Afro-Cuban Tales Lydia Cabrera.2004-01-01 As much a storyteller as an ethnographer, Lydia Cabrera was captivated by a strange and magical new world revealed to her by her Afro-Cuban friends in early twentieth-century Havana. In *Afro-Cuban Tales* this world comes to teeming life, introducing English-speaking readers to a realm of tenuous boundaries between the natural and the supernatural, deities and mortals, the spiritual and the seemingly inanimate. Here readers will find a vibrant, imaginative record of African culture transplanted to Cuba and transformed over time, a passionate and subversive alternative to the dominant Western culture of the Americas. In this charmed realm of myth and legend, imaginative flights, and hard realities, Cabrera shows us a world turned upside down. In this domain guinea hens can make dour Asturians and the king of Spain dance; little fat cooking pots might prepare their own meals; the pope can send encyclicals about pumpkins; and officials can be defeated by the shrewdness of turtles. The first English translation of one of the most important writers on African culture in the Americas, the collection provides a fascinating view of how African traditions, myths, stories, and religions traveled to the New World?of how, in their tales, Africans in the Americas created a New World all their own.

What Does It All Mean? Thomas Nagel.1987-10-15 In this cogent and accessible introduction to philosophy, the distinguished author of *Mortal Questions* and *The View From Nowhere* sets forth the central problems of philosophical inquiry for the beginning student. Arguing that the best way to learn about philosophy is to think about its questions directly, Thomas Nagel considers possible solutions to nine problems--knowledge of the world beyond our minds, knowledge of other minds, the mind-body problem, free will, the basis of morality, right and wrong, the nature of death, the meaning of life, and the meaning of words. Although he states his own opinions clearly, Nagel leaves these fundamental questions open, allowing students to entertain other solutions and encouraging them to think for themselves.

Tao Te Ching Lao Tzu.2021-02-17 Limited Time Promotional Offer Tao Te Ching - The Classic Book of The Way And Virtue The Tao-Te-Ching is an anti-authoritarian treatise which posits that the way of virtue lies in non-action (Wu Wei) through a recognition of the natural, universal force known as the Tao. The Tao flows without effort and, like water, goes where it will without striving and effects change and growth. To be virtuous, one should emulate the Tao and engage in non-action (not forcing an effect or outcome). Human-made laws, it claims, cannot make one virtuous and cannot contribute to good behavior, inner peace, or empathy with others because they are not in tune with nature. It is only by recognizing the Tao, and one's connection to it and all things, that one may achieve these goals. To recognize the Tao, one must know what it is, and so it is defined in the first chapter: The Tao (The Way) that can be spoken of is not the Constant Tao; The name that can be named is not a Constant Name. Nameless, is the origin of Heaven and Earth; The named is the Mother of all things. Thus, the constant void enables one to observe the true essence. The constant being enables one to see the outward manifestations. These two come paired from the same origin. But when the essence is manifested, it has a different name. This same origin is called The Profound Mystery. As profound the mystery as it can be, It is the Gate to the essence of all life. Lao Tzu: The Old Master Lao Tzu was an ancient Chinese philosopher and poet, well-known for penning the book *Tao Te Ching*. He was the founder of philosophy of Taoism, a religious and ethical custom of ancient China. He is largely respected as a religious deity in various traditional Chinese religious schools of thought. He is also believed by some to be an older contemporary of the famous philosopher Confucius. The '*Tao Te Ching*', literally meaning 'The Way and Its Power' presents the idea of 'Tao' as being the end all and be all of existence. It is extremely powerful, yet down to earth. It is the source of all being in the world. The book intends to guide people on how to return to the laws and ways of nature to maintain the balance of the Tao. Lao Tzu's philosophy was a simple one. He was against putting effort and striving, as he thought struggle is not only futile but also hinders productivity. In his theory of 'wu-wei', he advises to simply do nothing. By this he means not to go against the forces of nature, wait for the gush of events nature brings to you and dive right in. He advised not to struggle to change the natural order of things, but to bring spontaneity to one's actions as one holds on to the nature's way of life. Followers of Taoism believe that striving for nothing will never lead them to failure. The one who has never failed is always successful, thus becoming powerful. Lao Tzu's journey began as he set foot towards the western border of China, currently Tibet. He was saddened by what he saw around him: men being diverted away from nature and the goodness it brings. A guard he met on the border asked Lao to write down his teachings as he went. This is when he wrote the famous *Tao Te Ching*, a 5,000 character account of his thoughts and philosophical ideas.

