Ancient China John S. Major, Constance A. Cook. 2017 Ancient China: A History surveys the East Asian Heartland Region - the geographical area that eventually became known as China - from the Neolithic period through the Bronze Age, to the early imperial era of Qin and Han, up to the threshold of the medieval period in the third century CE. For most of that long span of time there was no such place as China; the vast and varied territory of the Heartland Region was home to many diverse cultures that only slowly coalesced, culturally, linguistically, and politically, to form the first recognizably Chinese empires. The field of Early China Studies is being revolutionized in our time by a wealth of archaeologically recovered texts and artefacts. Major and Cook draw on this exciting new evidence and a rich harvest of contemporary scholarship to present a leading-edge account of ancient China and its antecedents. With handy pedagogical features such as maps and illustrations, as well as an extensive list of recommendations for further reading, Ancient China: A History is an important resource for undergraduate and postgraduate courses on Chinese History, and those studying Chinese Culture and Society more generally.

of concepts known as ming-shi. By analyzing the pre-Qin thinkers' discourse on ming and shi, the work explores how Chinese philosophers dealt with issues not only in language but also in ontology, epistemology, ethics, axiology, and logic. Through this discourse analysis, readers are invited to rethink the relationship of language to thought and behavior. The author criticizes and corrects vital misunderstandings of Chinese culture and highlights the anti-dualism and pragmatic character of Chinese thoughts. The rich meaning of the ming-shi pair is displayed by revealing its connection to other philosophical issues. The chapters show how discourse on language and reality shapes a central characteristic of Chinese culture, the practical zhi. They illuminate the interplay of Chinese theories of language and Dao as Chinese wisdom and worldview. Readers who are familiar with pragmatics and postmodernism will recognize the common points in ancient Chinese philosophy and contemporary Western philosophy, as they emerge through these chapters. The work will particularly appeal to scholars of philosophy, philosophy of language, communication studies and linguistics.

Borders of Chinese Civilization Douglas Howland.1996-04-25 D. R. Howland explores China's representations of Japan in the changing world of the late nineteenth century and, in so doing, examines the cultural and social borders between the two neighbors. Looking at Chinese accounts of Japan written during the 1870s and 1880s, he undertakes an unprecedented analysis of the main genres the Chinese used to portray Japan—the travel

diary, poetry, and the geographical treatise. In his discussion of the practice of “brushtalk,” in which Chinese scholars communicated with the Japanese by exchanging ideographs, Howland further shows how the Chinese viewed the communication of their language and its dominant modes—history and poetry—as the textual and cultural basis of a shared civilization between the two societies. With Japan’s decision in the 1870s to modernize and westernize, China’s relationship with Japan underwent a crucial change—one that resulted in its decisive separation from Chinese civilization and, according to Howland, a destabilization of China’s worldview. His examination of the ways in which Chinese perceptions of Japan altered in the 1880s reveals the crucial choice faced by the Chinese of whether to interact with Japan as “kin,” based on geographical proximity and the existence of common cultural threads, or as a “barbarian,” an alien force molded by European influence. By probing China’s poetic and expository modes of portraying Japan, *Borders of Chinese Civilization* exposes the changing world of the nineteenth century and China’s comprehension of it. This broadly appealing work will engage scholars in the fields of Asian studies, Chinese literature, history, and geography, as well as those interested in theoretical reflections on travel or modernism.
