Buyology Martin Lindstrom. 2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In Buyology, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what

captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

**Financial Cryptography** Matt Blaze.2007-07-21 The Sixth International Financial Cryptography Conference was held during March 11-14, 2002, in Southampton, Bermuda. As is customary at FC, these proceedings represent final versions of the papers presented, revised to take into account comments and discussions from the conference. Submissions to the conference were strong, with 74 papers submitted and 19 accepted for presentation and publication. (Regrettably, three of the submitted papers had to be summarily rejected after it was discovered that they had been improperly submitted in parallel to other conferences.) The small program committee worked very hard under a tight schedule (working through Christmas day) to select the program. No program chair could ask for a better committee; my thanks to everyone for their hard work and dedication. In addition to the refereed papers, the program included a welcome from the Minister of Telecommunications and e-Commerce, Renee Webb, a keynote address by Nigel Hickson, and a panel on privacy tradeoffs chaired by Rebecca Wright (with panelists Ian Goldberg, Ron Rivest, and Graham Wood). The traditional Tuesday evening rump session was skillfully officiated by Markus Jakobsson. My job as program chair was made much, much easier by the excellent work of our general chair, Nicko van Someren, who performed the miracle of hiding from me any evidence of the innumerable logistical nightmares associated with conducting this conference. I have no idea how he did it, but it must have involved many sleepless nights.

Machining J. Paulo Davim.2008-07-11 Machining is one of the most important manufacturing processes. Parts manufactured by other processes often require further operations before the product is ready for application. "Machining: Fundamentals and Recent Advances" is divided into two parts. Part I explains the fundamentals of machining, with special emphasis on three important aspects: mechanics of machining, tools, and work-piece integrity. Part II is dedicated to recent advances in machining, including: machining of hard materials, machining of metal matrix composites, drilling polymeric matrix composites, ecological machining (minimal quantity of lubrication), high-speed machining (sculptured surfaces), grinding technology and new grinding wheels, micro- and nano-machining, non-traditional machining processes, and intelligent machining (computational methods and optimization). Advanced students, researchers and professionals interested or involved in modern manufacturing engineering will find the book a useful reference.

**Achtung-Panzer!** Heinz Guderian.1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian

Paul Harris.

**Sissy Dreams: From Boyfriend to Girlfriend** Paul Zante. Receiving a text from Sasha, my girlfriend, at work was always risky. Especially when she wanted to know if her girlfriend was horny. A short and sweet (and filthy) story.

Empire of Chaos: The Roving Eye Collection Pepe Escobar. 2021-01-23 From Syria and Iraq to Ukraine, from AfPak to Libya, from Iran to Russia, and from the Persian Gulf to China, foreign correspondent Pepe Escobar, author of The Roving Eye column for Asia Times/Hong Kong, crisscrosses what the Pentagon calls the arc of instability. As Escobar tells it in the introduction, the columns selected for this volume follow the period 2009-2014 - the Obama years so far. A continuum with previous volumes published by Nimble Books does apply. Globalistan, from 2007, was an extended reportage/warped travel book across the Bush years, where I argued the world was being

plunged into Liquid War - alluding to energy flows but also to the liquid modernity character of post-modern war. Red Zone Blues, also from 2007, was a vignette - an extended reportage centering on the Baghdad surge. And Obama does Globalistan, from 2009, examined how the hyperpower could embark on a change we can believe in. The outcome, as these columns arguably reflect, is Empire of Chaos - where a plutocracy progressively projects its own internal disintegration upon the whole world. You will find some key overlapping nations/themes/expressions/acronyms in these columns; Iran, Iraq, Syria, Afghanistan, Pakistan, Central Asia, China, Russia, Ukraine, Pipelineistan, BRICS, EU, NATO, GCC, the Global South, GWOT (the global war on terror), The New Great Game, Full Spectrum Dominance. You will also find a progressive drift towards not conventional war, but above all economic war - manifestations of Liquid War. Incrementally, I have been arguing that Washington's number one objective now is to prevent a full economic integration of Eurasia that would leave the U.S. as a non-hegemon, or worse still, an outsider. Thus the three-pronged strategy of pivoting to Asia (containment of China); Ukraine (containment of Russia); and beefing up NATO (subjugation of Europe, and NATO as Global Robocop). Book the ultimate trip to the Empire of Chaos, and see how the U.S. - and the West - are tackling the emergence of a multipolar world. Pepe Escobar is an independent geopolitical analyst. He writes for RT, Sputnik, TomDispatch, Strategic Culture Foundation, and is a frequent contributor to websites and radio and TV shows ranging from the US to East Asia. He is the former roving correspondent for Asia Times Online, where he also wrote the column The Roving Eye from 2000 to 2014. Born in Brazil, he's been a foreign correspondent since 1985, and has lived in London, Paris, Milan, Los Angeles, Washington, Bangkok and Hong Kong. He is the author of Globalistan (2007), Red Zone Blues (2007), Obama does Globalistan (2009) and Empire of Chaos (2014), all published by Nimble Books. Follow him on <https://>

