*Lev's Violin* Helena Attlee. 2021-04-06 Instantly entranced by the captivating voice of a violin, the author of *The Land Where Lemons Grow* takes us on a journey through five centuries of Italian history and culture to discover the stories embodied in this sensual instrument. From the moment she hears this violin for the first time, Helena Attlee is captivated. She is told that it is no ordinary violin. It's known as Lev's Violin and it is an Italian instrument, named after its former Russian owner. Eager to discover all she can about its ancestry and the stories contained within its delicate wooden body, she sets out for Cremona, birthplace of the Italian violin. This is the beginning of a beguiling journey whose end she could never have anticipated. Making its way from dusty workshops, through Alpine forests, cool Venetian churches, glittering Florentine courts, and far-flung Russian flea markets, Lev's Violin takes us from the heart of Italy to its very furthest reaches. Its story of luthiers and scientists, princes and orphans, musicians, composers, travellers and raconteurs swells to a poignant meditation on the power of objects, stories and music to shape individual lives and to craft entire cultures.

**Plant Life of the Dolomites** Erika Pignatti, Sandro Pignatti. 2016-11-10 This volume offers distribution maps of over 2200 individual species living in the Dolomite area, presenting detailed records on the local range of every species growing in the area studied, from the Puster Valley to the Piave River. The data was collected on the basis of a multiple field observations carried out over several decades. After dividing the area into approx. 200

quadrants, a nearly complete census of the species present was obtained for each quadrant. The evaluation and synopsis of this extensive set of data, which is presented in the form of a chorological atlas in keeping with international standard methods, allows the area to be accurately compared with other parts of the Alps. In addition to the chorological atlas and floristic inventory, a list of synonyms and toponyms of the three languages used in the analyzed territory, an expanded list of updated scientific names, and some helpful remarks on various Dolomites species are included. Lastly, the book explores how species can be considered as landscape bioindicators. This third volume of the work *Plant Life of the Dolomites* complements the main volume *Vegetation Structure and Ecology* and the volume *Vegetation Tables*, which presents essential data at the plant association level.

**Walking in the Dolomites** Gillian Price. 2017-01-20 This guidebook describes 25 hut-to-hut treks in the Dolomites of northern Italy, covering 15 regions including Cortina, Sella, Sesto, Marmolada and Latemar. Ranging from 11.3km to 40.8km and from two to four days, the graded routes are suitable for walkers with a reasonable level of fitness and experience of mountain terrain, and some feature exposed sections which demand a good head for heights. This edition includes a number of treks in less frequently visited rugged districts, as well as the more popular trips, all of which take advantage of the region's network of mountain refuges and efficient public transport system, with the majority of routes accessible by public bus. Detailed route description is presented alongside mapping and stunning colour photography and the guide also suggests alternative access and exit routes, and options for linking routes to create a longer trek. There is plenty of advice to help make the most of a trip as well as background information on the region's geology, plants and wildlife and local cuisine. The Dolomites - a UNESCO World Heritage Site - are characterised by striking volcanic and sedimentary rock formations. Walking is an ideal way to discover this breathtaking landscape of angular peaks, towering pinnacles and jagged ridges, and the carefully chosen routes in this guide will exhilarate, challenge and inspire.

**The Bounded Field** Jaro Stacul.2018-01-15 Regionalism is one of the most debated issues in contemporary western Europe. Yet why the region, rather than the nation state, can have such a strong appeal for the construction of social and political identity remains largely unexplored. Drawing on data collected in the mountainous Trentino region of northern Italy, the author investigates how ideas about village boundaries and private property form the background against which regionalist ideologies are understood. In suggesting that ideas about regionalism largely reflect views about private property, he provides an alternative to theories of nationalism that overlook the articulation between official ideologies and discourses at the local level.

*APM - Archeologia Postmedievale, 17, 2013 - Montagne incise. Pietre incise. Archeologia delle risorse nella montagna mediterranea / Carved mountains. Engraved stones. Environmental resources archaeology in the Mediterranean mountains* Anna Maria Stagno.2014-12-11 Montagne incise. Pietre incise. Archeologia delle risorse nella montagna mediterranea, Atti del Convegno (Borzonasca, 20-22 ottobre 2011), a cura di Anna Maria Stagno Questo volume riprende una delle proposte fondanti dell'archeologia postmedievale italiana: l'archeologia delle risorse ambientali. A partire

da oggetti concreti - le montagne e le pietre incise appunto - e attraverso punti di vista eterogenei, i contributi offrono un'ampia rassegna di metodi e percorsi di ricerca, ampliando la discussione a una riflessione sui paesaggi culturali e sui problemi della loro patrimonializzazione. Il volume si caratterizza per il taglio fortemente diacronico (dalla preistoria al XXI secolo) e il confronto tra discipline e procedure di ricerca. L'approccio non è nuovo per la rivista e, in particolare, rimanda al numero 6 (L'approccio storico ambientale al patrimonio rurale delle aree protette) che già aveva proposto alla ricerca archeologica "convenzionale" i temi dell'archeologia ambientale e dell'ecologia storica. Il monografico raccoglie i risultati dell'International Workshop on Archaeology of European Mountain Landscapes (Borzonasca, GE, 20-22 ottobre 2011), promosso dal Laboratorio di Archeologia e Storia Ambientale dell'Università di Genova e finanziato dal Parco Naturale Regionale dell'Aveto.
