**Wild Textiles** Alice Fox.2022-09-01 A guide to harnessing the world of nature to create sustainable textile art. Textile artist Alice Fox shows how to work with found, foraged, gathered and grown materials to create fabulous textile pieces that are inspired by, and made from, nature. She encourages crafters to be open minded and experimental, using local (and sometimes) unconventional materials, working with the seasons and learning what materials are available at different times of year to ground artists in natural cycles and integrate creative activity with a strong sense of place and character. Alongside advice on growing your own plants (such as flax or nettles) for creative work, the book is packed with practical ideas for foraging - from weeds, dandelions and other plants useful for making cordage, or leaves that can be stitched, quilted and shaped into vessels, to grass, wool, plastics and mud that can be gathered and delightfully repurposed by the textile artist. Other ideas for found materials include stones, shells and wood that can be wrapped or woven into, as well as a multitude of urban treasures that find a new life in creative hands.

*The Spinning and Twisting of Long Vegetable Fibres (Flax, Hemp, Jute, Tow,& Ramie)* Herbert R. Carter.2015-07-21 Excerpt from *The Spinning and Twisting of Long Vegetable Fibres (Flax, Hemp, Jute, Tow,& Ramie)*: A Practical Manual of the Most Modern Methods as Applied to the Hackling, Carding, Preparing, Spinning, and Twisting, of the Long Vegetable Fibres of Commerce In undertaking this work, the author's aim is to provide a practical guide to the spinning of the long vegetable fibres. He hopes that he has succeeded in writing in such a way that the book will be useful, not only to the technical student, but also to practical men like himself. When it is borne in mind that the same general principles underlie the preparing and spinning of all the long vegetable fibres, and that it is merely in details that the processes differ somewhat by reason of the coarseness or special nature of the fibres, it will not be considered that the author has undertaken too much or that it is impossible to furnish in one volume a practical handbook describing the treatment of so many fibres. It is hoped that even experts will find something new and interesting in the perusal of these pages, which the author has tried to make as up-to-date as possible. She also covers finishing yarnsâ€cleaning, setting twist, and plying--as well as what dye processes are best for adding color. Finally, she includes a discussion of spinning for both knitting and weaving, covering fabric properties of each fiber, and what spinners need to take into account when using the yarn in a subsequent project.

**The Life Cycle of Russian Things** Matthew P. Romaniello, Alison K. Smith, Tricia Starks.2021-09-09 *The Life Cycle of Russian Things* re-orientes commodity studies using interdisciplinary and comparative methods to foreground unique Russian and Soviet materials as varied as apothecary wares, isinglass, limestone and tanks. It also transforms modernist and Western interpretations of the material by emphasizing the commonalities of the Russian experience. Expert contributors from across the United States, Canada, Britain, and Germany come together to situate Russian material culture studies at an interdisciplinary crossroads. Drawing upon theory from anthropology, history, and literary and museum studies, the volume presents a complex narrative, not only in terms of material consumption but also in terms of production and the secondary life of inheritance, preservation, or even destruction. In doing so, the book reconceptualises material culture as a lived experience of sensory interaction. *The Life Cycle of Russian Things* sheds new light on economic history and consumption studies by reflecting the diversity of Russia's experiences over the last 400 years.
