*Artists' Things* Katie Scott,Hannah Williams.2024-01-09 Histories of artists' personal possessions shed new light on the lives of their owners. Artists are makers of things. Yet, it is a measure of the disembodied manner in which we generally think about artists that we rarely consider the everyday items they own. This innovative book looks at objects that once belonged to artists, revealing not only the fabric of the eighteenth-century art world in France but also unfamiliar—and sometimes unexpected—insights into the individuals who populated it, including Jean-Antoine Watteau, François Boucher, Jean-Baptiste Greuze, and Elisabeth Vigée-LeBrun. From the curious to the mundane, from the useful to the symbolic, these items have one thing in common: they have all been eclipsed from historical view. Some of the objects still exist, like Jean-Honoré Fragonard's color box and Jacques-Louis David's table. Others survive only in paintings, such as JeanSiméon Chardin's cistern in his Copper Drinking Fountain, or in documents, like François Lemoyne's sword, the instrument of his suicide. Several were literally lost, including pastelist Jean-Baptiste Perronneau's pencil case. In this fascinating book, the authors engage with fundamental historical debates about production, consumption, and sociability through the lens of material goods owned by artists. The free online edition of this open-access publication is at [www.getty.edu/publications/artists-things/](http://www.getty.edu/publications/artists-things/) and includes zoomable illustrations. Free PDF and EPUB downloads of the book are also available.

*Muscular System* Kristin Petrie.2006-08-15 Through engaging text and full-color photos, readers learn that there are 600 muscles in the human body and that there are three different types of muscles, cardiac, smooth, and skeletal. Other topics discussed include tendons, cardiac muscle, and smooth muscles, which make up the walls of blood vessels, the stomach, and intestines and are found in the body's hollow organs. The book explains that cardiac and smooth muscle are involuntary muscles, while skeletal muscles are voluntary. Readers discover that every muscle has its own name, including flexors, extensors, abductors, and adductors. Readers also learn that the trapezius and gluteus maximus muscles are examples of muscles that are named for their size, shape, or location. Muscular diseases and the ways to keep muscles healthy, including exercise and a healthy diet are also highlighted. Detailed diagrams, medical models, phonetics, glossary, and index enhance the text.
