying what's in fashion among top-GM's or memorizing variations are a waste of time. Most likely you will never play your 'preparation' or end up by jumping from one opening to the other. Experienced French chess trainer Vincent Moret provides a complete, ready-to-go chess opening repertoire for White with a sound set of lines that do not outdate rapidly, do not require memorization and are easy to digest for beginning players and other amateurs. In this complete and user-friendly guide, Moret has selected relatively aggressive variations that will enhance your tactical vision. To show the typical plans and demonstrate underlying ideas and key motifs, Moret not only selected games of Grandmasters. For instructional purposes, he also uses games of young players to highlight the errors they tend to make.

Starting Out Gawain Jones.2008 A new look at the sharp and dangerous Grand Prix Attack, which is one of White's most aggressive ways of countering the Sicilian Defence. It leads to very complicated play right from the opening moves and contains plenty of pitfalls for the unwary Black player. So whether you play the Sicilian as Black, or need an antidote for White, this book is an essential addition to your armoury.

Smerdon's Scandinavian David Smerdon.2015-08-15 Grandmaster David Smerdon gives the Scandinavian a welcome twist by using it as an all-out attacking weapon. The repertoire he presents is one he has successfully employed at grandmaster level over many years, and the backbone is provided by the razor-sharp Portuguese and Icelandic gambits.

Tango! Richard Palliser.2005 Presents a repertoire for Black against queen's pawn openings based on the dynamic Black Knights Tango. Using illustrative games, this book gives a grounding on the key tactics and strategies behind this ambitious opening, while also highlighting the various tricks and traps that both sides have to watch out for.

Opening Repertoire: Beating the Sicilian Main Lines Jonas Hacker.2021-01-18 The Sicilian Defence is the most popular reply to 1 e4. With 1...c5 Black comes out fighting, immediately challenging any sense of a "natural white advantage". Sicilian Defence players are often very well prepared theoretically and the tremendous dynamism of the Sicilian can often disturb their opponents. In this book, German FIDE master Jonas Hacker provides a complete repertoire for White when facing the Sicilian. The recommended systems are based on solid strategic considerations. The backbone of the repertoire is the line 1 e4 c5 2 Nf3 d6 3 d4 cxd4 4 Nxd4 Nf6 5 f3! This is a perfect line to throw Najdorf and Dragon players off their stride. White will (usually) follow up with c2-c4 and establish a useful space advantage. Many of the other recommended lines are also based around the space-gaining c2-c4 advance providing cohesion across the whole repertoire. In *Opening Repertoire: Beating the Sicilian*, Jonas Hacker guides the reader through the complexities of the Sicilian and carves out a repertoire for White. He examines all aspects of this highly complex opening and provides the reader with well-researched, fresh, and innovative analysis. Each annotated game has valuable lessons on how to play the opening and contains instructive commentary on typical middlegame plans. * A complete repertoire for White against the Sicilian. * A question and answer approach provides an excellent study method.

Side-stepping Mainline Theory Gerard Welling, Steve Giddins.2019-09-05 The average chess player spends too much time on studying opening theory. In his day, World Champion Emanuel Lasker argued that improving amateurs should spend about 5% of their study time on openings. These days club players are probably closer to 80%, often focusing on opening lines that are popular among grandmasters. Club players shouldn't slavishly copy the choices of grandmasters. GMs need to squeeze every drop of advantage from the opening and therefore play highly complex lines that require large amounts of memorization. The main necessity for club players is to emerge from the opening with a reasonable position, from which you can simply play chess and pit your own tactical and positional understanding against that of your opponent. Gerard Welling and Steve Giddins recommend the Old Indian-Hanham Philidor set-up as a basis for both Black and White. They provide ideas and strategies that can be learned in the shortest possible time and require the bare minimum of maintenance and updating. They deliver exactly what you need: rock-solid positions that you know how to handle. By adopting a similar set-up for both colours, with similar plans and techniques, you further reduce study time. With this compact and straightforward opening approach, Welling and Giddins argue, club players will have more time to focus on what is really decisive in the vast majority of non-grandmaster games: tactics, positional understanding and endgame technique.

Opening Repertoire: The Modern Defence Cyrus Lakdawala.2019-10-01 The Modern Defence is an opening that will appeal to player of an experimental nature. Black allows White to establish an apparently impressive position in the centre. The plan is to use this structure as a target - it will be restrained, undermined and eventually destroyed. When this plan works it can succeed beautifully but, naturally, if Black's play is inaccurate there is a danger of being overwhelmed. For this reason a thorough understanding of the intricacies of this opening is essential. *Opening Repertoire: The Modern Defence* examines all aspects of this highly complex opening and provides the reader with well-researched, fresh, and innovative analysis. Each annotated game has valuable lessons on how to play the opening and contains instructive commentary on typical middlegame plans. The suggested lines for Black are based around the very latest games and analysis. * A complete repertoire for Black in the Modern Defence. * A question and answer approach provides an excellent study method.

