It's time to recognize that the potential for greatness lies in a unique form within each child--and that the goal of education should be to encourage and develop it. This inspiring manifesto brings in research from different disciplines and demonstrates how to uncover individual greatness by giving students control of their learning. Homeschooling for Excellence David Colfax, Micki

Colfax. 2009-05-30 THE COLFAXES DIDN'T START TEACHING THEIR BOYS AT HOME TO GET THEM INTO HARVARD - BUT THAT'S WHAT HOMESCHOOLING ACCOMPLISHED! For over fifteen years, David and Micki Colfax educated their children at home. They don't think of themselves as pioneers, though that's what they became. Unhappy with the public schools, the Colfaxes wanted the best education possible for their four sons: a program for learning that met the evolving needs of each child and gave them complete control of how and what their children learned. The results? A prescription for excellence-Harvard educations for their sons Grant, Drew, and Reed. (Their fourth son is still too young for college.) Now the Colfaxes tell how all parents can become involved in homeschooling. In a straight-talking book that reads like a frank conversation among friends, they tell what they did and how they did it: their educational approaches, the lessons they learned, and what materials-books, equipment, educational aids-proved most useful over the years. Best of all, they show you how you can take charge of your children's education-in an invaluable sourcebook that will help you find a rewarding and successful alternative to our failing schools.

The Truth about the Titanic Archibald Gracie. 1913 Colonel Archibald Gracie IV, an American writer, amateur historian, and member of New York's prominent Gracie family, boarded the Titanic as a first-class passenger on his return trip home from a visit in Europe. In the fateful early morning hours of April 15, Gracie assisted Second Officer Lightoller in freeing the collapsible lifeboats before he scrambled atop overturned Collapsible B to avoid being pulled down by the undertow of the sinking ship. Gracie survived the harrowing night atop the lifeboat and returned to New York aboard the Carpathia, beginning work on an account of his Titanic experience upon his arrival home. Published shortly after Gracie's death in December 1912 (his health never recovered after the calamity), *The Truth About the Titanic* remains one of the most popular accounts of the sinking for its painstaking detail.

Rad American History A-Z Kate Schatz.2020-03-03 From the

New York Times bestselling team behind Rad American Women A-Z comes an illustrated collection of radical and transformative political, social, and cultural movements in American history. "An engaging, fascinating, and necessary book that speaks truth to power."—Congresswoman Barbara Lee In Rad American History A-Z, each letter of the alphabet tells the story of a significant moment in America's progressive history--one that isn't always covered in history classes: A is for Alcatraz, and the Native occupation of 1969; C is for the Combahee River Raid, a Civil War action planned in part by Union spy Harriet Tubman; Z is for Zuccotti Park, and the Occupy movement that briefly took over the world. Paired with dynamic paper-cut art by Miriam Klein Stahl, the entries by Kate Schatz explore several centuries of politics, culture, art, activism, and liberation, including radical librarians, Supreme Court cases, courageous youth, punk rocker grrrrls, Southern quilts, and modern witches. In addition to the twenty-six core stories, short sidebars expand the discussion, and dictionary-style lists refer readers to additional key moments. So while F is for Federal Theater Project, a New Deal-era program that employed thousands of artists, F is also for Freedom Rides and First Amendment. E is for Earth First!, but also for Endangered Species Act and Equal Rights Amendment. There are tales of triumph, resilience, creation, and hope. Each engaging, fact-filled narrative illustrates an eye-opening moment that shows

Advance praise for Rad American History A-Z "I wish I'd had Rad American History A-Z when I was growing up; it's a book I hope to read to my children one day. In such chaotic political times, this is a critical tool for young people to know how change happens, and to know that they, too, can make change happen. This book belongs on all library shelves as a transformative approach to history as we know it."-Alicia Garza, cofounder of Black Lives Matter Global Network

World History and Geography California. Dept. of Education.1994-01-01 This document is a response to teachers' requests for practical assistance in implementing California's history-social science framework. The document offers stimulating ideas to enrich the teaching of history and social science, enliven instruction for every student, focus on essential topics, and help make learning more memorable. Experiences and contributions of ethnic groups and women in history are integrated in this course model. The framework is divided into 11 units: (1) Connecting with Past Learnings: Uncovering the Remote Past; (2) Connecting with Past Learnings: the Fall of Rome; (3) Growth of Islam; (4) African States in the Middle Ages and Early Modern Times; (5) Civilizations of the Americas; (6) China; (7) Japan; (8) Medieval Societies: Europe and Japan; (9) Europe During the Renaissance, the Reformation, and the Scientific Revolution; (10) Early Modern Europe: The Age of Exploration to the Enlightenment; and (11) Linking Past to Present. Six of the 11 units delineated in the framework's 7th grade course description are developed in these course models. All units follow the same format. Each begins with a rationale and overview. Ways are suggested for teachers to coordinate the model with the state-adopted textbook for 7th grade. A presentation of activities to introduce and continue the sample topic are suggested to encourage students to apply what they

The Golden Touch Nathaniel Hawthorne.1959 King, Midas's fondest wish, to have everything he touches turn to gold, backfires.

Mussolini and Hitler Christian Goeschel.2018-01-01 A fresh treatment of Fascist Italy and Nazi Germany, revealing the close ties between Mussolini and Hitler and their regimes From 1934 until 1944 Mussolini met Hitler numerous times, and the two developed a relationship that deeply affected both countries. While Germany is generally regarded as the senior power, Christian Goeschel demonstrates just how much history has underrepresented Mussolini's influence on his German ally. In this highly readable book, Goeschel, a scholar of twentieth-century Germany and Italy, revisits all of Mussolini and Hitler's key meetings and asks how these meetings constructed a powerful image of a strong Fascist-Nazi relationship that still resonates with the general public. His portrait of Mussolini draws on sources ranging beyond political history to reveal a leader who, at times, shaped Hitler's decisions and was not the gullible buffoon he's often portrayed as. The first comprehensive study of the Mussolini-Hitler relationship, this book is a must-read for scholars and anyone interested in the history of European fascism, World War II, or political leadership.

His dramatic flair is largely influenced by French novelist Gustave Flaubert and is perfect for fans of Anton Chekhov's short stories. The most notable of the 300 short stories that he wrote include 'Bel Ami', 'Une Vie', and 'The Dumpling'.

College Algebra with Trigonometry Raymond A. Barnett, Michael R. Ziegler, Karl E. Byleen. 1999 This text takes a right angle approach to trigonometry and is designed for use in a one or two term course in college algebra with trigonometry or precalculus. *College Algebra with Trigonometry 6/E* has been written to maximize student comprehension and great care has been taken to produce a text that is mathematically correct and accessible to students. Emphasis is on computational skills, ideas, and problem solving rather than mathematical theory. Most derivations and proofs are omitted except where their inclusion adds significant insight into a particular concept. General concepts and results are usually presented only after particular cases have been discussed. The single most crucial topic is function. The function concept is introduced and developed from several points of view and is substantially motivated through many illustrations and examples. One of the primary objectives of this book is to give the student substantial experience in modeling and solving real world problems. Enough applications are included to convince even the most skeptical student that mathematics really is useful.
