**Visual Allusions** Nicholas Wade.2017-03-27 In this book a leading researcher and artist explores how we see pictures and how they can communicate messages to us, both directly and indirectly by making allusions to objects in space or to stored images in our minds. Originally published in 1990, Dr Wade provides fascinating examples of pictures that communicate hidden messages, either by implying something else, or by a shape or portrait which is carried covertly within another design. He analyses image processing stages in vision, demonstrating that the various stages may be related to styles in representational art. He shows how the way we have been taught to look at and recognise objects, affects the way we see them. The book lavishly illustrates with original examples of visual allusions and includes detailed practical advice on how photographers and designers can create them. Essential reading for photographers, designers, artists, people in film and television, and anyone involved in visual science , visual communication and advertising.

Historic Photographic Processes: A Guide to Creating Handmade Photographic Images Richard Farber.1998-10-01 Historic Photographic Processes is a comprehensive user's guide to the historical processes that have become popular alternatives to modern and digital technology. Though many of the techniques, applications, and equipment were first developed in the nineteenth century, these same methods can be used today to create hand-crafted images that are more attractive and permanent than conventional prints or digital outputs. Fine-art photographer Richard Farber incorporates extensive research with clearly-written directions and resource lists to provide in-depth information on eight of the most enduring processes in photographic history, including salted paper, albumen, cyanotype, kallitype, platinum/palladium, carbon/carbro, gum bichromate, and bromoil. He guides the reader through each step, from selecting the appropriate paper and sensitizing it to exposing, developing, and toning the final print. Each method is accompanied by a short explanation of how it was originally used and its significance in the evolution of photography. Historic Photographic Processes contains more than fifty color and ten black-and-white images that beautifully illustrate each of the processes described. Chapters include an introduction to photographic techniques and applications, such as useful safelights, sizing paper, measuring solutions, exposure controls, ultraviolet light sources, and making enlarged negatives, as well as an extensive section on safety in- and outside of the darkroom. The appendix provides important information on the chemicals discussed, as well as health-and-safety references, supply sources in the United States, Canada, and Europe, and a complete catalog of Internet resources. Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don't aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. *Migrant Cross-Cultural Encounters in Asia and the Pacific* Jacqueline Leckie,Angela McCarthy,Angela Wanhalla.2016-11-03 In contrast to much scholarship on cross-cultural encounters, which focuses primarily on contact between indigenous peoples and 'settlers' or 'sojourners', this book is concerned with migrant aspects of this phenomenon - whether migrant-migrant or migrant-host encounters - bringing together studies from a variety of perspectives on cross-cultural encounters, their past, and their resonances across the contemporary Asia-Pacific region. Organised thematically into sections focusing on 'imperial encounters' of the nineteenth and twentieth centuries, 'identities' in the twentieth and twenty-first centuries, and 'contemporary citizenship' and the ways in which this is complicated by mobility and cross-cultural encounters, the volume presents studies of New Zealand, Singapore, Australia, Vanuatu, Mauritius and China to highlight key themes of mobility, intimacies, ethnicity and 'race', heritage and diaspora, through rich evidence such as photographs, census data, the arts and interviews. Demonstrating the importance of multidisciplinary ways of looking at migrant cross-cultural encounters through blending historical and social science methodologies from a range of disciplinary backgrounds, *Migrant Cross-Cultural Encounters in Asia and the Pacific* will appeal to anthropologists, sociologists, cultural geographers and historians with interests in migration, mobility and cross-cultural encounters.
