The Other End of the Spear John J. McGrath.2011-09-16 This book looks at several troop categories based on primary function and analyzes the ratio between these categories to develop a general historical ratio. This ratio is called the Tooth-to-Tail Ratio. McGrath's study finds that this ratio, among types of deployed US forces, has steadily declined since World War II, just as the nature of warfare itself has changed. At the same time, the percentage of deployed forces devoted to logistics functions and to base and life support functions have increased, especially with the advent of the large-scale of use of civilian contractors. This work provides a unique analysis of the size and composition of military forces as found in historical patterns. Extensively illustrated with charts, diagrams, and tables. How People Learn II National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Science Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on How People Learn II: The Science and Practice of Learning. 2018-09-27 There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School: Expanded Edition* was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. *How People Learn II: Learners, Contexts, and Cultures* provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. *How People Learn II* will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.

Change Management in TVET Colleges Kraak, Andre, Paterson, Andrew. 2016-07-25 The Technical and Vocational Education and Training (TVET) college environment is marked by increasingly stark juxtapositions between what needs to be achieved in the post-school education sector and the increasing difficulty of current conditions. The 'triple challenge' of poverty, inequality and unemployment weighs heavily on the social, political and economic fabric of the country and expectations are high that the TVET colleges can make a pivotal contribution to counter these challenges. Despite laudable increases in TVET enrolment, the education system needs to work harder to accommodate the weight of demand for post school further education and training (FET) band qualifications from young people not in education, employment or training. At the same time, it is vital to secure adequate quality in TVET programmes which depend so much on the competence and commitment of college lecturers. This collection offers a set of research papers that provide new analytic and empirical material on: • The political economy of TVET types in different countries which, by comparison, illuminate the South African case; • A periodisation of government interventions in the TVET sector over the last three decades; • The unsettled state and status of TVET lecturers in relation to their job requirements and conditions of service; • The halting evolution of collegial relationships between college lecturers towards higher collegiality; • Employer expectations of college graduates and how colleges are responding; and • An analysis of the outcomes of a college improvement intervention in Limpopo and the Eastern Cape. This book will offer valuable information and insights for decision-makers as well as analysts of institutional change concerning links between education and economic growth, with particular regard to TVET graduates' employment rates.

A New Critical Approach to the History of Palestine Ingrid Hjelm, Hamdan Taha, Ilan Pappé, Thomas L. Thompson. 2019-06-07 A New Critical Approach to the History of Palestine discusses prospects and methods for a comprehensive, evidence-based history of Palestine with a critical use of recent historical, archaeological and anthropological methods. This history is not an exclusive history but one that is ethnically and culturally inclusive, a history of and for all peoples who have lived in Palestine. After an introductory essay offering a strategy for creating coherence and continuity from the earliest beginnings to the present, the volume presents twenty articles from twenty-two contributors, fifteen of whom are of Middle Eastern origin or relation. Split thematically into four parts, the volume discusses ideology, national identity and chronology in various historiographies of Palestine, and the legacy of memory and oral history; the transient character of ethnicity in Palestine and questions regarding the ethical responsibilities of archaeologists and historians to protect the multi-ethnic cultural heritage of Palestine; landscape and memory, and the values of community archaeology and bio-archaeology; and an exploration of the "ideology of the land" and its influence on Palestine's history and heritage. The first in a series of books under the auspices of the Palestine History and Heritage Project (PaHH), the volume offers a challenging new departure for writing the history of Palestine and Israel throughout the ages. A New Critical Approach to the History of Palestine explores the diverse history of the region against the backdrop of twentieth-century scholarly construction of the history of Palestine as a history of a Jewish homeland with roots in an ancient, biblical Israel and examines the implications of this ancient and recent history for archaeology and cultural heritage. The book offers a fascinating new perspective for students and academics in the fields of anthropological, political, cultural and biblical history.
