Rice Improvement Jauhar Ali,Shabir Hussain Wani.2021-05-05 This book is open access under a CC BY 4.0 license. By 2050, human population is expected to reach 9.7 billion. The demand for increased food production needs to be met from ever reducing resources of land, water and other environmental constraints. Rice remains the staple food source for a majority of the global populations, but especially in Asia where ninety percent of rice is grown and consumed. Climate change continues to impose abiotic and biotic stresses that curtail rice quality and yields. Researchers have been challenged to provide innovative solutions to maintain, or even increase, rice production. Amongst them, the 'green super rice' breeding strategy has been successful for leading the development and release of multiple abiotic and biotic stress tolerant rice varieties. Recent advances in plant molecular biology and biotechnologies have led to the identification of stress responsive genes and signaling pathways, which open up new paradigms to augment rice productivity. Accordingly, transcription factors, protein kinases and enzymes for generating protective metabolites and proteins all contribute to an intricate network of events that guard and maintain cellular integrity. In addition, various quantitative trait loci associated with elevated stress tolerance have been cloned, resulting in the detection of novel genes for biotic and abiotic stress resistance. Mechanistic understanding of the genetic basis of traits, such as N and P use, is allowing rice researchers to engineer nutrient-efficient rice varieties, which would result in higher yields with lower inputs. Likewise, the research in micronutrients biosynthesis opens doors to genetic

engineering of metabolic pathways to enhance micronutrients production. With third generation sequencing techniques on the horizon, exciting progress can be expected to vastly improve molecular markers for gene-trait associations forecast with increasing accuracy. This book emphasizes on the areas of rice science that attempt to overcome the foremost limitations in rice production. Our intention is to highlight research advances in the fields of physiology, molecular breeding and genetics, with a special focus on increasing productivity, improving biotic and abiotic stress tolerance and nutritional quality of rice.

The White King György Dragomán.2007 An international sensation, this startling and heartbreaking debut recounts the adventures of eleven-year-old Djata in one life-changing year. To be published in twenty countries around the world this spring. Djata doesn't know what to make of the two men who lead his father away one day, or understand why his mother bursts into tears when he brings her tulips on her anniversary. He does know that he must learn to fill his father's shoes, even though among his friends he is still a boy: fighting neighborhood gang wars, volunteering to dig ditches, playing soccer on radioactive grass, having inappropriate crushes, sneaking into secret screening rooms, and shooting at stray cats with his gun-happy (and politically influential) grandfather. But this depiction of life in a totalitarian state--the only world Djata knows--is tempered

by the sheer, hilarious absurdity of the situations he finds himself in, by his enduring faith in his father's return, and by the moments of unexpected beauty and hope and the small acts of kindness that mark out any life. As in the works of Mark Haddon, David Mitchell, and Marjane Satrapi, Djata's child's-eye view lends a power and immediacy to his story, making us laugh and ache in recognition and reminding us all of our shared humanity.

Water Conflicts in India K.J. Joy,Suhas Paranjape,Biksham Gujja,Vinod Goud,Shruti Vispute.2020-11-29 Water conflicts in India have now percolated to every level. They are aggravated by the relative paucity of frameworks, policies and mechanisms to govern the use of water resources. Based on the premise that understanding and documenting different types of water conflict cases in all their complexity would contribute to informed public debate and facilitate their resolution, Forum for Policy Dialogue on Water Conflicts in India, a collaborative initiative of the WWF project 'Dialogue on Water, Food and Environment', documented a number of such case studies. One of its kind in India, this book brings together an impressive sixty-three case studies - summarized status of the conflicts, the issues involved and their current position - and gives us a glimpse into 'the million revolts' that are brewing around water. While recognizing that each conflict is a microcosm of wider conflicts, the editors have classified these cases into eight broad themes that try to capture the dominant aspect of the conflict. These are: contending water uses; dams and displacement; equity-access-allocations; micro-level conflicts; water quality; trans-boundary

conflicts; privatization; sand excavation and mining. With a mix of academics and activists as contributors, the book makes an important contribution to a new discourse on water in general, and water conflicts and conflict resolution in particular.

The Persistence of Caste Anand Teltumbde.2010-10-01 While the caste system has been formally abolished under the Indian Constitution, according to official statistics, every eighteen minutes a crime is committed in India on a dalit-untouchable. The Persistence of Caste uses the shocking case of Khairlanji, the brutal murder of four members of a dalit family in 2006, to explode the myth that

caste no longer matters. In this exposé, Anand Teltumbde locates the crime within the political economy of post-Independence India and across the global Indian diaspora. This book demonstrates how caste has shown amazing resilience - surviving feudalism, capitalist industrialization and a republican constitution - to still be alive and well today, despite all denial, under neoliberal globalization. This insightful new analysis not only provides a fascinating introduction to the issue of caste in a globalized world, but also sharpens our understanding of caste dynamics as they really exist.

A Tale of Two Revolts Rajmohan Gandhi.2009-11-06 Two wars--the 1857 Revolt in PBI - India and the American Civil War--seemingly fought for very different reasons, occurred at opposite ends of the globe in the middle of the nineteenth century. But they were both fought in a PBI - World still dominated by Great Britain and the battle cry in both conflicts was freedom. Rajmohan Gandhi brings the drama of both wars to one stage in *A Tale of Two Revolts*. He deftly reconstructs events from the point of view of William Howard Russell--an Irishman who was also perhaps the PBI - World's first war correspondent--and uncovers significant connections between the histories of the United States, Britain and PBI - India. The result is a tale of two revolts, three countries and one century. Into this fascinating story Rajmohan Gandhi weaves the choices of five extraordinary inhabitants of PBI - India--Sayyid Ahmed Khan, Ishwarchandra Vidyasagar, Jotiba Phule, Allan Octavian Hume and Bankimchandra Chatterjee--and of three towering figures of PBI - World history--Karl Marx, Leo Tolstoy and Abraham Lincoln--to show the continuities between the nineteenth century and the PBI - World we live in today. Scholarly, insightful and gripping, *A Tale of Two Revolts* raises new questions about these wars that changed the PBI - World.
