**Reconnecting to The Source** Ervin Laszlo.2020-03-24

Renowned authority on science and philosophy Dr. Ervin Laszlo explores the implications of the new quantum sciences to move beyond the of limits of reality as we know it—and find our way again in our “in-formed,” purposively evolving universe.

Reconnecting to the Source is a powerful new book on the science of spiritual experience by Dr. Ervin Laszlo. A well-known figure in the fields of new science, consciousness, and spirituality, Dr. Laszlo has inspired some of today’s most important figures in science and philosophy. In Reconnecting to the Source he unpacks the science behind spiritual experience, investigating the ways in which we can access realms of experience beyond the everyday. It is in these moments, when our conscious minds are in contact or perhaps even overridden by our unconscious selves, that we can explore the depths of spiritual meaning. In addition to a foreword by Deepak Chopra, the book includes new, never before published contributions from a long list of well-known writers and public figures—including Jane Goodall, Barbara Marx Hubbard, Zhi-Gang Sha and many more. Each contributor has written about a unique spiritual experience of their own, sharing moments in their lives that are outside of the boundaries of the usual and reflecting on the importance of these moments. This revolutionary and powerful book will challenge you to reconsider the boundaries of our own experience and change how we look at the world around us. It is a unique, never before available resource for people who want to know how they can consciously align with the forces and “attractors” that governs the universe, and brought us, living, conscious people on the scene in the great processes of evolution that unfold here on Earth.

**Professor Maxwell's Duplicitous Demon** Brian

Clegg.2019-02-07 Asked to name a great physicist, most people would mention Newton or Einstein, Feynman or Hawking. But ask a physicist and there's no doubt that James Clerk Maxwell will be near the top of the list. Maxwell, an unassuming Victorian Scotsman, explained how we perceive colour. He uncovered the way gases behave. And, most significantly, he transformed the way physics was undertaken in his explanation of the interaction of electricity and magnetism, revealing the nature of light and laying the groundwork for everything from Einstein's special relativity to modern electronics. Along the way, he set up one of the most enduring challenges in physics, one that has taxed the best minds ever since. 'Maxwell's demon' is a tiny but thoroughly disruptive thought experiment that suggests the second law of thermodynamics, the law that governs the flow of time itself, can be broken. This is the story of a groundbreaking scientist, a great contributor to our understanding of the way the world works, and his duplicitous demon.

**September Moon** Candice Proctor.2020-11-16 Alternately poignant, uplifting, and laugh-out-loud funny, this is an enchanting tale of love, self-forgiveness, and the joyous discovery that it's never too late to become what you were meant to be. Stranded in Adelaide, South Australia, after the death of her former employer, Englishwoman Amanda Davenport is compelled by her rapidly dwindling resources to accept a position as governess on a sheep station in the wilds of the Australian outback. Frightened by the raw desolation she discovers there, Amanda is desperate to earn her passage home to England. Yet against her will, she finds herself irresistibly drawn to both the strange, haunting land and to the easy smile and rugged sensuality of the down-to-earth man who has made it his home. Struggling to bring up three irrepressible, motherless children on an isolated station plagued by all the hardships and dangers of the Flinders Ranges in the 1860s, Patrick O'Reilly thinks the last thing he needs in his life is a prim and proper English gentlewoman. But it isn't long before O'Reilly begins to suspect that Miss Davenport is not exactly what she seems . . . . Rich with the memorable characters and flawless sense of time and place for which Candice Proctor is acclaimed, SEPTEMBER MOON is a heartwarming story of resilience and passion set against the harshly beautiful and untamed landscape of the Australian outback. . . . a consummate storyteller. -Publishers Weekly . . . one of the best romance writers in the business today! -The Literary Times From the original 1999 Random House edition: In this, her third novel, the multitalented author of NIGHT IN EDEN returns to the glorious setting of nineteenth-century Australia, to the ancient, primal vistas of the outback, to a land as untamed as a man's soul . . . *Conjuring the Universe* Peter William Atkins. 2018 The marvellous complexity of the Universe emerges from several deep laws and a handful of fundamental constants that fix its shape, scale, and destiny. There is a deep structure to the world which at the same time is simple, elegant, and beautiful. Where did these laws and these constants come from? its laws and its constants. He explores the origin of the conservation of energy, of electromagnetism, of classical and quantum mechanics, and of thermodynamics, showing how all these laws spring from deep symmetries. The revolutionary result is a short but immensely rich weaving together of the fundamental ideas of physics. With his characteristic wit, erudition, and economy, Atkins sketches out how the laws of Nature can spring from very little. Or arguably from nothing at all.
