River Discharge to the Coastal Ocean John D. Milliman, Katherine L. Farnsworth. 2013-03-28 Rivers provide the primary link between land and sea. Utilizing the world's largest database, this book presents a detailed analysis and synthesis of the processes affecting fluvial discharge of water, sediment and dissolved solids. The ways in which climatic variation, episodic events, and anthropogenic activities - past, present and future - affect the quantity and quality of river discharge are discussed in the final two chapters. The book contains 26 tables and more than 165 figures - many in full color - including global and regional maps. The book's extensive appendix presents the 1534-river database as a series of 44 tables and 132 maps that provide quantitative data regarding the discharge of water, sediment and dissolved solids. The complete database is also presented within a GIS-based package available online at www.cambridge.org/milliman. *River Discharge to the Coastal Ocean* provides an invaluable resource for researchers, professionals and graduate students in hydrology, oceanography, geology, geomorphology and environmental policy.

Marine Palaeoenvironmental Analysis from Fossils Dan W. J. Bosence, Peter A. Allison. 1995 This volume critically reviews the use of fossils for the analysis of palaeoenvironments. The papers are multi-disciplinary, drawing on a host of geochemical, palaeoecological and palaeontological methods from traditional taxonomic uniformitarianism to more recently developed geochemical isotopic analyses. The approach of the book is analytical rather than taxonomic, concentrating on a range of techniques. The common thread, however, is that it is palaeontological material that is being considered, whether it be identifiable body fossils, trace fossils, distinctive fossil associates, diagenetically unaltered material or organic compounds. Using a number of methods, and comparing their results, allows different environmental controls to be isolated and provides more information on the record of past environmental parameters. The volume focuses on the data obtained from organisms and their remains and will be of importance to sedimentologists, stratigraphers and palaeontologists who need to maximize their palaeoenvironmental interpretations of depositional environments, facies models, sequence stratigraphy and palaeoclimates.--Provided by publisher.

The Reserve Russell Banks. 2009-10-13 Part love story, part murder mystery, set on the cusp of the Second World War, Russell Banks's sharp-witted and deeply engaging new novel raises dangerous questions about class, politics, art, love, and madness—and explores what happens when two powerful personalities, trapped at opposite ends of a social divide, begin to break the rules. Twenty-nine-year-old Vanessa Cole is a wild, stunningly beautiful heiress, the adopted only child of a highly regarded New York brain surgeon and his socialite wife. Twice married, Vanessa has been scandalously linked to any number of rich and famous men. But on the night of July 4, 1936, at her parents' country home in a remote Adirondack Mountain enclave known as The Reserve, two events coincide to permanently alter the course of Vanessa's callow life: her father dies suddenly of a heart attack, and a mysteriously seductive local artist, Jordan Groves, blithely lands his Waco biplane in the pristine waters of the forbidden Upper Lake. . . . Jordan's reputation has preceded him; he is internationally known as much for his exploits and conquests as for his paintings themselves, and, here in the midst of the Great Depression, his leftist loyalties seem suspiciously undercut by his wealth and elite clientele. But for all his worldly swagger, Jordan is as staggered by Vanessa's beauty and charm as she is by his defiant independence. He falls easy prey to her electrifying personality, but it is not long before he discovers that the heiress carries a dark, deeply scarring family secret. Emotionally unstable from the start, and further unhinged by her father's unexpected death, Vanessa begins to spin wildly out of control, manipulating and destroying the lives of all who cross her path. Moving from the secluded beauty of the Adirondack wilderness to the skies above war-torn Spain and Fascist Germany, *The Reserve* is a clever, incisive, and passionately romantic novel of suspense that adds a new dimension to this acclaimed author's extraordinary repertoire.

Marine and Coastal Protected Areas Rodney V. Salm, John R. Clark, Erkki Siirila. 2000 This is a new edition of the classic textbook on marine protected area (MPA) management in the tropics, originally produced as an output of the Bali World Parks Congress in 1982. Approaches to planning and managing MPAs have evolved considerably. Major advances include innovative financing mechanisms, partnerships with the private sector and NGOs, and collaborative management between government and coastal communities. These advances have brought new approaches for MPA establishment and management that are more participatory, involving communities through interaction and collaboration rather than prescription. With new case studies and illustrations, the guide comes in a water-resistant cover for field use. It is intended for those who plan individual and/or national MPA systems and gives philosophical context for MPAs along with some basic principles and approaches.

