Xu Bing Xu Bing.2020-09-28 - Monograph focusing on Xu Bing's most ambitious works of art: Book from the Sky and Book from the Ground- Presents the artist's method and motivation in his own words- An accessible yet academic insight into this innovative internationally renowned Chinese artist The written word is the most basic element of human culture. To touch the written word is to touch the essence of culture. - Xu Bing Book from the Sky certainly seemed to have fallen from the heavens: the text of this installation piece was written in a new language that resembled traditional Chinese. No matter who scours Xu Bing's book for 'meaning', they will only discover a semblance of it: mutated characters that resist interpretation. Carving out approximately four thousand wood blocks by hand, Xu Bing spent four years, from 1987 to 1991, making (in his own words) something that said nothing.Book from the Sky's lengthy production process is also detailed in this monograph. Carving approximately four thousand wood blocks by hand, Xu Bing (in his own words) spent four years, from 1987 to 1991, making something that said nothing. After creating a book no one could read, it only made sense for Xu Bing to develop his next project: a book that transcended barriers of language: Book from the Ground. Composed entirely of pictographs, Book from the Ground is a groundbreaking study into the concept of universal communication.Whether his goal is total comprehension or confusion, Xu Bing's masterful exploration of language challenges the way we think about the written word.

Lifelong Machine Learning, Second Edition Zhiyuan Sun,Bing Leno da Silva.2022-06-01 Lifelong Machine Learning, Second Edition is an introduction to an advanced machine learning paradigm that continuously learns by accumulating past knowledge that it then uses in future learning and problem solving. In contrast, the current dominant machine learning paradigm learns in isolation: given a training dataset, it runs a machine learning

algorithm on the dataset to produce a model that is then used in its intended application. It makes no attempt to retain the learned knowledge and use it in subsequent learning. Unlike this isolated system, humans learn effectively with only a few examples precisely because our learning is very knowledge-driven: the knowledge learned in the past helps us learn new things with little data or effort. Lifelong learning aims to emulate this capability, because without it, an AI system cannot be considered truly intelligent. Research in lifelong learning has developed significantly in the relatively short time since the first edition of this book was published. The purpose of this second edition is to expand the definition of lifelong learning, update the content of several chapters, and add a new chapter about continual learning in deep neural networks—which has been actively researched over the past two or three years. A few chapters have also been reorganized to make each of them more coherent for the reader. Moreover, the authors want to propose a unified framework for the research area. Currently, there are several research topics in machine learning that are closely related to lifelong learning—most notably, multi-task learning, transfer learning, and meta-learning—because they also employ the idea of knowledge sharing and transfer. This book brings all these topics under one roof and discusses their similarities and differences. Its goal is to introduce this emerging machine learning paradigm and present a comprehensive survey and review of the important research results and latest ideas in the area. This book is thus suitable for students, researchers, and practitioners who are interested in machine learning, data mining, natural language processing, or pattern recognition. Lecturers can readily use the book for courses in any of these related fields.

Writing Spaces 1 Charles Lowe, Pavel Zemliansky. 2010-06-18 Volumes in Writing Spaces: Readings on Writing offer multiple perspectives on a wide-range of topics about writing, much like the model made famous by Wendy Bishop's "The Subject Is . . ." series. In each chapter, authors present their unique views, insights, and strategies for writing by addressing the undergraduate reader directly. Drawing on their own experiences, these teachers-as-writers invite students to join in the larger conversation about developing nearly every aspect of craft of writing. Consequently, each essay functions as a standalone text that can easily complement other selected readings in writing or writing-intensive courses across the disciplines at any level. Topics in Volume 1 of the series include academic writing, how to interpret writing assignments, motives for writing, rhetorical analysis, revision, invention, writing centers, argumentation, narrative, reflective writing, Wikipedia, patchwriting, collaboration, and genres.

Outliers Malcolm Gladwell. 2008-11-18 From the bestselling author of *Blink* and *The Tipping Point*, Malcolm Gladwell's *Outliers: The Story of Success* overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. *Outliers* will change the way you think about your own life story, and about what makes us all unique.

'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times
