**Towards a new order in the global automotive industry: How Asian companies catch up to their western peers** Daniel Wäldchen. 2014-02-01 The global automotive industry faces the most influential changes since the revolutionary introduction of mass production a century ago. Latecomer firms from Asia are challenging the western incumbents. They can change the rules of the game in the industry by leapfrogging several steps in their development process. This study seeks to contribute to the discussion of latecomer firms by gaining insights into the catch up processes of five automotive companies in the passenger car segment, namely BYD (PRC), Chery (PRC), Geely (PRC), Tata Motors (India) and Mahindra & Mahindra (India). Based on learning theories and the core processes of car manufacturers, the author develops a catch up framework in order to compare automotive latecomers. The Korean manufacturer Hyundai serves as an example for a successful catch up, and provides a contextual framing for catch up processes in the automotive sector. An analysis of empirical data provides evidence for the evaluation of the catch up status of the five challenger firms. The author emphasizes the influence of institutional settings in China and India and the role of business groups that can act as facilitators for the catch up process. Finally, the study clusters the catch up strategies of the five observed companies in order to compare their approach.

Product Strategy and Corporate Success C B Rao.2019-10-17 Product strategy is the key driver of business strategy and corporate success. This book brings out several important aspects of product strategy, drawing upon examples from the Indian automobile industry, which is verily the bellwether of the Indian economy. The automobile industry is not only a strategic industry economically but also an instructive industry intellectually. The industry is the cradle of modern management and is a synthesis of various functional strategies. The growth of the automobile industry or, for that matter, any consumer-facing industry lies in its ability to maintain a continuous pipeline of new and innovative products, substantive in functionality and stylistic in appearance. The automobile industry provides the perfect backdrop for discussing products as the core of the corporate business strategy. The global automobile industry, including the Indian automobile industry, is at an inflection point with portends of an unprecedented transformation. The drivers of this transformation are already seen in terms of connected vehicles, autonomous mobility, electric vehicles and digital technologies. The book, through its eighty chapters, demonstrates the synergistic interplay between technology and business, strategy and execution, innovation and inventiveness, enterprise and regulation, indigenization and globalization, structure and process, resourcing and spend, and leadership and management. This interplay would determine India's ability to become a major player in this transformation. This book will be of interest to industry professionals, policy makers, the academic community and the general public.

**BREXIT - and Its Impact On India's Export Business** Dr.V.V.L.N. Sastry. 2020-05-13 Brexit will lead to fundamental changes in the trade relations between the UK and other nations. It would pose a challenge to countries such as India that use the UK as a gateway into the EU. The loss of the Single Market would also pose a challenge to the UK and the EU. It is too early to tell how the economic rivalry between the UK and the EU will play out in the long run. Developing economies that depended on the EU are bound to be affected by the rivalry. India is one of the countries that would be affected by the economic rivalry. The paper uses a review method to determine the impact of Brexit on Indian companies both at the local and international level. It undertakes a review of some of the largest companies in India. These companies operate in industries that are bound to be affected by Brexit. Therefore, an analysis of the impact of Brexit on these companies would depict the impact of Brexit on India as a case study. The results of the paper show that India would have a positive net effect from Brexit regardless of the fact that Brexit may lead to losses in trade between the UK and India. As India is the source of FDI of the UK, Brexit would result in making other countries in the EU attractive destinations of the FDI. To avoid losing out, the UK would try harder to ensure that more capital comes from India. The UK may do this by wooing Indian companies to ensure they invest in the UK It may provide tax breaks and other incentives. Nevertheless, it is vital for India to form stronger ties with the EU since the UK has been India's gateway to the EU. This will provide India with a wider access to the EU market. Loss of subsidies for EU students to study in the UK would necessitate the country to look for an alternative source of students. India is one of the

markets that the UK would explore in the aftermath of Brexit.
