Practice Nursing Theresa Lowry-Lehnen. 2018-12-08 Practice Nurses play an important and pivotal role in healthcare providing a range of interventions and services to patients in General Practice and Primary Care settings. While most Practice Nurses work in GP surgeries and doctor led clinics, others are working as autonomous practitioners in community practices and nurse led centres. Practice Nurses are presented with an ever increasing range of conditions and patient needs as the role is constantly changing and evolving. The extended roles and range of clinical skills which may be provided by a Practice Nurse depend on the needs of the patient and the qualifications, skills, competencies and scope of practice of each individual Practice Nurse (NMBI, 2015). Practice Nurses have a responsibility to ensure that they are suitably qualified, skilled and competent in carrying out each clinical procedure and intervention that they undertake. Developing guidelines for clinical practice is an important part of the Practice Nurse role, but the task of researching, developing and producing guidelines is time-consuming, and it can be difficult to find the information required as and when needed. *Practice Nursing: Clinical Guidelines and Procedures in Practice* written by a Practice Nurse, and based on local and national guidelines, provides a comprehensive overview and a step by step guide for nurses carrying out a wide range of clinical procedures in practice. The book contains over 100 clinical guidelines and

procedures with illustrations, tables, charts and diagrams. In producing these clinical guidelines, the author hopes that this book will prove useful as a resource and reference guide for other nurses in general practice and primary care settings.

Thomas, MSN, RN, NEA-BC, Mellisa Renter, MSN, RN, CPN. 2021-05-20 Empowering, engaging, and retaining qualified nurses are critical healthcare priorities. Why? Nurse retention is directly correlated to healthcare outcomes, and nurse turnover has a negative, multidimensional effect on healthcare organizations. Turnover affects job satisfaction among clinical nurses, which leads to burnout, making it harder for them to provide safe patient care and achieve overall organizational initiatives. Further, the high costs associated with nurse turnover can have a huge impact on a hospital's or health system's profit margin. Improving Nurse Retention & Healthcare Outcomes will help clinical nurses understand how to elevate their practice as frontline care providers and give executives a new, strategic approach to nurse retention. Authors Judy Thomas and Mellisa Renter outline the IMPACT Program they created to stimulate empowerment and professional growth. In addition to explaining the program, how it works, and what it has achieved, this book provides an implementation path to make an immediate impact on nurse empowerment, engagement, and retention.

Faith Community Nursing P. Ann Solari-Twadell, Deborah Jean Ziebarth. 2019-08-31 A multi-authored book, with editors and authors who are leaders in Faith Community Nursing (FCN) that aims to address contemporary issues in faith-based, whole person, community based health offering cost effective, accessible, patient centered care along the patient continuum while challenging contemporary health policy to include more health promotion services. Twenty-five chapters take the reader from a foundational understanding of this historic grass-roots movement to the present day international specialty nursing practice. The book is structured into five sections that describe both the historical advancement of the Faith Community Nursing, its current implications and future challenges, taking into account the perspectives of the pastor, congregation, nurse, health care system and public health national and international organizations. The benefits of this book are that it is intended for a mixed audience including lay, academic, medical professionals or health

care executives. By changing the mindset of the reader to see the nurse as more than providing illness care, the faith community as more than a place one goes to on Sunday and health as more than physical, creative alternatives for promoting health emerge through Faith Community Nursing.
