Thyroid Nodules Hossein Gharib.2017-08-22 Utilizing the most current evidence, this practical book is the first publication of its kind to focus exclusively on the clinical and laboratory evaluation and therapy of thyroid nodules, including advances in evaluation and controversies in management. Opening with chapters presenting the epidemiology, history, laboratory and clinical evaluation of thyroid nodules, the use of radioactive isotope ultrasound and CT scanning in diagnosis is then described. The interpretation of thyroid cytology following fine needle aspiration (FNA) biopsies and the use of molecular markers are discussed in detail, as is the controversial use of thyroxine therapy. Following a presentation of the common and minimally invasive surgical approaches to thyroid nodules, chapters on multinodal goiters, incidentalomas and thyroid nodules in children round out the presentation. Written and edited by leading US and international thyroidologists, Thyroid Nodules is a useful, state-of-the-art text for endocrinologists, surgeons, and primary care physicians.

Expert Committee on Biological Standardization. 2015-06-30 This report presents the recommendations of a WHO Expert Committee commissioned to coordinate activities leading to the adoption of international recommendations for the production and control of vaccines and other biological substances and the establishment of international biological reference materials. Following a brief introduction the report summarizes a number of general issues brought to the attention of the Committee. The next part of the report of particular relevance to manufacturers and national regulatory authorities outlines the discussions held on the development and adoption of new and revised WHO Recommendations Guidelines and guidance documents. Following these discussions a WHO guidance document on the Scientific principles for regulatory risk evaluation on finding an adventitious agent in a marketed vaccine was adopted along with WHO Guidelines on procedures and data requirements for changes to approved vaccines and revised WHO Recommendations to assure the quality safety and efficacy of poliomyelitis vaccines (inactivated). Subsequent sections of the report provide information on the current status and proposed development of international reference materials in the areas of antibiotics; biotherapeutics other than blood products; blood products and related substances; in vitro diagnostic device reagents; and vaccines and related substances. A series of annexes are then presented which include an updated list of all WHO Recommendations Guidelines and other documents on biological substances used in medicine (Annex 1). The above three WHO documents adopted on the advice of the Committee are then published as part of this report (Annexes 2-4). Finally all additions and discontinuations made during the 2014 meeting to the list of International Standards Reference Reagents and Reference Panels for biological substances maintained by WHO are summarized in Annex 5.
