Philosophy in a Time of Terror Giovanna Borradori.2013-05-28 The idea for Philosophy in a Time of Terror was born hours after the attacks on 9/11 and was realized just weeks later when Giovanna Borradori sat down with Jürgen Habermas and Jacques Derrida in New York City, in separate interviews, to evaluate the significance of the most destructive terrorist act ever perpetrated. This book marks an unprecedented encounter between two of the most influential thinkers of our age as here, for the first time, Habermas and Derrida overcome their mutual antagonism and agree to appear side by side. As the two philosophers disassemble and reassemble what we think we know about terrorism, they break from the familiar social and political rhetoric increasingly polarized between good and evil. In this process, we watch two of the greatest intellects of the century at work.

Précis of the Lectures on Architecture Jean-Nicolas-Louis Durand.2000-01-01 Jean-Nicolas-Louis Durand (1760-1834) regarded the Précis of the Lectures on Architecture (1802-5) and its companion volume, the Graphic Portion (1821), as both a basic course for future civil engineers and a treatise. Focusing the practice of architecture on utilitarian and economic values, he assailed the rationale behind classical architectural training: beauty, proportionality, and symbolism. His formal systematization of plans, elevations, and sections transformed architectural design into a selective modular typology in which symmetry and simple geometrical forms prevailed. His emphasis on pragmatic values, to the exclusion of metaphysical concerns, represented architecture as a closed system that subjected its own formal language to logical processes. Now published in English for the first time, the Précis and the Graphic Portion are classics of architectural education.

Bourdieu and Literature John R. W. Speller.2011 Bourdieu and Literature is a wide-ranging, rigorous and accessible introduction to the relationship between Pierre Bourdieu's work and literary studies. It provides a comprehensive overview and critical assessment of his contributions to literary theory and his thinking about authors and literary works. One of the foremost French intellectuals of the post-war era, Bourdieu has become a standard point of reference in the fields of anthropology, linguistics, art history, cultural studies, politics, and sociology, but his longstanding interest in literature has often been overlooked. This study explores the impact of literature on Bourdieu's intellectual itinerary, and how his literary understanding intersected with his sociological theory and thinking about cultural policy. This is the first full-length study of Bourdieu's work on literature in English, and it provides an invaluable resource for students and scholars of literary studies, cultural theory and sociology.

Science and Empires P. Petitjean,Cathérine Jami,A.M. Moulin.2012-12-06 SCIENCE AND EMPIRES: FROM THE INTERNATIONAL COLLOQUIUM TO THE BOOK Patrick PETITJEAN, Catherine JAMI and Anne Marie MOULIN The International Colloquium Science and Empires - Historical Studies about Scientific Development and European Expansion is the product of an International Colloquium, Sciences and Empires - A Comparative History of Scientific Exchanges: European Expansion and Scientific Development in Asian, African, American and Oceanian Countries. Organized by the REHSEIS group (Research on Epistemology and History of Exact Sciences and Scientific Institutions) of CNRS (National Center for Scientific Research), the colloquium was held from 3 to 6 April 1990 in the UNESCO building in Paris. This colloquium was an idea of Professor Roshdi Rashed who initiated this field of studies in France some years ago, and proposed Sciences and Empires as one of the main research programmes for the The project to organize such a colloquium was a bit REHSEIS group. of a gamble. Its subject, reflected in the title Sciences and Empires, is not a currently-accepted sub-discipline of the history of science; rather, it refers to a set of questions which found autonomy only recently. The terminology was strongly debated by the participants and, as is frequently suggested in this book, awaits fuller clarification.

