The College Essay Trap (2015-2016 Edition) Cassie Nichols.2015-04-23 There's no end to the advice you can get when you're writing your college application essay. Yet students fall into the same trap over and over. Every year, college admissions officers are forced to slog through the same formulaic essays written on the same stale topics. In this book, you'll learn about the most common mistakes students make when writing their college application essays. You'll learn about topics and writing styles that seem alluring, or even expected, but will actually hurt your chances of acceptance. You'll learn how to use your essay to convey who you really are as a person. You'll learn how to set yourself apart in the eyes of college admission officers and show them why you belong at their school. Like most traps, the College Essay Trap is easy to avoid. You just have to know what to look for. A remarkably useful short book to read and keep handy. The College Essay Trap offers as nifty and insightful a set of advice as I've come across. As someone who has read tens of thousands of such essays over the years, I found my self nodding in strong agreement with each trap [Nichols] describes and how best to avoid it. - Fred Hargadon, Former Dean of Admissions at Princeton, Stanford and Swarthmore.

Special Admission Kirsten Hextrum.2021-08-13 Honorable Mention - 2022 Society of Professors of Education Outstanding Book Award Special Admission contradicts the national belief that college sports provide upward mobility opportunities. Kirsten Hextrum documents how white middle-class youth become overrepresented on college teams. Her institutional ethnography of one elite athletic and academic institution includes over 100 hours of interviews with college rowers and track & field athletes. She charts the historic and contemporary relationships between colleges,

athletics, and white middle-class communities that ensure white suburban youth are advantaged in special athletic admissions. Suburban youth start ahead in college admissions because athletic merit—the competencies desired by university recruiters—requires access to vast familial, communal, and economic resources, all of which are concentrated in their neighborhoods. Their advantages increase as youth, parents, and coaches strategically invest in and engineer novel opportunities to maintain their race and class status. Thus, college sports allow white, middle-class athletes to accelerate their racial and economic advantages through admission to elite universities.

The International Criminal Court and Africa Charles Chernor Jalloh, Ilias Bantekas. 2017-10-06 Africa has been at the forefront of contemporary global efforts towards ensuring greater accountability for international crimes. But the continent's early embrace of international criminal justice

seems to be taking a new turn with the recent resistance from some African states claiming that the emerging system of international criminal law represents a new form of imperialism masquerading as international rule of law. This book analyses the relationship and tensions between the International Criminal Court (ICC) and Africa. It traces the origins of the confrontation between African governments, both acting individually and within the framework of the African Union, and the permanent Hague-based ICC. Leading commentators offer valuable insights on the core legal and political issues that have confused the relationship between the two sides and expose the uneasy interaction between international law and international politics. They offer suggestions on how best to continue the fight against impunity, using national, ICC, and regional justice mechanisms, while taking into principled account the views and interests of African States.

Where You Go Is Not Who You'll Be Frank Bruni.2015-03-17 Read award-winning journalist Frank Bruni's New York Times bestseller: an inspiring manifesto about everything wrong with today's frenzied college admissions process and how to make the most of your college years. Over the last few decades, Americans have turned college admissions into a terrifying and occasionally devastating process, preceded by test prep, tutors, all sorts of stratagems, all kinds of rankings, and a conviction among too many young people that their futures will be determined and their worth established by which schools say yes and which say no. In *Where You Go is Not Who You'll Be*, Frank Bruni explains why this mindset is wrong, giving students and their parents a new perspective on this brutal, deeply flawed competition and a path out of the anxiety that it provokes. Bruni, a bestselling author and a columnist for the New York Times, shows that the Ivy League has no monopoly on corner offices, governors' mansions, or the most prestigious academic and scientific grants. Through statistics, surveys, and the stories of hugely successful people, he demonstrates that many kinds of colleges serve as ideal springboards. And he illuminates how to make the most of them. What matters in the end are students' efforts in and out of the classroom, not the name on their diploma. Where you go isn't who you'll be. Americans need to hear that--and this indispensable manifesto says it with eloquence and respect for the real promise of higher education.

A STUDY OF THE INTER-RATER RELIABILITY OF UNIVERSITY APPLICATION READERS IN A HOLISTIC ADMISSIONS REVIEW PROCESS Blaire Lauren Moody Rideout. 2017 In 2015, the American Council on Education surveyed undergraduate admission and enrollment management leaders at 338 four-year institutions to understand holistic admissions review (Espinosa, Gaertner, and Orfield, 2015). In the report titled, Race, Class and College Access: Achieving Diversity in a Shifting Legal Landscape, 92% of selective institutions reported utilizing a holistic admissions review process and 72% cited the Gratz v. Bollinger (2003) and Grutter v. Bollinger (2003) court cases as the impetus for increasing their use (Espinosa et al., 2015). Holistic admissions review has led to admission directors relying heavily on applicant qualities beyond GPA and test scores, such as leadership and extracurricular experience (Hoover, 2013; Sandlin, 2008; Spencer, 2008). Yet, little research has been conducted on the reliability of

holistic admissions as an assessment or review tool, which is inherently subjective. This study sought to examine a holistic admissions review process at one institution to simply show if variance occurred and possible explanations for it. The study analyzed reader reviews for approximately 15,000 individual undergraduate admission reviews over three years. The primary method was focused on the inter-rater reliability of the application reviews. If there was significant variance for particular reviews, there was an analysis of the content behind such reviews. Findings revealed that subjective measures of performance review, and in this case holistic admissions review, may not be susceptible to high levels of variability with 97% of reader reviews showing agreement for this study. Overall, just 3% of the subjective application reviews showed variability. The content analysis of the 208 application reviews with variance revealed 20 categories within six themes of Concern, Diversity, Extracurricular, Lacking Substance, Missing Information, and Writing Style. Additionally, female and international applicants were more represented in the variability group when comparing to applicants overall. Implications for future research and professional practice should focus on reader characteristics and experiences, quantity of readers utilized, reader review systematization, and reader hiring, training, and supervision.