Perspective as Symbolic Form Erwin Panofsky.2020-09-01 Erwin Panofsky's *Perspective as Symbolic Form* is one of the great works of modern intellectual history, the legendary text that has dominated all art-historical and philosophical discussions on the topic of perspective in this century. Finally available in English, this unrivaled example of Panofsky's early method places him within broader developments in theories of knowledge and cultural change. Here, drawing on a massive body of learning that ranges over ancient philosophy, theology, science, and optics as well as the history

of art, Panofsky produces a type of “archaeology” of Western representation that far surpasses the usual scope of art historical studies. Perspective in Panofsky’s hands becomes a central component of a Western “will to form,” the expression of a schema linking the social, cognitive, psychological, and especially technical practices of a given culture into harmonious and integrated wholes. He demonstrates how the perceptual schema of each historical culture or epoch is unique and how each gives rise to a different but equally full vision of the world. Panofsky articulates these distinct spatial systems, explicating their particular coherence and compatibility with the modes of knowledge, belief, and exchange that characterized the cultures in which they arose. Our own modernity, Panofsky shows, is inseparable from its peculiarly mathematical expression of the concept of the infinite, within a space that is both continuous and homogenous.

The Book of Fantasy Jorge Luis Borges,Silvina Ocampo,Adolfo Bioy Casares.1988

Fictions Jorge Luis Borges.1985 (Book Jacket Status: Jacketed) Jorge Luis Borges was one of those very rare creators who changed the face of an art form--in his case, the short story. His work has been paid the ultimate honor of being appropriated and imitated by innumerable writers on every continent of the world. The seventeen brief masterpieces of FICCIONES explode the boundaries of genre, offering up labyrinthine libraries, a fictional encyclopedia entry that spawns an entire world, a review of a nonexistent writer's attempt to re-create Don Quixote word for word, a man with the disabling inability to forget anything he has ever experienced, and other metaphysical puzzles. But the true measure of Borges's greatness lies in the fact that his fictions--elaborately paradoxical, postmodern, and intellectually delicious as they are--managed to return the short story to the realm of the fabulous and the uncanny from which, as parable and fairy tale, it originally came.

The 48 Laws of Power Robert Greene.2000-09-01 Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control - from the author of The Laws of Human Nature. In the book that People magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, The 48 Laws of Power is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

Textos escogidos Chuang Tse.2019-09-19 Si el Tao Te Ching atribuido a Lao Tse (publicado ya en esta colección) supone la manifestación más contemplativa de la concepción taoísta del mundo, los textos atribuidos a Chuang Tse son la cara más práctica o descriptiva del mismo, hasta el punto de integrar lo que hoy en día llamaríamos un arte de vivir fundamentado en el Tao. La aceptación activa de éste, la llamada a la no acción y a entregarse al fluir de la existencia, la negación de la sabiduría meramente intelectual, su cuestionamiento de la realidad y la defensa de la utilidad de lo inútil hechas a través de sus deliciosas y llamativas fábulas y aforismos, hacen del Chuang Tse una vía de aproximación al Tao alternativa y a la vez complementaria del Tao Te Ching en la cual podemos entrar como quien se va sumergiendo poco a poco en un agua cristalina, tomando de aquí y de allá lo que sentimos útil para nuestro viaje. Selección, versión y epílogo de Gabriel García-Noblejas

Depression and the Body Alexander Lowen.1993-01-01 The depressed person, says Dr. Alexander Lowen, is out of touch with reality - and especially with the reality of his or her own body. This inspiring, pioneering book explores the cultural and psychological forces that contribute to this condition and shows how we can overcome depression, first by reestablishing the connection to our physical selves and learning to recognize the physical manifestations of our emotions. Drawing on his vast experience with depressed patients, Dr. Lowen outlines a series of simple but remarkably effective exercises that help us reawaken to our own inherent energies, enable us to express our love and uniqueness, and recover our spirituality and faith in living. “[Dr. Lowen’s] book is both important and, for the serious lay reader, engrossing. He is an unusually lucid writer, unburdened by jargon, candidly personal.” - Publishers Weekly

Picasso Ibero .2021-09-07 Picasso in dialogue with the Iberian holdings of the Louvre Although he spent most of his adult life in France, painter Pablo Picasso (1881-1973) never denied the artistic influence that his upbringing in Spain imparted upon him. Of particular significance was the art and culture of the Iberian Peninsula where he had been born and later lived as a young man, though it was likely that his first real encounter with Iberian art took place at the Louvre in France. This volume accompanies a curatorial collaboration between the Centro Botín in Spain and the Musée Picasso-Paris in France that explores Picasso's relationship with Iberian art on an unprecedented scale. The book demonstrates this rich connection by comparing works by Picasso with masterpieces from the Louvre's Iberian collection and major Spanish archaeological museums. Further context provided by the world's leading experts in Iberian art conveys the depth of Picasso's cultural and artistic dialogue with his birthplace.

The Reenchantment of the World Morris Berman.1981 The Reenchantment of the World is a perceptive study of our scientific consciousness and a cogent and forceful challenge to its supremacy. Focusing on the rise of the mechanistic idea that we can know the natural world only by distancing ourselves from it, Berman shows how science acquired its controlling position in the consciousness of the West. He analyzes the holistic, animistic tradition--destroyed in the wake of Scientific Revolution of the sixteenth and seventeenth centuries--which viewed man as a participant in the cosmos, not as an isolated observer. Arguing that the holistic world view must be revived in some credible form before we destroy our society and our environment, he explores the possibilities for a consciousness appropriate to the modern era. Ecological rather than animistic, this new world view would be grounded in the real and intimate connection between man and nature.