Psychiatric Power Michel Foucault.2008-06-24 In *Psychiatric Power*, the fourth volume in the collection of his groundbreaking lectures at the Collège de France, Michel Foucault addresses and expands upon the ideas in his seminal *Madness and Civilization*, sketching the genealogy of psychiatry and of its characteristic form of power/knowledge. *Madness and Civilization* undertook the archeology of the division according to which, in Western Society, the madman found himself separated from the sane. That book ends with the medicalization of madness at the beginning of the nineteenth century. *Psychiatric Power* continues this discourse up to the end of the nineteenth century, and the double depsychiatrization of madness, now dispersed between the neurologist and the psychoanalyst. Presented in a conversational tone, *Psychiatric Power* brings fresh access and light to the work of one of the past century's preeminent thinkers.

The Pasteurization of France Bruno Latour.1993-10-15 What can one man accomplish, even a great man and brilliant scientist? Although every town in France has a street named for Louis Pasteur, was he alone able to stop people from spitting, persuade them to dig drains, influence them to undergo vaccination? Pasteur's success depended upon a whole network of forces, including the public hygiene movement, the medical profession (both military physicians and private practitioners), and colonial interests. It is the operation of these forces, in combination with the talent of Pasteur, that Bruno Latour sets before us as a prime example of science in action. Latour argues that the triumph of the biologist and his methodology must be understood within the particular historical convergence of competing social forces and conflicting interests. Yet Pasteur was not the only scientist working on the relationships of microbes and disease. How was he able to galvanize the other forces to support his own research? Latour shows Pasteur's efforts to win over the French public—the farmers, industrialists, politicians, and much of the scientific establishment. Instead of reducing science to a given social environment, Latour tries to show the simultaneous building of a society and its scientific facts. The first section of the book, which retells the story of Pasteur, is a vivid description of an approach to science whose theoretical implications go far beyond a particular case study. In the second part of the book, "Irreductions," Latour sets out his notion of the dynamics of conflict and interaction, of the "relation of forces." Latour's method of analysis cuts across and through the boundaries of the established disciplines of sociology, history, and the philosophy of science, to reveal how it is possible not to make the distinction between reason and force. Instead of leading to sociological reductionism, this method leads to an unexpected irreductionism.

Stay with Me Nicole Fiorina.2023-08-03 Once upon a time, there lived a girl named Fallon, who was taken far away from home shortly after she was born.? A home that held more than strange traditions and bizarre superstitions.Twenty-four years later, she returned to Weeping Hollow, a haunting town she'd only heard about in stories during restless nights under a marble moon, to meet her last living relative.? They called her a freakshow--a ghost. They said I couldn't go near her.Still, there was this aching pull to Fallon Grimaldi that I couldn't escape.A nostalgic pull as if we'd been here before.Once upon a time, there lived a mysterious man named Julian with a curse as old as centuries wrapped around his soul.? He was one of the four Hollow Heathens, the very dark creatures who caused the town's people to live in fear.? And the Blackwell name was stained with darkness and death.They called him a monster. Cold and hollow. They said I shouldn't go near him.Still, there was this aching pull to Julian Blackwell that I couldn't escape.A nostalgic pull as if we'd been here before.

The Writing Public Elizabeth Andrews Bond.2021-03-15 Inspired by the reading and writing habits of citizens leading up to the French Revolution, *The Writing Public* is a compelling addition to the long-running debate about the link between the Enlightenment and the political struggle that followed. Elizabeth Andrews Bond scoured France's local newspapers spanning the two decades prior to the Revolution as well as its first three years, shining a light on the letters to the editor. A form of early social media, these letters constituted a lively and ongoing conversation among readers. Bond takes us beyond the glamorous salons of the intelligentsia into the everyday worlds of the craftsmen, clergy, farmers, and women who composed these letters. As a result, we get a fascinating glimpse into who participated in public discourse, what they most wanted to discuss, and how they shaped a climate of opinion. *The Writing Public* offers a novel examination of how French citizens used the information press to form norms of civic discourse and shape the experience of revolution. The result is a nuanced analysis of knowledge production during the Enlightenment. Thanks to generous funding from The Ohio State University Libraries and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access (OA) volumes, available on the Cornell University Press website and other Open Access repositories.