Opening Repertoire: The Sveshnikov Cyrus Lakdawala.2020-03-01 The Sveshnikov Variation of the Sicilian Defence provides a battleground for one of the key conflicts in chess: structure versus activity. Black voluntarily accepts a weak pawn formation but in return obtains easy development and excellent piece activity. This is a line that finds favour with aggressive, attacking players who are confident in their tactical ability. The idea of playing ...e5 in the Sicilian is an old one but the modern Sveshnikov treatment was developed in the 1970s, since when it has featured in the repertoires of numerous elite players. It is currently experiencing great popularity due to the fact that it was Magnus Carlsen's choice in his World Championship Match against Fabiano Caruana in London 2018. Carlsen's success with the line was a significant factor in his eventual

victory in the match. Since then he has continued to use the Sveshnikov with great success. In *Opening Repertoire: The Sveshnikov* leading chess author Cyrus Lakdawala guides the reader through the complexities of this dynamic variation and carves out a repertoire for Black. He examines all aspects of this highly complex opening and provides the reader with well-researched, fresh, and innovative analysis. Each annotated game has valuable lessons on how to play the opening and contains instructive commentary on typical middlegame plans. * A complete repertoire for Black in the Sicilian Sveshnikov. * A question and answer approach provides an excellent study method.

An Explosive Chess Opening Repertoire for Black Jouni Yrjola, Jussi Tella. 2001 This book equips the reader with everything he needs to know to play Black in a game of chess. Two experienced Finnish players have described an exciting repertoire based on the move 1...d6 in reply to whatever White's first move happens to be. Black's strategy is hypermodern and dynamic: White is encouraged to seize space, while Black develops his pieces rapidly and actively, waiting for the ideal moment to attack and destroy White's central bastion. The variations advocated have been proven in top-level play and have quick-strike potential if White is at all careless or imprecise. The repertoire is based around the Pirc Defence and the variations 1 d4 d6 2 c4 e5 and 1 d4 d6 2 Nf3 Bg4, which fit seamlessly together with 1...d6 systems against White's various flank openings. *The Petroff: Move by Move* Cyrus Lakdawala. This series provides an ideal platform to study chess openings. By continually challenging the reader to answer probing questions throughout the book, the Move by Move format greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of opening knowledge. Carefully selected questions and answers are designed to keep you actively involved and allow you to monitor your progress as you learn. This is an excellent way to study any chess opening and at the same time improve your general chess skills and knowledge. The Petroff Defence is a solid and reliable way to meet 1 e4. It has a strong reputation and has been employed regularly by many grandmasters, most notably former world champions Anatoly Karpov and Vladimir Kramnik. By choosing counterattack instead of defence as early as the second move, Black immediately avoids many favourite weapons for White, including the Ruy Lopez, Italian Game, Scotch Game and a number of daunting gambits. This practical advantage for those playing Black in the Open Games cannot be underestimated. In this book, International Master Cyrus Lakdawala invites you to join him in studying all the important lines in the Petroff. Using illustrative games, he explains the main positional and tactical ideas for both sides, provides answers to all the key questions and tells you everything you need to know about successfully playing the Petroff Defence. Essential guidance and training with the Petroff Provides repertoire options for Black Utilizes an ideal approach to chess study

The French Defence: Move by Move Damian Lemos. The French Defence is a classical opening that has featured in the repertoire of many elite grandmasters. Black generally concedes a slight spacial disadvantage early but in return gains a sound structure and middlegame opportunities to undermine the white centre. A close study of the French Defence can be very rewarding for all players as the structures and themes that arise are found in numerous other openings. In this book grandmaster Damian Lemos guides the reader through the complexities of this dynamic opening and explores all the important variations. This series provides an ideal platform to study chess openings. By continually challenging the reader to answer probing questions throughout the book, the Move by Move format greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of opening knowledge. Carefully selected questions and answers are designed to keep you actively involved and allow you to monitor your progress as you learn. This is an excellent way to study any chess opening and at the same time improve your general chess skills and knowledge. * Essential guidance and training in the French Defence * Analyses all key variations * Utilizes an ideal Q+A approach to chess study