The War We Never Fought Peter Hitchens.2012-12-06 Again and again British politicians, commentators and celebrities intone that 'The War on Drugs has failed'. They then say that this is an argument for abandoning all attempts to reduce drug use through the criminal law. Peter Hitchens shows that in Britain there has been no serious 'war on drugs' since 1971, when a Tory government adopted a Labour plan to implement the revolutionary Wootton report. This gave cannabis, the most widely used illegal substance, a special legal status as a supposedly 'soft' drug (in fact, Hitchens argues, it is at least as dangerous as heroin and cocaine because of the threat it poses to mental health). It began a progressive reduction of penalties for possession, and effectively disarmed the police. This process still continues, behind a screen of falsely 'tough' rhetoric from politicians. Far

from there being a 'war on drugs', there has been a covert surrender to drugs, concealed behind an official obeisance to international treaty obligations. To all intents and purposes, cannabis is legal in Britain, and other major drugs are not far behind. In *The War We Never Fought*, Hitchens uncovers the secret history of the government's true attitude, and the increasing recruitment of the police and courts to covert decriminalisation initiatives, and contrasts it with the rhetoric. Whatever and whoever is to blame for the undoubted mess of Britain's drug policy, it is not 'prohibition' or a 'war on drugs', for neither exists.

**Business and Society** Anne T. Lawrence, James Weber, James E. Post. 2004-04-01 Business and Society: Stakeholder Relations, Ethics and Public Policy by Lawrence/Weber/Post, has continued through several successive author teams to be the market-leader in its field. For over thirty years, Business and Society has been updated and reinvented in response to society's relationship to business. Business and Society, 11e highlights why government regulation is sometimes required as well as new models of business-community collaboration. Business and Society, 11e is a book with a point of view. Lawrence, Weber and Post believe that businesses have social (as well as economic) responsibilities to society; that business and government both have important roles to play in the modern economy; and that ethics and integrity are essential to personal fulfillment and to business success. The book is designed to be easily modularized; an instructor who wishes to focus on a particular portion of the material may select individual chapters or cases to be packaged in a Primis custom product.

*Tools of Transport Telematics* Jerzy Mikulski. 2016-01-12 This book constitutes the proceedings of the 15th International Conference on Transport Systems Telematics, TST 2015, held in Wrocław, Poland, in April 2015. The 35 revised full papers and two short papers included in this volume were

*Defects in Insulating Materials* G.E. Matthews,R.T. Williams.1997-01-14 This book constitutes a comprehensive international forum on defect-related phenomena in wide-gap materials, crystalline or otherwise. Materials as diverse as SiO<sub>2</sub>, group-III nitride compounds, diamond, alkali halides, refractory oxides, and polymers are covered, and the defects considered include intrinsic point imperfections, dislocations, accidental impurities, intentional dopants, imperfect surfaces, nanocrystals in host matrices, and bonding defects in glasses. Important unifying similarities of the phenomena are identified and investigative methods are presented which can be applied, almost across-the-board, to materials which share a wide transparency, deep traps, extensive stored energy in electron-hole pairs, and a low conduction-electron density.

Twelve Years a Slave Solomon Northup.2014-03-08 Now a major motion picture nominated for nine Academy Awards. Narrative of Solomon Northup, a Citizen of New-York, Kidnapped in Washington City in 1841, and Rescued in 1853. Twelve Years a Slave by Solomon Northup is a memoir of a black man who was born free in New York state but kidnapped, sold into slavery and kept in bondage for 12 years in Louisiana before the American Civil War. **Virtual and Remote Control Tower** Norbert Fürstenau.2016-05-13 The interdisciplinary research and development work carried out in the last ten years which is presented in this book aimed at replacing the conventional airport control tower by a new “remote tower operation” work environment (RTO) which should enhance work efficiency and safety and reduce costs. This revolutionary human–system interface allows for remote aerodrome traffic control without a physical

tower building and enables the establishment of remote airport traffic control centers (RTC) of which each may serve several airports from a central location.
