**Corrections and Beyond: My Story of Doing Time on the Other Side of the Bars** Dr. Ivan Godfrey.2021-09-23 When Ivan Godfrey began his career as a corrections officer in the New York State Corrections System, it was still reeling from the brutal retaliation to the prison riots at Attica. As a young African American, he grew up in the Bronx, then he worked in prisons, such as the notorious Sing-Sing Prison. In fact, Ivan often met inmates he knew on the streets from his New York City neighborhood. His memoir is a wonderful testament to his determination to strive for a better life and take care of his growing family while working in some of the most dangerous prisons in America. It is also a one-of-a-kind window into the life of a young Black prison guard as he struggled to climb the ladder of success despite inherent and overt racial barriers. Now he is an assistant professor, teaching criminal justice and behavioral science at SUNY Ulster CC, forensic mental health at Russell Sage College, and forensic social work and the criminal justice system at the University at Albany School of Social Welfare. Dr. Ivan Godfrey's memoir is an inspiring journey from the streets of the Bronx to the daily psychological and physical violence while working for over twenty years in the NY State Correction System and finally to the halls of academia.

*A Mental Health Treatment Program for Inmates in Restrictive Housing* Ashley B. Batastini,Robert D. Morgan,Daryl G. Kroner,Jeremy F. Mills.2019-06-26 This treatment program targets the criminal, behavioral, and mental health problems of inmates in segregated housing that prevents them from living prosocially and productively within the general prison population. The program makes use of a bi-adaptive psychoeducational and cognitive-behavioral treatment model to increase inmates' understanding about the psychological and criminal antecedents that contributed to their current placement, and to teach them the skills necessary for managing these problem areas. This flexible intervention assists inmates with significant problem behaviors by reducing psychological impairment and improving their ability to cope with prison life. This book includes a program introduction and guide for clinicians, the inmate workbook, and accompanying eResources to assist clinicians in both successful program implementation and evaluation of treatment outcomes. Designed to account for the safety and physical limitations that make the delivery of needed mental and behavioral health services difficult, this guide is essential reading for practitioners working with high-needs, high-risk inmate populations.

**TIP 35: Enhancing Motivation for Change in Substance Use Disorder Treatment (Updated 2019)** U.S. Department of Health and Human Services.2019-11-19 Motivation is key to substance use behavior change. Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors' use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs. Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. Resistance to change is an expression of ambivalence about change, not a client trait or characteristic. Confrontational approaches increase client resistance and discord in the counseling relationship. Motivational approaches explore ambivalence in a nonjudgmental and compassionate way.

*Aeromedical Psychology* Carrie H. Kennedy,Gary G. Kay.2017-11-01 Aeromedical psychology is that branch of psychology pertaining to the assessment, selection and evaluation of aviation personnel. This book, *Aeromedical Psychology*, is designed to provide the means for a variety of clinicians to carry out sound assessment and selection procedures, perform informed evaluations and make subsequent recommendations regarding flight status and treatment strategies geared to the aviation environment. To facilitate a dynamic understanding of the field, the book emphasizes an integration of applications and theory, case examples and research. The book is divided into three parts. The first presents assessment and selection procedures for aviation personnel (i.e. air traffic controllers, flight officers and pilots) and astronauts and the many ways in which both psychologists and psychiatrists are involved in these roles. In the second part, the waiver standards put forth by both the FAA and the various branches of the military are presented, as well as the waiver decision process. Clinical issues unique to aviation - notably fear of flying, motivation to fly and airsickness - are addressed, as well as possible courses of intervention, treatment and disposition. In the final part, more specialized issues pertaining to aeromedical psychology are dealt with, namely the psychopharmacological research and regulations applicable to recreational pilots and aviation personnel, managing the aftermath of aviation mishaps and the psychologist's role in accident investigations.