Opening Repertoire The Sicilian Najdorf John Doknjas, Joshua Doknjas. 2019-03-24 The Najdorf Sicilian is one of Black's most respected and popular responses to 1 e4. It was favoured by those two titans of the game, Bobby Fischer and Garry Kasparov and in the modern game it features in the repertoire of many elite players. This rich opening creates a wealth of opportunities for vigorous attacks, causing most games to be tense and engaging. The Najdorf is that very rare thing - an opening for Black that is highly aggressive but is also recognised as being objectively sound. In this book, FIDE Master John Doknjas and National Master Joshua Doknjas navigate through the main lines of the Najdorf and provide the reader with well-researched, fresh, and innovative analysis. Each annotated game has valuable lessons on how to play the opening, and contains instructive commentary on typical middle-game plans. With thorough variations and explanations on pawn structures and piece placement, this book provides insight to both strong masters and less experienced players alike. The format is ideal for the chessplayer keen to improve their game. While reading you are continually challenged to answer probing questions - a method that greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of chess knowledge. Carefully selected questions and answers are designed to keep you actively involved and allow you to monitor your progress as you learn. This is an excellent way to study chess while providing the best possible chance to retain what has been learnt.

The Pirc Nigel Davies. 2016-06 Grandmaster Nigel examines the Pirc Defense and its many variations. He shares his experience and knowledge with the opening, provides repertoire options for Black and tells you everything you need to know about playing the Pirc Defense.

1...b6: Move by Move Cyrus Lakdawala. This series provides an ideal platform to study chess openings. By continually challenging the reader to answer probing questions throughout the book, the Move by Move format greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of opening knowledge. Carefully selected questions and answers are designed to keep you actively involved and allow you to monitor your progress as you learn. This is an excellent way to study any chess opening and at the same time improve your general chess skills and knowledge. 1...b6 is a dynamic defence which allows Black to steer the game into relatively uncharted territory, where White players are unable to relax and rely on their 'opening book' knowledge. A major attraction of 1...b6 is that it can be employed against all of White's mainline openings, including 1 e4, 1 d4, 1 Nf3 and 1 c4. In this book, International Master Cyrus Lakdawala examines all the important variations after 1...b6. Using illustrative games, he explains the main positional and tactical ideas for both sides, provides answers to all the key questions and tells you everything you need to know about successfully playing 1...b6. Essential guidance and training with 1...b6 Provides repertoire options for Black Utilizes an ideal approach to chess study

Opening Repertoire: The Iron English Simon Williams, Richard Palliser. 2021-03-08 Grandmaster Simon Williams was taught the English Opening at the age of six and 1 c4 was his weapon of choice until long after he became an International Master. For this new work, he teamed up with acclaimed theoretician International Master Richard Palliser to explore his old favourite. 1 c4 remains an excellent choice for the club and tournament player. This book focuses on the set-up popularised by the sixth world champion, Mikhail Botvinnik, the so-called Botvinnik formation with 2 Nc3, 3 g3, 4 Bg2, 5 e4 and 6 Nge2. This system is compact but still aggressive and rewards an understanding of plans and strategies rather than rote memorisation of moves. In *Opening Repertoire: The Iron English* leading chess authors Simon Williams and Richard Palliser guide the reader through the complexities of this dynamic variation and carves out a repertoire for White. They examine all aspects of this highly complex opening and provide the reader with well-researched, fresh, and innovative analysis. Each annotated game has valuable lessons on how to play the opening and contains instructive commentary on typical middlegame plans. * A dynamic and easy-to-play repertoire for White * Complete coverage featuring several new ideas * Take your opponents out of their comfort zone!

Bird's Opening: Move by Move Cyrus Lakdawala. This series provides an ideal platform to study chess openings. By continually challenging the reader to answer probing questions throughout the book, the Move by Move format greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of opening knowledge. Carefully selected questions and answers are designed to keep you actively involved and allow you to monitor your progress as you learn. This is an excellent way to study any chess opening and at the same time improve your general chess skills and knowledge. Bird's Opening, 1 f4, is an ideal choice for freethinking chess players who prefer to rely on their general chess knowledge and intuition rather than having to memorize and keep up to date with mainline opening theory. Bird's Opening is essentially the

Dutch Defence with an extra move, and White can choose between a number of different set-ups, including the reversed Leningrad, Classical and Stonewall variations, depending on mood and opponents' responses. In this book, International Master Cyrus Lakdawala examines all the important variations of Bird's Opening, including the sharp From's Gambit. Using illustrative games, he explains the main positional and tactical ideas for both sides, provides answers to all the key questions and tells you everything you need to know about successfully playing 1 f4. Essential guidance and training with 1 f4 Provides a repertoire options for White Utilizes an ideal approach to chess study

Play 1...d6 Against Everything Erik Zude, Jörg Hickl. 2017-10-01 The average club player doesn't need to study hundreds of pages of chess opening theory. Understanding structures and finding tactics are much more important than memorizing variations. Renowned German chess trainers Erik Zude and Jörg Hickl have created an ideal club player's repertoire for Black. This compact manual presents a set of lines that is conveniently limited in scope, yet varied, solid and complete. The core repertoire is based on lines that the authors have successfully played at (grand)master level for decades: the Antoshin Variation of the Philidor Defence against 1.e4 and the Old-Indian Defence against 1.d4. There is only a limited number of plans, ideas and structures that you need to learn, and very few forcing variations. You will develop your position with a sequence of strong standard moves and start your highly effective counterplay. Zude and Hickl provide common sense guidance, explain all typical characteristics and give practical examples. If you have an Elo rating between 1400 and 2200, you don't need to look further because you can Play 1..d6 Against Everything!