Learning from Vernacular Pierre Frey. 2010 In 1964, Bernard Rudofsky curated the exhibition *Architecture Without Architects* at The Museum of Modern Art in New York, thereby drawing the attention of the postwar Western public to traditional architectures, rescuing them from the ignominy to which they had been consigned by the 'national' ideologies of Europe in the 1930s. In the early 1980s, Ivan Illich published a number of radical critiques of modernity in which he drew attention to 'vernacular' values, proposing a trenchant but hospitable definition of this term. It derives from Roman law, in which everything produced within the household for consumption within the household and not for sale or exchange is vernacular. In order to locate this proposition within the field of architectural criticism, this book borrows with ironic intent part of the title of Robert Venturi's celebrated work, *Learning from Las Vegas* (1977), which launched the fashion for post-modernism in architecture. Taking advantage of a collection of maquettes of vernacular architecture (the only one of its kind in the world), whose special attributes he highlights and whose value he underlines, the author selects contemporary realisations by architects from Africa, Asia, America and Europe that seem to him to constitute a 'new vernacular architecture'. The emphasis here is on materials available on the fringes of the market, on the safeguarding and development of traditional know-how, on the social role of the architect and on the teaching of architecture.

Invasive species in the New Caledonian archipelago : a major economic and environmental hazard Marie-Laure Beauvais,Alain Coléno,Hervé Jourdan.2006 La biodiversité calédonienne, reconnue comme l'une des plus exceptionnelles avec son fort taux d'endémisme, est largement menacée par l'introduction de nouvelles espèces. Il est donc important de protéger l'écosystème calédonien, à la fois riche et vulnérable, des espèces envahissantes, l'une des principales causes de perte de la biodiversité à l'échelle mondiale. Face à cette menace, le Gouvernement et les trois provinces de Nouvelle-Calédonie souhaitent mettre en place une structure collective afin de définir les orientations stratégiques nécessaires pour préserver et conserver leur biodiversité. Elles ont ainsi voulu qu'un état des connaissances soit dressé et qu'une réflexion soit menée sur la prévention, la détection précoce, l'intervention rapide, l'éradication, le confinement et le contrôle des espèces envahissantes. Cette expertise collégiale apporte les éléments nécessaires à la construction d'un système de biosécurité pertinent et efficace pour l'archipel néo-calédonien.

The Past Ahead Gilbert Gatore.2012 The Past Ahead is the story of the destinies of two people after their experiences of the genocide in Rwanda. Isaro is orphaned, exiled, and now returned to her native country. Niko is a character in a novel that Isaro writes to help her understand her country's recent horrific past. Isaro's quest to recover the memory of the life she has lost is haunted by her nightmare imaginings, whose horror is given expression through Niko, a mute social outcast. When an army intent on massacre reaches his village, the once gentle young man is forced to become a killer. After the fighting ends, Niko retreats to a cave that he shares with a family of gorillas to try to escape the burden of his guilt. In his solitude, he is plagued with painful memories that will not leave him. As Isaro writes Niko's story, she succumbs to the sadness of death, violence, and the dreadful reminders of her terrible past. Stunning and powerfully written, Gatore's novel lays bare the unfathomable human cost of this international tragedy.

Transitional Justice Gerhard Werle,Moritz Vormbaum.2022-09-08 The expression "transitional justice" emerged at the end of the Cold War, during the transition from dictatorships to democracies, and serves as a central concept in dealing with systemic injustice. This textbook examines the basic principles of transitional justice and explores its core mechanisms, including prosecutions, amnesties, truth commissions, reparations, and vetting the public service. It elaborates the substance and legal framework of these mechanisms and discusses current challenges. The book provides extensive material illustrating a wide variety of transitional justice situations. "This book summarizes the subjects of transitional justice and Vergangenheitsbewältigung systematically and clearly" (Joachim Gauck, German Federal President, 2012-2017).