Play 1e4 E5! Nigel Davies. 2005-11-01 There is no doubt that playing the Open Games is one of Black's most reliable and yet aggressive ways of meeting White's favourite opening move, 1 e4. Experts also agree that playing these fundamental openings is a crucial step in the development of a chess player, while moving up to the highest level it provides the battleground for countless duals between the likes of World number one Garry Kasparov, Vishy Anand and Vladimir Kramnik. It's true that some Black players are put off by the seemingly endless number of variations they can be faced with, as White can choose a between the King's Gambit, Vienna Game, Scotch Opening, Bishop's Opening and a number of wild and offbeat gambits. However, in Play 1 e4 e5! Nigel Davies provides a complete answer to this perennial problem by offering a concise and practical repertoire for the Black player, whilst crucially including a dependable defence to the Ruy Lopez - White's most popular attacking try in the Open Games. Davies is the perfect choice for this subject, having been battle-hardened by years of international competition in these openings. *A complete defence to 1 e4 *Written by a 1 e4 e5 expert *All of White's tries are covered *Includes White's main weapon, the Ruy Lopez Nigel Davies is both an experienced Grandmaster and chess trainer. Opening Repertoire Christof Sielecki. 2015-06-15 Title page verso lists the actual publisher: Gloucester Publishers Limited.

The Hedgehog Sergey Kasparov. 2017-02-15 An understanding of Hedgehog structures is an essential component in any chessplayer's knowledge. These structures arise when the black c-pawn is exchanged early on for the white d-pawn (as in the Sicilian Defence). White then adopts a formation with pawns on c4 and e4 and Black curls up in a Hedgehog formation with pawns on a6, b6, d6 and e6. These structures are important as they can arise from an extraordinary variety of openings including the Sicilian Defence, the English Opening and the Queen's Indian Defence. Play is usually highly intricate with White hoping to exploit the natural space advantage while Black remains solid and looks to break out of his or her carapace with the classical thrusts ...b7-b5 and ...d7-d5. Everything you need to know about the Hedgehog systems. The structure emphasizes plans and strategies. Written by an expert on the opening.

If your library doesn't have a subscription to OverDrive or you're looking for some more free Kindle books, then Book Lending is a similar service where you can borrow and lend books for your Kindle without going through a library. Since it's a search engine, browsing for books is almost impossible. The closest thing you can do is use the Authors dropdown in the navigation bar to browse by authors—and even then, you'll have to get used to the terrible user interface of the site overall. Read Your Google Ebook. You can also keep shopping for more books, free or otherwise. You can get back to this and any other book at any time by clicking on the My Google eBooks link. You'll find that link on just about every page in the Google eBookstore, so look for it at any time. Think of this: When you have titles that you would like to display at one of the conferences we cover or have an author nipping at your heels, but you simply cannot justify the cost of purchasing your own booth, give us a call. We can be the solution. Project Gutenberg is a charity endeavor, sustained through volunteers and fundraisers, that aims to collect and provide as many high-quality ebooks as possible. Most of its library consists of public domain titles, but it has other stuff too if you're willing to look around. It's easy to search Wikibooks by topic, and there are separate sections for recipes and childrens' textbooks. You can download any page as a PDF using a link provided in the left-hand menu, but unfortunately there's no support for other formats. There's also Collection Creator - a handy tool that lets you collate several pages, organize them, and export them together (again, in PDF format). It's a nice feature that enables you to customize your reading material, but it's a bit of a hassle, and is really designed for readers who want printouts. The easiest way to read Wikibooks is simply to open them in your web browser. You can search for a specific title or browse by genre (books in the same genre are gathered together in bookshelves). It's a shame that fiction and non-fiction aren't separated, and you have to open a bookshelf before you can sort books by country, but those are fairly minor quibbles. Sacred Texts contains the web's largest collection of free books about religion, mythology, folklore and the esoteric in general. Questia Public Library has long been a favorite choice of librarians and scholars for research help. They also offer a world-class library of free books filled with classics, rarities, and textbooks.
